Source record: 26306

I worked a station on Cooper Island, way down under. I copied the station as VP2V/K9IM and the station gave the QSL manager as wp9nov, or at least that's what my notes say.

I looked up the manager in both online call books, no luck. I guess I could send it by the bureau and let them figure it out, but I wanted to send it direct since the QTH was pretty cool.

What might I do next? Is there a list of managers somewhere that I could use to see if I missed the callsign a bit?

For Sale: Icom 9000, Racal 1772 and Watkin Johnson 905A

I have the following units for sale. All working and no problems.

Both ICOM 9000 and Racal 1772 have full operation and service manuals.

For WJ. I just have photocopied operating manual.

1) ICOM 9000 is full coverage till 2 gig.
2) Racal 1772 is full coverage till 30 MHZ.
3) WJ: is 30-300 MHZ

Both Racal and WJ are from Department of Comm in Canada.

Prices are as follows:

Icom 9000 is for $3500 USD
Racal 1772 is for $1500 USD
WJ is for $500 USD.

Buyer will be responsible for shipping and any custom duties if you are living in the U.S.

I am based in Toronto Canada am a private individual and not a company.

thanks

mani

Chuck,

The easiest way to do what you want to do is to look in the MFJ catalog for the HamComm interface cable that will go from the receiver earphone jack directly into the PC serial port. There are a couple of components inside the hood of the DB-25 connector which enable the audio signal to be digitized and sent into the PC as a signal on the RS-232 control lines. This same interface may be built with about eight parts from your local radio shack. In order to use this, you'll have to get either "EZSSTV" or "JVFAX". These to programs will take input from the simple interface described above. I did the same thing that you are doing when I first started in SSTV, and it worked fine on the first try. Good luck!!

When I worked Archie on 40 mtrs. he indicated an address of PO Box
1150, but gave no town. In looking at my "Callbook", every address
with a PO Box is in "Andorra la Vella".

In any event, that is where I sent my QSL, and am hoping for the best.

Our San Diego Packet Cluster sez it is Rotuma.

The qsl lookup at URL:
http://www.systemtechnik.tu-ilmenau.de/ham/qsldb_gate.html
Sez
3D2AG/P VIA 3D2AG

Same URL for addresses sez

3D2AG
ANTOINE D.R. N'YEURT
P.O.BOX 14633
SUVA
FIJI ISL.

SB DX @ WW $OPDX.390
Ohio/Penn DX Bulletin No. 390

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 390
BID: $OPDX.390
January 4, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1XN & GOLIST, N1NG, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, AJ4Y, N4GN, NO4J, K6FCC, W7TSQ, K8YSE, K9MIF, KU9C, EP2FM, F5NOD, G3SWH, HB9CXZ, HB9HFN, JH1LPZ, LX1NO, OH2BH, OH2BVE, OK2AP, PA3BXM, PY2YP, VE8PW and YO2LDE for the following DX information.

3A, MONACO. "The 59(9) DXReport" states to look for Luc, I1YRL, to be active in January as 3A/I1YRL on all bands. QSL via homecall.

5A, LIBYA. 5A1IC has been very active over the past week, mainly on CW, 40-10 meters. Activity over the past weekend seemed to concentrate on 40/17/12/10 meters. In "The Daily DX" they report that the operators are a YL named Veronica/IK3ZAW and her boyfriend Martino/IK3RIY. QSL via IK3ZAW .

5Z, LAMU ISLAND. Jim/G3RTE, Phil/G3SWH, John/G3WGV and Rob/5Z4RL will activate Lamu Island on the northern Kenyan coast between February 17th and 24th. Lamu counts as AF-040 for IOTA purposes and has been activated only twice before. It also counts as 5Z for DXCC purposes, of course. The team will be active with two stations on CW, SSB and RTTY on all bands from 160-10 meters, with the exception of 30 meters, which is not permitted in Kenya. There is hope for a special callsign to be announced closer to their departure date. QSLs will be handled by G3SWH:
Phil Whitchurch, 21 Dickensons Grove, Congresbury, Bristol, BS49 5HQ, United Kingdom or via the RSGB bureau. Donations towards the cost of the expedition are invited and may be sent to G3SWH.

EA8, CANARY ISLAND. Good friend and member of NODXA, Fritz/DL7VRO and other German operators have been active from here. Activity seems to have started around Janaury 1st. Activity has been on all bands, 80-10 meters, CW/SSB with operations on the WARC bands. Their length of stay is unknown at this time. Look for DL7VRO, DL3DRN, DJ4EJ and DJ8HD to sign EA8/homecall.

EP, IRAN. The latest news on amateur radio activity in Iran comes from Mr.Abdollah Sadjadian, EP2FM, who is in Iran. He reports that the Iranian PTT Adminstration has set up a station EP3PTT at their offices. This station is operated by some old time EP2s. The station is also operated by applicants who have passed the amateur radio exam (about 26 at present), but under supervision of the oldtimers. Mr. Jamshid Mansuri (EP2CN) and Mr Massod Adle (EP2ES) have devoted one to two afternoons per week to keep the station on fairly regular. Activity has been mainly on 20 meters. Khalil Ladjevardi, K6FCC (ex-EP2KL), has setup a Web page for EP (Iran) and it is as follows: http://www.qsl.net/k6fcc/AmateurRadioInIran.htm He also mentions a new Web page address and the latest information about amateur radio activity in EP-land is in process of being posted at: http://www.vtt.fi/ket/staff/komppa/ep.htm

FT5ZH QSLS (Special Mailing Procedures!). Lyon Dx Gang Association have announced the following important procedures in mailing for FT5ZH QSL cards:
1. All cards sent by bureau will be QSLed via the bureau.
2. All cards sent with sufficient postage will be returned direct, provided that the following new procedures are followed:

a) In order to speed up the return process, the postage and the envelopes will be standardized. The envelopes will be provided by the European Council, so PLEASE DO NOT SEND A RETURN ENVELOPE.

b) Instead, please send a printed address label with your QSL card. If you do not supply a label, then make sure that your COMPLETE and CORRECT mailing address is on your QSL card. If not, put it on a piece of paper ATTACHED to your card. If you have absolutely no way to produce a printed label, then the Lyon DX Gang will write your address manually on the envelope which will take longer for them to process.

c) Very important! All direct QSLs MUST be sent to the club address given below. Cards sent by mistake to the pilot stations will be forwarded via the BUREAU only, so this will be a very slow process. Here is the address: Radio Club de la Gendarmerie F6KDF, 292 route de Genas, F-69677 BRON CEDEX, France

FT5ZH log is NOW AVAILABLE at the following Web site:
http://perso.easynet.fr/~f5nod/ft5zhlog.html
Also, OPDX InterNet Subscribers will receive the FT5ZH expedition results (statistics) as an additional bulletin.

FW, WALLIS & FUTUNA ISLANDS. Cedric, HB9HFN, will be active as FW5FN next February/March (February 23rd-March 8th). His activity will mainly be CW on 160-10 meters. He has put up a home page where you can find more information (geography, schedules, material, logs, QSL, flight plan) about his DXpedition at: http://www.qsl.net/hb9hfn/pacific99.html

JT1A POST-CONTEST REPORT. A press release written by Martti, OH2BN, and provided by Tim, N4GN, announced the winners of the lucky-draw for three bottles of Mongolian vodka. Those eligible had made 6 band contacts

with JT1A during the CQWW CW Contest. The winners are: JA3YKC, JJ1VRO and ON5NT. The JT1A was a joint Finnish Mongolian operation. QSL via SCSDXT, Jouko Hayrynen, OH1RX. OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

NEW PREFIX, VY0. Starting April 1, 1999, all VE8 stations within the new territory of NUNAVUT will change to the new VY0 prefix. Most of these stations (there are only 4 or so active) reside within CQ Zone 2. The new prefix will be permanently assigned to the territory of NUNAVUT, which comprises all of the Eastern Arctic. NUNAVUT (which means = Our Land = in Inuktituk) will be Canada's newest territory starting April 1st this year. The old VE8 prefix will be assigned to stations in the Western Arctic, Zone 1.

PACIFIC DXPEDITION. "The Daily DX" reports that two Hungarians, HA9RE and HA8IC, have announced that they are planning a DXpedition to several islands in the Pacific Ocean. Currently, plans are still being worked out, but they hope to activate West Kiribati (T30), East Kiribati (T32) and Banaba (T33) sometime between January and the middle of March. Operations will be on CW, SSB and RTTY with activity on all bands from 160-10 meters. More information/details is forthcoming soon.

QSL INFO AND NEWS.......
Bob, W7TSQ, reports that effective January 1, 1999, he will be QSL Manager for AH6PN/HR6. Also, Bob would like to remind all that the /HR6 is part of the callsign and all direct QSL requests will be answered directly. He states that he will not see the first log until mid February. Please remember to put a $0.33 stamp on the SASE. Cards without postage will be returned via bureau.

QSL Info Server Available Via The InterNet. To use the server, here are the simple instructions:
1) Send E-mail to qsl-info@datasync.com
2) Put the DX callsigns in the message body. Include only callsigns for best performance. Anything after the word "end" in the message body will not be looked up (useful if your E-mail signature contains a callsign).
3) Please don't use "reply" to send more callsigns to look up. Replies don't go to the robot server. Compose a new message instead.

Additions and corrections should go to the database maintainer:
Lothar, DL1SBF - packet radio address: DL1SBF @ DB0SDX.#BW.DEU.EU
E-mail: k9pes_ms@siiks.a1.bosch.de
Other comments, etc. to Ray, WQ5L rocker@datasync.com

Cesar, PY2YP, reports that he has received several ZZ2Z QSL requests and can not reply because he has run out of cards. He requests to please reapply to: Ron Lago (AC7DX), P.O. Box 25426, Eugene, OR 97402 U.S.A.

Many have been asking what the QSL route/address for XU7AAN is. There have been some reports that XU7AAN was operated by JH8CLU, but the QSL route is via JH8YZB at: Hokkaido-Contest-Club, P.O. Box 48, Tomakomai, 053-0000, JAPAN.

QSL Manager Luis, HB9CXZ, reports that he received the new QSLS for 4F3CV and HB5H just before Christmas (after a long-long wait). He states that he replied to all the QSL cards received direct and from the bureau (about 1500). He mentions also that he is waiting for QSLs from IK2GAO for the HB9RL and HB5RL operations. He feels that the cards should be received in a month.

John, K8YSE, reports that the QSL cards for FO0PAP and FO0MAC have not been printed yet. Please be patient and DO NOT RESEND CARDS.

QSL Manager change/update for BS7H, VK9XM, XZ1A and XZ1X. Steve, KU9C, announced this week that Kan, JA1BK, has asked him to pick up the QSL management chores for the following operations: BS7H 1995 operation, XZ1A 1995 operation, XZ1X 1995 operation, BS7H 1997 operation (Japan QSL requests only! All other requests via W4FRU.) and VK9XM. You can QSL any of the calls listed above via KU9C at this address:
Steve Wheatley KU9C, PO Box 5953, Parsippany, NJ 07054 USA
Any questions, feel free to contact Steve via:
E-mail - ku9c@ix.netcom.com
Phone - 973.829.1890
Fax - 973.644.5053

The VP8CRB DXpedition logs are on-line and can be found at:
http://no4j.com/nfdxa/logs/vp8crb.htm
Dave, NO4J, will be posting/updating the logs daily for the duration of Jan's (K4QD) stay. QSL info is also on this site.

Steve, CE3/NE4Z uses XR3Z during contests. All QSL requests for XR3Z should go to Steve via the CE bureau or direct to: Steve Sexton, Av. Larrain 7618, La Reina, Santiago, Chile

OH0AA cards should go to bureau or via OH0AA Call Book Address. OH2BVE is NOT the manager for OH0AA. OH0NC handles the cards in the OH0AA club station. The cards sent to OH2BVE will be returned to bureau system and forwarded to OH0AA.

Milan, OK2AP, reports the new OKDX Club Web page is now up and running. The Web page is designed especially for DXers with all kinds of info. The URL address is: http://www.okdxc.cz

T33, BANABA ISLAND. Just a quick reminder that Karl, DL1VU, is now active as T33VU. Some reports indicate that he will be active through January. Activity should be on all bands, but mainly on CW. Over the past weekend, he was heard on 10 and 17 meters CW.

T9 AND ZA (BOSNIA-HERZEGOVINA & ALBANIA) OPERATIONS. Daniel, YO2LDE, reports that he will make another trip to T9 and ZA to operate RTTY in February. Daniel hopes to stay in Albania for one week and in Bosnia-Herzegovina for two weeks. He also mentions that he is looking for

a little financial support for this operation from DXers. It would be greatly appreciated. QSL via YO2LDE, Daniel M. Vuescu, Zadei F3-1-7, RO-1700, Resita, Romania. Please don't send the QSLs cards via Bureau. He does have a QSL Manager for North American stations (USA, Canada, Mex., etc) which is KB5IPQ. Daniel also provides the following Web sites of interest for DXers:

The South-West DX Bulletin (weekly) with all news from around the World at: http://qsl.net/yo2lde/swdxnews.html

1998 and 1987 All QSL Managers listed in 1997 and 1998 at:
http://qsl.net/yo2lde/qsl97.html
http://qsl.net/yo2lde/qsl98.html

A list of all InterNet E-mail addresses and Home Pages of YO stations can be found at: http://qsl.net/yo2lde/adrese.html

TF7, ICELAND. Gulli/TF8GX, Manu/LX2LX and Norby/LX1NO will be active from Westman Island (EU-071) during the IOTA Contest 1999. Callsigns to be used are to be announced later. Activity before and after the contest, will be concentrated on the WARC bands and RTTY. For further inquiries, please send E-mail to: lx1no@bigfoot.com

VQ9, CHAGOS ISLAND (Update). Dale, W4QM, is now back on the air as VQ9QM as of December 29th. Dale had an interesting trip last week. As reported last week he was headed to the Persian Gulf on a ship only to be ordered back to VQ9-land (1000 miles out), and then they were ordered to return back to the Persian Gulf again. After heading back again, about 100 miles out, they were again ordered to return back to VQ9-land. (ed. Not much site seeing on this trip. More like a YO-YO ride.) Anyway, Dale has been very active on 10/12/20/30 meters CW at various times.

ZL9CI, CAMPBELL ISLAND DXPEDITION UPDATE. It has been reported that as of 0020z, January 1, 1999, the ship called "Braveheart" sailed with the ZL9CI team aboard. The team left from Wellington for a 7 day journey to Campbell Island. They feel it will take one day for setup, so start looking for them around the 9th. Don, N1DG, Pilot Station for ZL9CII, will keep us posted on the ZL9CI Web site: http://www.qsl.net/zl9ci
Here is a bit of news from the team: "Ron, ZL2TT, was scheduled to do the SSTV for us. As he is not making the trip and as we do not have the expertise to run SSTV, it will no longer be a featured mode on the expedition, sorry. All other plans stay intact including plans to upload logs daily to the Web page. Plan on at least a 24 hour delay to get the logs over Pacsat after operations commence. All logs will have a 24-36 hour delay in transmission."

From: algo@bellatlantic.net
Message-ID: <76p655$1kv$1@news-1.news.gte.net>
Source record: 26325

Further clarification. On further research, I find that PO Box 1150
is the Andorra QSL Bureau. So C33BO wants his cards sent to that
bureau. Probably could get there "via the buro".

The Andorra Bureau Address is
U R A
PO Box 1150
Andorra la Vella
Andorra

Chuck;
Check out http://www.ping.be/on4vt/ it's a good place to
start. If your PC has a sound card you can use that and some software like
W95SSTV and others. There is a DOS based program called EZ-SSTV that uses
your com port and a simple interface that is described in the EZ-SSTV
manual.
Good frequencies are 14.230 & 14.233 MHz, although there
SSTV frequencies in the band plans for most bands, there are even some 10
meter SSTV repeaters!
Have Fun!

Once you have bounced the signal off the ionosphere, the polarization is fairly random. The more bounces, the more random it becomes. That's why someone with a Butternut vertical can talk to somebody else with a Hygain horizontal over a great distance. Listened to an operator in Australia with a vertical tower talking to a fellow in Florida with a 3 element horizonal beam on 15 meters today, as a matter of fact.

Horizontals tend to be better in some areas because they tend to pick up less man made noise. In general (not always), man made noise tends to be vertical pol. Usually easier to put up a gain antenna in horizontal pol, also. (at least, at longer wavelengths) With a 3 meter half wavelength, in your case, this last bit may not apply.

Wow! looks like someone touched a nerve here..I have held a commercial maritime licence for 18 years now ..have had many contacts in my spare time shipboard,
scanning the bands qso'ed with 11 meter dx'ers illegal or otherwise,Most purchased equipment over the web,ham mags,hamfests,yes! hams selling to individuals knowing what they will use it for.looks like to me the fault rests on the almighty dollar! money talks..anybody can buy 10 meter gear,it's everywhere.
it's a problem thats not going to just evaporate,the fcc is not going to enforce this.
The sunspot cycle is back guys! The cb craze is back with it ..Im not a ham...Radio is just a job for me .besides i don't have the thousands to spend on rigs,amps and antenna farms .I can understand the rage when hams work hard to learn the code..and then fall into all the tech aspects involved with written exams.just to get that ticket ..and have bootlegers taking over the bands..It's up to the ham community to enforce this problem..the fcc has already stated this issue..
Someone in one of the replys hit the nail on the head..reallocate the band move the cw and fm around to where they cant stand to monitor these freqs without pulling there hair out ..Hey the maritime hf freqs are a lot worse ..I have been cussed out by 2 shrimpers just for asking for break..To call base for a grocery order..you guys are taking this to hard..... At least it is mostly on 10 meters..could be worse..
Steve Jepsen wrote in message <368E3373.213D7540@NoSpam.com>...
Best of luck with your exam, I look forward to welcoming you to the amateur
community.

If you are using FM modes use verticle since most if not all FM sataions are using verticle antennas. Use horizontal for SSB, CW and AM. You will find the majority using some type of horizontal antenna when transmitting SSB, CW or AM.

53. Working Asia

Newsgroup: rec.radio.amateur.dx

Need some advice on working Asia and Oceania. Does anyone
have some techniques for getting past the wall of JAs I
encounter each time I point my antenna anywhere in that
vicinity?

I enjoy working the Japanese operators, but there
is an endless supply of them and I find it very difficult to
raise anyone else in that part of the world. I don't want
to offend anyone by sending out something like "CQ NO JA", hi.
Nor do I think it would be very efficient to narrow my
call to callsign prefixes. I don't like ignoring 599 stations
calling me from Japan either.

Any suggestions or do I just need to continue to plow ahead
and take what I can for every 20 JAs I work?

vy 73,

Casey, KS7J

Hi Casey
I have found the Japanese operators to be among the most courteous
in the world. While working contests I have called QRZ or CQ Asia --
stations outside of Japan please -- and they ALL standby.

After working several Asian stations (if there) then call for JA's by
district -- then later ask them to standby so you can check for other
Asian stations.

They are such good operators that this has always worked for me. Give it
a try. Be sure to award their patience with working them as well.

I'm sure you have heard CQ North America -- stations outside of
stateside please.

Well .. you can try what some old-timer DXers taught me to
do in developing my DXing skills .... basically, it is
simply to listen, listen, and listen some more until you
hear the kind of DX stations that you want to talk to.

Although we have all probably received responses from fairly
rare DX stations to our CQs .... the most reliable way
to avoid calls from stations you don't want to work is
just ... don't call CQ.

This matter of listening versus calling CQ is one of the
key differences between excellent Contesters and excellent
DXers (IMHO). Although there are many fine Contester/DXers
around ... the contester KNOWS that the way to work increase
his score to is primarily to call CQ. By contrast, the
serious (non-Contester/DXer) DXer is much more like the
experience hunter. The hunter may go out two or three seasons
in a row and never fire a shot. The DXer may spend hours and
even days (or longer) just listening ...without ever keying
his transmitter. W7MB, now a Silent Key, who acquired
383 DXCC countries in the course of his DXing career was
one of the fellows who used to stress this concept of
listening and waiting .... much like the hunter. After
all ... we do "hunt" DX and new countries, don't we?

Good luck
73, Sandy W7BX/7J1ABV
slay@netcom.com

PS: and yes ... I know all about the "if nobody calls CQ, how
do you know the band is open" mantra that others may put forth. ;-)

Hi Casey. I have never had a problem calling "CQ no JA". Most JA's will respect your wish and not bother you. They understand that they are a big formidable wall and will step aside for that form of CW. No offense meant, No offense taken!

Go for it. You might just be the one to work the P5 (if one ever shows up)!

The administration who is actually responsible from the HAM service changed the law about the HAm services. Actually we can't asse to the HAM exam because question from the exam are not ready because they're not sure if the law will be cancelled or accepted if she's cancelled the old exam question will be used, if the law is OK they need to update the question with the new law. I think all will Ok soon as I read in french HAM news paper.

I think my mail is not clear & not easy to understand. I hope a french will explain this subject.

Looks like they are not pragmatic enough. They have changed laws
concerning ham radio elsewhere, too, but there haven't been such
problems. AFAIK, a new law is valid from a certain date (which is
to be stated), and before, business is done as one is used to
according to the old one, afterwards, according to the new one.
And if they haven't even agreed on the new law, why should it
affect anything at all?
In Germany, the new law concerning ham radio has been "put into
service" on 1 May 1998 (it was agreed on in autumn 1997). Before
1/V/98, all examinations were taken according to the old one, and
even after that date they still used the old catalogue of question
until a new one is ready ;-) But that's part of the "transition
rules".

The logging program I use, LOG-EQF, does that (I suspect most of them do). You set it up with your latitude and longitude, and when you enter a call it gives you the beam heading. They
have a web page: www.itis.net/eqf/ if you want to check them out. 73, Bill

63. Addressing Direct QSLs -- Call Sign or Not (or what?)

Newsgroup: rec.radio.amateur.dx
Date: 1999-01-06 00:00:00 UTC
From: Bob Sikes <rwsikes@mediaone.net>
Message-ID: <3693595F.44B170A3@mediaone.net>
Source record: 26350

Here's another naive question from this novice operator.

In a few DX contacts I made recently, direct addresses were given during the QSO, and of course the call sign and first name.

When I sat down to send out the SASE ("green stamped") and my QSL cards, it dawned on me that I didn't know the last name of the person. I started to just address it to the call sign when I remembered advice to NEVER put the call sign on the outside of the envelope to avoid pilfering of the letter.

Which leave me with only the first name and address to use.

How do you all address a direct QSL?

Bob Sikes
KB1DHC

E.P.S. I tried looking up the call sign online, but as with many DX stations, no luck.

Bob,
Usually the information the operator gives you will be sufficient to reach him. After all, how many junk mail letters do you receive addressed to OCCUPANT or CURRENT RESIDENT?

Be aware that some countries may not be readily recognized by the postal service. In that case you will have to mention the parent country. For example, CEUTA & MELLILA needs to be sent VIA SPAIN, or EASTER ISLAND VIA CHILE.

You are correct in NOT mentioning any reference to ham radio on the envelope. This is important, especially in third world countries where an IRC will put a meal on the table. Put your call on the return envelope so he will remember which QSL goes in which envelope (just in case he's got a stack of requests to reply to).

Always include 1 IRC unless otherwise noted. Contrary to popular belief, an IRC is good for one unit of return postage just about anywhere in the world. There may be one or two exceptions.

It has also been said that the IRC needs to be stamped on the left side to be valid. Not an absolute. A lot of times, IRC's are not even cashed in but recirculated by the operator or their QSL manager. I have personally sent out IRC's with no stamp and received cards in return. I purchase my IRC's from WB2RAJ and WB2YQH (editors of the 59(9) Report) for 75 cents apiece. Don't go to the post office to buy them (too pricey).
73,
Tom N2CU

BTW, These tips came from a seminar that RAJ and YQH put on for local clubs (WNY area).

Bob,

Tom has some good advice there. I would just add that you might consider using SASEs with stamps from country to which you are sending the QSL. There are at least a couple of outfits that supply these stamps (I use Bill Plum) and I have had excellent results with this method. I typically use the method for the first couple of QSLs to a new country, after which I use the buros. Sending green stamps is problematical even if you do try to disguise the contents.

Also, start bookmarking callsign servers on the web and you can double-check those addresses and get the last name to boot.

Good DX,

Casey, KS7J

Responding to my post in order to answer all the replies...

I like the listen vs. cq approach and that is not such a problem
as it once was on the higher bands when everyone just assumed the
band was closed. Not sure it's any more efficient though, since
I do get a call from other countries for about every 10 or 20 JAs
it seems, and I can always use the CW practice, hi!

Rod, I think I was not clear that I am a CW op, so I'm not sure
it's common to ask for all JAs to standby in that mode, at least
I've never heard it.

Thanks for the words of encouragement that sending "no JAs" may
be OK. I may give that a try.

Thanks to all who responded, great help as always.

It doesn't seem to matter much, Walt. When I was active as 9L1US, the VK and JA ops copied my 14w beacon and quarter wave vertical which was near sea level for many nights in a row on the long path. My operating location was some 400 feet higher with a five element M2 horizontal yagi.

Try www.dxer.org

Herb has links to various call servers as well as QSL info etc.

In cases where I only have a first name I'll typically put
"Mr. Jim" or "Sr Juan" or whatever. As prior posters said, common sense is the key here.
In many years of DXing I have a near 100% rate for direct QSLing. That's not to say I always got a card on the first attempt ! Sometimes it took two or three and even direct cards can involve a long wait - I just received EP2MKO QSL for a 5/97 QSO, card sent direct in May 97 and Jan 98. I believe that many of the "he doesn't QSL" etc etc comments one hears are caused by improper logging or busted calls or just plain wishful thinking.

Good Luck

No kidding! I just bought several from the post office for $1.05! I'll have to check into this. I assumed the U.S. post office was the price setter (in the U.S.)

Thanks
Bob

You won't offend anybody, if they've been on the radio for a week
they are used to being told to shutup.

And Rod, go to TZ6 for a month and then come back and tell us
how courteous they are.... Courteous is inversely proportional to
the rarity of the DX.... same thing applies in Japan.

Listening sounds like your best option to me. If you call CQ and
the band is open to Asia, you are gonna work Japan.... Besides,
how many rare Asian DX stations tune around listening for guys
on the west coast calling CQ ? VK0IR didn't, I'd bet.

You need a recpirocal operating permit from the Mexican authorities..

See:
http://www.arrl.org/field/regulations/io/recip-country.html
http://www.vtt.fi/ket/staff/komppa/xe.htm
http://www.vtt.fi/ket/staff/komppa/xea_eng.rtf

Only Canada allows US amateurs to operate without obtaining a
reciprocal permit.

SB DX ARL ARLD001
ARLD001 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, QRZ DX, 425DXnews, The Daily DX and Contest Corral from QST. Thanks to all.

NEPAL, 9N. 9N7AR is QRV using CW and SSB on 40, 15, 12 and 10 meters. His length of stay is unknown. QSL via JR8FEK.

QATAR, A7. Jabor, A71BY, is now QRV using SSTV. QSL via F5PYI.

EASTER ISLAND, CE0. JA7KXD is QRV as CE0/JA7KXD, using CW and SSB on 40 to 10 meters. His length of stay is unknown. QSL to home call.

KYRGYZSTAN, EX. EX2A and EX8F are both active on 160 meters starting around 2100z until 2300z. QSL direct. Igor, EX2U, is QRV using SSTV. QSL via IK2QPR.

MARQUESAS ISLANDS, FO. Pekka, OH1RY, and Jaakko, OH1MA, will be QRV as FO0KOL and FO0SIL, respectively, from January 7 to 13. QSL to home calls.

SAUDI ARABIA, HZ. HZ1AB has been QRV on 160 meters CW at 1500, 1700 and 0000z. QSL via K8PYD.

JORDAN, JY. Pete, N3FNE, is QRV as JY9NE, and can be found on 40 to 2 meters. He will be here until the year 2000. QSL to homecall.

MIDWAY ISLAND, KH4. Ted, NH4/NH6YK, has been QRV on 21295 khz around 2300z. He will be here until January 10. QSL to home call.

PERU, OA. Cesar, OA4QV, is active as OA464QV in January to celebrate the 464th anniversary of the founding of Lima. QSL to home call.

BANABA ISLAND, T33. Karl, DL1VU, is now active as T33VU, and may be here for the month of January. Activity should be on all bands, using mainly CW. QSL to home call.

BOSNIA AND HERZEGOVINA, T9. Edin, T97M, has digital communications capabilities, and will be active on RTTY, AMTOR and PACTOR. QSL via K2PF.

IVORY COAST, TU. Aldo, I2AOX, and March, IK2CHZ, will be QRV from the QTH of TU5IJ from January 12 to 25. Activity on all bands, using CW and SSB, is expected. QSL to I2AOX.

AUCKLAND AND CAMPBELL ISLANDS, ZL9. The ZL9CI operation is in full swing. They are now active on all bands. QSL via ZL2HU.

THIS WEEKEND ON THE RADIO. Contesters will certainly be busy this weekend. The Japan International DX CW Contest, Meet The Novices and Technicians Day, Hunting Lions in the Air Contest, QRP ARCI Winter Fireside SSB Sprint and the North American CW QSO Party are scheduled. Please see January QST, page 84 for details.

I would assume that, just as in the USA, if you have a complete address the name is optional, in fact even here the Post Office cares not for the name, they just deliver to the address. It is up to the occupants to figure out who owns it. That is why you get mail that isn't yours if someone puts your address on accidently. If you have a complete address I would just put the first name on and send it out..... 73

Hi.

If the new law was OK it's will be same but I think they forget too add some info and made some mistake why actually we have a problem.

86. Final Propagation Forecast

Newsgroup: rec.radio.amateur.dx
Date: 1999-01-08 00:00:00 UTC
From: ids@mail.nol.net
Message-ID: <36966d86.3180452@news.nol.net>
Source record: 26373

PROPAGATION - by AD5Q HOUSTON, TEXAS -- JANUARY 1999

The solar flux peaked above 180 for the first time in the new cycle, but has dipped below 120 as I write my final monthly forecast. This series began in February 1988, and this article completes the collection with exactly 11 years of seasonal documentation. It has been a good run, and I have learned a lot in the process of writing the forecasts. I feel fortunate in that none have written to point out errors in the predictions. I know of none, though I am fully aware that my reporting on WARC bands and low bands has been superficial and inadequate - reflecting the deficiencies of my own station. Perhaps someone will pick up where I leave off - hopefully reflecting the DX perspective from a different continent or hemisphere.

An archive of the complete set of articles has always been available from my website, which will soon be reorganized so that articles from the last cycle can be selected by month and solar flux range for use in the current and future cycles. You will always be able to find an article from the last cycle that will forecast current seasonal trends in DX conditions. Other propagation gurus will continue to keep you posted on current conditions on the sun.

But -- the above paragraphs were off topic. It's January and nighttime covers the Arctic. Polar paths are difficult and certain parts of the world are hard to reach on all bands. The dip in solar flux to 120 is temporary, and we currently do not have good coverage into Europe in the morning on 10 Meters. A rebound in the flux would open a window to all of Europe, but paths to Russia will still be difficult from Texas because of the Arctic night. On 15 the openings are broader, and on 20 we get regular polar openings at sunrise and sunset. Polar openings on 20, however, are better at any other time of the year.

With a high solar flux, nightpath propagation returns to 20 beginning in February. This year, we can expect this improvement primarily during March - and hope for a flux above 175 in late February for the ARRL CW contest (and excellent running rates all night). 20 will be a nightpath band most of the year.

Currently, 40 is quiet and really excellent. European signals are loud all evening and well past midnight, with lots of activity. The quiet conditions will continue for another couple of months - longer at higher latitudes. Over the next several months, the most spectacular seasonal phenomenon will be the improvement in nightpath propagation on 15 Meters. This peaks in late spring, bringing Asian openings in the morning, Europe through the evening, and polar openings almost round the clock. We can expect these conditions this year.

On 10, there will be some improvement in the spring as daylight spreads over the Arctic. Later in the spring (when 15 opens round the clock), 10 will deteriorate as summer approaches. Spring DX on 10 is so-so, and is most spectacular in the fall. This fall, with a certainty of higher flux levels, 10 will be at its best.

For January, early evening band closings on 20 are a problem. Still, this is the best band for reaching remote parts of the world that are usually worked via the north pole. These windows are narrow, and the Antarctic long path is often the best alternative into southern Asia.

So here I conclude this final propagation post - a nutshell summary of the exiting year ahead. For greater detail, find the complete series of articles at http://www.nol.net/~ids/prop.html

I thank you all.

Just for information to all, it is 11 metersS (with an "s" on it), not 11 meter. I don't know who started this. It is plural, more than one meter, thus must end with the letter "s"

For example:

1 Meter

15 Meters

In 1991 I realized a dream as old as my novice ticket: a station with a big gun antenna! I've had a ball with it but now I'm ready to realize another dream: to retire to live in the mountains. My Boulder, Colorado QTH will soon be listed for sale with my favorite realtor. But first, I want to spread the word of this rare opportunity.

Obtaining the permit for a tower in Boulder County is about as difficult as making DXCC Honor Roll. But I have just such a tower: 87' of Rohn 55G and mast, HyGain HDR300 rotator and a 10-element Tennadyne Log-Periodic. The tower permit stays with the site. And, the site is something else.

This QTH sits on the high ground between Boulder and Boulder Reservoir with commanding views in all directions. But, the signal radiated from this site defies simple analysis-it is a big gun antenna on a big gun QTH!

The house will sell quickly when listed. It's a comfortable and spacious home, on a acre of pastoral splendor within minutes of downtown Boulder. Hardwood floors, HW heat, passive solar, two offices, heated shop, unfinished basement...

Until it's listed, as a concession to an early buyer, I will include the tower & antenna with the property. Asking price is TBD but will be in the $500K range. Qualified buyers are urged to contact me directly. Pass the word. 73,

Stan Huntting, KW7KW

Many European countries offer automatic reciprocrity very similar to the USA/Canada agreement. A handful of non-European countries are also signatories, and I know the ARRL and FCC are working on getting the USA into this deal. I don't currently know of any plans for Mexico to join as well, but I suspect they'd be looking at it.

Quoting the NY Times
"On new Windows keyboards sold in Europe, the right-hand "alt" key and the "e" key struck together will make the Euro symbol; in America, at least for now, users will have to depress the alt key and type 0128 on the numeric keyboard. And that's only if the computer's type fonts are recent-enough vintage - the last few months or so - to include the symbol."

What can I say, at least the NY Times had the key-code right.

Happy hunting,

Y'know,... I joined the RSGB a few years back, and RadComm is really an excellent magazine with fantastic technical content, but...

It took me about 6 months to learn the language... "PSU", "Accumulator", "Earthing", "Car Boot Sale", "PME", none of it made sense until I accumulated a few months of context... Even now, I'm afraid British editors would fail a spelling test in America.. (and vice-versa..)

2U0, GUERNSEY. The "DX News Sheet" reports that Colin, 2U0ARE, (a novice operator) is often active between 1430-1600z on 10130-10135 kHz.

9M6, EAST MALAYSIA. Ed, K8EP, informs OPDX that he will be active from 9M6AAC station at the Hillview Gardens Resort from January 29th through February 1st. Operations will be on CW and SSB, with some activity in the 160M CQ Contest. QSL via N2OO.

ATTENTION PREFIX HUNTERS. Look for the station OA464QV to be active to commemorate the 464th anniversary of Lima, Peru. Operator Cesar, OA4QV, will be active until January 31st. QSL via OA3QV.

C6, BAHAMAS. Don, KN4UG, will operate from Great Abaco Island (IOTA NA-080) as KN4UG/C6A now until January 19th. He will also be active in the SSB portion of the NA QSO Party January 17-18th. QSL via the Bureau or direct to: Don Namm, 103 Birkhaven Drive, Cary, North Carolina 27511. Check out Don's Web site at: http://www.qsl.net/kn4ug

C6, BAHAMAS. John/K3TEJ and Edward/WA3WSJ will be here from February 16-23rd. Their activity will be on 160-10 meters, including the WARC bands. They will also be in the ARRL CW DX Contest using the callsign C6AKW. QSL via K3TEJ.

FT5W, CROZET ISLAND. Gilles/F5AGL is now signing FT5WH and has been reported active mainly on 20 meters (14180 kHz) around 1915z. Reports indicate that he can be active on 40/20/15/10 meters for the moment, but he doesn't have an amplifier at the present. QSL via F6KDF: Radio Club de la Gendarmerie, 292 route de Genas, 69677 Bron Cedex, France. SPECIAL

NOTE: Please don't send QSLs for FT5ZH and FT5WH in the same envelope. You must send 2 different mailings (one for each station).

FK8, NEW CALEDONIA. The "LNDX" reports that Philippe, ex-TU2FH, has received the callsign FK8VHU. He will stay there until August, 1999. He was heard this past week around 0000z on 10 meters (around 28500 kHz).

FT5Z, AMSTERDAM. The "DX News Sheet" reports that Michael, FT5ZJ, is now active and was heard on 14122 kHz between 1700-1800z. Hopefully someone can ask him to move up the band. He will be stationed on the island for a year with the army. QSL via F2YT.

FY, FRENCH GUYANA. The French DX bulletin "Les Nouvelles DX" (LNDX) reports that Christian, F6BEN, has received the callsign FY5DG and is active on 20 and 40 meters. The length of his stay is unknown.

HD1DX MOJANDA DXPEDITION. Look for several Ecuadorians to operate from Laguna Mojanda Grande beginning on Saturday, January 30th at 1500z. This operation will last until 1500z, Sunday, January 31st. Activity is expected to be on 40/20/17/15/10 meters. The following information received was a little confusing: "Laguna Mojanda Grande is located within the crater of Mojanda Volcano, located in spurs of Volcano Fuya-Fuya to 3,800 meters on the level of the sea." QSL via HC6DC, Rodrigo Camacho.

IOTA NEWS.......
The "LNDX" reports that Jean Marc, F5SGI, will be F5SGI/P from Noirmoutier Island (IOTA EU-064) from February 20-26th. He will be active mostly on CW.

RARE IOTA. Hillar, N6HR, reports that the Western Washington DX Club and the Island County ARC (WA) will be operating from the rare Tatoosh Island (NA-169) in the July, 1999 IOTA Contest. Tatoosh Island belongs to the Makah Indian Nation and is located off Cape Flaherty at the western tip of Olympic Peninsula (WA). For more info, contact N6HR at: hraamat@whidbey.net

NEW IOTA. Sam, CT1EEN, informs OPDX that he will be in Australia September/October 1999, using the special callsign VK6EEN. During his stay, he states that he will be one of a TEAM (consisting of 12 to 16 operators) for a DXpedition to Rowley Shoals (VK9-99, IOTA OC-New). There may be another possible island in VK6-Land activated.

AS-041. Look for Oki Island (Shimane-Ken) to be activate by Yuji/ JA3CMY, Fumio/JE4CIL and Takeshi/JI3DST between March 20th (0700z) through December 21st (2200z). Activity will be on 80/75/40/20/17/ 15/12/10 meters with operation on CW/SSB/SSTV. QSL via the following"
JA3CMY - Yuki Iwata, 3-13-3 Kaneda-Cho Moriguchi-City,
Osaka 570-0011 Japan
JE4CIL - Fumio Suzuki, P.O.Box 3 Hamamura Ketaka-Cho,
Ketaka-Gun Tottori 689-0331 Japan
JI3DST - Takeshi Funaki, 2-18-26 Hannan-Cho Abeno-Ku,
Osaka-City Osaka 545-0021 Japan

E-Mail - MXK00027@nifty.ne.jp

J47, GREECE (Special Event). George, SV7DMU, informs OPDX that the "Radio DX Group of Thrace" (in SV7-land) will activate the special event station J47XCF from the February 8-21th. The station is active to commemorate the "Carnival Festival of City Xanthi" in North East Greece. For more details, check the home page of "Radio DX Group of Thrace" at: http://members.xoom.com/georgexanthi/dxgroup.htm

J7, DOMINICA. Members of the "Foundation for Amateur International Radio Services" (FAIRS) will be active again from here on February 12-22nd. Look for operartors Gay/KD4GMV (YL op) and her husband David/KK4WW; Kay/KF4EKH (YL op) and her husband Don/KE4UGF; Bill/W4WX and Larry/N4VA to sign as J79GMV, J79WW, J79EKH and J79UGF. Operations will be on CW/SSB and RTTY. Suggested frequencies are: 7180, 7240, 14190, 14240, 18130, 21350, 28380 and 50125 kHz. QSL via operator's instructions.

KG4, GUANTANAMAO BAY. Don, W4ZYT, will once again be active from here, February 16-23rd, as KG4ZK. Also, look for him to be active as KG4DZ in the upcoming ARRL CW Contest. QSL KG4ZK via home call and KG4DZ via W4SD.

PACIFIC TRIP. Simon, IV3NVN, reports to OPDX that from February 16-20th, he will be in Honolulu and probably active as KH6/IV3NVN. From February 21st to March 3rd, Simon will be active as KH4/IV3NVN from Midway Island. His activity will be on SSB and CW. His equipment includes the following: Yaesu FT-890, maybe a linear from Sommerkamp FL-2277B, a 5 element Log-periodic by TITANEX (for 10/12/15/17/20 meters), a home made vertical for 30/40/80 meters and maybe an inverted L for 160 meters. If Simon can find a 6 meters rig, he will also be active on this band. His QSL Manager will be Flavio IV3TMV, direct or via Bureau.

PY0S, ST.PETER & ST. PAUL ROCKS DXPEDITION CANCELLED. Karl, PS7KM (NDXG Coordinator), informed OPDX that the DXpedition to St Peter & St Paul Rocks (PY0S) scheduled for the first week of March was cancelled due to low budget. All donations received to cover expenses for the trip will be returned to sponsors as soon as possible. Karl and the "NATAL DX Group" would like to thank all, directly or indirectly, for their valuable help one more time.

QSL INFO AND NEWS....
QSL Manager Fritz, DL7VROI, who has just returned from his EA8 operation, reports that the QSL cards for the 8Q7IO and 8Q7IQ operation (October 19th-November 5th) should be received within the next week from the printers'. He does mention to us that he is the QSL Manager for the EA8 activity by him (DL7VRO) and only the following DL stations: DL1YFF, DL7AU, DL7IO, DL7UBA and DL7VRO.

It has been reported to OPDX that QSLs for Gyuri, HA5JI, no longer go to Bob, W9XY. Bob used to be the QSL Manager because Gyuri was strapped for time, but Gyuri is home more now so he asks that all QSLs be sent direct to HA5JI.

Bernie, W3UR (editor of "THE DAILY DX") reports that the A61AJ logs are now available on the InterNet at:
http://www.dailydx.com/a61aj_search.html
Bernie has printed the labels for all QSL card requests received before December 29th. He is in the process of attaching labels to the color photo QSL cards and will have all U.S. cards in the mail before the January 10th postal increase. Most of the U.S. cards will go in the mail Monday morning. He adds that the foreign mail will follow very quickly afterwards and Bureau cards are OK (However, he will only answer them in bulk once a year and that will be sometime in the summer). Also, A61AJ does have a Web page, which has some older pictures at: http://www.a61aj.com
For those who may be interested, Boris, T93Y, has posted pictures of the recent A61AJ CQWW CW DX Contest on his home page at:
http://www.qsl.net/t93y/a61aj/

The "Checkered Turtle" QSL cards for the October, 1998 J3A CQWW SSB Contest are now being sent out. The QSL Manager for that international team effort led by Harry/J37K and Gill/J39AL is Ron Hasselbrock, WA8LOW.

Alan, VK4AAR, reports to OPDX that he has been asked by Sara, VU3RSB, to take on his QSL management. AIan mentions that he guesses he will be able to handle earlier QSOs also. Please, QSL to VK4AAR DIRECT.

NEED A QSL MANAGER? Alan, VK4AAR, states he will be happy to take on the job. If you have an E-mail address, Alan can turn cards around very fast but the old fashioned method of mailing the log is OK too. If interested, contact Alan by E-mail or postal as per the following addresses:
VK4AAR's E-mail - almee@halenet.com.au
New Postal Address - Alan Roocroft, PO Box 421, Gatton 4343, Australia

Scott, VE7ARS, QSL Manager for the XM7P (RCMP 125 Ann Station) that was on Trutch Island (IOTA NA-181), states all the QSLs for this event have been sent out. Some cards went out blank to stations which was an error. Some operators were wondering what to do. Scot states that they have fixed the problem, and that they will re-issue all those blank cards. THERE is NO NEED FOR STATIONS TO SEND ANOTHER QSL OR MORE POSTAGE. Any station that QSLed direct will receive a card direct with the QSL info on it. Scot regrets the mix-up, but this stuff happens from time to time. Any station wishing to confirm QSL status for XM7P can send an E-mail messsage to: ve7ars@sfu.ve7cc.ampr.org

Bob Chambers, NC6J, reports that after ten years of handling the QSL Manager job for KC4AAA, he has decided to turn the job over to Larry, K1IED. Bob states Larry is more than capable and is in touch with the people at the South Pole on a daily basis. He will handle all prior and future QSL cards.

Jacky, F5OIU, has been informed that he is no longer the QSL Manager for MU0ASP or MJ0ASP. At this date Jacky has received only a few pages of the logs and no QSLs. Effective as of the 1st of January, please

QSL via the operator F5SHQ.

NEW BELGIUM BUREAU ADDRESS. Peter, ON6KZ, reports that QSL cards for ON stations should now be sent via the new address: Federation Radio Amateurs - Belgium, P.O.Box 1630, B-1000 Brussels 1, Belgium.

JUST ANOTHER REMINDER. Coly, 3W5FM (aka UA0FM), has a new address for direct QSLs: P.O. Box 37, Vladimir, 600000, Russia.

SAN ANDRES 1999 DXPEDITION. The Woodbridge Wireless (WWI) from Woodbridge, Virginia is pleased to announce its 4th DXpedition. This DXpedition will be to San Andres Island (HK0, NA 033) and will coincide with the 1999 ARRL DX Phone Contest. Their callsign is yet to be assigned (it may turn out to be HK0/W4DC). They plan to operate from March 2-9th, including the contest, when two transmitters will be on the air. Operations before and after the contest will emphasize RTTY, CW, and WARC bands. All contest QSOs will be confirmed automatically with a photo QSL via the bureau. You can send an SASE to W4DC if you need one quicker, or for QSOs outside the contest. The TEAM SAN ANDRES members are W4DC, K5OF, AA3KX, WB4ZNH, WN4FVU (if you need a YL contact), N2PP, and WZ8P. Check out their Home Page for the latest news and log checking at:
http://www.pwcweb.com/wwi/DXpedition
Questions and comments before and after the Dxpedition should be directed to Denis, W4DC (catalanode@navsea.navy.mil). During the operation, please contact Mike, KA4RRU (ka4rru@erols.com).

SILENT KEY. OPDX was informed that Philip Dawkins became a Silent Key on December 30th. His callsign was C6ACN. OPDX sends our deepest sympathy to the family.

T2, TUVALU. Mar/DL3DXX, Falk/DK7YY, Manfred/DK1BT, Tom/DL2OAP and Uli/DL8OBQ are now active as T20FW until January 14th. Please refer to OPDX.388 for more details. QSL via DK7YY.

V3, BELIZE. Art/NN7A and Mike/NG7S will be active January 31st through February 6th as V31JZ and V31RL. They will operate from Turneffe Island. Their activity will be mainly CW, but there will be some SSB. QSL via their home callsigns.

XJ1, CANADA. Look for Nova Scotia amateur radio stations to use the XJ1 prefix now until November 27th. This is to commemorate the 150th Anniversary of the Pony Express between Halifax and Victoria Beach.

ZD8, ASCENSION ISLAND. "The 59(9) DXReport" states that Jim/N6TJ and Glenn/K6NA will be active as ZD8Z and ZD8A, February 2-10th. QSL ZD8Z via VE3HO and ZD8A via K6NA.

ZL9, CAMPBELL ISLANDS. The ZL9CI team with ten operators and six stations is very active on the bands now. Just a little reminder that the operators have permit restrictions. They are limited to the hours of daylight only on the island, and the operators have to leave the island between 1030 and 1600z (weather permitting). QSL via ZL2HU. Operation should last until January 25th. On-line logs are available with updated information on this

operation at the Web site: http://www.qsl.net/zl9ci
OPDX InterNet Subscribers will receive all the latest press releases by

Hi,

Question. I'm getting ready to test for a tech + ticket. I'm interested mainly in CW DX'ing. I live in a single house on a corner lot with too many trees and power lines, phone line, and a cable TV cable.

I need to pick an antenna that fits into these limitations. A beam on the roof probably won't go over well with the wife at this point so I'm thinking about some kind of dipole or loaded dipole between a couple of trees. I do have an open spot for a vertical but the thing would have to be attached to the house. Again the wife might scream about guy wires at this point.

Any thoughts ?

Thanks, Don

109. MW DX antenna

Newsgroup: rec.radio.amateur.dx
Date: 1999-01-11 00:00:00 UTC
From: George Robertson <georger@rd.bbc.co.uk>
Message-ID: <Pine.SUN.3.91.990111151642.15733B-100000@sunf0>
Source record: 26249

Dear rec.radio.amateur.dx,

I live just South of London and I am looking to construct an antenna that will perform well for reception in the middle of the MW band (say 0.7 - 1MHz).

I live in a smallish 3-storey houes (tall and thin). The back yard is small but running a wire back-fence to roof would give about 12 metres I guess. The back of the house faces North-West and I am looking to pick up signals from the North.

The RX I will be using is a Trio R1000. It has 'spring terminals' on the back for antenna connection (280 - 300 Ohms ???).

So, what antenna arrangement should I use for DX? How should I match it to the RX? I have used a random wire but get fading and distortion on frequencies of interest - even at night (e.g. BBC Scot 810).

best wishes

george

If you're worried that "NO JA" may sound like your being somehow
"offensive", try using "QRX JA", or if you REALLY want to avoid a
possibility that you'd be considered "inconsiderate", there's always "QRX JA
PSE".

Of course, if you're anyplace that generates a decent size pile up, saying
"QRX JA" or "QRX NA" or even "QRX P5" will reduce the pileup all about the
same amount <g>

Yes. Take control of your life. Explain to your wife who the boss is....

If that doesn't work, get Bill Orr's wire antenna handbook, a roll of
wire, and some coax.

If that doesn't work, get a new wife.....

I disagree.

I'm glad to see that people are still involved in the fundamental aspects of radio construction. If you have a problem with this, then let's see your plans for building a non-"old, outdated" transmitter or receiver from scratch! Yes, it's fun to use highly sophisticated and powerful commercial gear for DXing, but isn't a QSO (DX or otherwise) much more meaningful if it was made using simple, home-made gear? I know for a fact that it feels pretty good....

Don,

There are some vertical antennas out there which may be ground-mounted and still perform rather well for DX. The Butternut HF6VX is among them. I have one of these in a limited-space environment, and it works well. The footprint is small, the tuning coils are near the bottom and it doesn't require any guying. It covers 80-40-30-20-15-10 as it comes, or you can get an add-on kit for 17m and 12m. The HF9VX includes these add-ons. You will have to run a number of buried or surface radials (size 24 wire is fine, can be insulated). The radial pattern in my installation is quite distorted, so I'm confident that it will work fine for you if you run about 12 - 16 25' radials in any way possible.

I started working with this antenna last September, and I've already worked over 120 DXCC countries and all 50 states. Just waiting for the QSL cards now... By the way, 75/80m bandwidth is only around 50 khz, but if you place it near the DX window (3,790 - 3,800 kHz) you can work very effective DX on that band too.

My rig is an old Yaesu FTDX-560 boatanchor with an FL-2000B linear amp. I do not use DSP or any other rx enhancement, and usually use 500 watts of output power on SSB.

Good luck with your new setup.

Curt Breneman

Consider a vertical antenna. This would be a simple antenna that won't stand out too much.

If you want to make your own, try an inverted "V" antenna. I built a folded dipole inverted "V" antenna for 40 meters. All I needed was coax feed line, a pole, 300 ohm TV antenna feed line, a 4:1 balum, and a friend's MFJ Antenna analyzer. (You can find the detailed information on how to build a folded dipole in the ARRL Handbook and in other books on antenns.) While my antenna is a single band antenna, one could make it multi band by putting multi-legs on the antenna. That is, one set of "legs" runs North/South for one band and the other set of "legs" (for the other band) runs East/West. You might be able to "squeeze in" 2 more bands going North-West/South-East and North-East/South-West. Expect some interaction between the legs as the get close to each other.

117. the thrill of a qso

Newsgroup: rec.radio.amateur.dx
Date: 1999-01-11 00:00:00 UTC
From: Paul Denby <pdenby@npiec.on.ca>
Message-ID: <77e2u0oou1@brain.npiec.on.ca>
Source record: 26257

When you loose the thrill of a QSO
With a W-one or two,
When the fact that you`re heard in some far
distant land
Just don`t mean a thing to you--

When sending a card is a burdomsome task
And a listeners card is taboo
It`s time you pulled switches and closed up
your shack
For there`s nothing in this game for you.

When you snub a beginner, when a "chirp"
is a crime
And a "QRS" plea you abhor,
You better get out of ham radio, friend
For there`s no more fun for you anymore.

I just love to be told, "You`re my first VE3",
If he only lives over the line;
The pleasure of working a chirpy DC
Is a thrill, boy, to me anytime.

I like to "pipe down", send slow to a kid;
Sure-- and tell him his keying is fine.
And when he comes out with that "Pse QSL"
Believe me, the pleasure`s all mine.

If you would enjoy this old radio game
Just pause and hark back o`er the years
When you hooked a "seven", you thought
you`d done fine
And to loose him just almost brought tears.

You`ve got to think back to your old lid days again
and remember that this is quite true,
You must do unto others in this Amateur World
As you`d have them do unto you.

Compliments of
W8RHZ (late)

TREES! You are lucky, with a few electric fence insulators tied at the corners, and
Sky blue insulated #12 wire it can be hard to see the antenna, I used that for years. I had to know where to look to find it and check on it's condition! I find #12 works for spans of 100 feet if you spring or wieght at least every other corner.

Right now I don't care who sees it, I have 230 feet of wire running in an irregular shape
HORIZONTAL LOOP between trees on my lot. A piece of Radio Shack TV flat line comes to the shack and hooks to my UNBALANCED tuner. The system need no ground except for safety, and works good. I use it for 160 to 10. Even though it is only 30 feet up and should be a real "cloud warmer" on lower bands, I have worked QRP on 30 to east coast and 40 to Detroit. On 100 watts I have worked over 500 miles on 160 with excellent reports.

Hi Stan,

My wife and I are also considering retiring in a mountain (or near-mountain) locale, as we are avid skiers. I'm curious as to where you are planning to move. I've never been to the Boulder area, but from what I've been told I thought it was in or very close to the mountains.

We are considering Utah, based on the proximity of so many great ski areas to a fairly major metro region. But we are also considering Summit County, CO and/or Taos, NM. Having been to both places, however, I'm concerned that Summit County is too touristy, and Taos is perhaps a bit too "rustic".

DXing is great, but at this point I think I'd rather ski!

Source record: 26275

Greetings,

I have a Dentron Clipperton-L which needs some work. With the HF bands heating up I thought a little extra kick for the FT-890 might be wise. However, while the ampifier was on loan the operating manual has been lost. Is there anyone out there who has a Clipperton -L and could make me a copy of the manual? I would be very grateful for such a favor. If this proposition should not generate any response is there any place where a replacement manual could be obtained?

A private e-mailing would be great on either of the above mentioned.

Thanks a meg in advance. 73 Frank, K0BLT@AMSAT.ORG

A dipole is a little stronger than an inverted "V" but is much more
directional.

I have an inverted "V" tied to the roof rafters inside the attic one story up
and have QSO's from Iceland to Australia, from Eastern Europe to Japan and
South America. The inverted "V" is more omnidirectional and strong enough in
output. So you can use wires inside or outside. You might also consider
using two dipoles at right angles to eachother to give maximum osutput from
each dipole and cover all directionality.

Paul, I lost your e-mail address so I hope this gets to you OK. Received your letter today concerning the VK0IR book and it went out via US Post Office International Priority Mail. I do not know what type of time frame they deliver in but hopefully you should have it in about 1 week or so.

Please let me know when it arrives.

To anyone else reading this, there are still 5 copies of the VK0IR Heard Island DXpedition book available. Price is $23US and included shipping.

Thanks again Paul

Steve

Sorry, ham radio is just a hobby. Marriage is a lifelong committment of
love and respect. As much as I love ham radio, if it came down to a
choice, I'd have to choose saving the marriage. Hopefully your wife
respects you enough to understand your need for aluminum. Mine does.

73,
Tom N2CU

142. FT847 general coverage TX

>endorsement for 12/17M contacts like there is for 10 40 and 80.
>
Actually, there are endorsements to 5B DXCC for 17 & 12, just not
30.

Under the current rules WARC band contacts count for mixed and
mode contacts + the above mentioned endorsements.

Soon, the ARRL will begin to offer individual band awards beyond
160, 80, 40, 10, + VHF bands. They will start with 20 meters
later this year with 17, 15, & 12 to follow at decent intervals.
(Guess they don't want the DXCC desk to be overwhelmed!)
The only band that will not have a separate award is 30. This
is because 30 is not available in all countries.

Good luck es 73,

Mark, W4GP

I was looking for any experiences you may have had with software to copy CW via the soundblaster or clone card. My wife wants to see what is coming in as I QSO. I have seen a number of programs that require you to build a com or lpt port adapter. Perhaps there is some software that uses the line or mic inputs that are common now.

Ideas welcome.

I agree. They're doing a superb job! Now if they can just convince the powers that be to let them operate from 1000utc to 1600utc then we guys in the NW may have a chance to work them on 40 and 80 during grayline......Of course now there's a geomagnetic storm taking care of business! Oh well...that's radio and politics. Keep up the good work ZL9CI. 73. K7JY.

I have to agree! I worked them on the first day of their operation on 20
CW with a dipole and 100 watts. Only took 3 or 4 calls to do it!

I've since worked them on 3 other bands, each time with no difficulty.
The ops are great and propagation to Midwest USA has been very good.

It helps keep the pileups manageable when as many as six stations are going at once. But the ops _are_ good, both phone and cw. This operation is the bizarro opposite of FT5ZH.

http://www.muenster.de/~welp/sb.htm

There is a rather lengthy list of software that will decode all sorts of things you feed your SB card, including CW. I have tried a couple of CW programs - most of them require quite a bit of on-the-fly tweaking, so that it interprets a dot as a dot and a dash as a dash. If you have a strong signal and a pretty consistent speed, you will get a usable (not perfect) translation. If you have a lot of fading, or an inconsistent speed, I think that you will end up frustrated with at least the programs I have tried.

I believe that there are commercial packages that do this as well, but they are pricey as I remember, and without trial packages.

HTH...

It can be anything the DX station wants, and usually depends on the listening conditions at his place. More often than not, you can hear the pileup if you tune up. If the station just says "up" and I can't hear anything else on the band, I'll start at 1 to 2 kc up and keep listening either for more instructions or others making contact with the DX between my calls, especially when the DX sends his 599.

Just give your spouse some perspective. Take a Sunday drive. Step 1. Show her a house of a guy who has a tractor collection in his front yard. Explain that because you are sensitive to her preferences, you have taken up a hobby with less visual impact, Ham radio. Step 2. Drive her past some ham's antenna farm that has multiple towers bristling with stacked HF Yagis or has a huge multiband Quad. Explain that it is a typical ham setup, that you would really like, but you are willing to scale back considerably from there. I believe your wish for a simple vertical will start to seem more acceptable. 73 and Good luck. Don

That's too much like work. Explain it to her like this:

A friend of mine invited me over for dinner one nite, and after dinner we
went to the shack and turned on the radio. His wife poked her head in
the door after a few minutes and said "You guys are nuts. You don't think
about anything but the damn radio. You never do anything else". So I
thought for a few seconds and said "You're right. Joe, turn off the radio,
lets go down to the topless bar and get a few beers". She has never
complained about the radio since......

Is it possibel to get general coverage TX without major surgery on the FT 920?

Are there any drawbacks?

Regards.

Mark

Funny, really, I'm QSL mangler for two of the guys on the team -
Trey N5KO and James 9V1YC - and have worked both of them on CW. I
had a short exchange of pleasantries with James on 17m but when I
checked the log later the QSO wasn't there... oh well, plenty of
time to do it again on that band. But I thought it was supposed
to help, having friends on expeditions!

Hi Mark. The major drawback is the 'pink tickets' you might get by
transmitting illegally.

Wanted, anyone who commutes / travels between UK and Germany
on something like a regular basis by car, van or lorry that can help with
transport / delivery of a couple of items of radio gear. I'm trying to save
the
buyer some money on shipping costs and risk of damage, there will of course
be a modest cash incentive. I don't have the address in Germany yet, were
still negotiating on the items. I'm in Somerset but could meet and pass on
the items and I'm sure the guy in Germany would travel to meet whoever
wherever.

Anybody GENUINELY interested in helping ?

SB DX @ WW $OPDX.392
Ohio/Penn DX Bulletin No. 392

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 392
BID: $OPDX.392
January 18, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1VV, K1XN & Golist, WB2RAJ/WB2YQH & The 59(9) DXReport, W4NF, AA5DX, WW5L, 9A4DU, DJ5AV & DX News Letter, DL3APO, F5OIU, F6AJA & Les Nouvelles DX, G3SXW, G4BUE & DX News Sheet, JT1CD, ON4ANT, ON4UN, ON5NT, PP8EB, RN9XA, VK1TX, VK4EJ, VU2BMS and YO2LDE for the following DX information.

3A, MONACO. YL operator Laura, 3A2MD, can usually be found active on SSB most days around 21230 kHz (+/- few) at 1400z. It has been reported that she does not like tailender. By the way, she does operate CW. Check around 21027 kHz at 1345z.

5H, TANZANIA. Dave (K8MN), 5H3US, has been active this past week on 40, 80 and 160 meters. Watch between the times 0300 and 430z. Also, ONLY QSL direct to his QSL Manager WA8JOC (no bureau or E-mail QSLs).

5Z, KENYA. The "DX News Sheet" reports to look for Graham, G0VNW, who is about to be active until October, possibly as 5Z4GC. Activity will be on SSB and on all bands. QSL via WB2YQH.

9A, CROATIA (IOTA Island). Ante/9A4DU, Nick/9A6DX and Zoran/9A4NC will activate the Croatian island Mljet (IOTA EU-016) in the Adriatic Sea Coast South Group for the first time. They will use their own callsigns/p. By the time you read this, their activity should have started and will last until January 25th. Activity will be CW/SSB mostly on the upper bands. QSL via bureau or direct to their home callsign.

9N7, NEPAL. The 59(9) DXReport states 9N7AR is active on 40/15/12/10 meters CW and SSB. His length of stay is not known. QSL via JR8FEK.

AX, AUSTRALIA. Bernie, VK4EJ, reports to OPDX that he will be using the "Special Callsign" AX4EJ to celebrate "AUSTRALIA DAY" on January 26th. The special prefix is only for 1 day. The QSL route is via his home callsign VK4EJ ("OK" in any callbook). Also, look for AX1TX to be active from 1300z for this one day celebration. A special QSL will be available.

QSL via K1WY.

C21, NAURU. A CW operation from the Republic of Nauru in the Central Pacific will take place from February 27th until March 7th. Bob, G3ZEM, will sign C21ZM and Roger, G3SXW, will sign C21SX. Priority will be given to Europe where C21 is most needed and to WARC bands. The operation will be with beams and linear amplifiers. Check frequencies ending in "3", listening up 1-3 KHz. Please QSL to home call.

EL, LIBERIA. Ghis, ON5NT, reports that Mark, ON4WW now signing EL2WW, returned to Monrovia last Sunday, Jaunary 10th. He will be very busy with his job and putting up new antennas. He now has a Yaesu FT900 and a linear (TNX to Bruce, KD6WW) with him. He will be putting up a K9AY loop for listening on the low bands, and he will be active on all HF bands CW and SSB. He plans to pay a lot of attention to 160 meters. He will also have SSTV capabilities (TNX to Danny, ON4VT). This past weekend he was very active on 40/30/20/17/12 meters. Mark will be home again on holidays sometime in March. Mark will be in Monrovia for several more months. QSL via ON5NT.

ET, ETHIOPIA. There has been plenty of activity from here this past week. Stations ET3AA, ET3BN and ET3VSC were heard on various bands (including the WARC bands). The best times to check are bewteen 1300 and 1530z.

H4, SOLOMON ISLANDS (and Temotu Islands). Siegfried, DK9FN, will be active from the Solomons as H44FN (January 24-27th) before he team ups with Bernhard, DL2GAC, at Temotu (Pigeon Island, OC-065). They will be active at Temotu Island from January 28th through February 10th. Look for CW activity to be done by DK9FN and SSB by DL2GAC. Their callsigns have not been announced yet. QSL DK9FN via HA8FW and DL2GAC via his home callsign.

HC8, GALAPAGOS ISLANDS. The "DX News Letter" reports that Paul, DL6FBK, is going to Ecuador on January 18 and hopes to become active from there. He wants to visit the shack of Henri, HC8KU, and plans to operate as HC8/DL6FBK/p on CW/SSB on 40/20/15/10m from February 4-9th.

HP, PANAMA (IOTAs to be activated). Joel, F5PAC, will be on holiday here but plans to fit in some radio time as HP?/F5PAC from February 5-25th. He will try to be active from Isla Grande (NA-202), Isla Colon (NA-088), Cebaco (NA-071) and maybe Iguana (NA-203). Remember, his holiday is first and radio after. QSL via bureau.

JT, MONGOLIA. Stateside, keep an eye on 40 and 80 meters for JT1BH during the following times: 2000-2300z on 3510 (+/- QRM) and 2300-0000z on 7010 (+/- QRM). QSL via JT1BH: S.Surenjav, P.O.Box 125, Ulaanbaatar-13, Mongolia.

NEW OFFICIAL ELECTED. The Lone Star DX Association have announced the following newly elected officers: Chief Director - Jerry Smith, W5TFV; Information Director - Tom Anderson, WW5L; Activities Director - Joel Rubenstein, N5JR; and Membership Director - Martin "Sandy" Sandberg, N5NBW.

OOOPPPSS A CORRECTION. Takeshi, JI3DST, informs OPDX that he made an error on his dates in his announcement to Oki Island (AS-041) last week. Operation will be from March 20-21st, not March 20th to December 21st. Please refer to OPDX.391 for the rest of the information.

PACIFIC TRIP TO AUSTRAL AND MARQUESAS. Wulf/DL1AWI and Mat/DL5XU are now active as FO0AWI and FO0XUU from Marquesas (Nuku Hiva OC-027) until January 30th. Also, look for them to be active from the Austral (Rurutu OC-050), February 02-10th. They have two FT-890s, PA and vertical antenna for extensive lowband activity in their baggage. Most of their activity will be on 160-10 meters CW. Also, they will try to be active on RTTY and SSTV at times. QSL to the homecalls.

QSL INFO AND NEWS.......
Jacky, F5OIU, informs OPDX that he will no longer be the QSL Manager for MU0ASP and MJ0ASP as of January 1, 1999, "due to the lack of seriousness of the operator to provided logs (since July, 1998) and QSLs". ALL QSLs already sent direct will be honored by a standard QSL card, but no more confirmations will be delivered pass this date. ALL FUTURE inquires should be addressed to the F5SHQ.

John, ON4UN, UBA QSL Manager and President of UBA, reports that the "NEW BELGIUM BUREAU ADDRESS" announced in last week's bulletin by Peter, ON6KZ, is for two small regional amateurs societies in Belgium, each having a few hundred members. The announced address is NOT the address of the "OFFICIAL BELGIAN QSL BUREAU!". The official QSL bureau for Belgium is run by the UBA (IARU society) and is the only one that can guarantee that the cards will reach their destination. Cards sent to the other bureau address may reach ONLY a few hundred of the nearly 4000 active amateurs in Belgium! Most of the cards sent to the FRA will end up in a garbage can... The address of the Belgian QSL-bureau is still: ON-QSL Bureau (UBA/IARU), P.O.Box 900, B9000 Ghent, Belgium. All IARU QSL bureaus are aware of this address.

Daniel, YO2LDE, states that he has changed his U.S. stateside QSL Manager. Tony, N1NJ, will be the QSL Manager and he will be able to QSL all contacts that took place after January 1, 1997. Tony's address is: Tony Naglieri, 22 Sherwin Street, Ware, MA 01082-1020, USA (E-mail is: n1nj@samnet.net). Contact before this date should be QSLed via YO2LDE's new home address: Daniel M. Vuescu, Zadei F3-1-7, RO-1700, Resita, Romania (or via E-mail to: yo2lde@qsl.net). Remember Daniel will be going to T9 and ZA during the period of February 15th - March 5th (see OPDX.390).

QSLs for UA9-UE9, RA9-RZ9 and R9 can be obtain by Eugene Bugrimov, RN9XA, in Syktyvkar, who runs the 9th regional incoming QSL Bureau of Russia. For fast reception of QSLs from this area use the address: c/o RN9XA, P.O.Box 1229, Syktyvkar 167001, Russia

HI3/ON4ANT QSLS. John, ON4ANT, reports that QSLs for the October, 1998, operation where received from the printer. Those who send a direct QSL can expect one in the mail in the weeks to follow. Bureau cards will go out in a few months when time is available. He also mentions QSLs

for their Club contest callsign OT9E can be requested via the bureau.

Norm, K6ZDL/5, reports that he has been receiving QSLs for the following closed stations: P29FV, P29MC, AND 5T5CW. He states that he no longer has the logs (nor retained them), and these stations have been closed for over 10 years.

QSL MANAGER CHANGE. Chuck, DU3NXE, announces that Joe, W3HNK, is now his QSL Manager.

QSL ROUTE CHANGE. Ray, WH6ASW/KH2, reports to OPDX that he has dropped VK4FW as his QSL Manager. The new route is to his home address on the island of Guam. The address is: Ray Fabre', 37 Turner Rd, Nimitz Hill, Asan, Guam, 96922 USA

SPECIAL EVENT. On January 18th, from 1200-2000z, the Marconi Radio Club will celebrate the 96th Anniversary of Marconi's First Two Way Radio Transmission between the United States and Europe by operating from the original 1903 Marconi Station site at South Wellfleet, MA (on Cape Cod). The Club will be operating two stations on the 20/17/15/12/10 meters on SSB and CW. They will use the callsign "W1AA/CC". The "CC" was the callsign that Marconi used during his historic transmission in 1903. This was before the existence of the FCC. DX stations QSL via Bureau and stateside stations send a SASE to W1AA via the CBA. Check out the Web page: http://personal.tmlp.com/k1vv/w1aa/
Or search for W1AA on the Web page: http://www.qrz.com/wrad/directory.cgi

SPECIAL EVENT. Look for the station LZ100PV to be active until December 31st, to celebrate the 100th anniversary of the Bulgarian composer Pancho Vladigerov. QSL via bureau.

SPECIAL EVENT. Special event station ZW7CC will be active next week, January 22-24th, from Fort Santa Caterina, by a group of Scouts from Paraiyba. Activity will be CW/SSB on all bands. QSL via PR7RT.

VP2V, BRITISH VIRGIN ISLAND. Look for Jack/W4NF, Bill/W4RM, Cliff/W4CE and Dave/W4DAV, who are going here for the ARRL Phone Contest in March. They will be running a Multi-2 operation from Tortola.

VQ9, CHAGOS ISLANDS. Ron, AA5DX, reports to OPDX he will be returning to Diego Garcia on January 24th. He states that he should be active by the end of this month with his old callsign VQ9DX. This tour will last 4 months, but he doesn't know at this time if the entire 4 months will be spent on VQ9. QSL via his home callsign, AA5DX. Ron won't be back in the states until the end of May, so cards will not start going out until June.

VU, INDIA. Norbert, DJ9RB, is active as VU2RBQ, from a location near the Southern tip of India and has been heard on 160m (1824 and 1830 kHz) at his local sunrise and sunset. Reportedly, he is running barefoot, but with a workable signal. Activity will last until January 23rd. QSL via the bureau to the homecall DJ9RB.

ZL9CI DXPEDITION. With about a week to go, this amazing operation continues and impressively continues to rack up big QSO counts. As always, OPDX InterNet Subscribers will receive all press releases by the team and Don, N1DG, as an additional bulletin.

ZX8, BRAZIL. Look for Eduardo/PP8EB, together with some friends, to be activate for the first time from the Amazon Jungle in the Amazon State of Northern Brazil, Anavilhanas Archipelago. This is the world's largest archipelago in a river. Activity will take place April 1-4th, using the callsigns ZX8DX (SSB) and ZX8CW (CW). Look for them on 80/40/20/15/10 meters. More details are forthcoming.

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to: kb8nw@barf80.nshore.org
- OR - Send a message via packet to KB8NW @ WA8BXN.OH.USA.NA
- OR - Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

Message-ID: <77tm97$m7s$5@node17.cwnet.frontiernet.net>
Source record: 26222

Hi.

Been preparing to upgrade the station with some computer control. Part of this is to control my Yaesu G-800-SDX rotor via my contest software. Yaesu wants $300 for the interface! That's almost as much as the rotor was when I purchased it.

So... anyone in hamland come up with or can guide me to a homebrew interface to control the Yaesu rotors? Sounds like a good project for the electronically able, unlike me.

Please respond directly (also to the group, if you want).

191. ******IC-Q7A AND IC-W32A PACKAGE DEAL******

Newsgroup: rec.radio.amateur.dx
Date: 1999-01-18 00:00:00 UTC
From: teenham@aol.com
Message-ID: <19990118012236.04279.00000060@ng39.aol.com>
Source record: 26231

- Hello there, I have two iCOM dual band HTs for sale as a combo. The iCOM W32A and the newly released iCOM Q7A mini-size HT. Both are superb HTs but I need the money so I am selling them. Information on them is below. I am asking $375 for both units including all the accessories (plus shipping). If you would like to take a look at the actual units that I have, I scanned a picture and can email it to you. (Below are links with pictures from iCOM.)
-
- iCOM W32A Dual Band HT/Scanner combo. Currently iCOM's top of the line full power HT. Dual VFOs with two simultaneous frequency readouts, independent S-meter for each, and of course dual frequency receive (without having to switch back and forth between two frequencies) Alphanumeric Tags (on both VFOs), PL Encode/Decode and SCAN (VERY handy!) , full DTMF Keypad, DTMF memories, and of course the CROSS-BAND REPEATER FUNCTION!! (which a lot of people find EXTREMELY useful), Battery voltage readout, Backlit LCD and Keypad (great for nighttime operation!!). Unit includes the ICOM BP-180 NiCAD battery pack 7.2 Volts 600mAh (very good condition, no memory effect). Also included is the rubber duck antenna, the optional DC power cord, and the optional RadioShack Speaker/Mic, ICOM BC-110A battery charger, and of coarse the manual. I'll also throw in the center loaded coil telescopic portable Radio Shack whip antenna which you can replace with the rubber duck when needed (for greater range) Wide 108-999 MHz receive (except 200-300 MHz and cellular - but you can still pick up cellular transmitions S9+ on image frequencies in the 960 MHz range, all of this has been programmed into memory. PLEASE BEAR IN MIND, IT IS ILLAGAL IN THE USA TO MONITOR THOSE FREQS.) Transmit is 140-150 MHz on the VHF side and 440-450 MHz (MARS/CAP done, but you can also enable 118-195 MHz TX on the VHF side and 420-510 MHz on UHF with another mod, info included, with a .JPG of the mod to make modification easier.) Plus DOS and WINDOWS programming software and schematic of the simple OPC-478 cable you can build for PC programming of the W32A. As an added bonus, the radio also has the manual programmed into the ROM of the unit, you simply hold down the GUIDE button and then press any key or go into any mode and you get a full explanation of that function scrolling across the bottom of the LCD screen (EXTREMELY handy when traveling!!!) Small size for a 5 watt unit, only 2 1/4(W) x 5 13/32(H) x 1 5/16(D) in. Serial number 03375. Everything in very good condition and operates very well. Take a look at a picture of it at
- < http://www.icomamerica.com/amateur/dualhand/#IC-W32A>

- iCOM Q7A Dual Band Transceiver/Scanner combo. This is iCOM's smallest HT, but it packs a lot of features into a small package! The amazingly wide 30 MHz through 1.3 GHz receive coverage can be EXTENDED EVEN FURTHER BY USING AN OPTIONAL $9 CABLE TO COVER .005 kHz - 1.9 GHz which includes LW, MW, SW, CB band, etc, (and the upper end will put you into some satellite frequencies as well.) The cable is not included, but it can be bought for as little as $9, you can build one with the included schematic (fairly simple), or you can use

one which is made for the Yaesu FT-50-51R, VX-1R or any iCOM HT. The software which does this is included (the software also lets you program the momories, set settings, etc, etc.) Included also is a schematic of this OPC-478 cable if you would like to build one yourself (fairly simple) - this is the same cable that works for the IC W32A. Transmit is 140-150 MHz and 440-450 (as you can see the MARS/CAP service band is enabled). Output power is 350 milliwatts (I was actually surprised at how many repeaters I was able to hit and hold with that amount of power!) Unit has 200 momories, AM, FM Narrow, and FM Wide modes, AN AMAZINGLY LOUD SPEAKER FOR THE SIZE OF THE RADIO!!! Also has Tone Encode/Decode and TONE SCAN!!! Backlit LCD Display, 2 priority channels, etc. etc. For more information directly from iCOM please see < http://www.icomamerica.com/amateur/dualhand/#IC-Q7A> and for a nice picture of it see < http://www.hamradiostore.com/web/gif/icq7fr.jpg> As you can see on those pages, this unit IS AMAZINGLY SMALL!! Radio comes with FA-S270C rubber duck antenna, belt clap, and hand strap. Unit serial number 01327. Made in Japan. THE UNIT IS IN MINT CONDITION AND ABSOLUTELY LIKE NEW! NO SCRATCHES OR FAULTS IN IT AT ALL!! I have the original box and the registration card which has not yet been filled out, so it's about as "mint" as they get.

If you are interested in these units (package deal only) then please email me and we'll work something out. No trades please. 48 states only. Money order only (too many problems with CODs) or check (two week clearance) Please email me with any offers. THANKS FOR READING.

194. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-01-18 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <77ulq1$scn@news.Hawaii.Edu>
Source record: 26234
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.digital.misc

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, WH6U, (jeffreyh@hawaii.edu), or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL

bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas.

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send email with the word "subscribe" on a line by itself to cq-contest-request@tgv.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to

dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's headers (before the first blank line). This will cause followups to your

article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.equipment,uk.radio.amateur

Hello All

I'm about to purchase a new radio and FT-920 and IC-746 both are good enough for my wallet, but has anyone done any comparison on these radios. I own IC821 so I really don't need the IC-746's two meter band. And the FT-920 is little cheaper, not much, but some 600 USD. I would like to know the low's and high's of these radios before buying one.

Reunion Isle in the Indian Ocean -- Good catch -- see my previous post
on Reunion Isle.

Also there are several prefix lists at url:
http://www.ac6v.com/pagev.html#PR

These will almost always give you the DXCC country for that unusual
prefix.

Also you might want to download WinHdg -- By WA6FHI -- It finds
heading, country, distance, zone info from callsign prefix. Nifty little
desktop aid for DXers -- see URL:
http://www.ac6v.com/page5.html#BEAR

203. Voice DX Spot w Easylog?

Newsgroup: rec.radio.amateur.dx
Date: 1999-01-18 00:00:00 UTC
From: Bill Bird <billbird@mo.net>
Message-ID: <3uMo2.251$m5.3029677@typhoon.stlnet.com>
Source record: 26243

I am enjoying the Easylog 4.5 Lite program but can't get the Voice Announcement feature working for DX Spots that come in from my local DX Packet Cluster. The DX Spot window comes up fine and I hear a "ding" coming from my Soundblaster card but I don't hear the callsign callout. I have loaded my own complete set of wav files with the files names of DX_A.WAV , DX_B.WAV , etc. I also added my own DX.WAV and SPACE.WAV files and they are all in the EL4\SOUND directory. My voice keyer feature works with the messages I have put in as wav files although the voice keyer "announce" feature where I type in a callsign doesn't work even though I have put in another set of wav files with the ENG_A.WAV , ENG_B.WAV , etc. naming convention in the EL4\SOUND directory.

Maybe these features I can't get to work are not available in the "lite" version but if they are I would appreciate help. Thanks and 73, Bill KG0YJ

217. EY8CQ 10m SSB pirate operation - January 18

Newsgroup: rec.radio.amateur.dx
Date: 1999-01-20 00:00:00 UTC
From: Richard Eckman <r.s.eckman@larc.nasa.gov>
Message-ID: <78597o$3ji$1@reznor.larc.nasa.gov>
Source record: 26111

For those who worked the station signing EY8CQ on 10m SSB on Monday morning (around 1330-1500 UT), 18 January, I have found out that this was a pirate operation. I was sceptical about the contact as the operator gave a QSL manager (an OK station) that was not listed in any callbook, the contacts were taking place well after sunset in Tajikistan when propagation on 10m would be difficult, and the operator seemed to have a French accent. A lot of folks in North America contacted this operation as it was spotted on the packetcluster many times during the morning.

I sent some e-mail directly to Alex, EY8CQ, asking about the QSL manager and received the following message:

```
-------------------------------
DEAR RICHARD,

I'M SORRY BUT I HAVE NOT ANY QSO ON 10 MTR 18 JAN 1999. IT WAS PIRATE OR YOU
ARE MISTAKE.
...
MY QSL MANAGER IS DJ1SKO:

SERGE KOVALEW
HAUPTSTR. 50
84513
TOGING GERMANY

SEE YOU ON THE BANDS.

73! ALEX EY8CQ

Hi Scott -- see URL:
http://www.arrl.org/qsl/qslout.html
For Countries Not Served By The ARRL Outgoing QSL Service.

For IARU QSL Bureaus Addresses -- see URL:
http://www.iaru.org/iaruqsl.html

From there it is a matter of checking all the QSL manager and DX address
lists including QRZ and BuckMasters at URL:
http://www.ac6v.com/page2.html

OR buying the "Flying Horse call Book" (RAC CD ROM) of which there is
not a free web listing for.

Or check your local packet cluster

Or subscribe to The Golist, Qsl Manager List
See URL:
http://ns1.qsl.net/golist/

This one has tons of QSL info.

221. JY1 has only weeks to live says NEWDAY

Newsgroup: rec.radio.amateur.dx
Date: 1999-01-21 00:00:00 UTC
From: straightkey@eudoramail.com
Message-ID: <786ga0$pt4$1@nnrp1.dejanews.com>
Source record: 26115
Cross-posted to: rec.radio.amateur.dx,rec,radio.amateur.misc

According to publishing sources, late Wednesday night, NEWSDAY killed an exclusive story that quoted "medical sources" saying King Hussein of Jordan has been informed he has only weeks to live!

NEWSDAY ordered the kill after it had already sent the exclusive to newspaper affiliates on the LOS ANGELES TIMES-WASHINGTON POST NEWS SERVICE, the DRUDGE REPORT has learned.

It was not known if the story found its way into print editions.

"We are violently pulling it back," said one publishing source involved in the debacle.

The story, filed by Timothy Phelps and initially cleared by NEWSDAY editors, reported that almost two weeks ago Hussein was told by his Mayo Clinic doctors that his body had rejected a transplant of his own bone marrow and that he had only weeks to live.

Hussein was at Mayo to receive treatment for non-Hodgkin's lymphoma, a type of cancer.

A NEWSDAY spokesman could not immediately be reached for comment.

There are plenty of sources on the Internet which I'm sure are
covered in other followups, but, direct QSLing is such a chore,
not to mention expensive. I use the WF5E QSL Service. For $1.00
per 5 QSLs, he'll get them to the correct manager and send the
responses to you via the bureau system. Not as fast as direct
or course, but the sheer simplicity is worth it IMHO.

http://www.qsl.net/wf5e/

[ObDisclaimer: I'm no more than a customer of said service]

Happy DXing,

When listening on around 5.5 Mhz usb at 16.30 ish in the UK
for about 2 hours daily a noise that sounds like invaders from
outer space starts up and moves across the band. No doubt
this is in part due to atmospherics but what is the noise, those
using that part of the spectrum have difficulty when the noise
comes up but where from. It can't be test signals so is it
jamming of some kind ? any thoughts ? it is very repetitive
and must be man made, sounds like something from Dr Who.

232. Voice DX Spot w Easylog

Newsgroup: rec.radio.amateur.dx
Date: 1999-01-21 00:00:00 UTC
From: Bill Bird <billbird@mo.net>
Message-ID: <8QRp2.591$m5.5689358@typhoon.stlnet.com>
Source record: 26126

I am enjoying the Easylog 4.5 Lite program but can't get the Voice Announcement feature working for DX Spots that come in from my local DX Packet Cluster. The DX Spot window comes up fine and I hear a "ding" coming from my Soundblaster card but I don't hear the callsign callout. I have loaded my own complete set of wav files with the files names of DX_A.WAV , DX_B.WAV , etc. I also added my own DX.WAV and SPACE.WAV files and they are all in the EL4\SOUND directory. My voice keyer feature works with the messages I have put in as wav files although the voice keyer "announce" feature where I type in a callsign doesn't work even though I have put in another set of wav files with the ENG_A.WAV , ENG_B.WAV , etc. naming convention in the EL4\SOUND directory.

Maybe these features I can't get to work are not available in the "lite" version but if they are I would appreciate help. Thanks and 73, Bill KG0YJ

mnemonic phone-tapping.

ABC...

On the other hand, a whole RNIS line is not indispensable to a digital central and its computer center to carry out digital phone-tapping . It is possible to listen to totally different phone traffick on the same commutator, from the very weak output of phones to very big outputs from the information transmitted on screens in ATM mode (asynchronous transfer mode). Voices and messages are stocked and can be analysed by computers which record or select from "key sentences" or phone routines.

We are still waiting to solve this problem which is minor today, but not after the year 2 000.

MNEMONIC MEANING
OBSPOSS: ADMITTED OBSERVATION
TEQUIP: TESTING EQUIPMENT
ALLSAT: VIA SATELLITES
BSYLN: BUSY LINE
DSZBW: BUSY LINES
FRPHNOAL: AUTHORIZATION TO PHONE FREELY
IDFL IDENTIFICATION : FAILED
IDFLCT IDENTIFICATION : FAILED / CARRY ON
IDFLRL IDENTIFICATION : FAILED / SET IT FREE
LSIFNADN SUBSCRIBERS' IDENTIFICATION : NO SET PHONE NB.

DX Summit gets most of its spots from packet clusters. However, you
can put a spot on directly over the world wide web. The direct spots
have the "@" symbol.

Hi

the manager for 1A0KM is IK0FVK.

For me, receive was OK (with self adress enveloppe and 1 dollar).

73's .

HB9ICC Sebastien

253. 14.1 Mhz beacons.

Is it only me that is driven mad by the interference,
packet I believe, that swamps any and all attempts to
hear beacons on this frequency. WHY ???

254. 5A1A return postage

Newsgroup: rec.radio.amateur.dx

What sort of return postage should I send 5A1A in Tripoli? Are IRC's good there? How many? I suspect green stamps are NOT a good idea. I worked them today and need the card for a new one.

Yes probably, and I don't know.

Tim

Ohio/Penn DX Bulletin No. 393

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 393
BID: $OPDX.393
January 25, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1VV, K1XN & Golist, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, W4SMG, W7TSQ, WB8BGY, W0YG, 5H3US/K8MN, 425 DX News, DJ5AV & DX News Letter, DL7VRO, F5NOD, G3SWH, G3VMW, G4BUE & DX News Sheet, JA6VQA, OZ6TL, RV1CC, SM7AED, SP2UKB, VA3DX and YO2LDE & South-West DX Bulletin for the following DX information.

4S7, SRI LANKA. Bob, ZL1RS, is currently in Sri Lanka for the next nine months. He hopes to be able to have his radio sent to him and obtain a license. Usually the licensing procedures in Sri Lanka can take up to three months. QSL direct only via ZL1RS.

5Z, LAMU ISLAND UPDATE. Jim/G3RTE, Phil/G3SWH, John/G3WGV and Rob/5Z4RL, who will activate Lamu Island on the northern Kenyan coast between February 17-24th, have announced that their callsign will be 5Z4LI, and their thanks go out to 5Z4NU and 5Z4RL of the ARSK for their assistance with this allocation. QSLs will be handled by G3SWH, Phil Whitchurch, 21 Dickensons Grove, Congresbury, Bristol, BS49 5HQ, United Kingdom or via the RSGB bureau. For more detail, please refer to OPDX.390.

6 METERS OPERATIONS PLANNED FROM 3B9. OPDX has learned that Ned Stearns, AA7A, avid VHF DXer/Contester from Arizona, has joined the major multi-national DXpedition group that is heading out to Rodrigues Island, 3B9. The plan is to be active on April 1st and be on the air for as much as 10 days. Ned is reportedly in charge of assembling the six meter station. He states, "That time of year and this part of the solar cycle looks promising for potential six meter propagation to EU and JA and possibly the U.S. over the long path." Ned will be bring a modest station with him which will include modest power (100 W), modest antennas (5 elements on 5 meter boom) and a 6 meter attended beacon. He is willing to work with DX enthusiasts in EU, JA and the US in order to plan his 6 meter operating schedules for this once-in-a-lifetime DXpedition. Ned can be reached via E-mail at: stearns@goodnet.com

8P, BARBADOS. Glenn, VA3DX, will be going to Barbados again from January 23rd-February 6th. He will use the callsign 8P9DX. His activity will be on RTTY/SSB/CW and all bands. Glenn states that he will be a serious entry in the CQWW 160 CW Contest. QSLs are via VE3ICR ("OK" in any callbook since 1984).

C5, THE GAMBIA. Steve, G3VMW, informs OPDX that he will be operational from Banjul as C56/G3VMW or possibly C56SW from March 4-18th. There will be activity on all bands 160-10 meters CW only and in the RSGB Commonwealth Contest March 13-14th. The C5 log with an Internet log search facility will be available immediately after the operation at: http://www.bramham.demon.co.uk
QSL via G3VMW: Steve Wilson, G3VMW, Bramham, Wetherby, West Yorks, U.K.

DXCC NEWS. The ARRL has announced that Wayne Mills, N7NG, will be the DXAC Chairman and that John Kanode, N4MM, will be the ARRL Board DXCC Liaison for 1999.

DU, PHILIPPINES. "The 59(9) DXReport" states that Andy, G4ZVJ, will be active sometime between now and February 24th as DU3/AH8F. Activity will be CW on all bands.

E3, ERITREA. The "425 DX News" reports that Joe/I2YDX and Bob/IK2WXZ are planning to activate some Eritrean islands between January 30th and February 7th. They will only be using 100 watts into a vertical antenna and will operate CW (40 kHz from band edge) and SSB on the usual IOTA frequencies. Their callsigns are to be issued upon their arrival. QSL via home callsigns.

FR/T, TROMELIN. Henri, FR5ZQ, will once again be active from here as FR5ZQ/T sometime between February 3rd and March 3rd. His activity will be limited due to his meteorological work on the island. Operation will be CW/SSB on 40, 20, 15 and 10 meters. His suggested possible schedule is: 0900-1300z 21010 kHz 1300-1400z 14272 kHz (a JA net)
1100-1200z 21190 to 21300 kHz 1600-1800z 28450-28505 kHz
1200-1400z 28450-28505 kHz 1600-1800z 14133-14200 kHz

QSL via Henri's home callsign: Henri Namtameco, Rampe de Saint-Francois, 5052 Tour de la Chaumiere, 97400 Saint-Denis, Reunion Island via France

KH0, MARIANA ISLAND. Look for Kazu, JA1RJU, to be active from here beginning in February as KH2K/KH0. Activity will be on CW, all bands including 160 meters. QSL via JA1RJU.

KH0, MARIANA ISLAND. The members of Oita DX Club (Kazu/JA6BTO, Kim/AF4LX, Take/JA6PBO and Aki/AF4KH) will be on the air from Saipan Island, Northern Marianas, between February 11-14th. Activity will be on 160-6 meters with operation on CW/SSB/SSTV. Their callsigns were not mentioned. QSL via JA6VQA via bureau or direct to JA6VQA: Akio Tagami, 6-kumi tomioka Oita 870-0947 Japan.

QSL INFO AND NEWS.....
Alex, RV1AC, informs OPDX that he finally has the printed QSLs for his IOTA activity from EU-066 (as RV1AC/1 and RU1AS/1 in June, 1996) and

EU-147, EU-162 (as RK1B/1 in July, 1997). All bureau and direct requests have already been answered, but if somebody still needs a QSL please send direct to Alex's home address at: Alex Pastchenko, P.O. Box 104, St.Petersburg, 192241 Russia (Please SASE).

OPDX received a message from Dave, 5H3US (K8MN), indicating that his QSL Manager Ken, WA8JOC, will respond to bureau cards! Dave states, "We've always done so. Bureau cards are not handled very expeditiously since the sender would certainly QSL direct if the card was very important to him." By the way, Ken, WA8JOC, has announced this week that he ONLY handles the QSL chores for 5H3US and no other 5H station.

8Q7IO, 8Q7IQ and 8Q7VK QSLs. Fritz, DL7VRO, reports that all USA inquiries for the 8Q7 stations, direct and E-mails, have been answered. However, QSL cards for 8Q7VK have not yet be answered since the logbook has not been received. If you have any questions, they can be answered via Fritz's E-mail address at: dl7vro@ibm.net

QSLs for 3D2TC should be QSLed to Craig Thompson, 50 Beach Road, Suva Point, Suva, Fiji Islands.

OPDX has been informed that Jackie Calvo, F2CW/ZL3CW is back in New Zealand. He has a huge laundry basket full of E31AA QSL requests, but is currently awaiting his E31AA cards from the printer. He hopes to have the cards in hand by the end of this month. He made 25000 QSOs, with a defective (improperly modified) TS-50, running only 10 watts! He is receiving about 20-30 E-mails a day, most asking for his post address, but some are already asking, "Where's my card?!" Have patience people - more E-mail and other queries just slow things down. NO SECOND REQUESTS NEEDED. QSL via ZL3CW.

Well-known QSL Manager Joe, W3HNK, wants it to be known that he is NOT the QSL Manager for JD1AMA.

The W1AA/CC 96th Anniversary operation from the 1903 Marconi Station site on Cape Cod was active for 6 hours making about 600 QSOs. QSL via W1AA.

The FT5WH Log is now available on the Web. They currently do not contain all contacts, but they will be added shortly. Check the Web site for contacts: http://perso.easynet.fr/~f5nod/ft5whlog.html
QSLs for FT5WH will be printed soon. They are waiting for some pictures of Crozet. The QSL manager is F6KDF: Radio club de la Gendarmerie, 292 route de Genas, 69677 BRON CEDEX, FRANCE

SN0, POLAND. Look for several station to be active using this special prefix in celebration of the 35th anniversary of the Amateur Radio Club SP2PMK in Torun. The following stations will be using the special prefix SN0 until the end of the month of January: SN0BBD (QSL via SP2BBD); SN0BMX (QSL via SP2BMX); SN0EFU (QSL via SP2EFU); SN0BNM (QSL via SQ2BNM); SN0SWT (QSL via SP2SWT); SN0UKB (QSL via SP2UKB); SN0PI (QSL via SP2PI) and SN0PMK (QSL via SP2PI).

SPECIAL EVENT - ARRL HQ STAFF TO SUPPORT SCHOOL CLUB ROUNDUP. The ARRL HQ staff will support this year's School Club Roundup (SCR) operating on HF from Hiram Percy Maxim Memorial Station W1AW. The SCR takes place February 8-13th. "Special emphasis will be put on contacting youth groups, especially school clubs," said ARRL Field and Educational Services Correspondent Dan Miller, K3UFG. Depending on propagation and the availability of volunteers, watch for W1AW between 1600 and 1700 UTC on the suggested SCR frequencies. Details for suggested exchanges and frequencies can be found in January's, 1999 QST, page 92, or at the Web site: http://www.arrl.org/contests/announcements/99/scr.html
Each day of the event, HQ staff volunteers will spend their lunch hours at W1AW making contact with as many youngsters as possible.

SPECIAL EVENT (Four countries will be involved with this one). An era in the History of the Communication will come to an end. The Global Maritime Distress Safety System (GMDSS) will be fully implemented on February 1st. This will cause the International listening watch on 500 kHz to cease. Operators from Greenland, Iceland, Faroe Island and Denmark will be active February 1-28th and in the Special Event Weekend April 10-11th. Look for the following stations to be active:

Greenland - OX3OXF from Qaqortoq Radio/OXF
OX3OXI from Nuuk Radio/OXI
OX3OYR from Aasiaat Radio/OYR

Iceland - TF3TFA from Reykjavik Radio/TFA

Faroe Island - OY3OXJ from Torshavn Radio/OXJ

Denmark - OZ1OXZ (opr OZ8AE) from Lyngby Radio/OXZ
OZ5OXZ (opr OZ5DL) from Lyngby RADIO/OXZ
OZ1OXB (opr OZ6TL ex-opr on Blaavand Radio/OXB)
from Lyngby Radio/OXZ
Stations will be active on the following suggested frequencies, plus/minus 5 kHz: 1830, 3535, 7025, 10125, 14035, 18075, 21035, 24905 and 28035 kHz. You can expect RTTY activity from OZ1OXB. There will be a special QSL card with a Historical background for the worked "Coastradiostation" for QSOs in February. All QSOs will be confirmed via the Bureau. Those who want a direct QSL card can obtain it via the operator worked. Awards are available and will be issued for Amateur Stations and SWL confirming QSOs with: 3 of the 4 countries (Category 3); for QSOs with all 4 countries (Category 2); and for QSO with all 8 Amateur Callsigns (Cagegory 1).

SPECIAL EVENT. The West Jackson County Amateur Radio Club will activate the special callsign N5D to celebrate the 300th anniversary of "D'Ibervill's landing in Ocean Springs, MS". Activity will be from 2200z, April 23rd to 2200z, April 25th. Suggested frquencies will are: 7255, 14255, 21355 and 28455 kHz. QSL to: West Jackson County ARC, P.O. Box 1822, Ocean Springs, MS 59564

T9 AND ZA OPERATION UPDATE. Daniel, YO2LDE, informs OPDX that his activity from Bosnia-Herzegovina and Albania may now be limited to 10 days of

operation (5 days in each country) than first reported (refer to OPDX.390). His operation may get cut due to funds. However, the NCDXF has sponsored some funds (200 USD) for his expedition, but Daniel states more funds are needed for a three week operation. For more details, check the Web page: http://www.qsl.net/yo2lde/dxpedition.html

VK4XN PIRATE ACTIVE. A pirate station signing VK4XN has been active on 80 meters and other bands. However, VK4XN is an active callsign. Eric, VK4XN, holder of the license, states that he is 92 years old and blind, and has NOT been on the radio for years. He does maintain his license, but he states he only listens. Eric states he gets QSL cards all the time from people around the world. He also states that someone has been using his callsign and has had this trouble for the last several years now. He has asked for help in putting the word out that ANYONE who works VK4XN, has worked a pirate station!!!! Eric says he writes to everyone who QSLs for help to put the word out.

VK9X & VK9Y, CHRISTMAS AND COCOS-KEELING ISLANDS. A final press release from Charlie, W0YG, states that the team will leave on February 1st to head towards these islands. Look for W0YG, W8UVZ and WB9Z to become active from Christmas Island as VK9XX from February 6-13th and from Cocos-Keeling from February 13-20th, as VK9YY. Their activity will be mainly on 160/80 meters CW, the WARC bands both CW and SSB, and RTTY on 15/20 meters. QSL via W0YG. Charlie states, "Please do not include VK9XX and VK9YY cards in the same envelope."

VP8CRB NOW QRT. Jan, K4QD (VP8CRB), is now QRT from the Falkland Islands. He states that he has made over 10,000 QSO (140 QSOs on 160 meters). Jan states that if anyone has a question about their 160 meter contact, they can contact him via E-mail at: k4qd@juno.com He also mentions that the logs are online at: http://no4j.com/nfdxa/logs/vp8crb.htm
His RTTY logs are also online at: http://no4j.com/nfdxa/logs/vp8tty.htm
Jan's possible next trip may be a return trip to South Georgia or some other location.

YV0, AVES ISLAND. The "DX News Sheet" reports that the Venezuela DX Club (YVDXC) and the Association de Radio aficionados de Venezuela (ARV) met on December 18th and agreed on a joint DXpedition in 2000.

ZL9CI DXPEDITION NOW QRT. According to Don, N1DG, the ZL9CI Campbell Island DXpedition went QRT at 2359z Janaury 24th. Congratulations to the ZL9CI team for setting a new DXpedition record of 95000+ QSOS (possibly more, maybe 100k).

IRC's are NOT valid in Libya. A greenstamp is okay. You should send it registered (the op should have mentioned that). It will add $4.85 to the cost but it is guaranteed to get into their hands.

Well, guaranteed is stretching it. I sent one to 5A1A registered and they were able to trace it as far as Paris, but I never heard from that one nor the one sent via the Spanish mail drop, nor the card sent via Cuba, or the one posted in Canada. You might try via OE6EEG. He seems to have respectable luck. Or you can send it registered and pray. It took me two years plus to get one via Mary Ann Crider (thank you Mary Ann).

You are right. Perhaps I should have said the odds are much better than
not registered. Off course nothing is certain in life except death and
taxes!

You might wait for the next DX contest (ARRL DX CW in February) when a
group of Germans may be operating from 5A2A and work them. The cost of a
QSL would be a regular airmail letter and 1 IRC. Worked for me.

Thinking of starting a radio net / club / contest ??? that uses surplus>military radio gear. Older gear would be (AM mode) welcome...BUT the newer stuff of the 60's thur current would be prefered like the>>> "AN/PRC-GRC-URC types"109,106,25,77,47,74,104,132,1009 etc with CW/SSB or FM modes. The idea would be to get out of the shack and into the>field and operate this gear kinda like it was intended, but for>fun/contest or??? Anyway you get the picture. Since most of this gear is portable/manpack design, battery operated and low RF power output maybe QRP frequencys already known to amateurs could be used?? Anyway just thinking outloud to see what the world wide web thinks... If this sounds like something to do on a weekend, once a month, once in awhile or never... drop me an E-mail and let's get going and have some fun on the bands with surplus radio gear. (THE GREEN STUFF QRP CLUB) Thanks, CAMERON / WA6VVC E-mail AT > cogan@ladwp.com <
PS: Past this on to help get the word out.

It also annoys me, it is caused by inexperienced and selfish RACKET
RADIO op's who have never read the band plans.
They also spread well down into the cw allocation.
RACKET RADIO should be barred from use on HF,it serves no useful
purpose other than generating RF pollution.

The dutch government (RDR) decided to increase the amateur bands in Holland.
A new amateurband 60 cm (480-498 MHz) will be available in february of 1999.
All modes are available but the most used mode will be wideband FM with good
quality modulation. You will find more information about this new amateurband
at:

http://members.xoom.com/pirate60

Hope to hear you soon,
PA0KLS

Hi Simon

Dont give up yet.

I've heard all of them at one time or another. You need to switch to a narrower bandwidth 1khz or less. 500hz would be better. I have an NRD525 + 62m attic wire + mlb which is well up to the job. It does take a good rx antenna and narrow bandwidth though.

Try at sunrise and sunset. The beacons are 100watts only maximum and come in best when conditions are good to excellent. OH2B and CS3B are usually strongest. I have heard ZL6B at 10watt level around 0740. The packet qrm dominates mainly during the day.

It needs a lot of patience and persistence and a tape recorder to get them all. Good luck ! 28200 24930 18110 are clearer generally.

What Tees me off are all the freebanders (seem to be Asian) on AM
that are QRMing the 28.200 beacon frequency.

It appears that these radios are channelized every 25 kHz.

Would appear that establishment of some 100W beacons with beams
on Asia on these channels .175, .225, .250, .275 etc. might be
appropriate.

No he doesn't! I have QSL'ed several times for a 1A0KM contacts. I sent him an e-mail, which he responded to, and said he would check it out. I still have not heard anything from him on it. That has been about three months ago now. I worked him on 7Feb94 - 16Dec95 and 31July98. I have sent Direct and through the Bureau. The first two contacts were as KM4ZM and the last was as W4DSM.

I believe that I would try sending the card to OE6EEG, Dr. Salim (sp),
and see. He apparently is a retired physician from northern Africa and
has contact with Abubaker. There is no guarantee, but a card with a
little note and a green stamp or two would be as good as any other
route.

Same here. Interestingly, I spoke to Abubaker and, without me even mentioning overdue QSLs, he provided some explanation about waiting to have "special call" QSL cards printed, or some other such thing.

On the other hand, I have gotten cards back from others after 6 months or more even when mailed direct, so who knows?

Gotta remember, its only a hobby!!

Source record: 26181

A few months ago I worked Hy, XQ0YAF on Easter Island. I didn't yet have a card from Easter Is. so I got the QSL info. He requested 2 green stamps to be sent to a P.O. box on Easter. I've never felt very good about sending money for a QSL, but there's a first time for everything.

Yesterday I received a card from him, sent back very promptly, along with a sticker from Easter Island (the kind you would put on your steamer trunk after visiting a far away place), and a couple of business cards for hotel and car rental! Although the filler material probably increased the postage somewhat, I was glad to find an honest ham who didn't pocket the money and leave me without a QSL.

Thanks Hy!

Hi Ray. Be patient. Abubaker has always replied if he gets the card. I have him confirmed on 10/20 and 40. All went registered mail and all took what I considered forever.

Gotta Remember, it's Libya. I guess we've gotten spoiled with such an efficient postal service her in the good ol US of A.

Besides, a good DX'er like yourself shouldn't need Libya...you should already have it confirmed and counted ;-)))

Cross-posted to: uk.radio.amateur,rec.ham-radio,alt.ham-radio.vhf-uhf,rec.radio.amateur.dx,rec.radio.amateur.misc

Announcement of a new 6m repeater;

OH2RCH is available at 51.970MHz TX / 51.370MHz RX with 50W output power, vertical antennas.
Repeater is located at the south coast of Finland in KP20 locator square.

Access with 1750hz tone or DTMF star.

More info & images of the repeater at http://www.megabaud.fi/~oh2ch/

Waiting for the ES-openings...

297. New to HAM and DX, need advice on QSLing

Newsgroup: rec.radio.amateur.dx
Date: 1999-01-27 00:00:00 UTC
From: kd5gch@usa.net.NOSPAM
Message-ID: <qswr2.3212$oi.3192525@news3.mia>
Source record: 26186

I am new to Ham radio...just got my Tech Plus last week, and have been doing some phone on 10meters. I have made a few DX contacts, and I am not quite sure of the "etiquette" in QSLing. Should I send my card first (i am having some made soon) or should I wait to get theirs? Should I send postage or "IRCs"? I have so far:

VY1BE
LU3CT
LU2FFD
LU5FT
PY1SX

How long should I expect to wait for them to send a QSL card? Do you send the cards as a post card, or do you put it in an envelope? How is the response rate on DX stations...do they usually QSL eventually?

Also, how do I find addresses to send my cards to these people? I have heard of QSL services, but how to I contact them and get their rules, procedures, etc?

Thanks and 73.
KD5GCH

Except with Ham radio, one is NOT charged a per minite charge like in
Nextel's 2 way radio DORK!!!!!! You are really stupid Al. And it takes a
lot for me to say that to someone in a news group.

There is no charge for Nextel two way radio service. Only when you use the Nextel transceiver as a cellular telephone you get charged. All other two way communication is free.

Nextel sucks here in New England. The calls are delayed, the disconnection rate is high, and the interference is terrible. I haven't met one satisfied Nextel customer up here in the Northeast.

Hi Todd -- how are things in BATON ROUGE ??

As you can see I was able to find your name and QTH by using a data base
of hams calls. For DX -- there are 30 plus places to look including
callbooks and managers -- see URL:
http://www.ac6v.com/page2.html

As for QSL "etiquette", postage, ARRL IN/OUT BURROS, envelopes,
WORLD WIDE QSL BUREAUS, POSTAL RATES & DX STAMPS, IRC TIPS & ADVISE,
QSL PRIMERS, QSL SERVICES -- these are covered also with links at the
above page. In particular -- see URL:
http://www.ac6v.com/pageff.html#PRIMER

QSLing direct can take a few weeks to several months -- by the burro can
take much longer -- a year or more. But sure cuts down on the cost.

Congrats on the upgrade. qsl is a nice part of the hobby. I think you will learn by experiance. The cost of qsl is an area of great concern. It amounts to how bad you want that card and wwhat the guy ask of you. most are just exchanged one forr one pay your own cost. Rare dx claim they can't afford it and that you pay for my card - Send the irc to get my card.
and you first I will send by return mail. Most of the op are honest , but not all.

I gave up paying for cards ten years ago. So true I don't get the rare ones. I did get a by4 from nanjing. I was one of several that a guy in calif forwarded as he had a irc in his qsl. nice guy.
form your own thoughts on the matter.

Heh. Yeah...novices/tech pluses get the most QRM infested, tiny little pieces of bands...I am certain this is to motive you to upgrade, and to punish/shame you for being just a novice! =)

I can't copy 13wpm yet...brain just won't do it, so I figure I'll keep practicing for a while. It is amazing what on-the-air practice can do for you.

Peace....

I have for sale a YAESU FT 736.
vhf / uhf all-mode base station.
stock bands are 2meters+ 70cm. also has 6 meters and 1.25 meters.
plus the FVS-1/1a Voice Synthesizer and the FTS-8 CTCSS Module.

on a scale from 1 to 10 this rig is a 8.
it has very light scratches on it, a a tiny tiny ding in the tuning knob.
i bought it this way. the radio has been to yaesu for a Dust and clean.
and the IF circuit replaced. i bought it broken and had it fixed.
it is 100% working condition and is looking for a good home.

First $1500 gets it shipped free. no trades i need the cash.

please reply to churchrr@home.com

Hello all!
Our ARC on campus, WA2NPQ, has a Kenwood TS-820S in great shape -
except we can't get it to transmit! When trying to tune-up, we get proper
plate idling current, but when it comes to Drive tuning and Plate tuning,
we can't get an ALC reading on the meter. The manual says to turn the CAR
control up 'till an ALC reading is obtained, but that isn't working for
us. The rig has a new set of finals and I've gone through and checked for
loose solder joints/board connectors, but I can't find any openly-obvious
problem. We'd really like to get the rig working as we just put up a G5RV
on the tallest bldg. on campus (we're itching to get talking!) If anyone
can help us out (ie. previous 820S owners, other insightful persons,
etc.), please reply to this account.

Thanks and 73,

- Greg (gtmiller@buffalo.edu)

I have one.
First things first...
Any plate voltage?
Does the plate current show anything when key down?
Any RF output?

I worked the first operation by Toly and company. I have a couple sets
of cards. The ones supplied by Carl N4AA were pretty quick, and also got
a set from Toly eventually.

There have been a couple DXpeditions to there over the last couple years
(and no leeeeest operations by them!) They were easy to work and to
confirm, too.

Does that have the acc. plug with the jumper for the final filaments? If so and that is not in place, that could be the trouble.

A couple of things to check for:

1. The TS-820S has a 9-pin plug in the back for remote VFO. If you are not using the remote VFO, you need to insert the jumper plug that enables the internal VFO to the radio.

2. If you have a plug inserted into the CW key jack it will disable carrier generation unless the key is closed. This is a shorting jack, so unplugging the plug is like closing the key - either allows it to generate a CW carrier for tune-up purposes.

I had a electronic keyer that could not provide continuous key-down, so needed to modify it with a Push Button switch across the output so I could tune up the radio without reaching around behind and unplugging the CW key plug.

Greg OM,

Does the rig receive OK? If so:
Since you have proper idle current, the final tube voltages are probably
OK
Make sure the jumpers are in the external VFO plug on the back.
Verify plate and screen voltages are present on the 12BY7A driver, and
that
you have plate current on the 12BY7A. Troubleshoot the XMIT RF drive to
the
12BY7A.
The TS820 and TS820S are excellent, rugged and REPAIRABLE rigs. I have
been
using mine for almost 20 years now (thousands of hours on the air on CW and
FSK), and I would not part with it. It also has FSK (which the
TS520/530/430/440/830
do not), and is an excellent rig for Pactor/Amtor. Lastly, this rig can
be converted to
the WARC bands too.

You'll get it working. Enjoy!

Hi Greg,

After all previous suggestions, fail you can try this.

USING A 50 OHM DUMMY LOAD at antenna connector.:

step 1 Turn carrier control fully clockwise.

step 2 Place meter switch fully ccw in alc position.

step 3 Place Mode switch in tune position

step 4 Tune the driver until meter deflects.

Please reply if this doesn't help.

We will just try something else.

With the R7 (recently retired in favor of the R7000), I have been able to work 200+ countries in a little over a year, when I put it up. You could do a lot worse!

I have owned a FT-920 for about a year & a half, use it as my second rig for contesting (the big boy in the shack is the FT-1000D. I have never had a day's problem with it, & I find it to be quite serviceable; I use it now primarily for S&P during contests. For the $$$, I don't know if you are going to find another rig in that price range that offers you so many features. Granted , it is not a 1000D, but then again, what is? :-) Primary gripe is the very wide SSB filter (& only one place to put SSB filters); but the upcoming INRAD kit should fix that quite nicely; I replaced the stock SSB filter with one of the INRAD offerings, I would recommend doing the same with any 920.

I don't have much experience with the 746, but when I was poking around the 746 vs the FT-847 (which I eventually bought), my impressions of the selectivity of the receiver was not very good.
I consider the receiver on the 920 to be superior to the 746, as well as the 756. But that is just one man's $0.02.....

Ain't it a grand hobby?!

I agree with Sean. The R-7 is a very good DX antenna for an area with space limitations where you cannot put up a beam and/or long wires. I've used an R-7 [and previously an R-4 & R-5] for the past 11 years. From U.S. east coast, I was able to work the guys on ZL9CI on 40 SSB with 100 watts [and other bands]. [Of course, they are VERY good operators, HI].

Once caution: when you assemble the antenna, do the measurements VERY carefully. A half inch or even a quarter inch can make a big difference.

Good luck
Leo - W3LEO
P.S. My R-7 is at about 23 feet [~5 feet above end of house].

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WA2MOE, WB2RAJ/WB2YQH & The 59(9) DXReport, W3HC, W3UR & The Daily DX, KN4T, N4JF, N4GN, WB4ZNH, KL7AK, W6/G0AZT, K8PYD, W8UVZ, WD8MGQ, KI0LO, New York Times, CO8TW, DJ2MX, DJ5AV & DX News Letter, EA5BYP, F6AJA & LNDX, G4BUE & DX News Sheet, G0PSE, HJ3PXA, JW5NM, LU1DZ, OH2BH, OK1RD, PY7ZY, RW3RQ, VK3AKK, YO2LDE & South-West DX Bulletin and ZS5BBO for the following DX information.

3A, MONACO. Leo, K8PYD, reports to us that he will be on the air from February 18th to March 2nd, possibly as 3A/K8PYD. Operations are to be mainly RTTY with some CW.

3B8, MAURITIUS. The "DX News Letter" reports to look for Hans, DJ7MI, to be active this week from February 2-20th as 3B8/DJ7MI. He will be on the air especially on CW on the lowbands. QSL via bureau to DJ7MI.

3W, VIETNAM. The "DX News Sheet" reports Nikolay/UA0FM (3W5FM) is now active on 160 meters (1825kHz) at his sunrise (2316z) for Europe. QSL via his home callsign.

5A, LIBYA. Abubaker, 5A1A, continues to be active on 10 meter CW mostly weekends around 28040 kHz between 1545 and 1630z. Also, check for SSB activity on 28445 around the same times. For low band activity, check between 2100 and 0000z on 160/80 meters. He says QSL by "Registered Mail" ONLY to Box 74421, Tripoli, Libya.

5H, TANZANIA. Ralph, 5H3RK, is another very active station from here. Some may remember Ralph who was previously active as Z21HS a couple of years ago or so. He is a very active CW op who likes low bands when possible. Over the last week, he has been heard on 20 and 40 meters between 2000 and 0400z. He will be attached to the Swedish Embassy for the next couple of years. Between Ralph and Dave, 5H3US, they should provide a lot of DXers with Tanzanian QSOs. He has met Dave, 5H3US, and

perhaps they will get together for a serious CQWW 160 effort. So far, from temporary quarters, he just has a multi-band vertical on the air. But he has a yagi and will probably put it up soon now that he's in permanent quarters. QSL via Ralph Karhammar, 5H3RK, PO Box 9274, Dar es Salaam, Tanzania.

5H, TANZANIA. The "DX News Sheet" reports Maurizio, IK2GZU, will be active February 8-28th, while working at a mission. No callsign was mentioned. He will be active on the HF bands using a tri-band beam and dipoles. QSL via home callsign direct or bureau (E-mail request can be sent to ik2gzu@spidernet for bureau cards).

9G, GHANA. The "DX News Letter" reports that Seth/9G1OO, Arie/PA3ERA, and Bert/PA3FUE intend to activate the club station 9G1AA in Dormaa-Ahenkro during February (no specific dates given). Look for them to be active mostly on CW on 20/15/40 meters. DO NOT QSL via PA2FAS. The correct QSL route is via PA3ERA, Arie Barendrecht, Taankade 10, NL-3311 TN Dordrecht, The Netherlands (also for 9G1OO and PI4DEC).

BT1WW, CHINA. During this past weekend, the Chinese Radio Sports Association (CRSA) aired a special event experimental station BT1WW for 48 hours to participate in the CQWW 160-meter Contest from Beijing. What was unique is that the antenna is some 300 feet above the ground, but the sad news is that the location is rather noisy and mounting a receiving antenna was impossible. The operators of this event are BA1AB, BA1OK, OH2BH and others.

CT3, MEDEIRA ISLANDS. Alain, F5LMJ, will be active as CT3/F5LMJ from February 13-20th. He will be active on CW on 10, 14 and 18 MHz (10110, 14030 and 18080 kHz). However, his activity will be limited because he is on vacation.

HK0, SAN ANDRES. Carl, WB4ZNH, reports that he and his wife (Martha, WN4FVU) are going on a contest DXpedition with a group from the Woodbridge Wireless from Northern, VA, as HK0/W4DC. He states they will be there for two weeks in San Andres, "alternately relaxing, building the station, killing ourselves during the contest and then packing it all back up again." Their operation will take place during the ARRL DX Phone Contest the first full weekend of March. He also mentions that they are attempting to get a special distinctive Columbian callsign for the duration of the contest and that it might not be possible, so if not, they will be signing HK0/W4DC. For more information, check their Web page at: http://www.pwcweb.com/wwi/DXpedition/

IOTA NEWS......
IOTA 99. The annual convention of the IOTA will take place in Alicante, Spain, April 24-25th. All the details of this great event can be found on the URE's WEB site at: http://www.ure.es

NEW ONES. Joe/I2YDX and Roberto/IK2WXZ will be signing E30LA and E30MA resepectively by the time you read this, but their first activity will be from Dahlak Archipelago (AF-038) and may be over (QTH February 1st).

However, they plan to activate two non-number Eritrean IOTAs, one from February 2-3th and the other February 6-7th. The dates of the two unnumbered ones will depend on the weather and any local problems. QSLs will go via their home callsigns.

NA-074. KL7AK will be active from Nunivak Island, Alaska, located in the Bering Sea about 150 miles West of Bethel, Alaska. This is a RARE ONE for IOTA. KL7AK will be active June 4-7th. There will be two stations on SSB/RTTY/CW. Check the usual IOTA frequencies, but mainly 14260 kHz. QSL to KL7AK via the callbook address or Bureau.

SA-008. The crew of the Ushuaia Radio Club activate LU8XW during the CQWW 160 Meters Contest this past weekend. Their location was on Tierra del Fuego Island.

SA-046. Ciro, PY7ZY, reports that between February 6-17th, he will put Itamaraca Island on the air as PY7ZY/7 on CW/SSB. QSL to: Cicero Xavier da Silva - PY7ZY, P.O. Box 501, 58001-970 - Joto Pessoa - PB - Brazil. This visit is in preparation for the IOTA Contest in July when the callsign ZX7XX will be activated. Operators will be PY7XC/Jim, PY7ZY /Ciro, PY7ZZ/Fred, PR7PO/Alex and PR7FB/Jack.

EU-011. TOM/G0PSE and STEVE/G4EDG will be active July 22-29th, on CW/SSB 160-10 meters on St. Mary's Island (Isles of Scilly) using the callsign GB0SM. They will also be participating in the IOTA Contest (July 24-25th) with the callsign G5M. QSL via Bureau or Direct via G3WNI: Bill Lindsay-Smith, Way Close, Madford, Hemyock, Cullompton, Devon EX15 3QY

ITU NEWS. From Saturday's (Janaury 23rd) New York Times: "In a step towards virtual statehood, Palestinians are about to be granted a form of long-distance independence, their own country code for international telephone calls..... Over Israelei objections, the International Tele-communications Union quietly announced this month that the area code 970 had been reserved for the Palestine National Authority territory in the West Bank and Gaza. The union, a United Nations affiliate based in Geneva, agreed in principle to give the Palestinians a code at its membership meeting in November..... The International Telecommunications Union governs the global allocation and regulation of area codes, broadcast frequencies, Internet bandwidths and satellite signals. It voted to give Palestine its own country code, as well as its own radio call signs and broadcast frequency assignments."

J3, GRENADA. "The 59(9) DXReport" states that Bill, K4LTA, plans to be active as J3/K4LTA from March 10th-April 10th. QSL via homecall.

KH6, HAWAII. Look for Richard, K5NA, to be active this month as KH6X, February 16-27th. Activity includes an entry in the ARRL DX CW Contest.

PIRATE ALERTS.....
Rob, HJ3PXA, reports that a station signing OA4CRK is operating from Bogota un-licensed. This station has operated several of the last contests and has recently given out QSOs leading everybody to believe

he is operating from PERU. He never says portable /HK3.

Elmo, EA5BYP, QSL Manager of 3C1GS, reports a station using the callsign 3C1GS has been active on CW. He states this is a pirate because 3C1GS only operates SSB.

More on VK4XN. Ken, VK3AKK, suggests that the reports of a VK4XN may not be a pirate but a case of "poor hearing". As a DXer, Ken states that he has been watching the 80m DX window since it was opened to VK. He has spoken to other VKs and they have never heard a VK4XN there. But, there is a VK2XN, Wayne, and he is very active there as well as 40m and other bands. Wayne is located in northern VK2 and is usually on the air with a group of VK4s. So, this may be the reason, perhaps, a check of the bogus QSLs against Waynes log may reveal the answer.

POSSIBLE NEW ONE? Foreign Minister Ali Alatas announced Wednesday, that Indonesia will propose to the People's Consultative Assembly, the nation's highest constitutional body, that East Timor be allowed to become independent. Alatas said the Indonesian government will put the proposal to the assembly by the end of this year. The assembly would then vote on whether to allow East Timor to become an independent country.

QSL INFO AND NEWS.....
Daniel, YO2LDE, reports that he has received the QSL cards from the printer for his past DXpedition to Albania (ZA/YO2LDE - 1997). He states that he has sent all the QSL cards out for this DXpeditions via bureau or direct. If anyone has not received a QSL, Daniel suggests to go to his Web Page to first check the interactive Log Book for their contacts before re-QSLing. His Web site is:
http://www.qsl.net/yo2lde/search.html

Juan's, CO8TW, QSL Information and Log for this past weekend's CQWW DX CW 160 Contest are as follows. QSL to: Juan Carlos Veranes, CO8TW, PO Box 8, Santiago de Cuba, CP 90100, CUBA. QSL Manager is W3HNK. His E-mail address is: co8tw@co9nla.uo.edu.cu
His contest log will be available on the NFDXA's page Web at:
http://db-sales.com/nfdxa/logs/logs.html

Harry, RA3AUU, SRR Vice President/Contest Committee, reports that the ONLY incoming IARU affiliated bureau for Russia is Box 59, Moscow, 105122, Russia.

QSL CARDS FOR ZS75SIG. QSL cards for this special event will be sent out towards the end of February/March. A request to all stations that worked this event is to please send QSL cards as soon as possible as Edwin, ZS5BBO, wants to get the QSL cards all posted ASAP. QSL to ZS5BBO, PO BOX 211032, Bluff, 4036, South Africa.

QSL Manager Mario, DJ2MX (ex-DL1FDV), has a new address. He is the QSL Manager for following stations: T94DX, T94DO, VK4SK and 4N4MX. Please use the address: Mario Lovric, Am Oelberg 11, 61231 Bad Nauheim, Germany/EU. Mario mentions many USA and JA stations are sending ONLY 1 USD for return postage. He states that this is not enough because

it cost him 3 DM (that is about 1.8 USD). For Europe, 1 USD OK. All other countries, outside of Europe, must send 2 USD or 1 IRC. Mario will answer ONLY if enough return postage is enclosed! All other QSLs would be sent via the bureau.

SPECIAL EVENT. Operators CO8DD, CM8SW, CM8YK, CO8TW, CO8HF, CO8KL, CO8YL, CM8UF and CO8IK will activate the station CO9NAA in commemorating the 146 anniversary of the birth of Jose Marti, the Cuban's national hero. They will be active on all HF band with two stations. QSL via CO8RCB: PO Box 5, Santiago de Cuba, CP 90 100, Cuba. E-mail request: co9naa@co9nla.uo.edu.cu

SPECIAL EVENT. Another country/station (please refer to OPDX.393) has announced that they will be active with a special callsign to honor the work done by the coast radio stations around the world for almost 100 years. Communication on CW will stop on February 1st at most of the world's coast radio stations as the new GMDSS system will take over communications with ships. Look for JW0LGS to be active February 1-28th. Operations will take place form Svalbard Radio/LGS - the world's northernmost coast radio station. JW0LGS will be operating CW only 1830, 3510, 7010, 10110, 14010, 18070, 21010, 24890 and 28010 kHz. Operators will be JW5NM and JW6MY. QSL via JW5NM, Box 498, 9170 Longyearbyen, Svalbard Island, Norway.

SPECIAL EVENT/PREFIX. From February 1-7th, look for operators RK3RWR and RW3RQ, from the "Michurinsk Contest Groupe", to activate the special callsigns UE3RCG and UE3ROM, respectively. Activity will be on all bands CW/SSB and the WARC bands. You can receive a "MCG-MEDAL" trophy for QSOs with these 2 stations during this period. This trophy is free, but please send QSLs and LOG data to: Andy B. Yatskiv, RW3RQ, P.O. Box 30, Michurinsk 393740, Russia. For more details, send E-mail to: valer~su@html.ru

T3 DXPEDITIONS (Also 3D2). Members of the OKDX Foundation, Jarda/OK1RD, Jiri/OK1RI and Slavek/OK1TN will be active from West Kiribati (T30) and Kanton Island (T31) or Banaba Island (T33). The team will first start their activity on February 25th from Nadi, Fiji, for 4 days as 3D2TN. On February 28th, they will take a flight from Nadi to Tarawa, Kiribati. From March 1st, for about a week, they will operate as T30RD from Tarawa. During their time spent in Tarawa and depending on the current situation there, they will hire a boat with 2 sailors to sail to Kanton Island or Banaba Island. They are hoping that on March 10th or about, their activity will start from Kanton Island as T31RD or Banaba Island as T33RD and last until March 28th. They spend more time operating in Tarawa until April 8th, where they will take a flight back to Fiji and further via L.A., Frankfurt to Prague. The crew's operations will be on all bands including the WARC bands with two comLplete HF stations on CW/SSB modes only. QSL cards for all operation via OKDXF.

T9 & ZA OPERATIONS UPDATE. Daniel, YO2LDE, provided OPDX with another update and states that these operations are a "GO". Operation will start February 15 and end on February 25th (He did not say which country he will start in). Daniel will operate with the callsigns ZA/YO2LDE and T9/YO2LDE. Suggested frequencies are:

RTTY - 3588, 7038, 14088, 21088 and 28088 kHz
CW - 14020, 18090, 21020, 24900 and 28020 kHz
SSB - 14215, 18145, 21215, 24945 and 28495 kHz
QSL direct ONLY to YO2LDE: Daniel M. Vuescu, Zadei F3-1-7, RO-1700 Resita, Romania. Or to N1NJ: Tony Naglieri, 22 Sherwin Street, Ware, MA 01082-1020, USA. DO NOT SEND QSL VIA "YO (Romania)" BUREAU !!!

VP9, BERMUDA. Dick, N1RCT, will be on a RTTY DXpedition now through Thursday, February 4th, as VP9/N1RCT. Activity will be from the North Shore on 20 meters RTTY. He will use a multi-band dipole and a 100W. Special attention will be given to JA/SE Asia from 2200-2300z each day. Send direct QSLs (with SASE, etc) to: Eddie Schneider, W6/G0AZT, P.O. Box 5194, Richmond CA 94805. QSLs can also be sent via Bureau to N1RCT ONLY (no bureau to W6/G0AZT!). There is a minor Web page setup on: http://www.megalink.net/~n1rct/dxcc/vp9.html

ZD9, TRISTAN DA CUNHA. Ian, ZD9IL, is not very active at the moment as he is having transceiver problems. His QSL Manager ZS5BBO will advise us when Ian has his transceiver up and running again.

ZS, SOUTH AFRICA. Edwin, ZS5BBO, reports to OPDX that he is still active daily on 20 meters (+/- 14205) from 1500z daily.

are you sure the SG switch is not in the wrong position on the back
panel? This is used when installing new finals for neutralization.
If someone forgot to put the switch back to the proper position,
this would be a symptom.

When I was a lad I was fascinated, almost obsessed, with the weak, mysterious, watery, bubbly, funny sounding signals being propagated from far corners of the earth to my shortwave receiver. I started out as an SWL listening to the various shortwave stations but when I began to tune to the ham bands, I knew I NEEDED to get a license! Here was mystery, unpredictability, things out of the norm. Such a fascination never failed and I am just as intrigued today as I was 30 years ago. DXing still seems like a new frontier to me every time I turn on the radio.

Will a path be open today to my friends in Japan? To other friends in Africa? Northern Russia? Will they be at their radios? What will the signals sound like today? Will I maybe even hear a long-delayed echo?

Cellular phones just don't provide the same level of fascination. 95% reliability is boring to me when it comes to radio and DXing. I like a pileup once in a while that I can't crack. It gives a challenge and is even more rewarding when I DO crack it on a later day (it took me over 20 hours of calling to get my first QSO with 3Y0PI - but then I was dancing on ceilings for days!)

I know this spirit is not dead. In this world of Internet and e-mail, there must still be some adventurous souls out there who find the same fascination I enjoy. Maybe they just have to be introduced to it.

73, Zack W9SZ

Message-ID: <19990201002727.01108.00002109@ng-ca1.aol.com>
Source record: 26035

You may wish to contact some of the radio clubs there. Possibly they will let you operate as a guest op, under the direction of one of their own hams, if getting your own license proves too difficult or time consuming. For example, BY1QH has hosted some guest ops in the past. That's the radio club of Tsinghua University in Beijing, (the premier engineering technical college...like our MIT). I have not done this, although I have travelled extensively throughout China. Too much to see and do; not enough time to play radio! Good luck! John, K7JY.

340. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-02-01 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <794ftm$dct@news.Hawaii.Edu>
Source record: 26036
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

```
Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed
with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-
running thread results from a single cross-posted article, and the
contents of such a thread drift further and further away from being
"on-topic" in the various NGs that receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups"
posted on the 15th of each month.

Jeffrey Herman, WH6U
(rec.radio.amateur working-group)

342. Re: Obtain Chinese license?

Newsgroup: rec.radio.amateur.dx
Date: 1999-02-01 00:00:00 UTC
From: Linda Ford <aa6mr@dcn.davis.ca.us>
Message-ID: <36B5F2BA.33EA@dcn.davis.ca.us>
Source record: 26038

I spent a year teaching in Jinan, Shandong Province, China. I obtained a copy from the ARRL of their flyer about getting a Chinese license and while I was there I got one. At the time (4 yrs ago) it was a matter of sending a $5 check to an official office in Beijing. My license came back immediately and it was good for 1 year.

Basically, the rules were... you must operate from a club station. Your callsign is your US callsign /BY1 etc.

There was a ham radio club in Jinan (organized while I was there) but they didn't have a club station and the rules wouldn't let me operate from a ham's home station. (I did visit one of the local hams who lived a short block away from where I was living and saw his set up.) I considered trying to get on the air during the few days I was in Beijing before leaving the country, but time didn't permit it.

The Chinese were very nice and my experience with the hams in Jinan was great. When you get your license, you are given the address and contact information of the club in Beijing so that should help.

Good luck ...and enjoy

Linda Ford aa6mr/by3

Hi
we are looking for information on Loren Windom, the propagator (not inventor) of the legendary Windom Antenna. We have his QSL cards and the QST article with the presentation of the antenna. We need much more, for a paper on him: biography, publications... whatever.
Any suggestions? Please mail to harranth@ping.at
Tnx, 73

Message-ID: <MPG.112174fefed5be41989789@news.planet.net>
Source record: 26050

Now that the ground hog missed seeing his shadow, that means spring is just around the corner..RIGHT. But that still leaves a tad more winter type WX

What better way to spend those cold Wintery DX-less nights that to curl up with your own copy of VK0IR, Heard Island. Written by KK6EK, Bob Schmieder. This is the complete account of the 1997 DXpedition that eclipsed all world records for amateur radio operations from remote sites and set the standards by which all DXpeditions are now compared.

I have 6 copies left. Cost is $20US plus shipping (approx $3US). If interested, let me know ASAP. ALL proceeds go to the Heard Island Fund.

I recently bought an Advanced Electronics Application ATU-1000.

It was sitting in the stockroom of my favorite Ham shop in Vancouver BC.
Somehow or another the unit had been all but forgotten about for a number
of years.

The unit is unused and was complete other the software and unfortunately
the instruction manual.

If anyone offer any information about the operating of this unit or can
sell me a copy of the instruction manual and software I'd appreciate
hearing from you.

Thank you

Colin Ming

365. Ham Log v4 - Software Upgrade

Newsgroup: rec.radio.amateur.dx
Date: 1999-02-05 00:00:00 UTC
From: rhg@sydney.dialix.com.au
Message-ID: <918210249.708328@fermi.dialix.com.au>
Source record: 26061

To All Ham Log version 3 Users...

Ham Log has been used widely throughout the world as the logging program for discerning Amateurs. In 1999, Ham Log celebrates its eighth birthday, with the release of a version FOUR.

Of significance with this version four release is that it is totally Year 2000 Compatible (assuming that the computer that it is used on is also compliant). It also encompasses the major ARRL DXCC changes and includes new features and enhanced logging operation. The program has been fine tuned so that it remains the definitive logging program for discerning amateurs - world-wide.

Details of some of the version four improvements are provided at the end. The new demonstration version (HAM_LOG4.zip) is becoming available. FTP is available at:

ftp.funet.fi - in directory /pub/ham/hf-log
ham_log4.zip and ham_log4.txt

All version three users have been notified by mail of special deals on upgrading. The addresses for many users may have changed, as some have been using Ham Log for many years. If you (or you know of friends who are using Ham Log) have not already received notification of the upgrade, please contact me at the address below. This is important as the _special_ upgrade offer is only available for a limited period.

Thank you for your assistance and support.

Robin VK2VN

---

HAM LOG VERSION 4 - AN IMPORTANT UPGRADE

Listed below are some of the changes.

ENTITIES...

On 31 March, 1998, several major rule changes were made by the ARRL concerning DXCC. This included the deletion of all references to Countries, which are now known as "Entities".

A large amount of work was required in version 4 to reflect these ARRL changes.

In addition, new some new Entities were created, together with some significant changes to prefixes.

YEAR 2000 COMPLIANCE...

All previous versions of Ham Log were not fully year 2000 compliant. Fortunately, all years were recorded in a four digit format, however, several changes were needed to make Ham Log totally year 2000 compatible. These have been done.

ENVIRONMENTALLY FRIENDLY VERSION...

Ham Log now comes with the new version 4 manual on disk, which you may print if desired. There is significantly more help available within the program such that the need for reference to a written manual has diminished. The printed manual was a significant cost, and as such the price of Ham Log has reduced! (A printed manual is still available.)

The expanded help provides more details about the superior features of Ham Log. Of course, the F1 help remains context specific and available throughout the program.

BETTER PERFORMANCE - FASTER TO RUN...

The program now runs faster, with some clever new programming techniques. There are also some great improvements at start up for registered users. Firstly, the copyright screen at start up is bypassed, and the logo screen only remains until the program has completed some quick virus checks. Secondly, the Main Menu can now be bypassed so that the program goes straight into the Log. Further, you can preset the order in which the log's QSOs are scrolled to your preferred choice.

So now you can be adding a QSO with one key press in one or two seconds, whereas in the old versions it could take up to 20 seconds and several keystrokes.

And exiting Ham Log is like lightning - just one keystroke from virtually anywhere within the program. As such, the Main Menu need not even be used!

The program uses less of your computer's resources while idle, giving greater processor time (and therefore performance) for other programs running concurrently under Windows.

SOME NEW AND IMPROVED FEATURES...

- Adding QSOs is easier. You can now preset any date (not just UTC or the current date - useful for adding old QSOs). Version 4 now gives you the options of pre-setting the frequency field, and / or using the frequency of the last QSO. When you have completed a QSO, the program prompts immediately for the call sign for another QSO, saving you from having to re-execute the Add QSO menu choice.

- The Text Editor field (effectively an unlimited notes field for a QSO) is now far easier to use in version 4. No longer do you need to use control keys or remember to save it before another QSO. You can even save your notes automatically with the current date, which is useful when you use the facility where the text is available for all QSOs with a specific station.
- The General Station Information (F10) is now easier to access and edit. Like the text editor facility, it is much simpler to save the information.

- The Custom Field Menu now allows you to globally replace the Custom Field with each QSO's call sign. (Remember that this change need only be temporary.) This enables most lists and reports to be confined to those QSOs with any specific station.

- Many of the less significant error messages have changed such that they no longer require a keystroke to acknowledge and remove them. Additional error checks on data entry have been added.

- There is more sophisticated printer control, with more error checking. It is also easier to abort a long print job.

- There are many other general and minor enhancements.

PROGRAMMING IMPROVEMENTS...

- Version 4 of Ham Log now comes with a separate program that will totally recreate the index files. Previously, in the event of severe file corruption, users had to follow a complex procedure using their original disks.

- The use of memory has been optimised for the larger program.

- Checks of available RAM and disk space have been deleted as these days they are rarely a problem. The program requires DOS 6 or above (though DOS 5 loaded high seems OK).

- In the rare event of a virus being detected by the program, it will provide some details, before aborting.

- A rare bug that gave errors on the first worked QSO for a country has been fixed.

Hi OM,

I just subscribed to this group today and read your reply. I am thinking of replacing my ancient, corroded HF-6V and am trying to decide between a HF-9V and a R-7000. Did you work your 200+ countries in one year barefoot or did you use an amp with the R-7000. Also is your QTH truly in W0 land or are you on the east coast? (I noticed your amsat.org address.)

Reception on my shortwave radio is fairly good until I turn on my computer, which causes significant noise on the radio. Can anyone offer advice on how I can eliminate this noise? My setup is fairly simple: outside wire antenna, shielded lead-in wire, with a ground wire. My radio and my computer are in the same room.

If you can offer a suggestion, please email me at:
florida@iag.net

Thank you,
Warren

Hi...
Does somebody have some more info about operating from Canary Islands (EA8)?

I'll be there during WW WPX CW (in May) and need some more informations.

Thanks.

Chris, 9A4KK!

Is Jordan's new King Abdullah bin Hussein a ham? I thought I remember that King Hussein used to like to bestow Amateur Radio Licenses to his children as soon as they were born.

381. Re: Is King Abdullah bin Hussein a Ham?

Newsgroup: rec.radio.amateur.dx
Date: 1999-02-07 00:00:00 UTC
From: Colin Guillas <rguillas@nrn1.nrcan.gc.ca>
Message-ID: <36BE121D.1F4C27F5@nrn1.nrcan.gc.ca>
Source record: 26077

Well, King Hussein was JY1... his wife also held a ham radio license. The call lookup at http://www.buck.com is incomplete... it only shows the late King Hussein, and nothing else- there are 34 other hams in Jordan, according to it. In any case, the hamcall database is incomplete because it does not show Queen Noor, and as it does not show the new King either, we can't conclude anything. :) I'm sure the info is out there somewhere.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, ARRL DXCC Desk, AA1M, AD1C, K1DW, WB2RAJ/WB2YQH & The 59(9) DXReport, NG3K, W3UR & The Daily DX, K4MA, N4GN, N4XP, K8JP, K8PYD, KU9C, W9RN, G4BUE & DX News Sheet, HA5PP, JM1LJS, OH2BH, PA3BIZ, PT2NP, PY3PAZ, VK4FW and YO2LDE & South-West DX Bulletin for the following DX information.

DXCC NEWS FLASH. If you are not a OPDX InterNet Subscriber or read the ARRL Bulletins than you missed that a "New DXCC Entity Was Added". Palestine will be added to the DXCC List effective October 1, 1999. Contacts made with Palestine (callsign E4) stations after February 1, 1999, will count for this new entity. Under the DXCC rules, contacts with the deleted entity of Palestine made prior to June 30, 1968 do not count for this entity. There is no commonality of territory or administration.

3A, MONACO. Last week we mentioned that Leo, K8PYD, will be active from February 18th to March 2nd, possibly as 3A/K8PYD. Leo now tells OPDX that Tom, N9NC, who previously operated as 3A/N9NC during the CQWW CW Contest, will be joining him in Monaco February 19th for a week. Tom will only be free during their evening hours after work. He plans to work 40, 80 and 160 meters CW. Leo also mentions that either or both of them may join in the contest the weekend of February 20-21st.

3B8, MAURITIUS ISLAND. There is plenty of activity from here. Hans, 3B8/DJ7MI, has been very active on 160/80/40/30/15 meters. His activity will continue until February 20th. QSL via DJ7MI. Jacky, 3B8CF, seems to like 30 meters a lot lately, check around 10103 kHz between 0230 and 0330z. The "South-West DX Bulletin" states that 3B8GD has been very active on the weekends on 28495 kHz and 18145 kHz. QSL via 3B8DB.

5H3US PHOTO GALLERY WEBSITE. Jim, AD1C, states Dave Heil, 5H3US (K8MN), sent him some pictures he snapped with his digital camera. These picture can be viewed at: http://jjr.ne.mediaone.net/5H3US/

7O, E4 AND P5, YEMEN, PALESTINE AND NORTH KOREA (HA5PP Projects in the works......). Zoli, HA5PP, writes to OPDX that he has been in Yemen twice in 1998, and is still trying to get permission to operate. He continues to work with Yemen's General Director of Ministry of Communications (MoC), Abdulgader Ibrahim, on a plan and an application to reactivate amateur radio in Yemen. Zoli feels the process is slow, but is close to having 7O back on the air. He tells OPDX that he just needs a little help to convince the "MoC". Zoli has requested that the OPDX readers and the DX associations call or FAX Mr. Ibrahim, and ask "What is the status/progress of amateur radio in Yemen." Tell him the world's amateur radio operators are anxiously waiting the return of amateur radio in Yemen. Also, state that you support Zoli's efforts to help re-establish amateur radio in Yemen. Zoli states that he can set up a nice amateur radio station with the coordination of some USA/Europe/Japan organizations. Here are General Director Abdulgader Ibrahim's phone numbers:
Home Phone: 967 1 321900
Office No.: 967 1 331455
Fax Number: 967 1 331455

In Zoli's letter, he also mentions that he is also thinking about going to E4 (Palestine) soon. This is currently in the planning stages and more details will be coming out later. Sponsors and donations will be welcome.

Zoli's letter to OPDX he states, "It seems to me, the hams have given up that the P5 will be on the air "again". I know that this is crazy trying, but I will try P5....." Zoli states that plans are in the works to visit North Korea. He also has mentioned that he is looking for sponsors to help fund a short operation (which may last only a few days). He feels the time is right. "GO FOR IT!", are his words he tells OPDX. If you are interested in helping Zoli, he can be contacted by E-mail at: navus@mail.matav.hu

8P, BARBADOS. Jim/K4MA and Will/AA4NC will be active as 8P9JA and 8P9JB respectively from February 17-22th. They will operate the ARRL DX CW Contest using the callsign 8P9JA as a Multi/Single entry. QSL to home callsigns.

BT1WW CQ 160 WRAP-UP. The following is an excerpt from a press release by Tim Totten, N4GN, written by Martti Laine, OH2BH:"..... The People's Republic of China indeed appeared on 160 meters in this past weekend's contest. The U.S. pileups were huge but unfortunately so was the noise level in Beijing. While congratulating those 24 U.S. stations who made it through, the gang in China also wants to apologize for those who kept calling." The lucky stateside stations are: N7RT, N6RO, W6UB, W7TVF, N6FF, W6YA, K6VX, W2VJN, K6SE, W6UE, N6ED, W6AJJ, N2KK, WU6T, KF6T, N7UA, K6UR, KG6I, W6PBI, W7IUV, KC7V, W7XR, N7DD and AB6LF. The greatest signals were N6RO, N6FF and W6AJJ. You can QSL to: Martti J. Laine, Unit No. 21H North Lodge, China World Trade Center, No. 1 Jianguomen Wai Avenue, Beijing 100004, People's Republic of China. Your observations are also welcome to the following two e-mail addresses:
martti.laine@nmp.nokia.com

crsa@public.bta.net.cn

CE, CHILE. "The 59(9) DXReport" states that Jack, WA0RJY, will be traveling in Chile during February and hopes to be active for about 5 days. He will probably be active as either CE/WA0RJY or CE/K7ED. QSL via WA0RJY.

DXERS LOSE A RARE ONE. He was not a rare country, a rare IOTA or even a special event station, but a King of a country. DXers who have been around for a few years (or a few decades) knew that working the King, JY1, was a rarity, honor and an accomplishment. For me (as your editor) working the King, was one of my favor highlights as being an amateur radio operator. It is not everyday that a leader or King of a country that would take the time to talk to you on amateur radio, but King Hussein of Jordan gave us that chance. Even though it was rare, the King has been heard on HF, and he even made a contact with the Space Shuttle via VHF. King Hussein's, JY1, signal on the ham bands will be dearly missed. The 63 year old monarch, peace-maker, who was treated in a U.S. clinic for a relapse of non-Hodgkin's lymphoma, was pronunced clinically dead, but was kept on life support after the collapse of all his major organs, except his heart. He became a "Silent Key" (SK) as this bulletin was being prepared. OPDX would like to send our deepest sympathy to King Hussein's wife, Queen Noor, and the family.

E4, PALESTINE. Reports indicate that Ali, JY4NE, has mentioned that he will be active from Palestine. He states, that the Ministry of Tele-communications in Palestine has not issued ham radio licenses yet, so he is still waiting. He think his callsign will be E44A, but he is not sure. Ali says to keep on checking his Web page for up-to-date info at: www.angelfire.com/ny/JY4NE/index.html
Other sources state Ali will be active possibly February 20-21st or February 27-28th from Gaza, QTH of ZC6B. Activity will be used on the highest open band. Operations will be SSB and some CW. Possible callsign may be E44E.

FO, FRENCH POLYNESIA. Look for Helmut, DJ4VW, to be active until February 20th, as FO/DJ4VW. His activity will be mainly on 20 meters SSB. He will be on the Island of Raiatea (OC-067). QSL via DJ4VW, direct or the bureau.

JD, MINAMI TORISHIMA. The "DX News Sheet" reports that Ryochi, JL1KFR, is active again until February 15th, as JL1KFR/JD1. Activity will be CW and RTTY, especially to Europe and North America. QSL via home call.

QSL INFO AND NEWS.....
OY1CT QSLS. OPDX has received information that several sources are stating OY1CT QSLs can be obtained via F6GNG; this is wrong. OY1CT has stated that "he has ALWAYS handled his own QSLs direct". So, please QSL direct ONLY to OY1CT.

QSL Manager Kevin, VK2CE, (manager of VK9NX) has a new address. Please check your data bases. The address should be: Kevin Mulcahy, POB 300, Merrimbula, 2548, Australia.

BQ9P QSLS. It is being reported that these cards should be coming out sometime in February. QSLs will be a full color folding card.

XX9X/XX9TAR/XX9TMC/XX9TNC/XX9TOT/XX9TXD QSL CARDS. Steve, KU9C, reports QSL cards for the various XX9 operations in October, 1998, listed are beginning to hit the mail. He states that he is about 1/2 way through the pile, and hopes to have most, if not all, out early next week. However, he does mention that if you sent your card with others, such as B1A, BT2HC, BQ9P or many of the other stations that he manages, this will slow their return to you. He expects to be mailing these cards out during the month of February as well.

PA6, NETHERLANDS. Bill, PA3BIZ, PR Manager of the VRZA (Dutch Radio Society), wants to remind everyone that the PACC Contest (160-10 meters) will be held next weekend February 13-14th (1200-1200z). Also, look for their club station, PI4KGL, which has received the special callsign PA6V for the contest. All QSLs go through PI4KGL and Dutch bureau.

PY0S, ST. PETER & ST. PAUL ROCKS. Paul, PT2NP, ABRA Director-Secretary, informs OPDX that the ABRA-DX Brazilian Association will be going on another DXpedition to St. Peter and St. Paul's Archipelago (formerly known as St. Peter and St. Paul's Rocks - PY0S). This operation will start March 15th or 16th and last until March 21st or 22nd. The ABRA team will include the following operators: PT2HF/Lunkes, PT2GTI/Stuckert and PT2NP/Paul. Operations will be on SSB and CW, but other modes are in the planning stages. The group will leave the port of Natal on March 10th, and will be back on the Brazilian coast between March 26th and 29th. QSL via PT2GTI. Paul also informs OPDX that this operation has no connection with the other group announced by Karl, PS7KM. More information is forthcoming. Paul, PY3PAZ, provides OPDX with the following PY0S information:
"These Rocks are a Federal Silvester Resource and there are about 4 Brazilian scientists living there for no more than 15 days at a time because of the bad conditions. On the Rocks, you have sun all day long, calm winds and the temperature reachs about +45C sometimes. Imagine how hard it is...The nights are sometimes warm but sometimes cold. The crew is changed every 15 days and the entire support comes from the Brazilian Navy..... It is quiet hard for a civilian group to go there. On the Rock, there is no place to be, no grass, no energy (only by batteries) and no potable water as well..... Only rocks everywhere."
You can also visit the ABRA Web site at: http://www.pt2dx.org.br
This site is written only in Portuguese, but at least you can enjoy the many photos from the four DXpeditions made by the Association to the following islands: Trindade, Coroa Vermelha, Martim Vaz and South Shetland-Antarctica.

S7, SEYCHELLES. "South-West DX Bulletin" reports that Kurt, HB9MX, will be active until February 27th, as S79MX from Mahe (AF-024). Activity will be on 40-10 meters. QSL via HB9MX: Kurt Bindschedler, Strahleggweg 28, 8400 Winterthur, Switzerland.

SPECIAL EVENT STATION. The Boland Amateur Radio Club will be running a special event station between February 27th and March 1st, to celebrate the 150th birthday of the L'Agulhas Lighthouse. The special callsign

ZS150LL (L'Agulhas Lighthouse) will be used on all the popular HF bands and all contacts will be confirmed with a very special QSL card. The L'Agulhas Lighthouse, built in 1848/49, is the second oldest lighthouse in Africa and the Southern most lighthouse in Africa. Boland ARC invites all lighthouse and radio enthusiast to pay a visit to their special station which will be active from a caravan parked right next to the light house.

T8, BELAU. Look for JA5AUC and JA5IU to be active as T88TM and T88SY, respectively, from Palau February 11-14th. They will be there on a mini vaction but activity will be on 160-6 meters CW/SSB. QSL via home callsigns and it is "OK" via the bureau.

V3, BELIZE. Joe, K8JP, and his wife Beverly will be driving to Belize, leaving about February 6th. They expect to arrive there about February 11th and return on March 9th. If all goes well with the tower and antenna installations, Joe will be operating the ARRL DX CW and SSB Contests as a Single Operator High Power All Bands and the CQWW 160 SSB Contest as a Single Operator High Power. Outside of the contests, Joe will be operating mostly on the lower bands, 160/80/40 meters CW with some SSB. Joe will use the callsign V31JP. He also mentions that he has a great deal of non-ham work to accomplish on this trip, so daylight hours will be spent on dealing with those tasks. He will be testing antennas on the higher bands. Also, on most mornings around 1200z, Joe can be found on 14165 with W2MIG and friends. QSL via Joe's new manager, Lonnie W. Miller, KA9WON, 12031 Blue Spruce Dr, Roscoe, IL 61073, USA.

V7, MARSHALL ISLAND. Tom, N4XP, states that he will be here for 10 days beginning February 27th. His callsign is not yet determined. He states that the low bands will be priority with 30 meters for Europe as well. QSL to home callsign N4XP.

VK9C & VK9X COCOS-KEELING AND CHRISTMAS ISLANDS. Just a quick reminder to look for W0YG, W8UVZ and WB9Z to become active from Christmas Island as VK9XX, now until February 13th and from Cocos-Keeling, February 13-20th, as VK9YY. Their activity will be mainly on 160/80 meters CW, the WARC bands both CW and SSB, and RTTY on 15/20 meters. QSL via W0YG. Also, Charlie, W0YG, states, "Please do not include VK9XX and VK9YY cards in the same envelope."

VP2E, ANGUILLA. Mike/W1USN, Bob/AA1M and Jim/W1HL will be enjoying a week in VP2E-land. Operations on CW and SSB are anticipated. Callsigns have not been assigned as of yet. Dates of the operation are March 1-8th. QSL to home calls.

VP2V, BRITISH VIRGIN ISLAND. Dallas, K1DW, informs OPDX that he is headed to Tortola, BVI, for three weeks starting on February 16th. His intention is to operate the ARRL DX CW and SSB Contests and the CQWW SSB Contest. During the non-contest times, Dallas plans to operate 160-10 meters on SSB, CW and RTTY. Dallas states, "I know that VP2V is not a rare country, but many may be looking to fill in countries for 5/6 band DXCC and RTTY DXCC."

---------- King Hussein Pronounced Clinically Dead

By Suleiman al-Khalidi

AMMAN (Reuters) - King Hussein of
Jordan, a symbol of strength and
stability in the volatile Middle East who survived several assassination attempts, was pronounced clinically dead from
cancer Friday.

"He is clinically dead, but he is still on the life support system," a government
source told Reuters. Earlier, a senior
official said the support system could be switched off later Friday.

Family members gathered at the royal bedside to say farewell to the man who ruled Jordan with a firm but benevolent hand through 47 years of Middle East turmoil, including wars, revolutions, military coups and assassinations.

The family spent more than an hour at the hospital.

"He's dying," a royal relative said as the king's ambulance swept into a military hospital after his overnight flight from the United States.

The 63-year-old monarch was kept on life support after the collapse of all his major organs except his heart.

The king's sister Princess Basma was seen crying as she left the hospital, on the outskirts of Amman and not far from a complex of royal residences.

One official said King Hussein's wife, Queen Noor, remained alone and praying at the hospital after other relatives left.

Around 100 Jordanians gathered outside the hospital.

"We cannot stay in our homes when he is sick and our hearts are crying," said Mohammad al-Abdullat. "He's a great man and he made great sacrifices for Jordan."

Presidents and prime ministers praised the Middle East's longest serving leader for his personal commitment to Arab-Israeli peace.
Right up to the end they prayed he would somehow overcome the cancer that was slowly killing him.

Witnesses saw the king's brother, Prince Hassan, who was sacked by Hussein as heir to the Hashemite throne just last week, leaving the hospital with his wife Princess Sarvath.

Ordinary Jordanians expressed sorrow.

"People are in pain. He is a beloved king. He served his country.
It's like he's our family," said one man as he opened his office in central Amman.

King Hussein, who himself survived several attempts to kill him, had been treated in a U.S. clinic for a relapse of non-Hodgkin's lymphoma.

Thursday, two days after he underwent a last-ditch bone marrow transplant, his condition deteriorated sharply and specialists allowed him to fly home.

"He wants to die in his own country," a Jordanian minister said.

The king's eldest son, Abdullah, a major-general commanding the Jordanian Army's special forces and appointed crown prince and heir only 10 days ago, was at Queen Alia airport to meet the flight.

Abdullah has been plunged into the affairs of state of a country standing precariously between the Middle East flashpoints of Israel and Iraq.

Diplomats say they expect most Jordanians to rally around the 37-year-old prince. The United States has expressed confidence Abdullah will maintain his father's commitment to Jordan's 1994 peace deal with Israel -- a pact that has never been popular with many Jordanians.

President Clinton paid homage to the Jordanian monarch at Thursday's National Prayer Breakfast in Washington.

"I ask you to pray for our King Hussein, a wonderful human being, a champion of peace, who I promise you today is fighting for his life mostly -- mostly -- so he can continue to fight for peace," Clinton said.

French President Jacques Chirac lauded Hussein as a "great leader" who worked tirelessly for peace.

Ian,

Try www.nzart.org.nz/nzart as a starting point. No CTCSS on our repeaters and the split is -600 below 147.000 and +600 above 147.000 and -5M offset at 70cm. There is hardly anywhere here where you are out of range of one repeater or another and the System (on 439.000) links darned near the whole country.

The days are now getting longer, but that means there's still a lot more darkness around. What better way to spend those cold Wintery DX-less nights that to curl up with your own copy of VK0IR, Heard Island. Written by KK6EK, Bob Schmieder. This is the complete account of the 1997 DXpedition that eclipsed all world records for amateur radio operations from remote sites and set the standards by which all DXpeditions are now compared.

I have 3 copies left. Cost is $20US plus shipping (approx $3US). If interested, let me know ASAP. ALL proceeds go to the Heard Island Fund.

Wild guess is VK9XX on Christmas Island - what time?

Usually, pileups on 21.027 are the result of split operation; look for
the DX station on or close to 21.024.

Let me Get this RIGHT, You are Selling a $299 (what looks like a 9600 Picpar) modem and you claim that it is at the price of a 1200 unit. Ok , I guess that this sort of proves that Anything will sell on the Net.hi hi

Please check what the real cost of TNC's is, the last time I checked it was not $299 for just a "Plain" TNC.

As a point of INFORMATION to ALL of you.
If you want to get Packet and TCP/IP working at a LOW-LOW COST check out AGW Packet SV2AGW (George Rossopoulos) did a SUPER JOB and is actively improving it.
You can locate the FREE software at http://www.forthnet.gr/sv2agw/start.htm. IT works and IT's FREE the only part that will cost you is the TCP/IP part, The driver is not free and you need to register it. The registration fee is 28 $USA The Rest of the Program's are FREE and work wit WIN95/98 and almost ALL of the Baycom /PicPar devices.

Hi Walt,

All members of the Jordanian royal family automatically have Amateur
Radio privileges in Jordan. Although the new king does not appear
to have a call sign, King Hussein's widow--the American-born Queen
Noor--is JY1NH. King Hussein's brother, the former Crown Prince
Hassan, is JY2HT, while his cousin, Prince Raad, JY2RZ, is chairman
of the Royal Jordan Radio Amateur Society.

Hi,

Putting up any sort of exotic antenna system would land me in more hot water with my significant other than I could probably handle.

So, with that in mind ... any suggestions for improving my reception so I can get the occasional oddball station that rarely shows up on my radio?

I own a Radio Shack brand with AM, FM, MW, LW and Shortwave and live in a quiet neighborhood with the usual assortment of power poles and wires.

Any suggestions would be helpful.

Thanks.

Jim

410. EI DXpedition Group

Paddy and his DXpedition was shipwrecked on a Pacific island. Unconscious for hours, he lay face down in the sandy beach, and was found in this condition by a tribe of cannibals. When he awoke, he found himself tied up in a great big cauldron, full to the brim with water, vegetables, and loads of lovely herbs and spices floating all around.

As he came to his senses, the chief cannibal grabbed him by the hair and shook him violently saying, d'ye see this spear, well I'm gonna ram this into your neck, an' kill ye, and then we're gonna eat ya'.

Paddy said nothing, and then the chief took several paces back, faced Paddy, and started to run at him with the spear out before him. As he reached Paddy, he noticed that Paddy was laughing, stopped, and said to him,'Do you realise what I just said to you'? At which Paddy was in stitches, spilling water from the cauldron onto the sand.

'I'm gonna ram this spear into your neck and you're gonna die, an we're gonna melt you down and eat you.' So, again the chief took a run at Paddy, and again stopped a few inches short. 'Are you thick or sometin', what are you laughin' at ? Do you not understand ?

'Is there something funny about this, that I don't see?' 'Yeah', says Paddy, 'every time you run at me with that spear, I keep shittin' in the pot'.

I have met quite a few Florida hams using nextel 2 way radio. The
coverage is statewide...except for the Tallahassee area(figure that one
out???)I know that
in some areas nextel service is poor, downright lousy. (Please don't send
email to reiterate that fact). Not so in Florida. If you are a
fellow ham using nextel two way radio in Florida, please take a look at my
web page at: http://www.geocities.com/SouthBeach/Coast/2863/
I'd like to have a qso with you on nextel. It is the ultimate HT experience.
I do not work for or have any financial interest in nextel com. I just
enjoy the magic of 2 way communications.
Hope to hear from you soon!
73 Al

Per the Italian DX Sheet and N4GN, an E4 operation will begin this
Monday, February 15th from the Palestine Hotel, Gaza by U.S. European
and Palestinian amateurs. No info on bands or length of the operation.
Suggest you watch other DX info bulletins for confirmation and details.

Then you don't understand how Nextel works. This is SMR, not cellular.
What he is talking about works like an amateur linked repeater system,
not like a cellular phone system. It is essentially a push to talk party line
for its trunk group that stretches over an entire state (and part of another).

I'm beginning to work a lot more Russian DX, but am reluctant to pay for access to the on-line Russian callsign server.

Is there a server somewhere of equal usefulness which is free? Have others used the pay server and found it worthwhile?

Also, can anyone help me with RA9MA and RZ9AY? The server returns a hit for RA9MA, but since I haven't signed up and paid the fee, the line for qsl manager is just a row of asterices.

I would be inclined to simply be patient & wait for the bureau.
(especially if your signal is good enough that you can call CQ & get
replies from Russia) A lot of these guys want your card as badly as you
want theirs, and there may already be some "PSE QSL" cards on their way
to you. (I finally worked UA0YAY in Zone 23 in early 1997 - and
received a PSE QSL card from Pavel via the bureau a few months later,
probably well before my PSE QSL card reached him!)

In great condition, with a few mobile scratches and 2 dings right on the top.. comes with a 25w Linear amp that attaches to the back, with DTMF microphone... It has awesome sensitivity, great for field work as it is extremely durable... the only reason I'm selling it is that I just purchased a Icom 706MKII and need to sell some stuff.
Read more about it here...

February 15, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, AJ3M, N4GN, W4SD, N5NJ, KG6AR, AC7DX, K8YSE, NE8Z, KK9A, KU9C, K0KL, AH0W/OH2LVG, DJ5AV & DX News Letter, DJ7AO, EA4DX, G4BUE & DX News Sheet, HA5PP, HS0/G3NOM, OK2AP, VE2EH, VE3SRE, VE6JO and YO2LDE & South-West DX Bulletin for the following DX information.

CORRECTION TO OPDX.395. Under "7O, E4 AND P5, YEMEN, PALESTINE AND NORTH KOREA" the FAX number for Yemen's General Director of Ministry of Communications (MoC), Abdulgader Ibrahim, was incorrect. The FAX number should be: 967 1 331457

3B8, MAURITIUS. The "DX News Sheet" reports that Mart, DL6UAA, will be active March 8th through April 24th as 3B8/DL6UAA. He will be part of the PAM (Paradise on Air Mission) DXpedition 99. QSL via home call.

3B9, RODRIGUES ISLAND. The Midway-Kure DX Foundation (WH7M) announces details for its 1999 Rodrigues Island 3B9 (AF-017) DXpedition scheduled for the 1st through 10th of April, 1999. A team of nine operators representing five countries will conduct the DXpedition on all modes from 160 through 6 meters. Plans are for up to nine fully equipped HF stations to operate from a number of locations throughout the island. One station will be dedicated to RTTY only. The DXpeditioners are Bruce Butler (W6OSP), Kimo Chun (KH7U), Jari Jussila (OH2BU), Victor Keller (XE1VIC), Jacky Mandary (3B8CF), Garry Shapiro (NI6T), Yuuji Yoshitani (JA3IG/K1NT), Ned Stearns (AA7A) and Frank Smith (AH0W/OH2LVG), team-leader. Chief pilot stations will be Andy Chesnokov (UA3AB) and Gary McClellan (K7ZD). QSL Manager is Joyce Johnson (N7LVD). Callsign TBA later. For inquiries, send E-mail to: mkdxf@aztec.asu.edu

3D2, FIJI. Ed, K0KL, will be in Fiji March 20-27th, and will be signing 3D2KE. His operations will be on 40 and 15 meter CW. A 2nd op K2VGD will log. QSL via the callbook address.

5T, MAURITANIA. Yoshi, JA1UT, will be active again, possibly with other JA operators as 5T5U from March 12-17th. QSL via JA1UT.

5X, UGANDA. Several reports indicate that Joe, G3MRC, will be active again sometime during this month as 5X1P. Activity will be mostly CW and some digital modes. His length of stay is unknown. QSL via home call.

9G, GHANA. The "DX News Letter" reports that Hardy, DL1IAL, was expected to be active as 9G5HK for three months starting in February. So far there have been no QSNs reported. QSL via DL1IAL.

9M2, WEST MALAYSIA. "The 59(9) DXReport" reports that Ross, 9M2AX, is quite active on 160 meters. He uses a Sloper 160 ft. up for JA, EU and NA; and an Inverted L at 170 ft. for Africa, 4S7 and VQ9. On the receiving end, he uses 1000 ft. Beverage at 130 ft. OPDX has spotted 9M2AX this week on 1833 kHz between 1400 and 1430z. Also, check 80 meters during this time.

A3, TONGA. Paul, A35RK, has returned to his home on Lifuka Island last week. He states that Cyclone Cora did do some damage to his home, boat, and antenna system. However, the damage is not severe and all can be repaired. He has received repair parts for the Force-12 yagi and will overhaul it as soon as possible (Paul says, "It works, but the loading is "funny" and it's a little "bent"). His Butternut vertical (80/40/30 meters) is not working on 80m...cause unknown. His TS-450 was repaired in New Zealand, and he bought a new "battery bank" and solar panel which should solve the "chirpy CW" problem. His ICOM 706 is still in New Zealand waiting for parts from Japan. Paul now has a 2 element 6m beam, and as soon as the IC-706 arrives back on the island, he will be working 6 meters for the first time. Future plans for Paul included a trip to Fiji in May for 3-4 weeks. He will operate 3D2RK from both Viti Levu and Vanua Levu...mostly CW. He may return to Tonga via Wallis Island (FW) but that is not yet certain.

CO9, CUBA. CO2WF and CM5KL will organize a group of Cuban operators at Boca Ciega Beach for the ARRL International DX SSB Contest March 6-7th. Their callsign will be CO9BCC and they plan to operate 160-10 meters. They will enter the contest as a Multi/Stations and Multi/operators entry. The list of operators are: CM2KL, CM2YR, CM5MA, CO2GY, CO2II, CO2JA, CO2JX, CO2KC, CO2NT, CO2VQ and CO2WF. The QSL Manager for CO9BCC is VE2EH. Check out the following Web pages:
http://www.qsl.net/ve2eh/co2wf.htm
http://www.qsl.net/ve2eh/co9bcc.htm

DXCC FAQ #3. OPDX InterNet Subscribers will receive this article by Bill Moore, NC1L, Century Clubs Manager, as an addtional bulletin.

E4, PALESTINE (The excitement begins!) As of February 13th, Ali/JY4NE and Sami/ZC6B/KF2GJ have began operating from Gaza as E44A and E44B, respectively. Operations will take place from Sami's QTH. Activity by Ali may last up to 5 days. Look for them mainly on SSB but with some CW operations. QSL E44A to JY4NE, PO Box 9392, Amman 1191, Jordan. QSL E44B to: P.O. Box 1008, Gaza, Palestine.

Ray, HS0/G3NOM, reports that five members of IARV (International Amateur Radio Volunteers) led by JA1UT will soon return to Palestine, Gaza and West Bank to complete their aid project for a hospital telecommunications facility. In their spare time, mainly in the local evening after work, they plan to be active as E44MPT (Ministry of Post and Telecommunications) on 3.5 - 28 Mhz including WARC bands using CW/SSB/RTTY. They are expecting to be active by the weekend of February 20-21st. The popular DX frequencies will be used depending on QRM and coordination with current Palestinian stations. QSL will be again be via JA1UT as per ZC6MPT.
A third group is headed to Gaza. Look for Martti/OH2BH, Pekka/OH1RY, Pekka/OH2TA and Bernie/W3UR to be active from the "Palestine Hotel". Their callsign/s and QSL routes have not been announced as of yet, but thanks to the local Palestinian counterparts, they will be able to operate with the E4 prefix shortly after thier arrival and set up. Bernie/W3UR, editor of "The Daily DX", reports that their team will be working closely with the IARV to prevent interference amongst all E4 activity. Also mentioned, during the first few days of operation, they will concentrate on the most productive bands. Look for them to be active on CW and SSB. More details will be forthcoming soon by Tim Totten, N4GN. OPDX will send out a special InterNet bulletin on the update.

EN5, UKRAINE. Look for EN5J as a Multi-Single in this year's ARRL and CQ WPX SSB Contests. QSL will be via KG6AR: Chris Williams, 1117 S. Del Mar Ave., San Gabriel, Ca. 91776-3034.

HC8, GALAPAGOS ISLANDS. Look for Bob/N5KO, Stephen/K6AW and William/W4ZV to be active as HC8N in the ARRL DX SSB Contest (March 6-7th) as a Multi/ Single entry. QSL via AA5BT.

J7, DOMINICA. Members of the Foundation for Amateur International Radio Services (FAIRS) will be here now through February 22nd. Look for the following operators/callsigns: David/KK4WW (J79WW), Gaynell/KK4WWW (YL op - J79GMV), Kay/KE4EKH (YL op - J79EKH), Don/KE4UGF (J79UGF) and Larry/N4VA (J79VA). Activity will be CW/SSB on 40-6 meters, the IOTA frequencies and the WARC bands.

KG4, GUANTANAMO BAY. Look for a group of stateside operators to be active from here 2100z, February 16th, and operate through February 22nd. Their operations will be primarily on the WARC bands and 160 meters before and after the ARRL DX CW Contest. The group will use the callsign KG4SD during the contest. Look for the following callsign (with QSL routes): KG4DZ (via KG4SD), KG4SD (via W4SD), KG4ZK (via W4ZYT) and KG4NW (via NW3K).

NH7, HAWAII. Rick, NE8Z, reports to OPDX that he will be on Maui from Febraury 27th through March 6th. He will be active as NE8Z/NH7. Activity will be on CW on the WARC bands. QSL via K8LJG or NE8Z.

OKDX DXPEDITION UPDATE. The members of the OKDX Foundation have set up a new Web site called "Czech DXpedition PACIFIC 99". This group will be active towards the end of the month, please refer to OPDX.394. Meanwhile, check out their Web site at: http://www.okdxc.cz/pacific99

QSL INFO AND NEWS.....
3D2DX CARDS. Roberto, EA4DX, reports to OPDX that the all QSLs received direct with postage have been processed, labeled and mailed, and that the last pile of QSLs (700 envelopes from US and JA stations) would be mailed from the US on Tuesday the 9th. He states the backlog has been cleared. If you have not received your cards in a couple of weeks, just E-mail Roberto (rdiazg@nexo.es), and he will check to see if your card was received and mailed. He also suggests that you check the following online log Web site to see if you are in the log:
http://www.qsl.net/ea4dx/3D2DXlog1.htm
Do not send bureau cards because he is not a member of the Spanish Bureau. QSOs not requested directly will be mailed automatically directly to the different national bureaus, but these process will not begin before July. Roberto states 3D2DX DXpedition from last September netted (no duplicates) a total of 15,500 contacts on 160-10 meters SSB and 500 RTTY (15/20 meters).

There is a new QSL route for WP3C. Please QSL now to: Alfredo Velez, HC-02 Box 7455, Utuado P.R, 00641 U.S.A. Alfredo's E-mail address is: morse@coqui.net

Pierre, VE2EH, reports that he is the QSL Manager for CO9BCC (see CO9 above), CO2WF and HH2LQ.

Masahiro, AJ3MI, just returned from his trip to Vienna, Austria; Tbilisi, Georgia; and Geneva, Switzerland. He would like to thank everyone who worked him. Masahiro was on the air from 4U1VIC on January 28th and 4U1ITU on February 5, 6, and 7th. He made about 200 QSOs from 4U1VIC and about 1,650 QSOs from 4U1ITU. He suggests sending your QSLs via the bureau or direct to the following address:

4U1VIC - Vienna International Centre, P.O.Box 200,
A-1400 Vienna, Austria
4U1ITU - International Amateur Radio Club, P.O. Box 6,
CH-1211 Geneva 20 Switzerland

BQ9P, B1A and BT2HC UPDATE. Steve, KU9C, states that he is expecting these cards from the printer next week. At that time, Steve states that he has freed up his calendar over the next few weeks to devote to processing the direct requests for these cards. Steve states again, if you requested several calls in one envelope, please be patient, this slows the process. He is aware of various award submission deadlines, and will do the best he can to support your submission needs.

Steve, DJ7AO, reports that he is now the QSL Manager for Ray, DL2GG/YV5. Please send your QSL via bureau or direct to DJ7AO: Stefan Reyers, Luebecker Str. 4, D-22964 Steinburg, Germany. Don`t use the CBA of DL2GG because he is living in Caracas. E-mail your requests to: dj7ao@qsl.net (home page is: http://www.qsl.net/dj7ao)
Also, visit Rays homepage at http://www.qsl.net/dl2gg

SEMI-RARE IOTA TO BE ACTIVATE. Silvano, KB5GL, will operate from Grand Isle (NA-168) in the Gulf of Mexico, February 19-21st. It has been reported

that the request of this DXpedition came from Europe. This island was activated several years ago and only one time. The callsign will be KB5GL/5. Silvano will operate on 20-10 meters, including the WARC bands on the IOTA frequencies (14260, 21260, 18128, 24950 and 28460 kHz). QSL DIRECT ONLY to: Ron Lago, AC7DX, POB 25426, Eugene Oregon 97402 USA.

SPECIAL EVENT. Industry Canada has issued the callsign XL3D in celebration of the 25th Anniversary of the Ontario DX Association for the period starting at 0000z, March 25th, ending at 2359z, April 25th. XL3D will take the place of VE3ODX as one of the two "10 point" stations in the 3rd Annual Ontario QSO Party to be held April 24th, at 1800z through April 25th, at 1800z. QSL direct with SASE or SAE with sufficient return postage to: XL3D, Ontario DX Association, P.O. Box 161, Station A, Willowdale, Ontario, M2N 5S8, CANADA. Or you may QSL via the bureau via VE3ODX or VE3SRE. For further information on this or the Ontario QSO Party visit the Ontario DX Association Website at:
http://www.durhamradio.ca/odxa
Or E-mail your questions to Bob, VE3SRE, at: ve3sre@rac.ca

SPECIAL EVENT. Vitaly, VE6JO, Director of the Calgary Amateur Radio Association, reports that Industry Canada has authorized the use of the special prefix XO6 in place of VE6 for amateurs in Calgary, Alberta, for the period of Febraury 14-28th. This is to honor the Provincial Special Olimpics which will be held in Calgary February 26-28th.

V2, ANTIGUA. Tyler/K3MM, Roland/K3RA and Bob/N5NJ will be here February 17-23rd, and will be operating in the upcoming ARRL CW DX Contest as a Multi-Op/Two transmitter entry. During the contest, they will be using the callsign V26O. The operation will take place from the V26B (V21N) contest station. Before and after the contest, the operators will use their own Antiguan callsigns on RTTY, FSK, and SSB. QSL via the following callsigns/operators: V26O via N5NJ, V26MM via K3MM and V26RA via K3RA. ADDED NOTE: The V26B contest station is still available for the 1999 ARRL SSB Contest. For details, contact Sam/WT3Q via E-mail at: WT3Q@aol.com Details on the V26O contest station can also be found on the Web page at: http://www.frc-contest.org/v26B/index.htm

VP2V, BRITISH VIRGIN ISLAND. Look for Jack/W4NF, Bill/W4RM, Cliff/W4CE and Dave/W4DAV to be active as VP2V/WW4RM in the ARRL DX Phone Contest, March 2-8th. Certificates will be awarded to all stations working him on all 6 bands during the contest. Activity is planned for CW and Phone on all bands (including WARC bands) before and after the contest. QSL via W4RM.

VP5, TURKS & CAICOS. John, KK9A will be operating in the ARRL DX Phone Contest using the contest callsign VP5J. He will use the callsign VP5/KK9A before this event. He may also try to work a little of the CQ 160M Phone Contest. QSL to his home callsign.

VP8, SOUTH SANDWICH. The "DX News Sheet" reports that Carl, G4VFU, who is active as VP8CZJ/MM near Caracas, Venezuela, is saying he still hopes to be active from South Sandwich Islands later in the year.

420. Rig for 6m DXing

Newsgroup: rec.radio.amateur.dx
Date: 1999-02-15 00:00:00 UTC
From: forrestc@lewis.mt.net
Message-ID: <rhNx2.31$rQ4.86793@news2.randori.com>
Source record: 25817

WARNING: Rambling ahead:) I hate when I ramble because I can't seem to do a good job of condensing what I want to say..... But oh well.

I'm just getting started out in the ham radio world and am looking into doing some DXing in the 6m band. As of today I have zero equipment at all here and as a result, would like to spend as little money as (reasonably) possible to get what I want.

First of all, I'm an apartment dweller - I'm not planning on doing DX from here, but instead, probably going mountan-topping this summer. Since I live about 20 miles from the Continental Divide here in Helena, Montana, I plan on trying to work some stations from there.

I also need to pick up something which will do 2M and 70cm to work the local repeaters, along with CTSS, and DTMF.

So, here's the real question. What options do I have for a good, 12VDC powered 6m radio primarily to be used for DXing. I'm specifically looking at the lower end of the band, and I am primarily interested in something with a digital frequency display (I really hate not knowing where I am.).

The reason why I mentioned that I need to do 2M and 70cm is that I'm open to spending a little more to get a tri-band rig. I do, though, really want a handheld 2M/70cm radio instead of an automotive mount.

Is there a tri-band 6m/2m/70cm handheld which is fairly decent for DX work and which won't reqire my checkbook to suffer a lot? Or, alternatively, is there a single band 6m "12v powered" rig which is quite inexpensive.

I'm also interested in hearing about mobile 6m antennas - meaning either auto mounted OR small enough that I can throw it in the back seat of the car.

What I really want is something I can go to a remote site and plop down and do some DXing with on the 6m band and something (else?) which I can use as a general purpouse 2m and 70cm radio.

-forrestc@imach.com

421. Re: Rig for 6m DXing

Dear Forrest,

I don't know what other equipment you may already have and if you are inclined to "roll your own", I can highly recommend the TenTec transverters for 6 meters.

I have built two of them and they work great. If you already have an HF rig that will cover 20 meters, all you have to do is have an antenna for 6 and you're cooking. The TenTec transverters will do whatever mode yourHF rig will.

It only puts out 8 (eight) watts, but from my QTH near Chattanooga, I have worked most of New England, as far west as Colorado, and into Mexico and Canada. Not bad for $95 against big bucks for a factory rolled 6m rig.

73 and good luck

426. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-02-16 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7actfi$r61@news.Hawaii.Edu>
Source record: 25823
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.digital.misc

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, WH6U, (jeffreyh@hawaii.edu), or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL

bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas.

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send email with the word "subscribe" on a line by itself to cq-contest-request@tgv.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to

dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's headers (before the first blank line). This will cause followups to your

article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

They say all good things must come to an end and so it is with the VK0IR, Heard Island Dx-pedition book. The response has been tremendous and there is only 1 (one) book left.

What better way to spend those not so cold soon to be Spring DX-filled nights than to curl up with your own copy of VK0IR, Heard Island. Written by KK6EK, Bob Schmieder. This is the complete account of the 1997 DXpedition that eclipsed all world records for amateur radio operations from remote sites and set the standards by which all DXpeditions are now compared.

I have 1 copy left. Cost is $20US plus shipping (approx $3US). If interested, let me know ASAP. ALL proceeds go to the Heard Island Fund.

From: "Tim Totten, N4GN" <n4gn@n4gn.com>
To: DX editors <editors@n4gn.com>
Subject: E44DX QRV from Gaza

The following release is based on information from Martti, OH2BH as
relayed through Jarmo, OH2BN.

73,

Tim Totten, n4gn@n4gn.com
http://www.n4gn.com

E44DX QRV from Gaza
1615Z, 16 February 1999

A major international amateur radio operation from Palestine--newly added
to the ARRL DXCC Countries List--commenced shortly after 1200Z today,
signing E44DX. The call sign was released today to the Palestine Wireless
Society from the Palestinian National Authority's Ministry of Posts and

Telecommunications (MPT).

Led by Martti, OH2BH, the international team includes Bernie, W3UR, Pekka, OH1RY and Pekka, OH2TA, who are carrying out this DXpedition in cooperation with Ali, E44A and Sami, E44B.

They are using two stations from the Palestine Hotel, and will be concentrating on 14195, 21295, 7005 and 3795 kHz during the first four days of the operation to work down the initial heavy SSB and CW pileups. Before winding up the DXpedition next Tuesday, February 23, the team will provide additional bands, with frequencies to be announced later.

QSL the E44DX operation via OH2BN.

From: "Tim Totten, N4GN" <n4gn@n4gn.com>
To: DX editors <editors@n4gn.com>
Subject: Brief E4 update

0715Z, 16 Feb:

OH1RY, OH2BH, OH2TA and W3UR arrived in Gaza late yesterday. As I write this, W3UR is guest operating as E44A (the personal call of Ali, ex-ZC6A, also JY4NE) on 14195. I expect the Finns will be QRV from the Palestine Hotel shortly--once they've had enough daylight to get antennas installed.

I also hope to talk to the guys soon, and I should be able to provide more details at that time.

73,

Tim Totten, n4gn@n4gn.com

=-

Release #1
=-

Date: Tue, 16 Feb 1999 07:45:58 -0500 (EST)
From: "Tim Totten, N4GN" <n4gn@n4gn.com>
To: DX editors <editors@n4gn.com>
Subject: E44DX on the air!

I just received the following quick update from Bernie, W3UR, in Gaza:

"We have just returned from the MPT with license E44DX. We have made several QSOs from the Gaza College and will be on the air within the hour using two radios from the Palestine Hotel. We have antennas (dipoles and vertical) set up for 10 15 20 40 80 meters. It's an excellent location which is less than 100 meters from the Mediterranean Sea. We plan to start out on SSB trying to work down the demand. Then switching to CW

later. QSL via OH2BN."

Indeed, E44DX just fired up on 21295. They should soon have two stations running full time at the hotel. A third E44DX station will likely be on from time to time at the Gaza college. Don't be surprised if you also hear one of the foreign operators guest operating as E44A or E44B from Sami's home station on occasion, as well as Sami and Ali on the air from one of the three E44DX stations. Between the six operators, they will be trying to keep as many as four signals on the air when possible.

More details when I have them . . .

73,

Tim Totten, n4gn@n4gn.com

NOOO!!!!
I'm not the manager for CO2KG or CM2KC.
Can u tell me who is posting that information????

I'm QSL Mgr for:
CO2JD, CO2MA, CO2HR, CM2CK(SK), CO8ZZ, CM8ZZ, CO8NA, CM8DM, CO8DM, CL8VP,
CM8VP, CL8UB. I help forwarding QSL to CO2VG and CM2VK.
I serve these stations via HI3K or HI3JH....

QSL to HI8LUZ, HI3LFE, HI4M via my US Call- AD4Z only.....

Thanks and I hope that you help me forwarding this INFO..

E44DX Team Meets Arafat, Begins CW Operation

GAZA CITY, PALESTINE, Feb 18, 1999--Members of the E44DX team got to meet Palestinian leader Yasser Arafat today. According to Tim Totten, N4GN, Arafat expressed his support for ham radio and sent his regards to the worldwide Amateur Radio community. Totten called the meeting "the absolute highlight for the team," which racked up more than 10,000 contacts during its first two days of operation.

Meeting a (possibly former) terrorist leader, responsible for approving skyjackings and sending 250 Americans into the ground at 500 mph from 30,000 feet is a highlight ? He is a lunatic ass whose perception of REALITY is warped by too much time spent breathing radon in a cellar, and how much money toward his next radio will be provided by charging $2.00 a QSL card.

Steve,

E44DX has been a terrible mess. I thought the CW operation was better, but not much. The DX was on 7005 last night with some fool jamming on top of him with what sounded like one of those "pulsating amplifier tuner-uppers". I went and worked VK9YY instead. There will be plenty of E4 operations in the immediate future. Maybe once the "newness" wears off (and the pile-ups a bit more civilized) I'll try again.

Hello, everyone, I have a mint shape HW101 (from Heathkit) to give to a new home. The unit doesn't have a vfo, but everything else in installed. The unit was put together by Heathkit many years ago, used for about 100 hours, then the vfo was removed(I was helping a friend out with his unit and gave him mine).

The chassis is mint, contains all tubes, parts, etc...anyone like to have this piece of history? Well, you pay shipping and the rest is yours...(free).

Oh, the YL says.."Better Reply Quick, otherwise it goes to the recycler!", isn't she great!

Thanks Everyone,

Lee

========
Amen. One bozo came on 14195 and proceeded to deliver a monologue
about how terrible all the jamming was, and how we should all call the
FCC, and then gave Hollingsworth's call and telephone number and
suggested that everyone call him to alert him to the situation. This
all took about 90 seconds, during which the DX was entirely jammed
out. He should have picked up the phone, called the number, and then
turn himself in.

I returned to ham radio after a long QRT period, and got into DX
about 6 months ago. It seems to me that this DX operation has
suffered a very high degree of "lidism". Some of it is almost
comical. While E44DX operating split was attempting to go through
numbers and was calling for ones, a certain notorious 8 land "Alpha
Hotel" came on the DX frequency and called in with his 8 land call.
Double dose lidism.

Perhaps the DX operation should be moved to 11 meters, with channel 20
as the DX frequency, listening on channels 25 through 30.

K1XV

Absolutely. I get the impression a lot of people think DXCC is a
contest, not an *award* - "If I work the new one before anyone else, I
win!". Win what?!

DX newbie hints:

1. Don't waste too much time slugging it out in the piles in the first
couple of days of an expedition to a rare one. It'll be a lot easier to
work later on.

2. Do spend a lot of time trolling for *other* DX during the first
couple of days of an expedition. All the big guns (and a lot of the
little ones) will be calling the expedition; something else rare may be
begging for QSOs just a few KHz away...

K1XV and NG et al,

>>>Perhaps the DX operation should be moved to 11 meters, with channel 20 as the DX frequency, listening on channels 25 through 30.<<<

Here here! Let them hack it out there!

And I wanted to make a clarification on my first post: I have no doubt that the callsigns I mentioned were being used by some "third party" and not the legitimate licensee. But if anyone know's those guys, they ought to let them know they are being bootlegged.

Once in a while you'd hear someone call on top of E44DX, but then realized that they didn't have the "split" functions enabled, and none of us can say we have NEVER forgotten to hit it before we keyed up. =). THAT'S forgiveable. But there is NO excuse for DX cops under ANY circumstances.

It's probably just my wishful thinking, but I could have sworn I heard him acknowledge me at one point, but the DX Cops and assorted idiots were 40 over compared to the DX's S9...not much of a fair fight!

And I agree with the comments about waiting for another day to work E4...I did the same thing when ZA came back on the air. It was probably 6 months after the first ZA op that I worked ZA1A on the first call.

Good things come to those who wait.

Heard the mess last night on 7005 also. When "K9BG" started calling on
the xmit frequency, I couldn't believe it. His call was given probably
20 times in a row. Then I heard the next callsign being used. I realized
that all these calls were eminating from the same sick individual. A
message to all the cops - no one is going to listen to you anyway so
just shut up and stop doing the same thing that you are trying to
prevent. If I make a mistake with my VFOs, I'll realize it soon enough.
No need to chastise me for an honest error. It's a hobby, for crying out
loud! Another pet peeve - the sick guy who pretends he's the DX station
and starts giving out signal reports to callers. You can usually tell
the difference, but pity the poor op who thought he just got into the
log.
73,
Tom N2CU

454. Conversion of Cushcraft A3WS

Message-ID: <7ak80j$1gdg$1@node17.cwnet.frontiernet.net>
Source record: 25951

Hi gang,

I am construction a homebrew version of the Cushcraft A3WS
12/17 meter, 3
element beam. I downloaded the .PDF files from the Cushcraft
site to see the
spacing dimensions. The scans that they have do not have the
resolution for
me to read what the values are!

Anyone with an A3WS manual that can tell me the
measurements?

The specs I need are.......

on BOOM:

Reflector to Driven spacing
Driven to Director spacing

on ELEMENTS:

Reflector: center to trap, trap to end
Driven: center to trap, trap to end
Director: center to trap, trap to end

Many thanks.......

Source record: 25953

Steve,
I understand how frustrated you feel over the E44 pile-up but a message like
this
is the Email equivalent of policing the frequency. It's very likely that some of
these
guys aren't very good operators, but it's even more likely that some sick
individual was
using their call sign to cause trouble. It's certain that if the practice of
posting calls
becomes common, the sicko's will just be encouraged to use other hams callsigns.
It's likely that posting call signs will just make the problems we have even worse.

I don't have a good solution to jammers, lids, DX cops, and the like, but this
is
one thing that I'm certain won't work.

VK9YY is Cocos Island. It is a dx-pedition by W8UVZ and W0YG, according to the 425 Dx News, which is an excellent medium to find out about current and future dx operations.

Steve...I take great exception to your listing my call sign as being
part of the problem last night on 40m CW. I'm pretty darned sure that
the closest I got to being on E44DX's xmit QRG was 2kc up. I too, quit
in disgust at the way hams were operating trying to QSO that station.
I have been a CW operator for 46 years and that is not my style of
operation no matter how frustrated I may get. I think you listed the
wrong station as being part of the problem unless you can tell me
specifically what your talking about.

Not all have poor manners yet it's still a mess of a pig pile.

Besides, ARRL IS the cause. They approved the whole BS system of entities to make more bucks and give newly retired Honor Roll dweebs a reason to stay in the chase, thereby insuring their dues for years to come. No dues, no DXCC stickers. While idiots are the direct cause, the constant parade of ARRL announcements of idiotic new entities and ongoing pre trip "look at me" blurbs by insider traders like OH2BH are the catalyst FOR the stupidity.

Dear Chester,

Without going to QRZ to do a name search, I am not certain which call you refer, but if you will please re-read the ORIGINAL post and my subsequent clarification, I stated that it was apparent that some third party was using any one if not all f the calls I quoted to jam E44DX's transmit frequency.

I am sorry if you are upset, but I did try to make clear that that was my suspicion, and if anyone on the NG knew any of those licensees, that they let them know thier calls were being pirated.

73 and good luck.

mf,

>>Besides, ARRL IS the cause. They approved the whole BS system of entities to make more bucks and give newly retired Honor Roll dweebs a reason to stay in the chase,...(rest snipped)<<

I think if you were to count the number of people who are "at the top" of the DXCC rolls and figure this number against the entire ARRL membership, this idea is pretty preposterous.

The few "top DXers" dues is not enough to offset the cost of what you alledge. It just doesn't make sense.

That's like saying manufacturing cars promotes drunk driving. Pretty ludicrous.

Hi Walt. Sounds like you are happy and the ARRL is happy! So, what's the beef? I have been a member for almost 43 years and while I disagree with some of their policies, it is still their game. I have found them to be generally fair and uniform under the circumstances. I had a good 70 card until that fateful day..... Oh well.

I have 4-5 P5 cards too. But none from a valid operation. Am I at the top o' the Roll? In some eyes, yes. In my eyes and those of the ARRL, no way Jose. I can live with it since the people that worked

the invalid P5's are in the same boat.

I've heard this wash before, do you REALLY believe that when a station comes on frequency from a rare country that there wouldn't be a pileup if there were no DXCC? Give me a break. The competition of breaking a pile up goes far beyond DXCC
The skill of putting your tx freq on the last call worked to assure you get through the DX stations 250Hz filter, timing you call, and a whole host of others make it fun to work a rare station. I've broken many with 100 watts and a dipole within just a few minutes. I've also got more cards to apply for DXCC but probably never will. Why does every little thing wrong with ham radio always boil down to some ARRL conspiracy?

<mf_luder@my-dejanews.com> wrote:

>Meeting a (possibly former) terrorist leader, responsible for approving

You are aware of the fact that just about everyone who has been involved in the peace negotiations, excepting 'bibi' Netenyahu and a few Israelis his of age, are former terrorists both on the Palestinian side and the Israeli side. The Palestinian side is obvious, mostly ex PLO/Fatah terrorists. The Israeli side is also obvious, ex Irgun types and the like. Rabin was a terrorist in his youth and he and arafat could manage to get along... So what the hell is your problem ? Most of the Right Wing Likud old guard had terrorist pasts. Most of your early Israeli leadership had such pasts, its the younger generations like Netenyahu who do no(in a sense).

As for "possibly former" it is obvious to everyone who has half a clue that Arafat is no longer a terrorist, though both he, Netenyahu, and most of the other concerned parties are not above manipulating other terrorist groups to move events in their favor. Its a vast chess game and you should try to understand it before commenting crassly on it.

It is helpful to have at least half a clue before posting on such matters.

Cheers.

Kamal S.

At exactly what point did I say that the Israelis were not an equally terroristic group in their day, with one distinction. Acts of terrorism committed by the Israelis were against the British army stationed in Palestine until the withdrawl before the War of Indepdence, and a few attacks on Palestinians before Iraq, the Arab Legion, et al. proceeded to try an open war on behalf of their Palestinian brothers (so they claimed). These Israeli attacks can be chalked up to what we call WAR.

The Palestinians and later, the PLO, despite lip-service to the Koran, proceeded to attack anything they could, including British police stations, despite the long history of British aid to Arabs and a stance which was against the Declaration of Statehood in 1947. The PLO puppet mastered OPEC, they hijacked planes, called for the elimination of Israel (they learned that from their Nazi allies) killed athletes, and blew U.S. civilians out of the sky.

So don't cry us a river by saying the Israelis were terrorists. That view, while true from the standpoint of their jockeying for position immediately before the U.K. withdrawl, is tainted by your perspective.

Furthermore, after 1948, former Israeli freedom fighters went on to end up military officers, such as Rabin, responsible for the Air Force's development and procurement, Moshe Dayan and the rest of the "names". Despite the assurances of representation in the Knesset from day one, the Arabs chose to disbelieve, ran for Jordan and gave us 50 years of how abused they were and retaliation for it.

Looks like I'm clueless indeed.

It's the old double standard. The guys we back are "freedom fighters",
the guys the other side backs are "terrorists". But they're both the same,
doing the same things for the same reasons. The winners get to write
the history books, so their side always comes out on the side of the
angels, whether they actually were or not.

You are right, Gary. General Curtis LeMay once told an audience that he was happy we'd won WWII since he was sure he'd have been tried as a war criminal by the Japanese. I found that gem in a book detailing the creation, construction, and delivery of the first atomic bomb.

And as far as the guy starting this whole line of crap, come walk a mile in your enemy's shoes before you cry terrorist. Come with me to East Jerusalem some time (on your nickel/sheckel) and find out how bad the Arabs are and how good the Israelis can be. One day in 1995 I was very nearly shot by an Israeli policeman pointing a locked and loaded M16 my way for walking down the wrong street one day, not five minutes' trot from the Wailing Wall. This was followed by a full night of low flying F-15s to keep the Arabs from sleeping at night. I stayed (but didn't sleep) in the old National Hotel, which was full of Western medical doctors representing UNICEF bringing relief to the Palestinian children who were sick and starving literally to death, while not twenty miles away Isreali citizens shopped in a mall like you would find in any American suburban area. Doubt the UNICEF comment? Call their staff and ask for yourself. It's really troubling.

Both sides actions are beyond reproach, and it's up to us to get past this ancient blood feud. Using radio as a tool to bring goodwill and understanding between us all is a wonderful idea. Take your nasty comments and file them somewhere else.

Todd Ellis, N2XL

SB DX @ WW $OPDX.397
Ohio/Penn DX Bulletin No. 397

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 397
BID: $OPDX.397
February 22, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AD1C, K1XN & The Golist, K2DO, K2KQ, N2AU, WB2RAJ/WB2YQH & The 59(9) DXReport, NG3K, W3GO, W3UR & The Daily DX, K4CIA, N4GN, W5AJ, K7BV, K8YSE, W8EB, N9AG, BA1HAM, CE3CDV, DJ5AV & DX News Letter, G4BUE & DX News Sheet, HA5PP, HB9HFN, HL2KAT, JA8RUZ, ON6TT/5X1T, SM0AGD, UA0MF, VE3NQK, VK3TZ, VK9NS and XE1ITJ for the following DX information.

3D2, FIJI. Karl, K0KL, will be active next month as 3D2KE bewteen March 20-27th. Activity will be mostly on 40 and 15 meters CW. QSL via homecall.

3V8, TUNISIA. The "DX News Sheet" reports that Vlad, UA2FF, and other operators will be active in the CQ 160 Meter SSB Contest from the 3V8BB station.

4U1ITU, ITU HQ. Look for Don/K2KQ, Tom/K1TW and Piero/IK2BHX to activate 4U1ITU in the ARRL DX SSB contest as a Multi-2 entry.

5T, MAURITANIA. The International Amateur Radio Volunteers (IARV) will go to Mauritania to establish an emergency radio communication system in North Mauritania area. This time Tada, JA1CPS, is the leader and will head up a team of 5 operators. Yoshi, JA1UT, is NOT going to Mauritania this time due to the Palestine operation. The IARV will stay in Mauritania from March 11-17th. Activity will be on 80-10 meters, including the WARC bands on CW/SSB/RTTY mode. They have not specified which frequencies they will operate but will seek popular DX frequencies. They will operate during their spare time. QSL via JA1UT.

CE0, EASTER ISLAND. Roberto "Bob", CE3CDV, reports a group of 10 friends will depart on February 27th to activate Easter Island as CE0AA. They will be active until March 20th. Activity will be on CW/SSB on 160-6 meters. The QSL Manager is Sergio Del Gaudio, CE3WDH, P.O.Box 240-3, Santiago, CHILE. QSLs via Bureau are also OK.

CORRECTION TO OPDX.396. Under "HC8, GALAPAGOS", we mentioned that N5KO's name was Bob. This is incorrect. His name is Trey. Also, the LINK to the V26B site in the bulletin had a capital "B" in the URL and hence it would not work. The address should have been:
http://www.frc-contest.org/v26b/index.htm

DXCC NEWS. If you are not a OPDX InterNet Subscriber, you missed a special bulletin that was sent out announcing that the DXCC Desk will be purging 9U contacts as far back as January 1, 1994, and after. The purging will take place before March. The DXCC Desk reasoning is: "The submission of forged documentation is a clear violation of DXCC Section 1, Basic Rule 7, and also Rule 12 (a). Bill Moore, NC1L, from the League, says. "The list includes the callsigns listed below and may or may not be limited to these: 9U/F5FHI, 9U/EA1FH, 9U5W, 9U5DX, 9U5T, 9U5CW and 9U5DX. Remember, only the contacts dated January 1, 1994, or after do not count. Some have credits before this and these would be OK. The station 4U9U is OK."

E4, PALESTINE. The excitement continues from this one even though the LIDS/KIDS and SPACE CADETS try to disrupt operations. REMEMBER, ignore them! Anyway, several stations have been active with more to be aired in the coming weeks. As reported in last week's bulletin and in the specially issued OPDX bulletin (to OPDX InterNet Subscribers) throughout the week E44A, E44B, E44C, E44D and E44DX are all licensed to operate. A message from Jim Smith, VK9NS, earlier in the week informed OPDX that he talked to Ali, E44A (JY4NE). Ali stated that there are four students at the local college being trained so that they, too, can be licensed in the near future. Jim states, "....this is good news and hopefully we can expect plenty of activity in months and years to come. For myself, the appearance of Palestine on the bands with that brand new ITU allocated prefix/callsign has been one of the most signifcant events my amateur radio life. Having worked in the Middle East and knowing a little of events it is special. We should wish Palestine and its radio amateurs every success as they join our hobby."
The E44DX team continues to be very active mainly on SSB, but they were active for a few days last week before the CW contest and will do some CW operations after the ARRL International DX CW Contest, starting at 0000z, Monday. Their focus will be on 7 MHz. The E44DX Palestine DXpedition team's absolute highlight, however, has been their meeting with Palestinian leader Yasser Arafat where Yasser Arafat expressed his support for ham radio, and he sent his regards to the worldwide amateur community. Your editor talked to Bernie, W3UR (Editor of "The Daily DX"), on 10 meters last Saturday and he informed me that at that time, the team has worked about 23000 QSOs. Their goal is over 35000 QSOs before their operation ends on Tuesday, February 23rd.
The International Amateur Radio Volunteers (IARV) team led by Yoshi, JA1UT, is Palestine right now. The team is has 7 members/operators to help establish another radio-telecommunications system in Palestine. The announcement indicated that Toshi/JA8RUZ and Hiro/JP1TRJ will concentrate on amateur radio operation 24 hours continuously with two radios. Activity will be on 80-10 meters including WARC band CW and SSB. There wil be NO RTTY this trip. Yoshi was spotted over the weekend as JA1UT/E4.

FW, WALLIS ISLANDS. Just a quick reminder that Cedric, HB9HFN, will be active from here February 23th through March 8th. His callsign will be FW5FN. Please refer to OPDX.390 for more details. Cedric states that he will try to post the log during his DXpedition every 3-4 days on his Web page at: http://www.qsl.net/hb9hfn/log/fw_search.html
QSL cards will be available via the bureau. You can fill in your request at: http://www.qsl.net/hb9hfn/log/fw_search.html#request
Or send direct with a SAE (Self addressed envelopes) and the necessary return postage.

GU, GUERNSEY. "The 59(9) DXReport" is reporting that Bill, G4YWY, will be active from here March 24-28th, as GU4YWY/M. Look for him to be active mainly on 17/15 meters and the IOTA frequencies. QSL homecall.

HK0, SAN ANDRES (Update). The Woodbridge Wireless (WWI) from Woodbridge, Virginia, is pleased to announce its 4th DXpedition which will coincide with the 1999 ARRL DX Phone Contest. The callsign, as of now, will be HK0/W4DC, but they trying to obtain a short contest call. They plan to operate from March 2-9th. During the contest, two transmitters will be on the air. Operations before and after the contest will emphasize RTTY, CW, and the WARC bands. All contest QSOs will be confirmed automatically with a photo QSL via the bureau. You can send a SASE to W4DC if you need one quicker, or for QSOs outside the contest. The "TEAM SAN ANDRES" members are W4DC, K5OF, AA3KX, WB4ZNH, WN4FVU (if you need a YL contact), N2PP, and WZ8P. For the latest news and log checking, check out their Home Page at: http://www.pwcweb.com/wwi/DXpedition

J6, ST. LUCIA. The St. Lucia Amateur Radio Club will celebrate the 20th anniversary of the independence of St. Lucia with an activity day on Monday, February 22nd. Look for J69SF on 10, 12, 15, 17 and 20 meters (SSB and CW) 1800-2200z. Activity will continue later if demand requires. The club will be sending a special certificate upon request. Help with the postage will be appreciated. Send certificate requests to: St. Lucia Radio Club, co/ Givan George J69AC, PO Box 1677, Castries, St. Lucia, West Indies.

KG4, GUANTANAMO BAY. The Florida Dxpedition Group will be active from here March 18-25th. Look for Bill/W4WX/KG4GC and William/N2WB/KG4WB to be active during the BARTG RTTY Contest (March 20-21st). Their contest callsign will be KG4WB. Also, look for them before and after the contest on all bands with special attention to 6 meters and RTTY. QSL via home callsign.

OON6TT ON THE ROAD AGAIN. Peter, ON6TT/5X1T, will be going to three countries (Ethiopia/Eritrea/Djibouti) in a 14 days emergency mission to assess needs and to bring in an intervention team to boost the UN World Food Programme's preparedness to deal with the conflict on the level of IT and communications. Peter states to not expect a large scale operation if he is able to receive licenses and to look for him during his evenings.

PJ8, ST. MAARTEN. Ron/ND5S, his wife Sue/KF5LG, Bil/W8EB and his wife Dorothy/W8DVC will once again be on this island. They will be there for three weeks between February 22nd through March 14th. The group will be

using the callsign of PJ8A for the ARRL DX Phone Contest and will use the prefix of PJ8/homecall for the rest of the time. They will be concentrating on 160 and 80 meters but have the capability to operate on 160-10 meters. The group's equipment includes: Icom 706, PK232 for RTTY, plus the Yaesu FT-900CAT, KamPlus for RTTY, Yaesu FL-2100Z amplifier, two R-7000 verticals and a 127 foot sloper for 160 and 80 meters. One vertical is located at the top of the 10 story building as well as the sloper. The other vertical will be installed on the three story balcony. This is their fifth year on the island. They will maintain a daily sked on 14200 kHz at 2030z with the gang back home in Michigan. So if someone wants to request a sked on the other bands, please feel free to stop by and make a schedule.

QSL INFO AND NEWS......
Mirek, VK3DXI, is currently back from his Z2/ZS trip and is now living in Singapore. He states that he was active as much as he could as Z2/VK3DXI, and ZS/VK3DXI considering it was stricly a business trip. Mirek will be doing the QSLs himself, and the best route is via his new QTH in Singapore (He is awaiting the return of his 9V1XE callsign): Mirek Rozbicki, 7 Seletar Terrace, Singapore 806908, Republic of Singapore. Bureau cards are via VK3DXI, however he also mentions his old addresses are still valid for VK2DXI, VK3DXI and 9V1XE.

Bill, K4CIA, is NOT QSL Manager for KV4FZ and has no logs or cards. This information was listed in DXNL after the 160 contest. Bill states that he used to help Stu, W2GHK, many years ago when he was Herb's manager, but that is history now.

Chen Ping, BA1HAM, is pleased to announce that NE9Z, Bill Rinker, as his QSL manager to handle all QSL cards for him (BA1HAM), except the domestic cards to/from China.

The following stations are QSL via N2AU: ZF2NT, NH7A, YC0LOW, RZ9WZ, ZP5XF, KL7Y, KH6X and W6XR. The ARRL DX Bulletin gave the wrong QSL information for the KH6X operation by K5NA. All QSOs as K5NA/KH6 are via K5NA.

Zoli, HA5PP, informs OPDX that 99% of the E30HA's QSLs went out last week. Now for the BAD NEWS. Zoli has been informed by the Hungarian Police that they found many stolen foreign letters which included a lot of E30HA request and QSLs in a postal worker's home. This means some will not receive QSL cards, and Zoli is very sorry about this situation which will cause many to re-QSL.

S7, SEYCHELLES. Erik/SM0AGD, with his XYL Eva and Thor/LA7XB, will be here for 2 weeks, March 1-14th. This is not a full-scale DXpedition, so look for S79AG and S79XB. QSL to operator's homecall. Erik mentions that there are some restrictions, 80 meters is not allowed at all and 40 meters only between 7050-7100 kHz. Look for them on CW above 7050 kHz.

SPECIAL EVENT. Once again the Eastern and Mountain District Radio Club (EMDRC) will be operating with the special event callsign VI3GP to celebrate the 1999 Australian Formula One Grand Prix. Operation will

take place on all HF bands 160-10 meters (SSB and CW) and locally on 2m. Various EMDRC operators will operate from their home QTHs, many of whom are regular DXers. The callsign will be operational from 0000z, March 4th, through 2359z, March 7th, except for the 2 hours during the actual GP (approx 0300-0500z March 7th). QSL to VK3ER via the bureau or direct to the CBA, PO Box 87, Mitcham, 3132, AUSTRALIA, with return postage and SAE. As usual, a special QSL card is being designed for this year's GP.

T4, CUBA. During the ARRL International DX SSB Contest, look for the "No-Name DX-Group" to be active again operating as T48RAC from Santiago. Activity will be on all bands. Operators will be VE3ESE, VE3SDN, CO8HF, CO8KL, CO8OT, CO8TW, CO8LY, CO8UZ, CO8VN, CO8DC, CO8AJ, CO8DD and CM8YK. There will be an on-line QSOs look up on the "KWARC" Web page at:
http://www.kwarc.org
Use the Cuban Flag as your guide. QSL via VE3ESE, Don Fisher, 48 Lucerne Dr., Kitchener, Ontario N2E 1B3. Send a SAE, and green stamp for QSL card or SASE in Canadian postage.

UA0, ASIATIC RUSSIA. Mike, UA0MF, informs OPDX that he is on daily during his evening on 160 meters (1830.5 kHz) calling USA at from 1200z to 1400z. He is in "Zone 19", and if somebody needs him for some awards, just send him a message for a sked via his E-mail address at: ua0mf@mail.primorye.ru His QSL Manager in the USA is W3HNK. Direct QSL cards can be sent to is address: Mike Filippov, P.O.Box 20, Vladivostok, 690021, Russia.

VK9L, LORD HOWE ISLAND. Ed, K8VIR, will be active again March 6-18th as VK9EHH. Look for his SSB activity on 14162, 14260 and 21300 kHz. QSL via W8WC.

VP5, TURKS & CAICOS ISLANDS. George/N2GA and Diane/K2DO will be active from the Providenciales, May 24th through June 1st. They will be active as a Multi-Single entry in the CQ WPX CW Contest on May 29th and 30th, as VP5GA. Before and after the contest they will be active as VP5/N2GA and VP5/K2DO. Please QSL to home calls and to N2GA for VP5GA.

XF4, REVILLAGIGEDO. A group from XE1 operators will activate Socoro Island (NA-030) belonging to the Archipelago of Revillagigedo, March 1-15th. Their callsign will be XF4MX. Activity will be on 160-10 meters, Satellites, RTTY, CW and SSB. THe XF4MX DXpedition is formed by the following Operators:
XE1FSK Danny, operator in digital modes and phone.
XE1FRF Fabo operator CW
XE1ITJ Louis Pilot Station and Spokesman
XE1MX Mark team manager and responsible for the operation,
QSL Manager, and phone operator
They will also be in the ARRL DX SSB Contest as a Multi-Single entry.

XT, BURKINA FASO. The "DX News Letter" reports that Michel/F5RLE and Joel/F5AOW, are active as XT2DM (on CW) and XT2OW (on SSB) now until March 1st. Look for them to be active on 12/17/30 meters. QSL via F5RLE.

XU7, KAMPUCHEA (Cambodia). OPDX has been informed by Chung, HL2KAT, that Mr. Song Hyung Sub, HL2AQN, will be active here as XU7AAC from March

11-15th. He will leave Seoul, Korea, March 10th at 0000z to fly to
BangKok and from here to Pnompenh. He will depart from Pnompenh on
March 17th. Activity will be on 40/15/10 meters CW/SSB. QSL via HL2AQN:
Song Hyung Sub, Buwon Apt. 9-101, 340, Wonjeong-dong, Bucheon, Kyunggi-do,
421-200 Korea. Chung states that a relative Website can be found at:
http://www.qsl.net/hl2kat
Also, Song's E-mail address is: hl2aqn@sbsmail.net

Enough with this. This thread should be in another NG. It has nothing to do with radio.amateur.DX or radio.amateur.POLICY!

Hi Casey,

Did you work this station in this weekend's CW DX contest? I worked what I thought was V26O, but this could have been V2BO if I miscopied the B as a 6. Anyone else know?

73,

Marv

Yes, but be careful: expeditions to remote locations have a habit
of ending before they were scheduled to end. Lots of things can
go wrong, like unexpected bad weather.

>2. Do spend a lot of time trolling for *other* DX during the first

>begging for QSOs just a few KHz away...

Also I'd say DON'T rely on packet unless you have a big signal.
By the time you see the spot, most likely several hundred others
have as well. Tune the bands yourself and try to find 'em before
the packet spotters do. That's not as easy as it used to be but
still can be done. I actually heard E44DX calling CQ last night
on 40 CW right after the contest ended. The spot popped up about
2-3 minutes later.

IMHO it's a lot more fun to find the DX yourself instead of
following the packet spots anyway.

The one time I listened to them on phone was Sunday afternoon
on 10 meters. They had North America on hold and were working
only Europe.

That did strike me as silly given that Europe has a much easier
path to E4 than North America does, especially W6/W7. That's kind
of akin to a Pacific expedition telling Europe to stand by so he
can work only the USA.

Good point. But where the country isn't that hard to reach (like E44 or ZA) you can pretty much count on someone else activating it later.

> Also I'd say DON'T rely on packet unless you have a big signal.
> By the time you see the spot, most likely several hundred others
> have as well.

ABSOLUTELY. If the DX is at all rare, by the time they're spotted you won't have a chance unless you have a BIG signal. Even then, the lids may make it impossible for you to *hear* the DX.

> I actually heard E44DX calling CQ last night
> on 40 CW right after the contest ended. The spot popped up about
> 2-3 minutes later.

Geez, now that's luck!

I should add another point... If you're lucky enough to have access to a big signal, don't be afraid to call CQ. You'll work dozens of garden-variety DX stations for every rare one (though I still find that enjoyable) but every once in awhile, you'll get a good catch. Last night, while waiting for my computer to digest the contest logs, I called CQ on 14.226, and KH4/IV3NVN replied.. and in a previous incident, a friend asked me to transmit on his station so he could check a RFI complaint -- I called CQ with my call, and KF6BL/T5 in Somalia came back...

73 Doug
(who's just about to give up on E44DX -- can't ever hear him for the jammers, and when I can, I can't figure out where he's listening since 75% of the pileup calls continuously, even when the E4 is transmitting...)

> of a deplorable standard.

Well, I've heard a whole lot worse<g>... It sounds like a
middle-of-the-scale operation from here.

I'm not particularly fond of working by numbers, but is there any way
around it? (that's a question, not a statement... I've never been on
the DX end of a pileup of that magnitude, but even as a W9 I sometimes
have enough callers to have some difficulty picking one out. Maybe
numbers is the only way to thin it out enough to get one call?) And
working by numbers does always seem to bring out those who insist their
area is being slighted. Maybe they want to prefer W6/W7 while they know
they have propagation out there, knowing it will later favor W1/W2/W3 &
they can get them then? Doesn't do much for the W1 who's got to go to
work though.. Maybe "Stations with 'A' as the last letter of the call,
go now, E44DX"?

> There has also been much antisocial use of frequency space, with

Yeah, that was a nasty surprise last night & this morning on 40 and 10
CW respectively.

> There have also been instances where certain geographical areas or
> callsign groups have been called specifically, but then the expedition
> operators have proceeded to work other stations who call out of turn.
> This is the absolute antithesis of good operating practice, and simply
> encourages everyone else to call out of turn when they hear others
> being "rewarded" for their bad manners.

This, and failing to stick with the number you're asking for, are
unexcusable. If you're going to call for a specific area, and then come
back to some other area, why bother.

I wonder if the idea of huge DXpeditions is counter-productive? In the
case of a country like Palestine (which has a permanent population, is
not geographically impaired to most parts of the world, and is not
difficult to reach for smaller contest expeditions) maybe the money
would be better invested in training more local operators and equipping
some club stations; it would take longer for everyone to get an E4 QSO
in their log, but the bands wouldn't get trashed nearly as badly, and
the blood pressure reading of the amateur community as a whole would be
much lower...

One wonders if the 9X5HG plan (answer someone else's CQ, make one QSO,
and then QSY elsewhere) might actually be more efficient...

i have to say the r7000 is one of the best antennas i have used
cushcraft sent a trap update kit last year along with additional tubing
to install between the traps for more beef. i have it installed 15 ft
high on 1.5 in. emt conduit without guys, it has survived the northeast
michigan winters and even came thru unbent from a 75 mph storm last june
(wish my 140 dollar purple martin house could say the same) performance
is right up snuff and sometimes better than my other ground mt verticals
and the r7000 is much more quiet.the only complaint i have about the
antenna and most of the other cushcraft ones are that they insist on
using stainless steel hardware which equals tighten once buy new u-bolts
for the next time .

Hello

what is your opinion of the radio shack (realistic in the UK) dx-340 for dx work?

The reason I ask is because although radio nederland gives it 4 stars out of 5 it doesn't recommend it for dx work.

are there any mods I can implement to render it more suitable? what is your opinion of this receiver? What antennas give best rx (in your experience)?

a (hopeful) dx beginner.

Besides, there's nothing about the DXCC program that inherently requires unethical behavior. This is strictly the fault of those engaging in the bad behavior.

Heck, we've got datamode operators (not many, mind you, but a handful is enough to make my point..) clobbering CW QSOs. Is that the ARRL's fault because they published articles on datamode operation & ads for data controllers?

I recognize one or two of these call coming on packet and Telnet to say it was not them. My call was also used on E44dx Cw xmit frequency (K1VKO) while I was sitting there listening to it. I put it out on packet. The more I read the packet (Tri State) and DXTELNET spots about how guys were giving up, the madder it made me and the longer and harder I listened and clamped down the filters. I have been away from Dxing for about 4 years and BQ9P and the E4 were new ones for me. I found that nothing has changed but the date, as far as nitwits being nitwits is concerned. Everything shall come to he who waits. I Ended up with SSB on 15/20 and CW on 20/30/40 so I can put that one to sleep and screw the jammer's.

It's interesting how impressions vary. From the west coast of the U.S.
(Oregon)
it sounds like the E44 operators were favoring Europe.
I was only able to hear them a few times, their choice of bands made them
unavailable to the west coast much of the time. When I could hear them, they
were invarably working.

516. by the numbers

Newsgroup: rec.radio.amateur.dx
Date: 1999-02-23 00:00:00 UTC
From: Steve Jepsen <ai7w@NoSpam.com>
Message-ID: <36D2DD8E.FED92228@NoSpam.com>
Source record: 25864

The subject of running pile-ups 'by the numbers" was brought up in the E44 thread. A comment was made that the E44 was favoring W6,W7. In fact, working "by the numbers" puts much of W7 and to a lesser extent W6 at a disadvantage.
The reason for this is that the W7 call area extends from Mexico to the Canadian border and W6 extends from Mexico to approx. the 42nd parallel. Since propagation to the middle east and Europe opens to the southern latitudes first, and often opens only to the southern latitudes when conditions aren't perfect, only the southern part of W6, W7 has a chance at the DX.
The DX station calls W6, W7 and works the population centers of Southern Calf. and Arizona for a few minutes and moves on. Washington, Oregon, Idaho, Montana, Wyoming, and Northern Calf. are left out. In contrast, if propagation isn't open to the Northeast or Northern Midwest, the DX station get very few contacts from W1, 2, 3, 8 and 0, so he gives them more time or comes back later.
This is further proof that life isn't fair and neither is DXing.

Steve AI7W

517. Threat to DX'ing -- we need your help

Newsgroup: rec.radio.amateur.dx
Date: 1999-02-23 00:00:00 UTC
From: K0HB@arrl.org
Message-ID: <7av2aa$uu8$1@nnrp1.dejanews.com>
Source record: 25865

About twenty-six years ago on August 4th, 1972, the Ap index hit 223, the ionosphere was bombarded with all sorts of solar particles with hard-to-pronounce names, and amateur radio was at it's peak. It has never been that good since. Ap indexes even in the 120's are almost unheard of lately.

Also, on that same date, titanium dioxide was first released in a commercial product. It has led inexoribly to the decline of amateur radio as we know it. Titanium dioxide is directly responsible for the decline of the Ap index, and the resultant decline of amateur radio. It has also led to a horrible decline in well tanned girl torsos at the beaches of the world.

In the late 60's a group of induhviduals who were rankled by the advent of incentive licensing looked for a way to ruin propagation and thus amateur radio forever. Since propagation depends on a solar component known as freckles-del-sol (better known as sunspots), a means of stopping sunspots would destroy would destroy amateur radio.

The group discovered the sun-blocking power of a natural chemical called titanium dioxide, but they needed a way to deploy a thin mist of the chemical into the upper reaches of the earths atmosphere. Since it could be dispersed by evaporation, these diabolocal fiends found the perfect means of sending it skyward.

First they quietly obtained virtually the entire world supply of titanium dioxide, and then they started a rumor in the medical world that the tanning rays of the sun could actually be harmful. Incredibly, in 1972, people would believe anything.

Literally millions of bikini clad ladies, even on Gilligans island, were panicked! After all, it was August, the height of the swimsuit season, and most of them had not nearly amortized their investment in the latest Jantzen bikini, or partial bikini. What could they do?

Meanwhile, the titanium dioxide Cartel had formulated a mixture of their chemical and coconut and put it on the market as not only a sun-blocker, but also a means of replenishing critical skin oils depleted by exposure to the sun.

Millions of bikini-owners flocked to purchase the new sun blocker, spread it lavishly on their bodies, and returned to the world beaches. Little did they know the horrible ravages they were inflicting on the E and F layers of the ionosphere, as the gruesome chemical evaporated from their skin and rose into the skies of the world,

from whence it ruins propagation on a global scale.

Hams, UNITE! Help take back the ionosphere! Be part of the solution,
not part of the problem. Visit your local beaches today and check
the skin of everyone for traces of this harmful solution. It can be
easily detected by it's characteristic coconut smell, and even small
concentrations are dangerous. Carefully sniff all bodies on the
beaches for traces of this chemical. If detected, throw the offending
person in the water to dilute the effects, and burn on the spot
any garments known to be contaminated.

Save amateur radio....
.....to the beaches, now!

I wanted to get the word out to all the sites about a thief by the name
of Glen Verasso of
Newark, Ohio. He entered into a trade agreement with me when he saw my
listing of
my Henry 2KD5 in one of the various ham sites, amongh whch this was one.
He offered to trade me an FT1000 (presumably an early one) for my Henry.
This seemed like an odd, but certaily reasonable trade so I went for it.
I carefully packed up the Henry in 3 boxes and sent it to him UPS, the
same time he sent a package to me, again UPS. What I received today was
a nicely wrapped box with three concrete blocks inside, total value
about $1.50.

I take up the thread where Walt Davidson wrote, commenting on E44DX:

> In comparison, the standard of operating on the recent ZL9CI
> expedition was exemplary.

But THEY did not have to cope that the only place where they could operate from was a hotel where the telephone system and the lifts break down as soon as you work with more than 50 Watts. They did not have to restrict themselves to a vertical and a dipole...

I am annoyed by the arrogant reaction of some guys in this newsgroup. As I see it (and I base my opinion on the fact that I talked to Ali, Sami, Bernie and Martti for my programme at Radio Austria International, and with the new team afterwards) ewverybody crushed down on the two local operators as soon as they went on the air. They were faced with very nasty comments by full-size-yagi-kilowatters from just across the sea, "hams" unable to understand that a relatively unexperienced OM with a TS-50 cannot cope with such a situation. Both E44A and E44B were happy with the "relieve operation" by the "big guns".

E44A and E44B spent all those last days trying to help the operators, meet all the demands and "demands" of ham community, in a very sensitive area and with humble means - and nobody cared to thank them.

Folks, read what you wrote in this thread, and if you find the time between DX-chasing, be a little bit ashamed about yourselves.

Dear "Hambone",

Because Canada is a Nation, not a northern state, and they can make up whatever regulations for their hams they like.

United States regulations are different for many different reasons. On reason we are on the subbands we are is due to the fact that historically we have had a greater on-the-air presence (senond to Japan these days), and therefore one reason we are kept above certain "cut-off" frequencies is to allow Hams in other countries to be able to communicate without being walked on by the Ugly Americans.

The behaviour on the E44DX operation should be more than enough proof.

Oh, there's a variety of inequities with that system. There's a bunch more hams in W6 than in W7, so if you take an equal number of 6s and 7s, you're being unfair to the 7s (who have more competition). (but if you take more 6s, the other 9 districts will complain & jam....) How do you handle portables? If I'm a 9 living in Massachusetts, do I call with the 9s or the 1s? (of course, with the 9s - but is that fair when calling a European station? My propagation to Europe is *much* better than that of the "real" 9s. But if I call with the 1s, how does the rest of the pileup know I'm really in 1-land?)

Unfortunately, so far it's the best we've got. (the "Stations with 'A' as the last letter of your call, go now, DX0DX" idea is beginning to look good<G>...)

Yikes. It would certainly be more convinient (geez, I can't spell this morning..) to be able to work SSB in 7060-7100, but I think the result would be utter bedlam.

Already, wall-to-wall datamode activity frequently begins where the CW activity stops. Add 40kHz of SSB to the mix and we have a real problem. Plus, with all the US SSB activity jammed into 40kHz of band, nobody would be able to hear any DX -- they'd all be transmitting in 7020-7060 & we'd be working split anyway!

A much better solution is to back a move to widen the 40m band. One plan I've seen suggested would give broadcasters exclusive use of 7200-7300 in return for making 7100-7200 exclusive amateur & adding 6900-7000 or 6950-7000 to the amateur band. That'd work a whole lot better...

The Canary Islands are part of Spain. (kinda like Hawaii is part of the United States) So the address data QRZ.COM has for EA8 stations comes from the Spanish government, and I would think if you wrote "Spain" on the envelope after the address, it would get through. (in fact, it might get through faster, as the postal sorter here in the US might not know where the Canary Islands are but has certainly heard of Spain!)

> of a deplorable standard. Yes indeed ... W6 and W7 call areas seem to
> have had preferential treatment throughout ... I have no idea why.
> Perhaps most of the sponsorship for the expedition came from there?

You have no idea why? How about for the same reason that South Pacific stations standby for Europe....poor propagation and short openings. We had about two hours following our sunrise when they were strong enough to work on 20m and 15m and about 30 to 60 minutes around their sunrise when they were workable on 30m and 40m. The rest of the time they were too weak to break the East Coast and European pileups. We had no openings at all between 0500 and 1500 - our nighttime. They must have been working other areas during that time.

The Middle East is one of the hardest areas in the world for us to work. Openings that favor us over Europe, Japan and the East Coast all at the same time are infrequent.

> I do not like the "working by numbers" routine; in my experience it
> only leads to frustration and annoyance amongst those who are left

> inevitable result of bad manners, unwelcome comments and jamming.

I don't either and I would rather let propagation favor each area but sometimes it just doesn't. In those cases I have no problem letting the DX work the area that is most difficult for them.

> There has also been much antisocial use of frequency space, with
> operators at E44DX persuading callers to "spread out" and occupy an
> ever larger swathe of the band, to the inconvenience and irritation of
> other band users.

I agree and I heard complaints about this from the local DXers. The splits they used were unnecesarily large and stations were often spread out too much.

> There have also been instances where certain geographical areas or

Unfortunately this and other practices destroy any control the operator had over the pileup.

I dunno who is responsible for this - but I am actively chasing you, I
am sick of the ng being brought to gutter level and I am determined that
I will find and ensure that whoever posted this WILL find themselves in
the shit.

Anyone else in the ng got any thoughts?

So Gervald and ASO - details of these postings have been passed to your
prospective providers (even thought I see they were posted from
netline.cl) - who have also been informed.

I suggest you two find out whose responsible because I am sick of this
and not prepared to see this ng in the gutter anymore.

Where in the rules does it say that using the lower end of 40 for S.S.B. is not allowed in the US? Maybe you should understand the fact that it is a voluntary ARRL band plan. I'm not going to move to Canada because I don't like snow!

He's easier to work, because his operation style is far superior to the E44DX style. His CW is better, he returns with full callsigns most of the time (and when he does they are correct), he is predictable in his QSX and he is in full control of the pile up, giving the lids no chance. It is one of those pleasant operations, which you can work if you can hear them. That was not true of the E44DX operation. HA3NU who keeps running unbelievable rates on 10 right now is one of the best CW-operators I have ever heard. Hope he goes to P5 and A5 one day....

566. Frequency Protection Act...A New Beginning

Newsgroup: rec.radio.amateur.dx
Date: 1999-02-26 00:00:00 UTC
From: erlpnk4yz@aol.com
Message-ID: <19990226074755.14118.00000492@ng-ca1.aol.com>
Source record: 25764

With the recent closure of the Impeachment proceedings, the new Congress will be soon conviening and with it a new opportunity to REALLY protect Amateur Radio into the 21st Century.

The Morse Code issue aside, the biggest threat to the Amateur Radio Service is the encroachment of commercial concerns. I think it ironic that the commercial concerns were the ones that pushed Amateur Radio Operators into the "shorter" wavelengths, and now they are the ones anxious to push us back out.

The Spectrum Protection Act will ensure that no matter how the FCC may "reassign" or "reallocate" "our" spectrum, they would be obligated to make sure we are granted equal bandwidth elsewhere.

The recent FCC issuance of an Experimental License to the ARRL to exercise on the 5MHz band is proof that the exodus from HF to UHF and higher is creating a vacuum in HF and the lower VHF portions of the spectrum, and I think we'd be foolhearty to not take advantage of that.

I personally think any HF allocation presently existing is safe from any such action, and I am willing to bet that if we were to petetion the FCC for it, we would get new allocations in the 30-50MHz range with little resistance. Much of the 11 meter "export" rigs and many of the 6 meter rigs and trransverters easily cover this portion of the spectrum, and would make it wide open to all the NCT's looking for new horizon's to explore.

The following list are persons serving on the House and Senate Commerce Commission that oversee's such enactments. Please consider a letter of support for this Act and consider we are acting on our children's behalf, too, not just ours!

568. QSL 100% via buro??

Newsgroup: rec.radio.amateur.dx
Date: 1999-02-26 00:00:00 UTC
From: faunt@netcom19.netcom.com
Message-ID: <FAUNT.99Feb26113908@netcom19.netcom.com>
Source record: 25766

OK, what does the phrase "QSL 100% via buro" mean?

Does it mean they always reply to bureau cards, as well as direct, or does it mean that they really don't want direct cards and want you to go through the bureau?

73, doug

569. May I draw your attention to...

I have always taken it to mean that they will answer all QSL's that come from the Buro. It has nothing to do with declining to respond to direct mailing since direct invariably includes SASE's.

Sorry in advance for posting a tired question, but I did a search on old posts and didn't quite find the answer.

Am looking for simple DOS/Win95 DX contest logging software - no need for rig interface or packet cluster, etc. Freeware, shareware, forsaleware - willing to pay a few bucks for an online download. Any recommendations appreciated.

Thanks much & 73,
Barry N2LU

Hello from Vienna!
There are different infos:

DXMB 1102 from 29.June 1998 says:
7X4AN NEU an POBox 30133, Barcelona, 08080 Spanien.

425 DX Bull. 384:
7X4AN Mohamed Boukhiar, P.O.Box 30133, Barcelona, E-08080, Spain

1997 QSL Routes from DXNL:
7X4AN Mohamed Boukhiar, 10 Rue Louis Lumiere, F-18000 Bouvges, France

and often in 425 DX Bull. to DJ2BW.
Sorry, but no exact help available! (for me)
Forgot to say: Info from PROLOG is DJ2BW for the operation in 1994.

Source record: 25781

Doug,

If you are working any DX at all, you should get a couple of 5 by 7 envelopes on file at the bureau that covers your callsign.

The card will go to the bureau for the NUMBER in your call, not the call district you live in. So if you happen to be a "W9" but live in Florida, you need to send the envelopes to the "W9" bureau. Put your callsign in large letters where your return address would normally go, then put at least three stamps on it. Mail it to that bureau. They normally forward cards once a quarter or once every six months.

Like Dean said, it can be a heck of a lot cheaper that direct mailing, although pretty slow. Also, the ARRL has an "Outgoing" bureau, so if you are a League member, you can use this service to forward the cards at pennies on the dollar in expense. It's a good deal. Ive used it several times with very good results.

73

Steve, K4YZ
Chattanooga, TN

PS...You do NOT have to be ARRL memeber to RECEIVE cards. Just have the envelopes on file. E mail ARRL at qst@arrl.org and they will tell you the address for your bureau.

Last time I heard 7X4AN give his QSL info, this is the address he gave.
(I got my QSL direct from Algeria, but that was shortly after he came on
the air & he's changed QSL info since then)

(BTW, Mohamed seems to be knocking Algeria way down the "most needed
countries" list in a real hurry! - every time I turn on the rig, there
he is...)

I would be pretty sure it's 4N800H. (yes, a weird call!) There have
been a few of these with the 800 in the call active, I know I worked two
in the contest last weekend.

I'm afraid I don't have QSL info, I would go through the Yugoslav QSL
bureau.

Hello OM's!

I have installed on my WEB-Site the latest list of all (known) 10M
FM-repeaters worldwide.

The list has been prepared by DL6XB and will be updatet frequently.

You find it at the following URL:

http://www.qsl.net/dl2gg

Good DX on 10M FM !

73 from Venezuela

Appreciate the URL for the E44/HA1AG web page log lookup. Thanks. 73,
K3BEQ

601. Drake R8B Sound Enhancement

Newsgroup: rec.radio.amateur.dx
Date: 1999-02-28 00:00:00 UTC
From: Michael <MKlevickis@worldnet.att.net>
Message-ID: <36D9BFB0.1EAD@worldnet.att.net>
Source record: 25899

I operate a Drake R8B primarily to receive commercial voice transmissions. Although this is a decent radio, the sound quality from the internal speaker leaves something to be desired. I have considered adding either a Grove SP 200-B Sound Enhancer or a JPS or MFJ Digital Signal Processor to improve the sound quality and readability.

Has anyone had any experience with any of these units? I would appreciate suggestions and reasons for choosing one over the other. I have read that some DSP's distort voice transmissions because of a signal processing delay. Is this a problem with either the JPS of MFJ units?

Any comments would be appreciated.

Michael

No, they'd be handled by the Puerto Rican buro. The W3 buro would
probably send them back to the originating country

603. Ohio/Penn DX Bulletin #398

March 1, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N2SU, WB2RAJ/WB2YQH & The 59(9) DXReport, W3EH, N4TO, N4GN, N5AW, W5CTV, WC6DX, KE9KD, N9WDQ, K0RX, W0YG, 9K2HN, DJ5AV & DX News Letter, F6AJA & LNDX, G3VMW, G4BUE & DX News Sheet, G4UZN, HB9HFN, IK3ZAW, JA3EMU, LZ3IH, ON4CEL, ON4VT & The Picture DX Bulletin, OZ5AAH, OZ5TOM, PA1AW, PT2NP, PY7ZY and ZP5AZL for the following DX information.

3B8, MAURITIUS. The "DX News Sheet" reports Bob, G3PJT, will be active March 8-20th as 3B8/G3PJT from 3B8CF's QTH. Activity will be mainly CW but there will be some SSB. Look for him on 80-10 meters (including the WARC bands), and in the RSGB Commonwealth Contest (March 13-14th). QSL via his home call.

3B8, MAURITIUS. The "Les Nouvelles DX" reports that Patrick, F6CMH, will be active as 3B8/F6CMH from March 17-26th. He will be operating on all bands SSB.

5A22, LIBYA. QSL Manager Veronica, IK3ZAW, informs OPDX that starting March 1st, Abu Baker, 5A1A, will be signing the special callsign 5A22PA. The reason for the special callsign was not given. Look for him on the bands 160-10 meters CW/SSB. QSL via IK3ZAW, via the bureau or direct to: Veronica Della Dora, Piazza Fiume 14, 30126, Lido/Venezia, Italy.

9M6, EAST MALAYSIA. Tony, G4UZN, will be operating from Sabah with the call 9M6TUZ from the Hillview Gardens Resort between March 16-23rd. Operations will be mainly CW. QSL via home callsign, G4UZN, direct or via the bureau (direct is preferred).

9N7, NEPAL. "The 59(9) DXReport" is reporting Sergio, IZ6BRN, who is currently active as AP2WAP, makes occasional trips to Mirmi. He is licensed as 9N7RN and plans to make his next trip in late March/early April for a few weeks. QSL via IK4ZGY.

A9, BAHRAIN. Will, WC6DX, is active until March 16th as A92GF in Bahrain. He will be operating on all bands including WARC bands, but especially near the IOTA frequencies. He is especially looking for North America West Coast stations. He will be active in the ARRL DX Contest March 6-7th, and has requested a special contest callsign TBA. North America stations QSL via WC6DX, others via EA7FR. Bureau cards are welcome to either call, but please DO NOT QSL to the Bahrain bureau.

BV, TAIWAN. Look for Juergen, DJ3KR, to be active as BV3/DJ3KR after his Svalbard operation (See JW below). His activity will take place March 19-23rd and March 26th-April 17th. He will be operating mainly on the low bands and the WARC bands. QSL via DH3MG.

C5, THE GAMBIA. Frank, ON4CEL (ex-5A21PA), will be active here March 17-25th. No callsign was mentioned. Activity will be 80-10 meters mainly on CW, but with some SSB operations. Frank mentions that just like his 5A operation, he will try to work USA hams on the lower bands during their greyline time. QSL via the bureau or direct to: Franky Beuselinck, Oostmolenstraat 95, 9880 Aalter, Belgium. DO NOT use the address in the callbooks. There will be an on-line log available on his Web site after the operation at: http://user.online.be/~frankyb/index.html

C5, THE GAMBIA (Update). Steve, G3VMW, reports that he has been issued the callsign C56SW for his DXpedition trip to The Gambia next week. Please refer to OPDX.393. He will be active on all bands 160-10 meters between March 4-18th, from Kololi, near Banjul, mainly on CW. His equipment is a Kenwood TS-570DG with doublet, loop and 160m dipole antennas. QSL via his home callsign (G3VMW). His C56SW logs will be on his Web page with a log search when he returns back home.

CE0AA DXPEDITION UPDATE. A few additional details about the CE0AA DXpedition to Easter Island have been provided (Thanks to N5AW and XQ3IDY). The team will leave Santiago at 1200z on Saturday, February 27th, to take a 5 hour flight to CE0 and stay until March 20th. They will have 6 stations up and plan to include 6 meters. It wasn't clear if there will be an experienced 6 meter operator along, but they were advised to use the 50.110 DX calling frequency. They are also planning operation on 160 meters (1830 khz) and have special permission to operate on 30 meters (10.105 mhz). The QSL route is via CE3WDH as previously reported.

E44DX WRAP-UP. Excerpts from a press release from Tim Totten, N4GN, state that the E44DX team of W3UR, OH1RY, OH2TA and OH2BH returned to Tel Aviv, Israel on Tuesday, 23 February, after completing 33,775 QSOs with 14,640 individual DXers in 7 days of operation from Gaza City, Palestine. SPECIAL NOTE: The complete press release will be provided to all OPDX InterNet Subscribers. However, the press release states that please QSL E44DX via OH2BN. A multi-color, folded QSL card is being designed. Meanwhile, an on-line log search is now available at the official E44DX web site: http://www.n4gn.com/e44dx/
Due to the number of requests from DXers with E-mail-only accounts, the same log search database may now also be searched via e-mail! Simply send a message to e44dx-log@n4gn.com with your call sign at the beginning of the SUBJECT line. The BODY of the message is ignored. Coming soon--the

E44DX Internet Slide Show! Watch the web site for further details.

E4, PALESTINE. The update on the IARV team in Palestine is that Yoshi, JA1UT, returned home last Wednesday and Toshi, JA8RUZ, and the others will be or should be QRT (on Monday) by the time you read this. However, the four Hungarian DXers, Zoli/HA1AG, Gyula/HA1TJ, Anti/HA3OV and Laci/HA3NU operating as E44/HA1AG from Gaza, will be active until 1300z on March 3rd. The operators have mainly focused on CW but have operated on SSB and RTTY. The team has kept two stations on the air simultaniously around the clock. Their preferred frequency has been 7 kHz from the band edge on CW and 80 kHz on RTTY. SSB has been on the usual DX windows. A Web page has been set up for on-line QSO look up at: http://www.okdxc.cz/e44
QSL via Zoli Pitman, HA1AG, Somogyi Bela ut 18, Gyor H-9024, HUNGARY. SPECIAL NOTICE: In some callbooks (RAC), the Zip code is given as 9300. It's wrong! Although the letters sent to the wrong zip code reach HA1AG, it take much longer. QSLs will be printed right after the operation. Another station signing, E41/OK1DTP, has been active on the 80/20/10 meters bands. Not much is known about this station and activity has been very limited. The operator states he is in Jenin, West Bank, and to QSL to OK1TD.

E44IPA, PALESTINE? Ben, OZ5AAH, Chairman of International Police Radio Club in Denmark (ex OX3IPA, OY5IPA, TF/OZ5IPA, HS0/OZ5IPA and more) will be active from Hebron area from March 10-15th. The callsign has not yet been confirmed by authorities, but Ben will try to get E44IPA. Activity will be mainly CW on the WARC bands and the lower bands. QSL via home callsign, direct only. QSLs are good for most police awards (Sherlock Holmes, Hercule Poirot and Lt. Colombo). Any support/donations are most welcome. His E-mail address is: beniparc@post3.tele.dk
His Web page is: http://home3.inet.tele.dk/beniparc/

FR5/T, TROMELIN ISLAND. Henri, FR5ZQ, now signing FR5ZQ/T, has been active over the weekend on 20 and 10 meters SSB. He will be there until March 3rd. Activity seems to take place around 1800z and 0300z.

FT5Z, AMSTERDAM ISLAND (This one is interesting!). The "Picture DX Bulletin" reports that Mikael, FT5ZJ, is more frequently active now on SSTV. He is mostly seen on 20 meters between 1600 and 2000z. QSL F2YT. See the "Picture DX Bulletin's" pictures of the month at: http://www.ping.be/on4vt/

FW, WALLIS ISLAND (Update). Cedric, HB9HFN, now signing FW5FN, reported eariler in the week that he lost his amplifier after only 300 QSOs. He also states that propagation is not very good but hopes it will improve. Europe, look for him on 10108 or 10135 kHz as it seems that there no EU QRM on these frequencies. Cedric states there will be NO 160 meters due to his linear and no trees for support around the hotel. He will, however, spend more time on 80 meters.

HK, COLOMBIA. Gerard, F2JD, who is active as HK3/G0SHN and can ususally be found on HF, is now active on 6 meters also. Sorry, no QSNs yet.

IOTA NEWS......
EU-088. Tom, OZ5TOM, will be active from Lasoe Island from April 18-25th, as OZ5TOM. He will only be active on 20/40/80 meters SSB, from aprox. 1900-0300z every day while he is on holiday. He does mention that if 10 meters is open, he will also try there. Tom will use only 100w and a wire antenna. QSL only direct via Tom Wallin, P.O.Box 202, DK-2640 Hedehus, Denmark.

NA-168. Chris, W5CTV, will operate from Grand Isle in the Gulf of Mexico, March 6-7th, possibly the evening of the 5th. Chris will only have 10 meters and will operate on the IOTA frequency (28460 kHz). QSL DIRECT to: Chris Vincent, 2620 Long Branch Dr., Marrero, LA, 70072, USA or via Bureau.

OC-066. Guy, FO5QA, is a newly authorized licensed resident on the Tikehau Atoll in the Tuamotu Archipelago.

SA-084. Pedro, HK3JJH, will try to active Cacagual Island for two days March 6-7th (another source reports March 3-4th). He hopes to arrive on Malpelo Island after his Cacagual operation and be active on 10, 15, and 20 meters SSB. QSL direct: P.O. Box 81119, Bogota, Columbia.

JW, SVALBARD. By the time you read this, Juergen, DJ3KR, should be active as JW/DJ3KR until March 5th. He will be operating mainly on the low bands and the WARC bands. QSL via DH3MG.

KG4, GUANTANAMO BAY. Look for Vic/N4TO and Arlan/N4OO to be active as KG4TO and KG4BV, respectively, from March 12-22nd. Operations will be primarily CW, and they will concentrate on the LF and WARC bands. QSLs via the home callsign of the operators, KG4BV via N4OO and KG4TO via N4TO.

PJ8, ST. MAARTEN. George, W3EH (ex K2KTT), will be activating PJ8/W3EH (formerly PJ7/K2KTT) from March 2-9th. He will be an entry in the 10 meter ARRL Phone DX Contest. As time permits, George hopes to be active on 80-10 meters both CW/SSB. QSL via W3EH, or for older listings including all paperback callbooks back to 1982, QSL via K2KTT.

QSL INFO AND NEWS........
Jean Michel, F6AJA, reports that the cards for 5R8OP and 5R8PR are still at the printers', PLEASE be patient.

Hamad, 9K2HN, reports that he has added his log book to his Web page at: http://www.gate.net/~morpheus/hamad/9k2hn.html
He states that there are 79959 QSOs listed. He has also currently added the following logs that he manages: 9K2F, 9K5HN, 9K2HN/P and 9K0A.
If you have any comments, please contact him at: 9k2hn@kubbar.com

LZ5W was active in CQWW WPX RTTY as a Single Op on 7 MHz. The operator was Slavi, LZ1MC. QSL via LZ1MC.

JA1UT's address is: Yoshio Hayashi, 4-20-2-401 Nishigotanda, Shinagawa, Tokyo, 141-0031 Japan

VK9XX/VK9YY. Charlie, W0YG, informed OPDX that they made over 12K QSOs from both islands (more QSOs were made from Cocos-Keeling than Christmas Island). He did mention that the cards must be re-ordered before QSLing can begin. The initial batch of cards received cannot be sent out (ed. reason not given). Charlie wants to remind everyone to PLEASE not send the VK9XX and VK9YY cards in the same envelope. Separate operations require separate envelopes. They will QSL one operation per envelope, but if you sent two separate cards in one envelope, you will have to re-QSL. Charlie states, "Any other way is just too inefficient and adds too much time to a volunteer job anyhow." By the way, they are already talking about the next trip!

Bin JA3EMU, QSL Manager for TZ6JA, states that he will accept QSL cards via the JARL bureau until the end of May in the year 2000. The reason is that he is withdrawing from the JARL. From June in 2000 onward, do not send QSL cards to the bureau, only direct to his QTH with SASE.

Ciro, PY7ZY, informs OPDX that he is receiving QSLs for his PY7ZY/7 DXpedition to Itamaraca Island (SA-046), but with two problems:
1) Many IRC were received without the stamp of the origin country. This is impossible to make exchange for postage returns.
2) Many DXers are sending cards without IRC/SASE. In these cases, QSL cards will be sent via bureau.
All QSL cards that were received will start going out beginning March 1st.

ZF2MO, who has been quite active in contests the last few weekends, reports that his QSL route is via OM2SA.

S21, BANGLADESH. It seems Bob, G3REP, continues to be active as S21YP on 20 meters CW. Activity seems to be around 0200 and 0300z. QSL via home callsign.

SV/A, MOUNT ATHOS. Several sources are reporting that Vangelis, SV2BFN, and possibly two other operators are planning to be active at the end of May. This will mainly be a SSB/RTTY operation.

WEBSITES FOR DXERS.....
The K1WY DX Association has moved its web site to a new server. The new address of the Web Site is: http://pws.prserv.net/k1wydxa

Kelly, KE9KD, reports a new Website called DX-Central DotCom is now set up and running at: http://www.dx-central.com
Kelly and a few other guys maintain this Web site which is dedicated to DX. They built the site because they found themselves frustrated in having to jump from site to site to get DX information. This site is 100% interactive and completely database driven. One is able to do callsign lookups, get QSL route and manager info, view a real time feed of the PacketCluster network, check logbooks and have an interactive chat session. The site also features a fully searchable index of ARRL and OPDX bulletins. They hope to add more in the near future. They are hoping this web site will be of value to the DXer and encourage input from the visitors.

YK, SYRIA. It has been reported that Omar, YK1AO, can usually be found on Fridays on the low end of 40 meters looking for USA stations. He has a good signal, but you have to QRS a bit to around 13 wpm. The best time to find him is 0400-0500z (late stateside Thrusday nite). Bob, N2SU, states, "This makes sense because Friday is the Muslim sabbath and is a good time to try for Middle Eastern stations..... FYI, Syria is #26 Most Needed (World) and #24 (USA) according to The DX Magazine."

ZP40, PARAGUAY. Tom, ZP5AZL, will be active in the ARRL DX Phone Contest March 6-7th, possibly using the special callsign ZP40Z. The same callsign will be used again in the CQ WPX SSB Contest in late March. His activity will be on all bands, especially the high bands. QSL via W3HNK. Also, look for Juan, ZP5MAL, to be active in the ARRL DX Phone Contest using the callsign ZP6T. He will only be active 1on 5 meter as a High Power entry. QSL via his home callsign.

ZV0, ST. PETER & ST. PAUL ARCHIPELAGO. Paul, PT2NP, Director-Secretary of the ABRA (DX Brazilian Association) provides the following update. The DXpedition will be using the call signs: ZV0SB (SSB) and ZV0SW (CW). Also, for the first time during their DXpeditions, they will try to work on 160 meters. The following is their suggested frequencies:
CW - 1825, 3505, 7005, 10140, 14005, 18075, 21005, 24895 and 28005
SSB - 1835, 3785, 7055, 14195, 18145, 21295, 24935 and 28495 kHz
Their main pilot and land coordinator will again be Ari, PT2BW. There will be at least another pilot. They are making the best effort to work in RTTY too, but it is not sure for the present. If this mode happens, the call sign will be ZV0SY and frequencies will be around 14080 and 21080 kHz. For more details, please refer to OPDX.395 and the ABRA Web site at: http://www.pt2dx.org.br

Subject: E44DX Wrapup

E44DX Wrapup: The Historic First DXpedition to E4-Land
28 February 1999

The E44DX team of W3UR, OH1RY, OH2TA and OH2BH returned to Tel Aviv, Israel on Tuesday, 23 February, after completing 33,775 QSOs with 14,640 individual DXers in 7 days of operation from Gaza City, Palestine. A special luncheon was hosted by a large group of Israeli DXers, showing their true ham spirit and hospitality. These DXers also provided the E44DX team with a memorable visit to the historic city of Jerusalem.

The last night of operating saw E44DX on 160 meters with good coverage to Europe and the U.S. Although the all-band total of 7430 U.S. QSOs is quite reasonable, the path to W6/W7 proved to be a real challenge. In spite of the difficult propagation, 1145 QSOs were made with the U.S. West Coast. The final JA total was 3720 QSOs.

One of the Yaesu FT-1000MP radios was donated to PAWS, the new Palestinian Amateur Wireless Society, which now holds the E44DX call sign. Another complete station was donated to PAWS, and is currently being used by E4/OZ6ACD from the West Bank region of Palestine.

The two locals, Dr. Sami, E44B and Dr. Ali, E44A are expected to be active regularly. Their assistance to the E44DX DXpedition was invaluable.

The E44DX team would like to thank the Palestinian Authority for their invitation to conduct this first E4 DXpedition as well for granting visitor licenses number one through four. Also, the assistance and support of Yaesu Musen Co. Ltd. (http://www.yaesu.com or http://www.yaesu.co.jp) was highly appreciated.

Please QSL E44DX via OH2BN. A multi-color, folded QSL card is being designed. Meanwhile, an on-line log search is now available at the official E44DX web site:

http://www.n4gn.com/e44dx/

Due to the number of requests from DXers with e-mail-only accounts, the same log search database may now also be searched via e-mail! Simply send a message to e44dx-log@n4gn.com with your call sign at the beginning of the SUBJECT line. The BODY of the message is ignored.

Coming soon--the E44DX Internet Slide Show! Watch the web site for further details.

Source record: 25906

Any suggestions on sources (net or other) for finding place names? For example, I worked RU1POL/0 last night. He gave his QTH as "Cape Billings". That's not in my Rand McNally "Atlas of the World, Masterpiece Edition", which I've otherwise found to be very comprehensive.

I also worked UA9JFS last night, and he gave his QTH as "Kogalym", which QRZ confirmed. However, that wasn't in my atlas either. (At least with that one, I was able to find via a Web search that it's apparently in the same area as "Chanty-Masijsk", which was in my atlas.)

>
> 73, doug

Basically it means what the op says. He/she will QSL 100% via the
buro...........

That is how some DX stations QSL. Send some SASEs to the 6 land bureau
and when
your letter manager has QSLs for you, you will get them.

If you belong to the ARRL, there is an outgoing QSL bureau. Look in QST
or the
ARRL website for details.

If you do not belong to the ARRL, there are other outgoing QSL bureaus
that will send
your QSLs bureau fashion.

If the DX station gives you a QSL manager, send the manager a SASE and
when logs are
confirmed you will get your QSL. If you don't send the manager a SASE,
you will most
likely get your QSL via the buro.....

73, Bob W8IMO
QSL manager for 8P6JG

>See the "Picture DX Bulletin's" pictures of the month at:
> http://www.ping.be/on4vt/

This one is VERY interesting indeed, since SSTV is _THE_ mode you work DX,
especially when it's frogs not knowing how to handle a CW or SSB pile up.
I hereby encourage voting for deletion of Amsterdam Island as a seperate
DXCC entity.

612. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-03-01 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7bdbvs$kun@news.Hawaii.Edu>
Source record: 25910
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

```
Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed
with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-
running thread results from a single cross-posted article, and the
contents of such a thread drift further and further away from being
"on-topic" in the various NGs that receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups"
posted on the 15th of each month.

Jeffrey Herman, WH6U
(rec.radio.amateur working-group)

Hello from Vienna!

For ZB2JO I have an old adress, but might be ok (is not his business adress;
I think he is retired now for some years: POB 907 Gibraltar.

But also he is in the CallBook 1999 with the following adress:
Alex Zammit
8 Kings House
Laguna Estate
GIBRALTAR

Another Adress (same as from my database) comming from DL2CC (updated by
ON4LCV on 19. March 1998): Alex Zammit; POB 907 Gibraltar.
(This QSL database from DL2CC you can find and download with an good
interface program at
the following URL: http://www.grossmann.com/ham/qsl

Sorry not more info.
Thats all for now.

629. HUMOR: SSB and the Y2K Bug

Newsgroup: rec.radio.amateur.dx
Date: 1999-03-03 00:00:00 UTC
From: bdiaz@my-dejanews.com
Message-ID: <7bhulepfa1@nnrp1.dejanews.com>
Source record: 25927
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.dx

While the press has said a lot of the upcoming things that
can go wrong with computers, come the year 2000, little
has been said regarding something VERY important to Hams.
Who cares if the world comes to an end, if you can't work DX?

When SSB was developed, it was a means of compressing more
usable frequencies in a given Band. Thus, rather than take
6 kHz for voice with DSB, a SSB signal takes about 3 kHz.
While we like SSB for not taking up as much space on the Band,
it was never designed to handle the extra digits found in the
year 2000.

No one know for sure what will happen, but some fear that all
the SSB radios will read the year 2000 as the year 1900. This
could be a real problem, because we all know that in the year
1900 SSB didn't exist. Not only that, the AM and FM modes
didn't exist!!!!

It could be, that come January 1, 2000, all radios will only
operate in CW mode; the only mode that existed in 1900.
This could be a major problem for the "No Code" Hams and
those who learned the code "just to pass the test" and
forgot it after that.

It's believed that the year 2000 will cause a major shutdown
of all electrical power in the world when the computers at
the power companies crash. If so, this would be a MAJOR
reduction of QRM. Add to the fact, that we're in a good
position in the Sun Spot Cycle and we have a super chance
to work some great DX before the world comes to an end!!!

I pity the poor Hams who haven't worked on their CW skills
when this happens. Still, they have about 9 or 10 months
to build up their CW skills, before the whole world comes
to a "This Program Has Performed An Illegal Operation And
Will Be Shut Down" end!!!

>QSL route for this station. Any info/help would be welcome. Tnx a lot !

>Cris - PY2TST

The cluster spots I saw said "via buro" or "via HC8 buro". There
isn't an HC8 buro, cards would go to the HC one in Ecuador and sit
there until the op picks them up or the buro people mail them to
him. The op is Dave W6NL (ex-W6QHS), he will be in the contest
this weekend.

I am the mgr for HC8N (and N5KO/HC8), buro or direct.

Manager for HC8A is WV7Y.

If the IRCs are of the newer type (explicitly for air mail), one of
them will be sufficient for return postage even by air mail from
Germany. Of course, the older ones are only good for surface mail
as indicated on them.

I've always presumed that stamps from the country to which
you are QSLing are preferred over IRCs, since it saves a
step in exchanging the IRCs, though I guess IRCs do get
traded themselves. There are at least a couple of dealers
that supply such stamps. Works for me, anyway.

> "Pour le dï¿½veloppement de l'informatique au niveau franï¿½ais."
> " Arrï¿½tons de suivre et innovons."

Hello Jean -- the RST System is:
R = READABILTY S = SIGNAL STRENGTH T=TONE
READABILTY
1 -- Unreadable
2 -- Barely readable, occasional words distinguishable
3 -- Readable with considerable difficulty
4 -- Readable with practically no difficulty
5 -- Perfectly readable
SIGNAL STRENGTH
1 -- Faint signals, barely perceptible
2 -- Very weak signals
3 -- Weak signals
4 -- Fair signals
5 -- Fairly good signals
6 -- Good signals
7 -- Moderately strong signals
8 -- Strong signals
9 -- Extremely strong signals
TONE
1 -- Sixty cycle a.c. or less, very rough and broad
2 -- Very rough a.c. , very harsh and broad
3 -- Rough a.c. tone, rectified but not filtered
4 -- Rough note,some trace of filtering
5 -- Filtered rectified a.c.but strongly ripple-modulated
6 -- Filtered tone, definite trace of ripple modulation
7 -- Near pure tone, trace of ripple modulation
8 -- Near perfect tone, slight trace of modulation
9 -- Perfect tone, no trace of ripple or modulation of any kind

It is used to report signal quality. In voice communications the TONE is left off -- thus a very strong clear signal would be 59. These have nothing to do with S-Meter readings which is a common mistake these days.

652. Need Info For Project: Compiling 6m Net List

Newsgroup: rec.radio.amateur.dx
Date: 1999-03-05 00:00:00 UTC
From: "S.M.A.R.C." <N7RCM@POBOX.COM>
Message-ID: <7bqmgl$1bm1@enews3.newsguy.com>
Source record: 25604
Cross-posted to: alt.ham-radio.vhf-uhf,rec.radio.amateur.antenna,rec.radio.amateur.dx,alt.ham-radio.marketplace,rec.radio.amateur.misc,rec.radio.swap

I totally enjoy working six meter. So i'm taking it upon myself to put together the biggest list of 6m nets around, with your help. Whether just in the U.S. or the world. We need more activity on this band. Not because we'll loose it, because no one want's low band anymore, but because of getting the hobby a kick to get up and going.

I don't know about your neck of the woods, but here in Las Vegas there are about 30 or so repeaters, not just on six, but other bands, and there are times when you will not here a single person for hours.

If we had some sort of net going on all the time, not 24hrs now, but in some places the times would be feesable and if you want to get up at 3am local time and work a DX station from Europe or so, you may just catch that great opening.

So, how about some help. I'll post the list, if it turns out to be worth posting, on these amateur newsgroups, some of the reflectors and maybe upload, with permission, on some of the amateur web pages so all can take advantage of it.

You all know that the repeater directory guide book does a fairly good job of listing repeaters, but what about nets and stuff. We'd have to listen 24hrs of so many freqs just to catch a net.

Here's what I'll need. The net name and location, Day or Days held, The time that it's held in UTC format, Frequency (ies), whether in AM, FM, SSB, PL if used, and who the net control operator is.

What I'd also like is the call, if possible, of the machine or who is the owner, club etc.

Thanks all in advance and we'll see where this goes. 73 de N7RCM

Most contesters will gladly reply to cards received for contest QSOs.
I would recommend enclosing a SASE for direct QSLs. Especially if
they're in a rare country or state, the volume of QSL requests
received by a contest station can be quite large.

I just plowed through a 2" thick stack of contest QSLs.
Feels good to be caught up...

661. NSS- Annapolis

Newsgroup: rec.radio.amateur.dx
Date: 1999-03-06 00:00:00 UTC
From: donlewis79@hotmail.com
Message-ID: <YTbE2.1009$Ku1.1002417@newse3.tampabay.rr.com>
Source record: 25609

March 4, 1999 filename: nss0304.txt

Merle Parton,

In case you don't know the latest developments at NSS,
let me update you.

NSS was decommissioned in early 1996. The sole remaining
facility employee is John Schorpp, the antenna man.

The towers and transmitter building are scheduled to be
demolished by September 1999. There has been an
appropriation of $4.2 million to demolish the site and
convert it to a wildlife preserve.

There is a group of people, including John Schorpp, and
now me, who learned of this development only this past
weekend, that want to stop the demolition and convert
the site to a museum of VLF radio technology.

As a member of the Antique Wireless Association, I wrote
a letter to its president last night, citing the few facts I
know, and asking what it might be able to do to aid this
venture to convert to a museum. The AWA operates a
large communications museum in Bloomfield, NY, just
south of Rochester NY. It has ties with the Smithsonian
Institution.

There is a public hearing in Annapolis March 8, 1999. The
time is 6:00 p.m. of the Lowe Office Building. That's all
the address I have. I have handwritten directions to it that
John Schorpp handed out at a hamfest we attended this
past weekend.

John Schorpp has asked me to ask you to consider putting
a notice of this meeting on the NSS Web page. I know
this is short notice, and there isn't even a complete address,
but let me give you my name and phone number: Pete
Sypher, 301-601-2711. I'm going to the meeting. I'm going
to spend time and effort for this cause of converting the
site to a museum, even though the chances of this being
realized are slim, in my estimation.

73, let me know what you think about all this.

Pete Sypher

664. DXTelnet 4.5 : Released!

Newsgroup: rec.radio.amateur.dx
Date: 1999-03-06 00:00:00 UTC
From: ik4vyx@my-dejanews.com
Message-ID: <7bs9l4jnc1@nnrp1.dejanews.com>
Source record: 25612

Hello to ALL,
this is IK4VYX, Fabrizio

This bulletin announces that a new version of DXTelnet (4.5) is available.

For those who still don't know it, DXTelnet is a ham communication software package allowing several kinds of simultaneous connections to many listed DX resources. Among them: Rf packet connections to DXClusters Telnet connections to DXClusters or chat servers IRC connecions to N6RT's CQDX DX Chat Room (see below) Web connections to OH2BUA's DXSUMMIT and JAC web clusters Connections to online internet resources such as QRZ (TM) and Buckmaster (TM) CDs, 425 DX News, QSL Info, Solar Flux Hourly Report, PC Time Adjustment and other.

What's new:

* Added full support to the new DX-Cafe node

* The function retrieving the latest 425 bulletin has been updated.

* Improved support of the ham converse chat server

* Improved support of the CQDX-IRC site
(Check http://www.qsl.net/n6rt/cqdx.html to learn more about CQDX)

* Improved support of sound Alerts

* Improved web refresh on DX-Plorer

* Upgrade of the site list entries to include new telnet sites

* Added a special spot filter rejecting old spots
(this fights huge spot loops during main contests)

To get more details about the news in this version, please check
http://home.sprynet.com/~wd4ngb/new.htm

DXTelnet 4.5 can be downloaded from one of the following web sites:

http://home.sprynet.com/~wd4ngb/telnet.htm
http://www.powernetonline.com/~dbald/dxtelnet.html
http://www.qsl.net/ad5xa/dxt.html

To email me any feedback you can get my email ad from the first of the above sites.

Best (((73))) to ALL

666. KENWOOD 2M and DSP 232 PROBLEM

Newsgroup: rec.radio.amateur.dx
Date: 1999-03-07 00:00:00 UTC
From: art.santella@juno.com
Message-ID: <36e3e2bb.477511@news.snet.net>
Source record: 25614

I have a AEA/TimeWave DSP 232 all mode controller. I have the intermittent problem of the Kenwood 231A locking into the transmit mode when on a packet cluster. It has only happened twice but the rig almost overheated. I shut off the 232 and it comes out of transmit and then operates fine for days. I was told it might be a ground loop. Has anyone ever had any problem like this.

> Sorry for my english I'm French
> I develop Ham LogBook for Psion S5 and I don't know
> what is RST, and its values. (signification)

(I'm sorry, my second language is Spanish so I don't know any French!)

RST= Readability, Strength, and Tone.

R - Readability - how easy it is to hear the other station. 0 means you can't understand anything he says, 5 means you can understand every word he says.

S - Strength - how loud the other station's signals are. 0 means you can't hear his signal at all, 9 means he's extremely loud. A station whose signal is relatively soft ("S3") may be very readable ("R5") if there is no noise or interference.

T - Tone - the quality of the other station's signals. Tone is only relevant to Morse Code signals. A perfect Morse signal is T9 - when the transmitting station is pressing his code key, you hear a perfect tone. T0 is a very rough tone, with lots of buzz and other noise.

It is unusual for the first or second numbers in a RST to be less than 3, and for the third number to be less than 9.

Generally true.

That said, if you're asking for *my* QSL, I'd rather you sent me an IRC. I can then send it on to some other DX station whose card I need.

(I'm in a rare county, and receive a fair number of PSE QSL cards from DX stations. About 1/4 send an IRC, 1/4 send mint U.S. stamps, 1/4 send a "green stamp", and 1/4 don't send anything.)

Well Roy you are old-fashioned...I get more unsolicited QSLs from contesters
than from all my other DX contacts combined. A contact is a contact, ole boy.
With the QSLing habits of contesters much more reliable than casual dx-ing QSOs
one would be foolish to not count these.

Tradition counts for a lot in ham radio<G>!

(seriously, some people feel a QSO isn't a QSO unless a signal report is exchanged... There are some contests that do use a more meaningful exchange. Maybe the best examples are the Internet Sprints, where you send your name for the first QSO -- and then, for each subsequent QSO, the name your last QSO gave you!)

SB DX @ WW $OPDX.399
Ohio/Penn DX Bulletin No. 399

The Ohio/Penn DX PacketCluster
DX Bulletin No. 399
BID: $OPDX.399
March 8, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, K7BV, W8AEF, KE9KD & DX-Central, W9ZT, DJ5AV & DX News Letter, DL7VRO, EI6HB, G4BUE & DX News Sheet, HA0HW, IK3ZAW, IK0AZG, JA1HGY, OK2AP, ON6DP, OZ6ACD, PA1AW, PP8EB, SM7NAS, UA0CW, VK4AAR, VK6APK and XE1HBU for the following DX information.

5A22PA UPDATE. Veronica, IK3ZAW, informs OPDX that since the announcement of the 5A22PA operation she has been receiving a lot of E-mails asking whether she is Abu Baker's (5A1A) QSL Manager or not. Please understand that she will be the QSL Manager for the 5A22PA special event station ONLY (NOT 5A1A)! This special callsign has been issued to celebrate the 22nd anniversary of "The 1st Born Jamahiriya in History", and the suffix "PA" stands for "People Authority". QSL 5A22PA "ONLY" to: Veronica Della Dora, Piazza Fiume 14, 30126 Lido di Venezia-VE, Italy.

9H, MALTA. The "DX News Sheet reports that Andy, G4ZVJ, will be active this week as 9H3ZV (March 9-16th). His activity will include an entry in the RSGB Commonwealth Contest. QSL via home call.

C9, MOZAMBIQUE. The "DX News Sheet reports that Per, LA7FAA, is active as C91CV from Quipaco Island (NO IOTA Number). They state that he was spotted on 10 meters SSB (February 28th), his length of stay is not known. No QSNs have been reported on the Ohio/Penn Network. QSL via home call.

DXCC ACCEPTANCE OF ZL9CI. Ken Holdom, ZL2HU, Group Organizer/Team Leader/ QSL Manager of the Kermadec DX Association Campbell Island DXpedition, announced that the ARRL DXCC Desk has accepted the ZL9CI Campbell Island - January 1999 DXpedition for DXCC purposes. Ken also mentions that they are currently awaiting the printed cards from Japan and will post progressive updates in the near future.

E4, PALESTINE. Ayar, OZ6ACD, now active as E44/OZ6ACD, has informed OPDX that he will be active from the Headquaraters of the "Temporary International Presence in Hebron" (TIPH) in the West Bank. Apparently, Ayar is the first licensed station to operate with the E4 prefix from the West Bank.
This leaves the question of the E41/OK1DTP's legitimacy (mentioned in last week's bulletin). Some reports state that the Deputy Minister of the MPT (in Gaza) has no record of this station. Probably the most interesting thing is that operator David Lunak, OK1DTP, has put up a Web page at: http://okdxc.cz/e41/
The Web site contains a log search. As always, work first worry later. You never know what will happen.
Anyway, Ayar, E44/OZ6ACD, has receieved equipment from the Martti/OH2BH E44DX group and the JA1UT/E4 group. This equipment will be left behind for the newly established amateur radio group called the "Palestine Amateur Wireless Society (PAWS)" at the College of Technology in Gaza. E44/OZ6ACD will be active almost every day after 1400z, and on each Sunday morning until 0800z. However, he will be QRT between March 17-26th. Activity will be on all HF bands 80-10 meters. 160 meters is still uncertain, but 6 meters will be used frequently. Suggested frequencies are:
SSB (+/-QRM) - 3794, 7044, 14244, 18144, 21244, 24944 and 28444 kHz
CW (+/-QRM) - 3504, 7004, 10104, 14004, 18074, 21004, 24894 and 28004

CW activity will be limited, but OZ5IPA (as mentioned in last week's bulletin) will provide more CW activity when he arrives to be active from the same QTH (March 10-15th). QSL for E44/OZ6ACD should be sent to his QSL Manager OZ1ACB via the bureau or direct to: Allis Anderson, Kagsaavej 34, DK-2730 Herlev, Denmark. Ayar also mentions to please check the following Web site for the latest info and for QSO search: http://www.tiph.org/e44/search.htm

"The Daily DX" reports another operator is headed to E4-land. Peter, G3WQU, has submitted his paper work for a license to operate from Bethlehem, West Bank. He hopes to be active soon as E44/G3WQU.

E44/HA1AG WRAP-UP. Zoli/HA1AG, Gyula/HA1TJ, Laci/HA3NU and Anti/HA3OV are all back in Hungary without any problem. They are all in good spirits but are very tired. In less than 9 days with 4 operators, each operating 12 hours day in front a radio, they made 40500 QSOs. The only problems they had during the operation was with the hotel's phone and TV systems, but the staff was very tolerant! Look for more info to be forthcoming from Zoli soon!

EA8, CANARY ISLANDS. By the time you read this Holger, DL7AU, should be active from Fuerteventura for about 4 weeks. His callsign was not mentioned, but he will be active mainly on RTTY. He will also be active in the CQWW WPX Contest as a 10 meters single band entry. QSL via DL7VRO.

FT5X, KERGUELEN ISLAND. The "DX News Letter" reports that Helios, F6IHY, shall be once again on the air as FT5XN starting sometime this month.

IOTA NEWS.....
OC-136. Alan, VK8AV, is currently on a DXpedition to Phillip Island

and signinng VK8AV/3 until mid-March. He wants to work CW 30
kHz up from the band edges on 10, 12, 15, 17, 20, 30, 40 meters,
but when things are slow he will work on SSB on the IOTA, DX
and popular net frequencies. His QSL Manager will be Alan,
VK4AAR, who will also be able to confirm other QSOs with VK8AV
if needed. Please QSL DIRECT with SAE + postage to:
Alan Roocroft, VK4AAR, POB 421, Gatton 4343, Australia

OC-141. Stuart, VK8NSB, has announced that he will be going to Groote
Eylandt from April 3-18th. He will use the callsign VK8NSB/P
and will be operating a HF IOTA Station on 80/15/10 meters
CW/SSB. QSL via VK9NS.

OC-170. Beginning 0400z Sunday, March 14th through 0000z Sunday,
March 21st, a group of operators from VK6-land will be active
from Woody Island. A team of 12 operators have finalized all
their traveling plans and have received permission to operate
from the island. The group will hopefully use the callsign
VI6EWI. This is yet to be confirmed. The group will work all
bands, 80-70cm, both SSB and CW from 4 HF and 3 VHF/UHF
stations. They will be staying as close as possible to the
recognised IOTA frequencies. QSL Manager for this expedition
is Neil Penfold VK6NE. His address is "OK" in all callbooks
and Internet callsign databases. Bureau cards will also be
accepted.

JW, SVALBARD. Kjell, SM7NAS, will be active from Longyearbyen as JW/SM7NAS
from April 2-8th. Activity will be on all HF bands, CW, SSB and RTTY using
1kW to a 5 element beam for 10, 15 and 20 meters 100 ft up, a delta loop
on 40 meters and an inverted L for the other bands. The JW/SM7NAS log will
be available soon after the operation at:
http://home.bip.net/kjell_adolf
QSL via the bureau or direct to: Kjell Adolfsson, Svensbackevagen 6D,
SE-59096 Overum, Sweden

KG4, GUANTANAMO BAY (Update/Change). The following group of operators will
be active March 18-25th and during the BARTG RTTY CONTEST (March 20-21st)
as KG4GC and not KG4WB as reported earlier. Operators will be Bill/W4WX
(KG4GC), William/N2WB (KG4WB) and Vance/N5VL (KG4VL). They will be on
all bands before and after the contest using thier own calls. QSL KG4GC
to W4WX and all others to the homecalls.

OH0/OJ0, ALAND ISLAND AND MARKET REEF. Dennis Motschenbacher, K7BV, Editor
for the National Contest Journal, will be going to Aland Island to operate
the new OH0Z super station in the CQ WPX CW Contest at the invitation of
station owners Ari/OH1EH, Jukka/OH2MAM, and OH1JT. Look for OH0/K7BV to
be used before and after the contest. Dennis states that there is a very
high probability that his DXpedition will include a 3 to 4 day OJ0/K7BV
operation from Market Reef thanks to a generous invitation from Seppo/OH1VR
and Lars/OH0RJ who control the operations of the beacon on the reef. OH1VR
will accompany him to the reef and then operate in the CQ WPX CW contest
after Dennis's departure by helicopter to get back to OH0Z in time for the

same contest.
K7BV's DXpedition will occur between May 23rd and June 3rd. CW will be the preferred mode of operation on all HF bands including WARC band opportunities. Also, look for RS12 satellite activity (he will be on the air as frequently as possible). If a small transceiver can be borrowed, 6 meters will definitely get some attention. Carl, K9LA, will provide Dennis with extensive propagation forecasting support to insure the efficient use of the lower bands. Unfortunately, short hours of darkness, six in May in the northern latitudes, will severely limit opportunities to satisfy the need for these countries on 80 and 160 meters.
George K5KG (E-mail: GeorgeK5KG@aol) will perform Pilot Station duties and daily feed constructive input from the DX community to K7BV via HF skeds.
QSL Infomation: OH0 - OJ0/K7BV via KU9C and OH0Z via OH1EH, Ari Korhonen, Kreetalank. 9 As 1, FIN-29200 Harjavalta, Finland

PACIFIC TRIP CONTINUES (T30/T31/T33). The OK DX Foundation members Jarda/OK1RD, Jiri/OK1RI and Slavek/OK1TN continue to be active as T30RD from Tarawa until March 10th. At that time, they will be active as T31RD from Canton or as T33RD from Banaba Island until March 28th. They will then return to Tarawa and be active again as T30RD until April 8th. Their operations include two stations on 160-10 meters CW/SSB. QSLs via OKDXF, Box 73, CZ-29306 Mlada Boleslav, Bradlec, Czech Republic.

PY0. FERNANDO DE NORONHA. Look for Peter, PY5CC, to become active again March 21-29th, as PY0FF. Activity will be on all bands with special attention paid to 6 meters. QSL via JA1VOK.

QSL INFO AND NEWS.....
HC8L QSLS. OPDX has been receiving several messages asking where to QSL this station. The operator states to QSL via the bureau. Your editor has tried to find "the HC8 address" , but with no luck. I guess one could use the "ARRL Outgoing Bureau" and hope that someone will pick up the cards at the HC Ecuador Bureau. Reports indicate that the operator is Dave, W6NL (ex-W6QHS). The only thing we can suggest is to wait and see if something (address) comes out after this past weekend's contest.

IR0MFP. This special event station, whose suffix stands "Millennium For Peace", was active during last weekend's ARRL SSB Contest and has the QSL Manager of IK0AZG.

All the logs from the "OK DXpedition Pacific99" will be online very soon. Currently only the logs for 3D2TN have been entered.
Check the Web sites: http://www.okdxc.cz/pacific99

GOOD NEWS. The XZ1N cards have been coming out. Watch your mail box!

EJ7M. Several stations have asked about the QSL info for EJ7M which was active from Bere Island last July. The QSL Manager is Denis, EI6HB. QSL via the CBA or via the IRTS Bureau.

Vlad, UA0CW, operated in the ARRL SSB Contest this past weekend on 15 meters. Please QSL ONLY to W3HNK!!!

S0, WESTERN SAHARA. Arseli, EA2JG, states beginning March 31st, he will be here for two weeks as S09A. Activity will be on all bands. QSL via EA2JG, Arseli Etxeguren, Barrena 6, 01480 Luyando Alava, Spain.

T8, PALAU. Five members of Far East DX-Ploiters (FEDXP), JA1BRK, JA1HGY, JA1HYF, 7N3AWE and JK1OPL, will be activated from Belau Republic as a DX-Vacation operation. Activity will be from March 19-21st, with two separated stations operating on 160-6 meters CW/SSB/RTTY. They will concentrate on the WARC bands. Look for the following (station/QSL route): T88AJ (7N3AWE), T88HY (JA1HYF), T88HG (JA1HGY), T88?? (JK1OPL), and T88RK (JA1BRK). The main RTTY operator will be T88AJ (7N3AWE).

TL5A NOW QRT. Alex, PA1AW, reports that Alex, TL5A, has put 74000 QSOs in the log, and together with his TL0R operation this makes over 80000 QSOs from the Central African Republic. During a short stop in PA-land on route to a new assignment, Alex will get the full logs from Alex, TL5A/PA3DZN, to update the Web log search pages at: http://www.qsl.net/tl5a This will probably be sometime this week. QSL via PA1AW (ex-PA3DMH).

TP50, FRANCE. Paul, ON6DP, states he will be active with ON7RN as TP50CE from the special event station celebrating the Council of Europe's 50th year anniversary, April 30th to May 2nd. QSL via F6FQK.

V3, BELIZE. Bert, PA3GIO, plans to be active as V31GI from a few Belize IOTAs. Look for him March 14-19th from Southwest Caye (Glovers Reef NA-180), March 21-26th from Blackbird Caye (Turneffe Islands NA-123) and March 28th through April 3rd from Little Water Caye (NA-180). Activity will be on SSB 20-10 meters on the usual IOTA frequencies, 40 meters and the WARC bands. Bert will be using a TS-50 with 100 watts and dipole. Check out his great and colorful Web site at: http://www.xs4all.nl/~pa3gio/ca/
QSL via home callsign (bureau is preferred).

WEB SITE FOR DXERS. The Northeast Wisconsin DX Association has a new Web page at: http://www.execpc.com/~w9zt

XF4MX, REVILLAGIGEDO UPDATE. Parcival, XE1HBU, from Guadalajara, Mexico, informs us that the current XF4MX operation from the archipielago Revillagigedo Island (active until March 15th) now has a Web page up for specific information about frecuency, modes,... etc at:
http://www.radionet.udg.mx/xf4mx/index.html

ZY, ANAVILHANAS ARCHIPELAGO. The world's largest archipelago (in a river) will be activated by operators PP8EB, PP8DA, PP8HDA, PP8KB, PP8BV and PP8JM, April 1-4th. The callsign to be used is ZY8A. Activity will be on 80/40/20/17/15/12/10/6 meters CW/SSB. This will be the first time this archipelago will be aired. This is not a IOTA but is good towards the Brazilian Award. QSL Manager is PP8KB, Luiz Ricardo, P.O. Box 691. Manaus Am, Brasil 69011-970.

wrote:

>Which makes me wonder, why bother to exchange reports in contests?

Indeed. And in some contests they don't. (E.g. ARRL Sweepstakes,
California QSO Party, etc).

But that gives rise to a "compatibility problem". For most awards,
including DXCC, a valid QSO must include an exchange of signal
reports. If signal reports were abandoned in DX contests, QSOs in
these contests would no longer be valid for awards.

Is this true? The ARRL Operating Manual makes no mention of signal
reports being required for DXCC, that I can find. On the other hand,
the rules for WAS specifically state that no there is no minimum
report, which might mean a report of some sort is required, or that
none is required.

Also, the RST on the QSL card is the one that is given by the operator
sending the card. There doesn't seem to be any requirement for that
report to be given on the air.

Actually, there's nothing in the DXCC rules that requires an exchange of signal reports. But there are some other awards that do require a minimum signal report, so obviously one must be transmitted!

Hey all, I just got my Tech+ ticket and am still around the 7 WPM range right now (but improving and having fun).

What I was wondering is whether there's room in any of these contests for us slow-coders? From the little I've read it sounds like "fists of fury" out there. Maybe what I'm thinking about is those DXpeditions I read about. I suppose those guys wouldn't bother. No ?

Thanks, 73, Don KB3DMA

Most contest ops do work at pretty high speed, for efficiency reasons of course. But I think you'll find most ops will slow down when someone calls in at slow speed. I always adjust my speed to approximate that of the caller when someone calls me at a speed far removed from that at which I'm working.

If they don't, just send "PSE QRS"... if that still doesn't work, go on to the next CQer. That's one QSO they won't get for their score.

Most CW contest activity does take place below the Novice/Tech CW bands, though with 10 and 15 being wide open lately, the activity has been extending well up into those areas.

The ARRL 10 Meter Contest in December features double points for CW QSOs with Novice/Tech stations. In that contest you will find plenty of big signals working slow CW above 28.1 mHz to get those 8-point contacts.

Good luck,

Don: Most contest ops will slow down to approximately the speed of the calling station, but that doesn't help you in copying their CQ and call at 35+ wpm, does it?

You'll find that if you operate higher in the CW band, the speeds are (generally) slower, and that if you show up late in the contest and call CQ, you will have more stations trying to work you than you can possibly log. In the finals several hours of most contests, the operators (especially the ones who are in the running to win) are scratching for every new call they can find, and they'll call you at whatever speed you choose to CQ!

It's almost like being a rare DX station for some.

In my experience, the QSL return rate for major contest stations is
higher than for most casual contacts. Some even send out cards first.
ARRL used to give DXCC credit for contest QSOs without a card once the
scores were published. (so you knew they had the log to check)

Congrats on the new callsign Don, and welcome to the CW fraternity :-)

If you want to get into CW DX-hunting and contesting, you will need to get your speed up. Contesters typically cruise at 28-32 WPM, DX-peditions sometimes a little slower.

You'll find it hard to work DX breaking pile-ups at 7 WPM unless you catch them at a very quiet time when they are calling CQ repeatedly with no takers (if such a thing is possible from the US).

I suggest you call them, when they come back at mega-speed don't give your exchange and say 'pse qrs' until they slow down. Once you have copied it, come back with your report and let them get away.

When you do this, try not to test the DX op's patience by making errors or repeating things over and over. There are a host of do's and don'ts but I won't bore you with that at this stage...

However, working rare DX at 7 WPM could be tricky at the best of times. DX stations are there to hand out the new country to as many stations as possible. If they can make 3 others happy in the time it takes to copy your callsign, you'll miss out.

In a contest I suggest you again call stations who are CQ-ing repeatedly, usually towards the end of the contest. They'll work you, even at 7 WPM. Contesters need QSOs in the log, and if there are no takers they will work you at 7 WPM. Ask them to QRS first before giving out your report. Try listening in on them for a while to get their callsign and their zone or the incremental number down before calling them.

However, at the end of the day, contesting and DX-ing are a fast game, and you will have to get your speed up to enjoy it. The fun way to get your speed up is to make lots of CW QSOs. Learn to use an iambic keyer, get some books on DX-ing and contesting and join a contest group.

Don, I concur heartily with Wilbert comments. I like the fac tthat he was positive in his attitude and you are too. Might I suggest trying to secure a frequency and YOU call CQ Contest. You might be surprised at who calls you! Also, and most importantly, the DX stations will note your speed and if they want to, they can QRS for you. Hang in there and keep upping your speed. It is fun fishing in a pond full of fish and that's usually what a DX contest is like.

You will be shocked and pleasantly surprised at how your own code speed will increase if you dive in andd listen to the contests, or avoiding the contests, find a space on 20 or 40 meters in the evening and call cq and answer others calls. 7 wpm will become 10-12 wpm, but my only suggestion to higher speeds is to learn to copy behind yourself. At 7 wpm it isn't a problem, but as you work faster speeds you will need to write at the same time you are listening.

698. Re: T30R

Newsgroup: rec.radio.amateur.dx
Date: 1999-03-10 00:00:00 UTC
From: "Robert G. Schaffrath, N2JTX" <rschaffrath@acm.org>
Message-ID: <36E68254.570@acm.org>
Source record: 25548

The operator has been saying to QSL via OK1RD. However, according to two DX bulletins (Ohio/Penn DX #399 and DXNL 1135) the call was supposed to be T3ï¿½RD and QSL via the OKDXF. This is the OK DX group DXpedition operation of which 3D2TN and an as yet not-on-the-air T31 or T33 station are part of. I worked 3D2TN and I believe was also told to QSL via OK1TN which happens to be the same address as in the bulletins. That address is:

OK DX Foundation
P.O. Box 73
29306 Mlada Boleslav, Bradlec
CZECH REPUBLIC

Sooooo at this point I have two cards and greenstamp in an envelope to go to the above address. I am waiting for the T31/T33 operation so that I can add a third card if necessary. My assumption is that the above address will route the cards to the appropriate operator as they are part of that team. Hopefully someone can clear up the confusion. Otherwise I will have to direct the cards to the appropriate operators. I would say to wait until the operation is completed and see what pops up in the bulletins.

73,
Robert, N2JTX

706. Re: QSLing from Contest Logs?

Newsgroup: rec.radio.amateur.dx
Date: 1999-03-10 00:00:00 UTC
From: Sandy Lynch <slay@netcom.com>
Message-ID: <slayF8EJBu.C68@netcom.com>
Source record: 25556

I am curious just what you have been at for 25 years that gives you
the impression that QSLing from a contest QSO was a "Lid" operation?
Those of us who operate on HF bands including many DXCC Honor Roll
members, A-1 Operators, and other assorted folks who serve as role
models have used QSLs from contest QSOs for far longer than your
25 years. Since David/KK7GW is only around 15 years old, and a
very good CW op (judging from his performance at W7RM and N6TR's QTHs,
I'd say he will one day also be a role model for others. He is to
be forgiven that he can't remember the time not too long ago when
the ARRL DID give DXCC credit for contest QSOs (no QSL required)
if the logs of the DX station were also submitted to them. Alas ...
those days are longgone ... but I still remember them ... and I've
only been at this hobby since I was 10 ..... about 36 years.

Bottom line: reset your interpretation for what a "Lid operation" means.

Warmest 73,
Sandy W7BX@arrl.net

HK3JJH
5B DXCC
DXCC Honor Roll
WPX Honor Roll

Pedro knows the deal. Don't worry.
You will get his QSL back with a simple rubber stamp of his location on the
front.
No big amps, no big beams,no pilot stations,
Just Pedro and his radio.
Sort of refreshing.

Pedr,o HK3JJ, has put on most (all?) of the HK islands over the past couple of years and has QSL'd all of the contacts using his direct CB address. All have been accepted by the DXCC desk and IOTA. He's good as gold. Use his CB address.

Hi Doug,

I happen to know, that OH2PM China address is valid. I too llive in Beijing
and we both work for the same company.

Anyone have a current address for VK2ICV? (manager for VK9LX) My card sent to 32 Acacia St., Cabramatta NSW 2166 was returned - I *think* it was marked "Left Address" (moved) but it's kinda hard to tell. Thanks!

However, you don't necessarily need to be able to run that fast
yourself--or even ask them to slow down--in order to work them.

Find yourself a contest with a really easy exchange (or a DX-
pedition) and get very comfortable with sending your part of it.
Then find a contest station that's calling CQ and listen to them
until you can copy their exchange. Once you've figured that out,
get in there and call them, and when you hear them come back to
you, send your exchange and hope that they return with their
standard exchange. :-) You may occasionally get tripped up with
them asking for a repeat of something, but in most cases, the
exchange will go smoothly and you'll feel great for having worked
someone at such a high speed!

I've worked a bunch of contests and DXpeditions this way, even
though my own code speed has never been more than 15-18 wpm.

Obviously, getting your own code speed up is even better, or
finding someone who is willing to slow down, but I thought
I'd let you know about this other alternative, too.

Good luck!

736. Amateur radio portion of HAARP test

Newsgroup: rec.radio.amateur.dx
Date: 1999-03-13 00:00:00 UTC
From: pwinter@best.com
Message-ID: <7ceuusbsf1@shell5.ba.best.com>
Source record: 25585

A VHF DXing question...

Will the amateur radio portion of the HAARP test on March 20th only be accessible to hams in Alaska and northwestern Canada? I have a friend in central California who's been getting heavily into VHF/UHF contesting (and even EME), and I'm sure he'd like to give this "make your own F-layer" experiment (my wording :-)) a try if he could. Or at least listen in. Has anyone seen any information from the person identified in the test announcement as the coordinator of the ham test, Ed Cole AL7EB?

Patty

SB DX @ WW $OPDX.400
Ohio/Penn DX Bulletin No. 400

The Ohio/Penn DX PacketCluster
DX Bulletin No. 400
BID: $OPDX.400
March 15, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N2OO, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, K4YDK, KI6WF, N7GSU, W7TSQ, K8EP, NE8Z, K9ALP, W0YG, DL2GAC, DF6EX, F6AJA & LNDX, FK8GM, G3SXW, G4BUE & DX News Sheet, GW0ANA, HA1AG, IK2SGC, IK2SFZ, IW0DJB, PA3AXU, PS7AB, PT2GTI, RZ9WZ, UN7FZ, VE2SEI and 9A4KK for the following DX information.

3D2, FIJI. The "DX News Sheet" reports that Paul, A35RK, will be active again from the Viti Levu and Vanua Levu Groups (IOTA OC-016) as 3D2RK. His activity will be in May for 3 to 4 weeks. Operations will be mostly CW. QSL via W7TSQ.

3W6, VIETNAM. Jani, YB0US/NM6US, will be operating from here as 3W6US from March 25-29th. This will include the CQWW WPX SSB Contest. Jani will be using the special callsign XV300S (that's Xray Victor Three Zero Zero Sugar) during the CQ WPX SSB Contest (March 27-28th). QSL XV300S via JH1EVE, Hiro H. Higashiyama, 1-12-5 Higashijujo, Kita, Tokyo, Japan. Outside of the contest, Jani will use his own call, 3W6US. QSL 3W6US via N2OO: Bob Schenck, P.O. Box 345, Tuckerton, NJ 08087-0345 USA. QSL Manager Bob, N2OO, states, "For those of you still waiting for a 3W6US card from his last operation there in October 1998.... the cards should arrive from the printer in the next week or two. When they arrive, I shall kick butt! Good things always come to those who wait!"

8P, BARBADOS. Mario, K2ZD, will be operating from here as 8P9JM from April 6-13th. Activity will be on 50 Mhz and HF, with 100 watts. QSL via K2ZD.

8Q7, MALDIVE ISLANDS. "The 59(9) DXReport" reports that DH5HV will be active from here May 17-31st, while on his honeymoon. Operations will be with 100 watts into a dipole.

9M2, WEST MALAYSIA. Johnny, G3LIV, will be active from Pulau Penang as 9M2/G3LIV, May 4-24th. Activity will be mainly on CW 20/17/15 meters.

QSL via his home callsign.

C21SX/C21ZM WRAP UP. Nauru operations C21SX (Roger/G3SXW) and C21ZM (Bob/G3ZEM) made over 20,000 CW contacts in 132 DXCC countries between February 27th and March 7th on all nine HF bands, including 38% on the WARC bands. More details and break down on this operation will be provided to OPDX InterNet Subscribers as an addtional bulletin.

CORRECTION. In OPDX.399, under "JW, SVALBARD", Kjell's (SM7NAS) Web site was listed wrong. The URL address should have been:
http://home.bip.net/kjell_adolfsson

CY9, ST. PAUL ISLAND. Look for CY9CWI to be activated by the West Island ARC of Montreal from July 21-28, 1999. Operation from this DXCC country will be on 160-6 meters as conditions permit. Operation will be on or near the frequencies: 1830, 3005, 3745, 7005, 7065, 7230, 10105, 14010, 14265, 18125, 21010, 21305, 24935, 28010, 28395, 50010 and 50130 kHz. The team will be an entry in the 1999 IOTA Contest (July 24-25th) and will make special efforts to work Asians on 10-15 meters, Europeans on 80-160 meters, and Canadians everywhere! Operators will be Helen/VE2YAK (YL Op), Fred/VE2SEI, Al/VO1NO/VE1, Reg/VE2AYU, Bill/VE1MR, Dragan/VE2ZIV, Lowell/VY2OX, and J-F (Jeff)/VE2TBH. The following CY9 references were provided: CQ zone 05, ITU Zone 09, IOTA NA-94, Can. Is. NS-002, N. Lat. 47.33 degs., W. Long. 60.16 degs. Direct comments/questions go to: Fred Archibald VE2SEI, 130 Embleton Crescent, Pointe Claire, QC, H9R3N2 Canada or via his E-mail address: archibal@pubnix.net
QSL via VE2CWI West Island ARC, Box 884, Dorval, Quebec, H9R 4Z6 CANADA.

E41, PALESTINE. "E41/OK1DTP is a legal operation", states Zoli, HA1AG (aka E44/HA1AG). Zoli reports that he has seen the printed license of David, E41/OK1DTP, in the Ministry of Telecommunications in Gaza. By the way, a copy of the license can be seen on the following Web site:
http://www.okdxc.cz/e41/license.htm
Zoli goes on and mentions that E44 is used for the operations from the Gaza Strip such as E44/JA8RUZ, E44/HA1AG and E44/JA1UT. All other regions will use different callsigns like E41/OK1DTP or E46/OZ6ACD. It would seem David is the first to use the E41 prefix. ADDED NOTE: Zoli states that QSLs for E44/HA1AG will be ready by Monday, March 15th.
Meanwhile, E41/OK1DTP, continues to be active and was heard on 12/10 meters SSB over the past weekend. Check 24935 and 28400 kHz between 1100 and 1400z.

EA8, CANARY ISLANDS. Chris, 9A4KK, reports that he will be active from here during the CQ WPX CW Conetst as a Low Power entry. He is currently unsure what bands he will be active on.

HK, COLOMBIA. Gerard, F2JD/G0SHN, continues to be active as G0SHN/HK3 until the local administration gives him a normal HK3 callsign. He will be here for about the next 2 years. He can sometimes be found on 20 meters. QSL via the French Bureau REF or via F6AJA: Jean-Michel Duthilleul, 515 rue du Petit HEM, 59870 Bouvignies, France.

HV, VATICAN. Luca, IW0DJB, HV5PUL's QSL Manager, reports that the ham station from Pontifica University Lateranense, Vatican City State, will be on air on April 22nd during the "III Lateran Journey". The activity will be on HF, RTTY, 6 and 2 meters. For other information on the HV5PUL station check out the Web site at: http://www.pul.it

IOTA NEWS.....
EU-011. Glyn, GW0ANA, reports to OPDX that from May 3-8th, he will be on a small backpackers trip to the Scilly Isles. He will be active on Tresco Island using the callsign G0ANA/p. The trip is exploratory for a future big scale expedition. He will only take a TS-50S using 100 watts only, an Outbacker vertical and wire antennas with him. Weight must be kept to a minimum due to the helicopter flight. QSL via GW0ANA, CBA or bureau.

EU-032. Didier F5BJW will be TM2A from Aix Island from April 10-17th on SSB all bands.

EU-068. Operators F5TYY, F6IUI, F6BFH and F9IE will be signing their callsigns/P from Ile de Sein from May 13-15th.

EU-068. Operators F5PVF, F5TVG, F6JMT, F8ATS, F4AJQ, F4TTR and F1UHM will activate Sein Island from May 22-27th with the club callsign F6KOP/P. They will be on SSB, CW and SSTV with operations on 80m to 23cm.

EU-074. Jean Marc, F5SGI, will be signing F5SGI/P from Brehat Island from April 25-30th. He will be operating mostly on CW with some SSB activity on 14260 kHz.

EU-081. The radio club "F6KFV" will be using TM2F from St. Marcouf Island for the IOTA contest (at the end of July).

OC-127. By the time you read this, Bernard, DL2GAC, should be active as H44MS from Rennel Island. He will be active until March 22nd. Activity will be on 40/20/17/12/10 meters. QSL via his home callsign.

JT, MONGOLIA. Operators Antonio/I1ZB, Andrea/IZ0CRN, Gaetano/IT9GAI and Nicola/I0SNY will be active April 6-15th, as JT1Y from the JT1KAA club station in Ulan-Bator. QSL via I0SNY. Suggested frequencies are:
CW - 1825, 3505, 7005, 10105, 14015, 18075, 21015, 24895, 28015 and 50110 kHz.
SSB - 1840, 3780, 7045, 14185, 18145, 21285, 24985, 28485 and 50110 kHz.

N7GSU/BCN (Signal reports PLEASE). Robin, N7GSU, reports that the N7GSU Beacon is now on the air at 28.2825 MHz. It transmits continous with 500mw to a 1/2 W Vertical antenna from grid CN85if. Please send signal reports via snail mail to Robin Faulkner, N7GSU, 24142 SW Peavine Rd., McMinnville, OR 97128 or via E-mail to: n7gsu@qsl.net

NEW OFFICERS FOR 1999.....
The Northern Ohio DX Association will retain their current officers

for another term. They are: President - Tedd Mirgliotta/KB8NW, Vice President - Dwaine Modock/K8ME, Secretary - Ron Borkey/K8VJG and Treasurer - Mary Michaelis/N8DMM

The new officers for the Western Washington DX Club for 1999 are: President - Dick Swanson/K7BTW, Vice President - Ralph Javins/N7KGA, Secretary - Mike Schone/WA7BAY, Treasurer - Marina Zuettel/N7LSL. The Trustees are: John Gohndrone/N7TT, Roger Huntley/W7VV, Joe Gregory/W7QN, Dave Wallace/KK7KJ, David Jones/KK7GW and Adam Kerner/K7ST.
P3, CYPRUS. Harry, UN7FZ/UP6F, informs OPDX that the "Team of P3A" will take part in CQ WW WPX SSB as a Multi/Multi category. QSL via W3HNK. Operators will be active before and after the contest using their callsigns/5B4. QSLs for operations before and after the contest must go to home callsigns.

QSL INFO AND NEWS.....
HC8L QSL ROUTE. Mike, K4YDK, worked Dave (W6NL), HC8L, and was able to get the address for the HC8 bureau. It is: Guayaquil Radio Club, Box 5757, Guayaquil, Ecuador.

5W0GD/A35XU QSLS. PA3AXU has informed OPDX that there is no back log for direct QSLs on these cards. Also, he has answered the first bunch of QSL (approx. 200 cards) received through the bureau. If you still need a QSL, send them direct to: G.A.M.C. Dijkers, Dokter P.A. Cornethof 3, 6669AZ Dodewaard, The Netherlands.

Eduardo, OA4SS, states he has a stateside QSL Manager. QSL to his manager KB6J (SASE or IRC's).

New QSL information for HC6CR/HD6CR and HC6FG/HD6FG. QSL Manager Rick, NE8Z/HC1MD, reports that as of March 9, 1999, he will no longer be the QSL Manager for HC6CR, HD6CR, HC6FG and HD6FG. All past, present and future QSOs can be confirmed via their direct addresses:
HC6CR/HD6CR HC6FG/HD6FG
Roberto Camacho Maricela de Camacho
Casilla 614 Casilla 614
Ambato, Ecuador Ambato, Ecuador
He states mail theft in Ecuador has made the passing of logs impossible, and they are not able to send him the logs via E-mail. The entire country is going through a severe financial crisis with devaluation of their local currency. However, Rick will continue to act as QSL Manager for Alfredo/HC1HC. Alfredo does computer logging and is able to communicate with him daily via E-mail with logs and/or other information.

Mike, Z31FK, reports some bulletins and manager-lists include the QSL information Z31FK via I1YRL. Mike, Z31FK, states this is definitely wrong!!!!! I1YRL has never been his QSL Manager! The correct route is the direct address which is the only correct route for Z31FK (or via bureau) as follows: Dimitar Jordanov ("Mike"), P.O.Box 45, 92300 Kocani, Rep. Macedonia

VK9XX QSL CARDS. Charlie, W0YG, reports that all USA and Canada QSL cards received to date have been answered UNLESS both VK9XX and VK9YY cards were enclosed within the same envelope. This will take a considerably longer time to sort out. He also mentions that if a request for QSL cards was received without a return envelope, these cards will be sent through the bureau. Charlie estimates the first bureau shipment to be approximately a year away due to the workload of servicing some 10 DX operations as QSL manager. Direct requests are encouraged to eliminate delays. He will address JA and EU cards next for their VK9XX operation.

SPECIAL EVENT. A special event station will be on the air to celebrate Marconi`s first transmission "Across the English Channel" from Dover to France. This first "DX" transmission was done on the 27th of March, 1899. Their re-enactment will take place from his original QTH South Foreland Lighthouse, Dover. The operation will be active from the March 25-29th, using the callsign GB100SFL (if confirmed by authorities, if not then GX4BRS). QSL to GW0ANA, CBA or the bureau.

SPECIAL EVENT. Look for special event station UE9WZZ to be active to celebrate the 80th anniversary of the Republic of Bashkortostan (Russia). Look for activity on all bands especially 20/15/10 meters bands. QSL via RZ9WZ. E-mail address: rz9wz@ufanet.ru
Direct address: P.O.Box 7, Ufa, Russia, 450071

T5, SOMALIA. A few sources report that Julian, T5EC, a member of a German medical relief team in Badade, was heard on 12 meters SSB on March 7th. No other information or QSNs were reported since then. His length of stay is not known. QSL via DL0MAR

TX8, NEW CALEDONIA. Operator FK8FI, FK8VHN, FK8HC and FK8GM will be active in the CQ WPX Contest in 2 weeks as TX8DX as a Multi/Multi entry. The QSL Mmanager is VK4FW: Bill Horner, PO Box 929, Gympie QLD 4570, Australia.

VP5, TURKS & CAICOS ISLANDS. Matt/IK2SGC and Conrad/IK2SFZ will be active from March 24th to April 5th from Whitby, North Caicos as VP5/IK2SGC and VP5/IK2SFZ. They will be on the air for the CQ WPX SSB Contest as Multi/ Single as VP5N or VP5R. During the non-contest operation, they will be concentrating on the lower bands and WARC bands. The equipment will be the following: Yaesu FT1000MP, Kenwood TS-950, Kenwood TS930, Kenwood TS-830, Alpha 87A, Alpha 78, Heath SB220, 10 element 10/15/20 + WARC, Cushcraft 2 element 40 Meter, M2 80M rotatable dipole and 160m slopers. QSL via IK2SAI. E-mail QSL requests for the bureau can be sent to: ik2sai@amsat.org
Or via packet radio at: ik2sai@ik2hdg.ilom.ita.eu Direct QSLs can be sent to: IMCO P.O.Box 99 20101 Milan Italy.

XX9, MACAO. Ed, K8EP, will be travelling to XX9-land over the period April 8, 9, 10, 11 and 12th. He will obtaining his license when he arrives there (Callsign to be assigned later). His operations will be on 40-10 meters SSB and CW. QSL via K8EP.

YB0, INDONESIA. Wisnu, YB0AZ, reports that he tries to be on 14195 kHz (+/- QRM) each day. He is currently looking for HI and MS to complete his WAS on 20. QSL via Bob/W7TSQ his QSL manager and THE ONLY route for a card. Bureau cards are OK.

ZC4, UNITED KINGDOM SOVEREIGN BASES ON CYPRUS. The "DX News Sheet" reports that George, 5B4AGC, may be active as ZC4RAF, March 26th. Activity will be on CW, possibly staying overnight for LF bands. QSL via 5B4YX.

ZK2 NIUE. Look for Uwe/DL2YAK and Hape/DL1EMH to be active from here March 22nd through April 11th as ZK2GEO. Activity will be on all bands CW/SSB/RTTY and also an entry in the CQ WPX SSB Contest. QSL via DL1EMH.

ZV0, ST. PETER & ST. PAUL ARCHIPELAGO (Update). By the time you read this, the ZV0SB and ZV0SW operation should have started (scheduled to begin on March 15th or 16th). It was announced this past week the team will, unfortunately, not work RTTY this trip. They hope to do it next DXpedition. Also announced, Ari, PT2BW, who was to be their pilot station and land coordinator, had to drop out do to health reasons. Morgado, PT2CSM, will replace him along with the help of PS7AB/Ronny, PT2/PY1HE/ Dias and PT2TF/Tereza. Operations will last until March 21st or 22nd.

Has anyone used a monitor scope, such as a Kenwood SM 220, with a Yaesu FT 1000D? I would like to set up a panadaptor view to use while receiving.

Any suggestions?

Jim, W4JO
Powder Springs, GA

They say March comes in like a lion and leaves like a lamb and in between it's eat or be eaten. Well, while the Wx decides which way it wants to go, what better way to spend those cold / warm Winter / Spring DX nights that to curl up with your own copy of VK0IR, Heard Island.

Written by KK6EK, Bob Schmieder. This is the complete account of the 1997 DXpedition that eclipsed all world records for amateur radio operations from remote sites and set the standards by which all DXpeditions are now compared.

I have 1 copies left. Cost is $20US plus shipping (approx $3US). If interested, let me know ASAP. ALL proceeds go to the Heard Island Fund.

That's what I'd usually think, but there have been spots on DX Summit
indicating this station is coming in from the wrong direction -- the
general consesus is it is indeed a pirate.

Then again, one should always WFWL.. (work 'em first, worry later!)

I currently own a TS-450S with 1.8 kHz and 500 Hz filters and was pondering replacing it with a Icom IC-706MKII. I know it will add DSP, 6 and 2 meters but any opinions on whether this would be an improvement on HF for the low budget DXer ? 73 and Thank you

In terms of basic performance at least, I think the 706 would be a step down for DXing use. I'm not knocking the 706 per se, in fact I have one and like it very much, but as a DXing rig there are many better choices.

It would not be an improvement on HF, unless you wanted the built in keyer. QSK is good on the 450, not so good on the 706. Get the 706 and see how you like it. If you get a good deal on a nice used one the experiment shouldn't cost a thing if you change your mind.

Given you are after HF performance, and from your email address "cwdxer" place a lot of weight on CW I would stay with the TS-450. You can add excellent CW and DSP performance by adding a Timewave DSP-599zx to the station.

Geesh guys, I hope this doesn't sound too demeaning to us hams as technocrats but here is my answer;
The cost of a used HT amp right here on the newsgroups is around $50. By the time you purchased a 10dB transistor, new mounting hardware and insulator, heat sink, resistors, fixed and compression trimmers, a bit of coil winding wire, relays, a couple diodes, switching transistor, and a relay, you would exceed this amount, 'unless you had an excellently stocked junque box. . . if that is the case do a search on MRF transistor amplifiers and in about an hour you will have a schematic and PC etching template. Motorola has application notes for power transistors. You could also check the ARRL manuals at the library.
73 and email me direct if you do take this on and get in a bind,
Art k9xf

772. Malpelo Enthusiasm

Newsgroup: rec.radio.amateur.dx
Date: 1999-03-17 00:00:00 UTC
From: "Louis Sica, Jr. (AC0X)" <ac0x@qsl.net>
Message-ID: <KN_H2.1754$xl4.104128@ptah.visi.com>
Source record: 25721

Today I was scolded by Pedro for "third time working him on 20 meters". To be honest, I think I *DID* work him once before, but it was hard to copy my call to be sure, so I went for an "insurance contact". If he heard me a third time, I didn't hear him at all. Also, I'm hardly a big gun, running 100 watts to a ground mounted Butternut vertical.

My question is this: Is Mr Allina one who might "punish" me by not sending me a card for this? I included a note (in my best Spanish) apologizing for my "enthusiasm". Malpelo is a new one for me (#308, all with "mini-yagis" and verticals with 100 watts), so I do hope I get the card.

Thanks to all

>Although I doubt my antenna is worthy, any hints on the best
>time to try to work Europe ?

It depends on the time of the year - and what part of Europe. Propagation
is widely different if you are up in the Nordic countries, like me, or down
in the Mediteranian area.
One ofthe facinating things for me, when I started ham radio, was to explore
when I could work what. If you make it too easy for yourself, you will
loose out on the fun !! hi

BTW At this time of the year ha band starts to open to East Coast USA from
abt 20 UTC. When the band peaks most of us will be sound asleep in our beds
!!

Have fun - explore the band !! I worked Antartica on 40 m one late night
with a piece of wire across the street. That was the highlight for years for
me.

There are several things of note here:

SSB is a lot more difficult on 40 than CW. Most of the DX transmits LSB from 7040 to 7099 kHz and listens either in the US phone band for USA, or on their freq for the rest of the world. EU has a hard time hearing there because of the EU 41-mtr shortwave broadcast stations.

Most of the CW DX hangs out on 7000-7015 kHz. There is some higher in the CW band, especially in contests. If you want to do CW DXing from the USA, an Extra-class license is a big plus.

I got on 40 meters in late 1992 from my current QTH with a barefoot rig and a low sloping dipole - the high end was up about 10 meters and the low end was up about 0.4 meters. I worked 150 countries on 40 in the next year and a half (this was exclusively CW). My rule is - if I can hear them, I can usually work them.

Hi.

For 9A stations you can try on http://ham2.irb.hr/hrs

It's web pages of Croatian Amateur Radio Association (HRS) where you
can find 9A callbook on-line..

If there isn't some of call, you can send me e-mail and I whill check it

directly in HRS by phone.

73's de Chris, 9A4KK (one of 9A9D Contest Team)!

Now, now, cost-effectiveness isn't the only reason to homebrew, is it?
Without wanting to start a thread on the philosophies of homebrewing,
it must nevertheless be stated that the desire to build need not come
solely from a desire for economy. Such a view, stated alone, reflects
an egocentrism on the part of the speaker/writer.

> if that is the case do a search on MRF transistor amplifiers and in about an
> hour you will have a schematic and PC etching template. Motorola has
> application notes for power transistors. You could also check the ARRL
> manuals at the library.

Now, here is the egocentrism-destroying part! Well written, Art.
Don't forget that the 1998 version of the ARRL handbook has an article
in it on a 2m amp using one of those RF power modules.

There's also a guy on qsl.net who parallelled 4 (count 'em, 4) 70cm
power modules to make a 100-watt power amp. Go to www.qsl.net and
perform a search for "amplifier" to find it... Interesting stuff!

Another approach would be to salvage the PA stage from a
defunct VHF commercial radio (unless that's why the radio
was scrapped...) and rig up some switching. One particularly
slick no-moving-parts approach I've seen involves quarter-
wave transmission lines (practical at 2m) and diodes.

Hello everybody,

I also worked VK0AE on 30m (work first - worry later) and looked
around in the internet to find out where he was.

After I found the call in the 1998 callbook and discovering that
the station should be on Macquarie Island I tried to make a contact
with somebody there. See the atttached 1st e-mail.

After seeing Marks posting I also found someone on Casey base
See the 2md e-mail.

Now I am pretty sure that VK0AE was/is a pirate - but I worked him
and yes he/she is a pretty good cw op.....

Congratulations, Doug!

>Which just goes to show, persistence pays...

Absolutely. When you aren't the biggest gun around (at least, I'm
assuming you aren't :-)), you've got to be persistent and clever.

I remember once when Revillagigedo was activated for the first
time in many years and I was trying to get through to them with
my porch awning antenna. Even though I knew some of the ops--so
they definitely would have come back to me if they heard my
voice or part of my call--I just wasn't being heard.

However, I had noticed that they were showing up on 40m about a
certain time each evening, so one night I tuned up there and waited.
Sure enough, they came on and I was about the second or third
person they worked. There was no way I was ever going to break
through a pileup, so I just had to work *around* them! All those
times I was beating my head against the Heathkit in frustration,
I told myself it was building character. :-)

> interesting. Thanks.

It's standard transmission line stuff, the way a 1/4 wave
line inverts impedances.

On receive the diodes act like an open circuit. On transmit
the diodes at the PA output conduct (short circuit), appearing
as an open at the other end of the line, disconnecting the
antenna (not to mention the PA output from both the PA input
and the HT input) from the HT. Similarly, the diodes at the
HT output conduct (short), appearing as an open at the other
end of the line, disconnecting the antenna from the HT and
sending its power to the amplifier instead. All the usual
references.

I've seen examples in the ham literature - in Ham Radio
many moons ago, and in VHF Communications/UKW-Berichte
quite recently.

Another clever application of transmission lines I saw recently
involved faking a variable inductor in a VXO by transmogifying
a variable capacitor with a lumped 1/4 wave line...

hinermad@my-dejanews.com wrote:
> Um - that's actually 0.7 volts at the diodes.

That too..

Is not the impedance of the diodes substantially higher than 50 ohms?
(I mean, when they aren't conducting)

In that case, the 1/4wave line hooked to the antenna connector is
connected to another 1/4wave line hooked to the transceiver connector,
which in turn goes to the input of the receiver, which is in theory a 50
ohm load. (admittedly in practice not true, but presumably close enough
to make things work) So we have 1/2wave of 50-ohm transmission line,
ending in the 50-ohm load of the receiver input - essentially the same
thing as if we'd added another 1/2wave of RG-58 between the antenna and
the receiver.

Now, when we key the transmitter, these diodes (which had been just a
minor impedance bump in the middle of a 1/2wave piece of transmission
line) become something pretty close to a short circuit. Now, the two
pieces of 1/4wave line do become transformers, transforming the very low
impedance of the conducting diodes to a rather high impedance across
both the input and output of the amplifier. So the two lines have
relatively little effect on the input and output matching, and at the
same time the near-short-circuit at the midpoint prevents output RF from
getting back into the input. (and turning the whole thing into an
oscillator)

Actually I do have a pretty good signal these days, but I sure remember the cap-pistol days! (besides, with the large collection of poorly-trained and outright malicious ops on the bands these days, even the big guns often need strategy simply to *hear* the DX! No amount of transmitter power will make up for a malcontent jamming the DX...)

Great story! (and great idea. Some DX operators have predictable operating patterns, and if you can figure that pattern out, you've got a real leg up on the competition!)

Well, unfortunately there still wasn't time for a chat in this QSO. But
I have received previous information about the island from other
sources. DXing is indeed a lot more fun when you can imagine what the
other guy's QTH is like; to that end I keep a good world atlas in my
shack, and try to pinpoint the location of each DX station worked.

I agree that nets are often best for those with big amps or good antennas, who can break the pileup to get on the list. It is harder to get on the list than to work the dx, and most people would be better off on their own, much of the time.

What I don't understand is your hostility toward those of us who are apartment dwellers. I have 5 band WAS on indoor dipoles and am going for 5-band dxcc. Why should I quit until I live somewhere where I can have a tower?

You're right, though, I do look something like a lizard.

Shame on you. There's a whole lot more to amateur radio than spending money. What Dan is wanting to do is both legal and beneficial. If he builds the amp and you buy one, he'll know a lot more about it. Find something constructive to say or move on.

IMHO the criticism of the indoor-antenna station is indeed uncalled-for. It may have been reasonable 40 years ago. (except for those who had, for some reason, to live in New York<g>) Today, with the extreme housing prices in some parts of the country (notably California), a responsible job as a qualified electronic technician (or even a degreed engineer) may not pay enough to buy a single-unit home. Family priorities also limit the ability to pursue a competitive antenna system. (I can afford one only because I'm single & childless...)

That said, having a limited antenna (as Charles says) doesn't justify the use of lists. I managed to work over 200 countries in less than 5 years using 100 watts and two indoor antennas. (10m dipole and Isoloop) A list *may* be justified if:

- The DX station's command of English is limited.
- The MC has relay MCs in other areas of the world to ensure those within the main MC's skip zone have a chance.
- Nobody relays any reports or calls.

For awhile, I operated mobile a lot & found myself invited to a certain net. (on CW, at that!) Tried it a few times, but was very disturbed by the amount of relaying going on; I felt someone else's transmitter was responsible for sending my information to about 10% of the stations I "worked". Haven't been back...

<G>.

Unfortunately, this scheme doesn't work on SSB. (well, it does work
against the tuner-uppers & CW jammers, but not against the "UP" lids...)

I guess a supercharged QRN-canceller might be in order for this...

I don't buy that one. How much English do you need for "AC0X, 59"

>- The MC has relay MCs in other areas of the world to ensure those
>within the main MC's skip zone have a chance.

If one MC is bad, two usually makes it worse.

>- Nobody relays any reports or calls.

Which is ALWAYS going to happen on a list just by its nature. The net control HAS to say "zero x-ray, make your call", giving the DX station part of your call already.

Look, I'm not going to call lists TOTALLY evil. Early in my "DX career", I too was under the misbegotten impression that lists helped the "lesser powered station", and got on them to work such "rarities" as Guernsey and St. Lucia. But, as time went on I learned how much more fun (and usually easier) it was to work them OUTSIDE of lists. And I'll admit, my FR/J card is from a list operation. Shoot me. But, what I *AM* saying is besides being not nearly as fun or not nearly as "sporting" as working them on your own, that lists often don't make a contact easier for ANYONE, DX station or station calling them, low powered or high powered station.

Besides, how many "anti-list purists" would stay that way if a valid P5 station showed up on a list somewhere. I think almost all of us would swallow our pride for that one.

Ah, my pet peeve, the tuner-uppers. Wish there was some way to short out their finals. I can give a jammer the benefit of the doubt and presume he/she just doesn't know any better, but the tuner-uppers should realize they are littering the frequency.

Just another gripe from

At 1/4 electrical wavelength a transmission line will act like a short
circuit.
Thus it is called a shorting stub. This is the basis of waveguide.
Waveguide
is basically two 1/4 wave shorted stubs joined. The shorted end is the edge
of the wave guide. This makes it easy to guess the transmission frequency
of some equipment by the size of the wave guide.

It has been difficult to tell from the discussion, but it sounds like there
is a 1/4 wavelength stub in series with two diodes (that are in parallel but
reversed with each other) then another 1/4 wavelength stub. Is my
assumption correct? or is the amplifier also between that? Thanks, Michael

Good point. Though I've heard more than one operation that goes well beyond that.

Oh, I've worked a couple (8P6 & 6W8..) via nets too. (don't remember if I've ever worked one on a list or not!) The concept is not inherently evil. It is inherently inefficient. (as Louis says)

Really, we should delete the CW portion of the license exam and replace it with a *spoken* exam. It'd make for a more orderly HF spectrum...

Ignore the spamming BS you may get here Dan,
Ofcourse you can HB an amp.. I have many of times. It's fun and a great learning experience.

It's a shame there are so many "appliance operators" hanging out on VHF but with today's ease on licence requirements I guess we get what we get if we're going to keep the hobby alive.

I have used many different sources from CCI to RF Parts Ramsey sells an OK kit at a decent price but the best performance I ever had was by using an old VFH Marine Tube rig. and converting the PA to 144 Mhz WORKED GREAT on SSB and FM.

Good luck and don't let the CB'rs get you down... <= That should stir up some interesting discussion!

FS: Tower, 90' Rohn 55G

Nine 10' sections of Rohn 55G, extra heavy duty galvanized steel tower, in perfect condition, no rust or corrosion.
Rohn top plate with 2-1/2" thrust bearing.
Rohn rotator bracket, drilled for HyGain HDR-300 (rotator not included).
Steel mast, 6' x 2-1/2" diameter x 1/4" wall thickness.
2 ea. Rohn guy brackets with shackles.
3 sets upper and lower guy assembles using Philystran 6700 above and 5/16" galvanized steel below, insulators, turnbuckles and load balancers.
Rohn engineering drawings and specifications included.

On the ground, ready for pickup, near Boulder, CO. Install a base, three guy anchors, rotator and antenna and you're in business. Texas Towers' current price for the nine 55G sections alone is more than $2,000. What am I bid?
The complete tower goes to the best offer over $990

Sure wish I was better at ASCII art<G>.. The following will probably only
make sense in a fixed-width font small enough to provide at least 80
characters to a line:

```
input connector ==============amplifier
electronics======================output connector
|
|
| 1/4wave line
1/4wave line |
====================|==============================
|
diodes (2, one
with cathode grounded & other with anode ground)
|
ground
```

I'll try to draw something more sensible in Windows Paint & post it to:
personal.bna.bellsouth.net/~w9wi/trswitch.htm

That'll take a few minutes, don't expect to see it any earlier than 2200 CST
Friday 19 March.

I suspect, despite all the sarcasm, that the original poster intends to use
the HT as either a mobile, or base. I too would be interested in home-brew
2m+ amps, but I personally would prefer to hook them to a mobile/base

I was just reading about one in the '99 ARRL Handbook (p13-44). Uses a
toshiba S-AV7 or S-AV17 for 25 or 50W version respectively... wonder
where to find these, and how much? Alternatively, Radio Shack was
closing out their 2m amp for $30 a while back, if you can find one.

i used to own a ts-430s and now i own a 706-II and i sold the 430
but all in all the 430 was a slightly better radio it had less
Intermod and images, i basically run mobile once a yr on vacation and
the 706 is lots of fun,, but for DX id prefer something better.
other than that you can not beat the bells and whistles and size of the
706. i like mine a lot, 2m op with repeater offsets is clumbsy.

Yes, for awhile I had a Heath 1w in/10w out amp that used that arrangement. Really pretty cute -- two quarter-wave lines, with a pair of back-to-back diodes (in fact, I *think* they were plain ol' 1N4148s but not certain) across the lines where they joined. One line on the output connector, the other on the input.

No drive: the diodes don't conduct (at least as long as there's less than 0.7V P-P of RF on the antenna!) and the lines essentially behave as a piece of coax. Feed it some drive, and the diodes conduct -- putting a short circuit at the junction point -- and reflecting a near-infinite impedance at each terminal of the amp. Worked quite well. (especially on a packet station in the room next to my bed!)

At the risk of being repetitive<g>.. After browsing every DX site I can think of, I still need routes for the following, for the ARRL DX test just past:

CU2AF (appears a few times for 1995-1996 expeditions - still valid? Or via CU2 CBA?)
VP2V/K3MD (mentioned several times but never with QSL info)
VP9ID (I'll bet it's K1EFI but hate to use that for a contest QSO without confirmation)

Thanks!

813. another fun DX QSO!

Newsgroup: rec.radio.amateur.dx
Date: 1999-03-19 00:00:00 UTC
From: Doug Smith <w9wi@bellsouth.net>
Message-ID: <36F24439.390422B1@bellsouth.net>
Source record: 25740

Well, I've been chasing Malpelo for the whole expedition.. As the readers of this group may or may not know, the only reasonable landing site on Malpelo Island is on the island's *south* shore -- and a very large ridge rises directly north of it. (I've seen a photo of the island. "Mal Pelo" is Spanish for "Bad Hair" (though I understand the island was actually named in some other way) and the ridge really looks like Bart Simpson's hair on a bad day!) This tends to make propagation to the USA rather difficult. I've heard Pedro several times on this trip, but rarely loud enough to make it worth firing up the transmitter -- if I can't tell if he answered me, why bother calling?!

This morning, I left DX Summit minimized while answering my email. When all the email was done & I restored DX Summit, I noted one DX station was spotted as "having QSYed to avoid QRMing Malpelo". Decided to load a 250-spot page, and found one spot of Pedro on 28.485. Tuned there - I could tell there was a station there, but nothing copyable. After about 15 minutes, he began to get stronger - and then went QRT for awhile. Oh well.. I'll leave the rig on 28.485 & see what happens.

Over the next half-hour or so, I did laundry, made lunch, messed around with the computers, etc.. A few people apparently had seen a packet spot & would call HK3JJH on 28.485, but he wasn't there..

Then, about 1730z I heard a clear (though not particularly loud) South American-accented voice begin saying "CQ, CQ". This was a familiar voice, and it led me to sprint (?!) into the shack. Turned the plate voltage back on, and pressed T/F SET to make sure the transmitter was still on 28.490. Released it to go back to .485; "... JJH portable 0M Malpelo Island, QRZed". "W9Whiskey Italy". "W9WI, 59"...

Which just goes to show, persistence pays...

Thanks for the info. I love hearing some detail about these DX locations. Whilst I enjoy the cut an thrust of DX chasing, some of the most pleasant QSO's have been those odd times when you and the DX station seem to be the only people on the band and you can really find out about the location and logistics of the trip!

Cheers,

/Denis MW0CBC/GW8OQV (ex VP8, W2 etc)

Um - that's actually 0.7 volts at the diodes. The 1/4 wavelength of coax acts like an impedance matching transformer, converting a low voltage signal at the antenna terminal to a high(er) voltage signal at the diodes. The diodes clip this down to 0.7 volts, which then gets transformed back down to a tiny voltage at the amplifier input by the other 1/4 wave coax run. The impedance transformation is important - otherwise you could just hang the diodes on the amplifier output.

Even seen a glass light-emitting diode? One that projects "1N914" on the ceiling?

Mike,
Why bother, I have a Dymark 2 Meter amp for an HT, you can have it for $20.
plus shipping.

Dear colleagues radio-amateurs

We would like to inform you that Radio club HERTZ will organize an
expedition on an island St. Nicolas EU163
The expedition will last from 15. to 25. April 1999.
The callsign's to be used are: YU7ADY/P and, possible, 4N9W.
The working frequencies are 3.5, 7, 14, 21, 28 and, possible, 144 MHz.

Thank you for your attention

73 de YU7ADY

Hey, I've been listening to this thread for a while, and I'm not too
sure what is happening with the two pieces of coax... Are they for
switching the amp in and out of the circuit--in effect, acting like a
T/R switch? If so, where can I find some more info on this? It sounds
interesting. Thanks.

I sent him a direct QSL using a business-looking envelope, with the postage
put on as a "meter" at the local Post Office. I received the card back
direct and also one via the bureau. I needed that one for Zone 23 on
80-Meters.

Doug,

How true. I worked Malpelo on 20 Phone one morning while I was on vacation. The pile-up was bad. One station just kept calling **/QRP. No matter what was going on he was calling. The sad part is he was rewarded with a QSO. Since his strategy payed off, he will use it in the next pile-up creating more QRM.

See ya next weekend in the WPX--I'm on business in CA and will be operating from N6RO.

Hi Mike,

This URL is a great prefix lookup engine:
http://no4j.com/nfdxa/dxcc/pfx.asp It shows VP6 as Pitcairn Island.
Unfortunately, the ARRL DXCC list does not include VP6, don't know why.

I cant' answer why the VP6 doesn't show as a seperate DXCC entity (it is)
but these changes occured after the Reds took Hong Kong. The British ceeded
the VR-VS block of call signs to Red China when that happened.

Yes, it was changed. Used to be VR6, but when Hong Kong was returned to China, the VRA-VRZ prefix block was also handed over to China. (why they didn't leave Hong Kong with VS calls & give China the VS block I don't know - probably has something to do with commercial services)

Hi Mike -- several excellent prefix lists at URL:
http://www.ac6v.com/pagev.html#PR

Shows VP6 as new Pitcairn Island Prefix

This can be confirmed by going to the Pitcairn Home page at URL:

http://www.visi.com/~pjlareau//pitc1.html

Here is a quote:
"Note: As of May 1998, all Pitcairn call signs are prefixed by VP6
rather than VR6, which now belongs to China."

Also skeds and VP6 Calls are listed there.

Yes, the prefix changed as a result of a reassignment of call sign prefixes when Hong Kong was returned to the PRC.

Doug,
I enjoyed your story about HK3JJH/0. I had a similar experience this past summer but it was entirely by accident! I had been tuning around 10 meters just to see what was on, but the band was not too exciting. I think it was one of those late mornings on a day when the geomagnetic field was active so there wasn't much coming in from anywhere except W6/W7 and South America. I remembered at that point that I needed to fix my shack chair, which was a bit wobbly, and so I left 10 meters by the wayside for a little while to attend to the chair and wait for the band to get better. I left the TS440 on 10 anyway, tuned to a rather random frequency, wherever I was when I took my hand off the knob. I think it was 28.486.7 or something like that. Over the next hour I heard a few off-frequency CQ's from guys in the states, and then all of a sudden I heard something that would have knocked me out of my seat, had I been sitting in it instead of fixing it. Zero beat on the random frequency I was listening on, I heard VP6TY calling a station in W9 on schedule. I hopped over to the radio, swung my little 2 el beam towards Pitcairn, and as the lengthy pause indicated to me that no one had returned the call to VP6TY I gave him a call. He heard me the first time, and we had a nice little chat before we exchanged 73's and the pileup started. So just by a stroke of tremendous luck, I landed a brand new one with my little station on 10 meters. The most amazing thing was that my QSO that day was only the second time I had ever heard a station from Pitcairn! Here's to hearing them before the pileups start! 73 and good DX.

Are you looking at a printed version of the DXCC list? The one on the
ARRL web site has Pitcairn listed as VP6.

Hi

This is to let you know that I will be joining the 1999 CQ WPX Contest
SSB with a special callsign : CQ7 ERK. I will join on a Single Operator
Low Power Single Band 10 meter entry.

QSL via my home call CT1ERK via bureau or direct to my Callbook address.

Good luck.

Antonio Rocha Graï¿½a

March 22, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N1WLV, WA1ECA, AB2E, KP2BH, K4PC, K7AR, N8RFK, K8YSR, KE9KD & DX Central, W0YG, DJ5AV & DX News Letter, G4BUE & DX News Sheet, G0RCI, G0TSM, LA0CX, OK1YM, ON4BAM, PY1KS, SV2CWY, UN5PR, VE2SEI, VK5FV, VO1HE, YC0LOW, YU7ADY, ZP5AZL, ARRL Letter and Takashi Sawaguchi for the following DX information.

SPECIAL NOTE FROM EDITOR. There may not be a bulletin next week due to the fact that my wife is sending me to Las Vegas for a few days for my birthday so I can visit my father..... FOR REAL... What a great gal, hey! Anyway, if possible, send your DX info before March 25th, and I will try to put one together before I leave.... 73 de Tedd KB8NW (Editor)

3A, MONACO. The "DX News Sheet" reports that Luc/I1YRL and John/IK1SLP will be active again March 27-29th, as 3A/I1YRL (CW) and 3A/IK1SLP (SSB). Activity will be on all bands. QSL both via I1YRL.
Also, look for Henry, HB9APJ, to be active April 7-19th as 3A/HB9APJ His activity will be mainly CW on 30-10 meters. QSL via his home callsign.

8A, INDONESIA. Jo, YC0LOW, informed OPDX to look for 8A0J (Eight Alpha Zero Juliet) to participate in CQ WPX Contest on all bands as a Single Transmitter/Multi Op station. His QSL Manager is Taufan, YB0AI.

8P, BARBADOS. Look for Dean, 8P6SH, to be active as 8P2K during the CQ WPX SSB Contest and all other major contests until December 31, 2000. QSL via KU9C.

ATTENTION CONTESTERS! According to "The ARRL Letter (Vol. 18, No. 12, March 19, 1999)" the following was reported: "The new Canadian Territory of Nunavut, VY0, comes into effect on April 1, 1999. To reflect this new addition, Nunavut will become a separate multiplier in the two RAC Contests commencing with the RAC Canada Day Contest on July 1, 1999. --RAC"

C5, THE GAMBIA. Franky, ON4CEL, received the callsign C56EL and has been quite active on 40/15/12/10 meters CW. You just have a few more days to work Franky as C56EL (goes QRT on March 25th). Franky states for NA to look during their greyline time on 30/40/80 meters. QSL via ON4CEL, via the bureau or direct only to the following address: Franky Beuselinck, Oostmolenstraat 95, 9880 Aalter, Belgium.

C9, MOZAMBIQUE. Reinhard, DL6DQW, will once again be active from Benguera Island, March 26-29th, as C91RF/P. Activity will be on all bands CW/SSB using a IC-706MKII and wire antennas. QSL via the bureau or direct to his home callsign.

CY9CWI, ST. PAUL ISLAND. Fred, VE2SEI, reports that the original CY9CWI DXpedition announcement contained several errors and they would like to have the announcement republished. Look for the West Island ARC of Montreal from July 21-28th. Operation from this DXCC country will be on 160-6 meters as conditions permit. Operations will be on or near: 1830, 3505, 3780, 3860, 7005, 7065, 7230, 10105, 14010, 14265, 18080, 18125, 21010, 21305, 24935, 28010, 28395 and 50130 kHz. The team will be an entry in the 1999 IOTA Contest (July 24-25th) and will make special efforts to work Asians on 10-15 meters, Europeans on 80-160 meters, and Canadians everywhere! Operators will be Helen/VE2YAK (YL Op), Fred/VE2SEI, Al/VO1NO/VE1, Reg/VE2AYU, Bill/VE1MR, Dragan/VE2ZIV, Lowell/VY2OX, and J-F (Jeff)/VE2TBH. The following CY9 references were provided: CQ zone 05, ITU Zone 09, IOTA NA-094, Can. Is. NS-002, N. Lat. 47.33 degs., W. Long. 60.16 degs. Direct your comments and questions to: Fred Archibald VE2SEI, 130 Embleton Crescent, Pointe Claire, QC, H9R 3N2 Canada or via his E-mail address: archibal@pubnix.net
QSL via VE2CWI West Island ARC, Box 884, Dorval, Quebec, H9R 4Z6 CANADA.

DXCC FAQ #4. All OPDX InterNet Subscribers will receive a few extra bulletins this week. One contains Bill Moore, NC1L, DXCC FAQ #4.

DXCC YEARBOOK. Reports say that Bill Moore, NC1L, stated that they should be in the mail soon (April 1st).

E4, PALESTINE. David, E41/OK1DTP, continues to be active especially on 80 and 12 meters. Look for him to be active in the upcoming CQ WPX SSB Contest. Reports indicate that David will be active until December 31st. David was recently joined by his father Jirka, OK1TD, and they installed a HF tri-band beam and 160 meters dipole. QSL via OK1TD, Jiri Lunak, U Sporky 185, CZ-470 01 Ceska Lipa, Czech Republic.

HS, THAILAND. Look for Charlie, K4VUD, to be active as HS0ZCW now through April 5th, and again between May 18th and June 2nd. No other details were provided. QSL via K4VUD.

IOTA NEWS.....
EU-038. Maurice, ON4BAM, will be active from the island of Ameland (Waddeneilanden), from May 12-15th, as PA/ON4BAM (/M). This is a family trip that includes playing radio (not a 24 hour operation). He will be active while driving (not too much.. only small island), evenings and in between sightseeing

He will be using a TS-50S (150W), Outbacker Perth while mobile and wire (80m dipole or 12m helically wound wire on a FTT, Fiberglass Telescopic Tower). Propagation permitting, he will favor 12 and 17 meter bands. If the bands are bad, Maurice will be on 20 meter (14.250-270). QSL via homecall (CBA or Bureau).

EU-107. The Grantham Amateur Radio Club will activate Ile Aux Moines, one of the Sept Iles, from June 26-30th. The callsign will be F/G0GRC. They are limited to daylight hours and battery power as the isles are a bird sanctuary. QSL via G0RCI, Alan Gibson, 1 Oakleigh RD, Grantham, NG31 7NN England. All QSOs will be confirmed. After 1 month, any remaining cards will be sent via bureau.

EU-163. The radio club HERTZ will organize an DXpedition to the island of St. Nicolas, April 15-25th. The callsigns to be used are YU7ADY/P and possibly, 4N9W. Activity will be on 80/40/20/15/10 meters. QSL via Radio Club "Hertz", P.O.Box 47, 24430 Ada, Yugoslavi.

OJ0, MARKET REEF. Look for OH0RJ, LA1SJA, LA3KIA and LA0CX, who will be active from the lighthouse around the last weekend of June. The lighthouse has been booked and transportation has been arranged. Their main mode will be CW, on 160-6 meters with an emphasis on 12 meters. The main station will be running on a 24-hours-basis, one more station as often as possible. Total time of operation is expected to be 96 hours. Callsigns will be OJ0/ with their home callsign. QSL via homecalls.

LO, ARGENTINA. Daniel, LU1DK, reports to look for the station LO0D to be using this new prefix for the next 5 years during contests. QSL via F6FNU.

NEW PREFIXES FOR THE "CQ WW WPX CONTEST". Chris/SV2CWY and Savas/SV2AEL, will operate with the new following prefixes for the CQ WPX Contest only during the last weekend this March. Chris/SV2CWY will us the callsign J4Z, probably the first time a 3 letter callsign is used in Greece. QSL ONLY via: PO BOX 40130, Thessaloniki 56000 Greece. Savas/SV2AEL will use the callsign SW2A. QSL ONLY via: PO BOX 22013, Thessaloniki 55310, Greece. These two callsign will not be accepted via the SV QSL Bureau.

NP3, PUERTO RICO. The NP3X team will be in the CQ WPX Contest after some last minute preparation. They will be in the contest as a Multi/Multi entry. The team will be operating from the KP3P contest station. The list of operators will be: WP3A/Jim, WP4NHM/Rafael, WP3C/Al, W4OV/Bruce, WD4JNS/Julio, W4DN/David and KP2BH/Jimmy.

P4, ARBUA. NODXA Member Bob, K8BL, will be operating from here from March 22-26th. His equipment is an IC735 and MFJ portable antenna. Look for him 15 kHz above the band edge. Callsign is currently unknown. QSL via K8BL.

PACIFIC NORTHWEST DX CONVENTION. The Willamette Valley DX Club is pleased to announce the annual Pacific Northwest DX Convention is to be held July

30-31th and August 1st, at the Monarch Hotel in Portland, OR. For more info about the club, and to print out a registration flyer for the convention, visit the club's Website at: http://www.qsl.net/wvdxc

PW, BRAZIL. Alex, PY1KS, will be active in the CQ WPX SSB and CW Contest as PW1S. His entry will be All Bands Low Power (ABLP). QSL via Bureau or direct to: P.O.Box 18123, Rio de Janeiro-RJ, 20722-970 (GG87ic), Brazil.

PY0F, FERNANDO DE NORONHA. Just a quick reminder! By the time you read this, Peter, PY5CC, should be active as PY0FF on all bands until March 29th. QSL via JA1VOK.

QSL INFO AND NEWS.....
QSL J3/M0BJL direct to his address: Shaun Jarvis, PO Box 21, Hythe, Southampton, SO45 1UW, UK. Shaun says that via the bureau is fine if you want to wait a while. This operation was totally unplanned as it was his honeymoon!. He mentioned to one of the hotel staff that he was interested in Amateur Radio and was put in touch with another member of staff who held a J3 call. When Shaun was offered the loan of a TS-850 and a fullsize G5RV he said he couldn`t really refuse.

If you were lucky to work Eddie, N1WLV/DU1, on 6 meters over the past weekend, QSL via DY1LVA, EDUARDO VICTOR J. VALDEZ, ESQ, P.O. BOX 169, U.P. DILIMAN POST OFFICE, 1144 QUEZON CITY, PHILIPPINES.

Erik Sjolund, SM0AGD, reports one U.S. green stamp is NOT enough to QSL to Sweden.

QSLs for ZF2NT go via N4YBF. However, Chris, K4PC, 4-land's QSL Sorter (for W4, K4, N4 "Y"), reports that he has received many QSLs for this call, but unfortunately N4YBF does not keep bureau SASEs on file with him. Chris has sent him several requests to supply him with SASEs but he has not received a response to the requests. Chris suggests that anyone wanting a QSL should send their QSLs DIRECT to N4YBF and not through the bureau.

HK3JJH/0M QSL Route. Both the following addresses are acceptable:
Pedro J Allina, Box 81119, Bogota, COLOMBIA
Pedro J Allina, Apartado Aereo 81119, Santafe de Bogota, D.C., COLOMBIA

ZA5G QSL ROUTE. Frank, WA1ECA, reports that he does not manage this station. The only ZA station that he has ever managed was ZA5B (Gene Neill) who is no longer there. QSL ZA5G direct only.

Frank, WA1ECA, reports that he will no longer accept any QSL cards for 5X1F and 5X1C. Sam, 5X1F, unfortunately became a "Silent Key" after a long bout with cancer before Franl had a chance to get his logs. The only log page ever received from him was August 22, 1995. Mario, 5X1C, has not sent Frank logs since October 1995. Any card requests that are on hand will be returned if it is a direct request and has return postage. Bureau cards will be discarded.

VK9XX/YY QSL CARD STATUS. All QSL cards received direct have now been answered. "The backlog is ZERO!", states Charlie, W0YG. However, Charlie has noticed that he has received some envelopes with nothing inside indicating his mail is being opened somewhere in transit. He states, "So far this has happened twice with letters mailed from Japan. This has been reported to the U.S. Mail folks but they express doubt if anything can be done IF the problem is out of their jurisdiction."

VE6TK is listed in some publications as the QSL Manager for Bill, 3D2DI. VE6TK is no longer Bill's QSL Manager, and, in fact, the call has now been re-allocated. The current owner of the call has been receiving cards meant for Bill. The correct and only address for 3D2DI is: W.J. Smith, PO Box 184, Suva, Fiji.

SPECIAL EVENT. The Ikeda citizen's ARC (JH3YKV) have been issued the special callsign, 8J3IKD, to commemorate the 60th anniversary of Ikeda City, Osaka Japan. Their activity will be on all bands, all modes up to 5.6 GHz. Operations will be from April 10-30th and their licence is only good for 20 DAYS! During the weekdays, they will operate during their spare time in Ikeda City and during the weekends from Mt. Satsuki. Any JARL member is welcome to operate. For details, contact JE3LGJ via E-mail at: je3lgj@jarl.com
QSLs will be issued one way through the bureau.

SPECIAL EVENT. April 14th marks the 40th anniversary of the Incorporation of the Society of Newfoundland Radio Amateurs (SONRA). To commemorate this event, the SONRA DX Group will be operating as VO1AA for this special event on April 14th, from 0000-2230z from their club station. Activity will be CW/SSB on 160-10 meters and also 2 meters. There will be a certificate available to any eligible contact upon receipt of an SASE. To receive your certificate, please send your QSL card with a self addressed envelope big enough to take an unfolded 8.5x11 inch sheet of paper (unless you want it folded) and sufficient return postage to:
SONRA DX Group -or- Paul J. Piercey VO1HE
Box 23099 40 Mt. Cashel Rd.
St. John's, NF A1B 4J9 St. John's, NF A1A 1X7
Canada Canada

SU, EGYPT. Jaro, OM3TZZ, who has been a resident in Giza, Cairo, for some time now, has finally received a callsign. Begin look for SU9ZZ to be active on the bands. He was spotted this past week and weekend on 20/15/10 meters CW. Check between 1530 and 1730 on 15/10 meters and around 0500z on 20 meters. QSL via the bureau or direct to OM3TZZ: Jaroslav Jamrich, Gejzu Dusika 43, Trnava 917 08, Slovak Republic.

SV, GREECE. Olda, OK1YM, (currently now in SV1-land) reports to please look for SV1DKR to participate in the CQ WPX SSB Contest as a Multi/Multi entry.

UP5, KAZAKHSTAN. Romeo, UN5PR, informs OPDX that he will be in the CQ WPX SSB Contest as UP5P and as a Single Operator-All Bands entry. QSL via direct to his regular callsign UN5PR: Romeo Y. Loparev, P.O.Box 73, Temirtau, 472300, Rep. of Kazakhstan. The QSL Bureau in Kazakhstan is

not working.

V2, ANTIGUA & BARBUDA. Brian/N3OC/V26OC and Darrell/AB2E/V26E will be activating the V26B supersite as a multisingle entry in the CQ WPX CW Contest, May 29-30th. They will be on before and after the contest with their individual callsign from May 26-31st. QSL V26OC via N3OC and any V26E operation via AB2E. Darrell reports that he is waiting for another 2000 V26E QSLs from the printer and hopes to have all the bureau cards out before May for the past operations.

XF4, REVILLAGIGEDO. The "DX News Letter" reports that Hector, XE1BEF, will be active as XF4BEF from Socorro Island (NA-030) between March 17th and April 2nd. However, no QSNs have been reported yet. Activity is to be active on CW/SSB/RTTY and on 160-6 meters. QSL via XE1BEF.

ZP40, PARAGUAY. Tom, ZP5AZL, informs OPDX that he will be active in the CQ WPX SSB Contest next weekend using the special callsign and prefix ZP40Z. This is a brand new prefix for the collectors. He will be active as a High Power/All Band entry. QSL route is only via W3HNK, not to his home address.

845. Gray Line and 10 Meters

Newsgroup: rec.radio.amateur.dx
Date: 1999-03-21 00:00:00 UTC
From: Bob Sikes <rwsikes@mediaone.net>
Message-ID: <36F583DE.70153FCB@mediaone.net>
Source record: 25545

I've heard that you get a gray line boost in propagation due to the loss of the D layer on the sunset side before the sunrise side D layer builds. Make sense to me that this works for the lower frequencies, but I don't understand how this would boost 10 meter propagation (as someone told me it would).

Does anyone know for sure if this phenomena applies to the higher HF bands?

Bob W1MMM

Bob,

I'm not sure about 10 meters, but I've experienced it on 15 and 20 meters several times. One morning in Texas, I worked VK9XX on 80 CW just before my sunrise--worked them 15 minutes later on 20 meters with the beam pointed short-path (into the darkness). It only lasted about 20 minutes and then they were gone. I wrote it off to grey-line. I've often listened on 10 meters at sunrise, but never heard anything happen....

Source record: 25647

I cannot seem to leave this one alone. It seems this subject
has been kicked around for years. Imagine if you will, A
simple station out on 8Q Maldives. The operator knows that he/she
cannot call CQ to work anyone in a valid QSO without getting
burried alive in a pileup. My hat's off to those who can do
that. It's an old game of cat and mouse, chasing after the "rare
ones". but not for everyone. I myself choose to play the cat and
mouse game, and play in contests as well. It took some years of
practice in operating efficiently for the best mult rate possible
(when and where). In no time one could literally work dxcc or
5Band DXCC in one weekend with a very modest station. Well back to
the subject. I trully believe that if a dx station has a chance to
work some stateside stations without the VK0IR style pile up, then
more power to him. Perhapps the list operations would serve some
useful purpose to some. Stateside stations are not all created the
same as well. They operate where they choose. The DX nets are also
located in the General op portion of the band as well, which serves
yet another purpose to some. I personally use the nets to let myself
know if propagation to a target direction is up to par, so I listen
to the DX. I also hear the anti-list activists tuning, talking,
yawning, whining, and whatever else might get their attention. For
one point I would agree with them on: it is not wise to send your
"first two", and not the entire call properly. However, on the other
hand, it is equally not wise to "jam" the nets with the sheer purpose
of informing folks of this. Words of the somewhat wise: If you do not
like the lists, dont listen to them. If you want to take your chances
not properly ID'ing yourself, good luck not getting pinched. For what
it is worth, we should be setting an example for those moving up in
the ranks, not discouraging them with poor behavior. and lastly, let's
all try to get along. This is, after all, a hobby....
thanks for reading this

Nets/Lists help stations get the hang of working dx. Lets face there comes
a time when the nets are no longer any value as a dx finder and people can
spin the dial and fend for themselves. But to learn what to say how to say
it and judge propagation it is a great learning tool.

9X5HG was the first and only operation from Rwanda in many years. He took an interesting tack to this problem: he would answer other people's CQs, chat with the CQer for as long as he and the CQer pleased, and then simply disappear. It did tend to leave fruitless pileups scattered around<G>, but seemed to work pretty well.

My personal opinion is that lists may be necessary for a DX station whose command of English is limited, and as long as that list is conducted *honestly* (i.e., no relaying..) it's an ethical operation.

It's still more efficient for the DX to learn how to handle a pileup.

I will certainly cede the point about lists as a propagation beacon! (14.100 works better, provided the datamode stations keep far enough away..)

I'd be quite sure that virtually all of the jammers come from the same group of malcontents who jam pileups and contesters. There's a small group who seems to feel the HF bands are only for ragchewing & anybody doing anything else is a valid target for QRM. The true anti-list DXer uses the newsgroups, opinion columns, and club newsletters as his weapon.

Finally, I'm glad you brought up the point about "last two". If nets want to work that way, I guess they can. (just be sure one gives the full call every once in awhile -- it's the law!) But "last two" has spread out of the list/net world into regular operating. (I'm even getting last-two callers on CW!)

It is especially frustrating to receive last-two calls while operating in a contest. 95% of the time, the last-two caller is loud enough & in the clear enough that I would have got the full call if he gave it -- but now, I have to take a fill. Wastes time.

If anyone else is calling, I will ignore the last-two caller. I know some of them must wonder (when I first answer a station running 1 watt to a dipole, and have to ask for his name 3 times -- and only after that, answer the last-two caller who's running 500 watts to a 4-el Yagi at 25m), maybe someday they'll get the message.

In the meantime, maybe I'll just have to assume if they're shouting "Mike Quebec" over and over, their call *is* MQ, and log them that way...

But any "what to say, how to say it" you learn on a net is useless on the rest of the band! The procedures are totally different. You can only learn regular DXing by doing it. (it is unfortunate the concept isn't on the licensing exam in many countries)

I suppose there can be some value as a propagation beacon. Just tuning around works just as well, if not better. (what if there's a weird opening to central Asia but no central Asian stations choose to participate in the net?)

By far the most effective "dx finder" is one's own VFO knob. A rare DX station who just called CQ or signed off a ragchew will be much easier to work than one who was just spotted on packet, or for who one must wait for the rest of the list to finish with.

855. Re: Gray Line and 10 Meters

Newsgroup: rec.radio.amateur.dx
Date: 1999-03-22 00:00:00 UTC
From: Frank Donovan <donovanf@erols.com>
Message-ID: <7d720e$i8r$1@winter.news.rcn.net>
Source record: 25654

Bob,
It's true that the gray line often enhances propagation on all of the
bands 160 thru 10 meters; however, the cause is not the D layer.
The D layer is strictly an absorbing layer, no refraction occurs in this
layer. In any case, D layer absorption is not a factor on 10 meters.

The MUF is rather uniform along the gray line path; certainly
far more uniform than propagation on non-gray line paths.

Perhaps the best example of 10 meter gray line propagation is the
long path to the Japan and South East Asia at east coast sunrise,
lasting for perhaps two hours. This opening is very common and
easily observed with little effort between September thru as late as June
during high sunspot years. This gray line opening has been very frequent
on 10 meters this year.

On the lower frequency bands, ionospheric tilt often contributes to sunrise
and sunset enhancement; however, ionospheric tilt is an E-layer and F-layer
phenomenon, not a D layer phenomenon.

>

Then along came 9X5EE, who could work 5 or 6 stations a minute on CW and made the country a lot less rare.

I have cards from both, but I treasure the card from Hartmut 9X5HG more, because of the difficulty in working him and because we had a great half hour chat!

Both stations will answer bureau cards, You may have to wait a year or more
for that route to work.

I have in both cases sent a self addressed envelope inside an envelope
addressed to the manager. Do not, if possible, have anything on the outside on
the envelope that suggests amateur radio. In the case of OKDXF just use the
initials. Inside the envelope is your card. Filled out completely using UTC
time along with a green stamp or an IRC.

You can also purchase mint stamps for the managers country from William Plum
(see any DX publication for Bill's address) and stamp the return envelope.

I've gotten about 315 countries this way with good return statistics.

Source record: 25669

I have listened to the various nets and the concept of the list lizard seems to revolve solely around the dx net, though any number of other nets seem to exist without the qrm--county hunters and Geratol come to mind. Apparently someone in authority has talked to Jim W. because I haven't heard him on one of his evening broadcasts lately, but he has chosen to publish on the web a list of stations he heard on a dx net, thinking somehow that this would be an embarrassment. He is equating a net to bad operating practices. If a station gives full id and then offers the last two as requested, he has not violated any rules. Jim must be livid. Just hope he doesn't publish the call of some attorney with extra time on his hands!

I would STRONGLY recommend you get the tower manufacturer's
recommendations for the base. If it's a Rohn tower, I'm told their
specs are on their Web site - they're also in their catalog. (find who
sells that brand of tower in your area & ask them for a catalog) I
believe Rohn does have a system for bolting their towers to the top of
the concrete pad, though I don't know if that extends to the
self-supporters.

Forgive my directness, but you are treading on very dangerous ground!
Opinions from even the most experienced in the newsgroup will amount
to nothing more than opinions. You need to identify the *required
installation parameters* for this tower. You can only discover them
through original specs on the tower or an on-sight survey by qualified
engineers. Jury-rigging a base mount could lead to disaster also.
No doubt there are many people here who could relay specifications on
towers that they have installed, but those specs will not be of any
value to you and your installation. Good luck!

Personally, I prefer to use a good pair of stereo phones. All the "made
for ham/SWL radio" headphones I've tried sound shrill and tend to be
rather fatuiging (sp?).

Right, and in the meantime they have already issued IRC which are
explicitly valid for air mail delivery ("... par voie aerienne").
When I buy some at the local post office, I only get those.
Apparently, the old ("... par voie de surface") IRC aren't printed any more.

If you do not mind Mono, the Koss SpeedZone SPZ9 headphones, available at Radio Shack (p/n 20-284, $59.99), work great. I use them with my HF rig. They are a passive noise reduction design which really helps when trying to hear week signals.

If you want Stereo, the exact same passive noise reduction design is available in Stereo from AES. They are Koss model QZ/99 and actually sell for the same price in the AES catalog ($59.99) as the Mono ones do in the Radio Shack catalog. They also have a Stereo/Mono switch on them. I got mine at Radio Shack last summer when the were on sale for $49.99. They were also on sale again recently for the same price. From the picture in the AES catalog, they look identical with the exception of the Stereo/Mono switch.

I recall reading somewhere (I wish that I could pin down the source) that the older IRCs (even the ones mentioning "surface mail") should be redeemable at airmail rates. I suspect that most postal employees behind the counter don't know this. To the best of my knowledge, the coupons do not expire. Anyone have anything more definitive on this?

3A, MONACO. "The 59(9) DXReport" reports that Henry, HB9APJ, will be active as 3A/HB9APJ, April 7-19th. Activity will be on 30-10 meters CW with an FT-990 and magnetic loop antenna. QSL via homecall.

3B9, RODRIGUES ISLAND. Frank Smith, AH0W, from the Midway-Kure DX Foundation (MKDXF), has released the following information: The Midway-Kure DX Foundation is about to embark on its 1999 DXpedition to Rodrigues Island (AF-017), the "Cinderella of the Mascarenes", starting April 1st and running through April 11th. Callsign will be 3B9R.
The DXpedition will operate on all bands, 6 meter through 160 meters and all modes. One of the 9 HF stations will be dedicated to RTTY only. Team-members represent five nations and include Bruce Butler/W6OSP, Kimo Chun/KH7U, Jari Jussila/OH2BU, Victor Keller/XE1VIC, Jacky Mandary/3B8CF, Garry Shapiro/NI6T, Ned Stearns/AA7A, Yuuji Yoshitani/JA3IG/K1NT and Frank Smith/AH0W/OH2LVG, team-leader. Individual team members may also operate from Mauritius after the operation as 3B9/home-call.
Acting as pilot stations will be Andy Chesnokov UA3AB, Tom Harrell/N4XP of the Dateline DX Association and Gary McClellan K7ZD. During the operation they can be contacted as follows:

ua3ab@dateline.ru
n4xp@juno.com
k7zd@inficad.com

QSL manager is Joyce Johnson, N7LVD, 5627 West Hearn Road, Glendale, Arizona 85306. A Web site will be announced soon. Up-to-date information can be found at: http://mkdxf@aztec.asu.edu

5B, CYPRUS. Look for F5SQM to be active as 5B4/F5SQM from April 1st to 6th. Also, look for George, 5B4AGC, to be active in the CQ WPX SSB Contest as H2G (yep H2G). QSL via home callsign.

7Q, MALAWI. Activity will increase from this one. Ron, 7Q7RM, reportedly is back in the country with John/7Q7JL, Les/7Q7LA and Harry/7Q7HB to follow. QSL is only via DIRECT to G0IAS. NO BUREAU CARDS!

BV2, TAIWAN. BV2PU will be active in the CQ WPX Contest as BV2B. Activity will be on all HF bands. QSL via BV2WA, via direct or bureau.

BY1DX, CHINA. A press release from Tim, N4GN, reports that the "Beijing- Chaoyang- Nokia Amateur Radio station", BY1DX, is now active. It is a first-ever foreign corporate sponsored amateur radio club in China, and it commenced its activities this past week on 40/20/15 meters. QSL cards go to OH2BH, Finland CBA address: Nuottaniementie 3D20, 02230 Espoo, FINLAND. ADDED NOTE: OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

CQ, PORTUGAL. Antonio, CT1ERK, reports to OPDX that he will be active during the 1999 CQ WPX SSB Contest using the special callsign CQ7ERK. He will be active as a Single Operator/Low Power Single Band 10 meter entry. QSL via his home callsign CT1ERK via the bureau or direct to his CBA. Also, look for team CQ9K to be active in the CQ WPX Contest as a Multi-Single entry. The Team operators are: CT3BD, CT3CD, CT3DL, CT3HF, CT3HK, CT3IA and CT3KN. The QSL route is via CS3MAD, P.O.Box 4694, P-9058 Funchal, Madeira Island, or via the Bureau.

E4, PALESTINE. Peter, G3WQU, who has been operating as 4X/G3WQU from Bethlehem since 1975, has now been issued a license by the Deputy Minister of Posts and Telecommunications in Gaza, Palestine, with the callsign E4/G3WQU. PLEASE NOTE: E4 and not E44 or E41 as previously issued. Peter will be active during weekends beginning March 26th on CW only on all bands 80-10 meters, 160 meters is not available. Peter expects to be in Bethlehem for at least two years. QSL via G3WQU at RSGB QSL Bureau or direct to: Peter McKay, UNIFIL, PO Box 75, NAHARIYYA 22100, ISRAEL.

EM4, UKRAINE. The team of UR4EYT (club station of young technicians) will be active as EM4E during most contests for the year 1999. The team used to use the contest callsign UR4E. QSLs are OK via the bureau to UR4EYT, or direct to: P.O.B. 3363, Dnepropetrovsk-5, 320005, UKRAINE.

HK0. MALPELO ISLAND. Pedro, HK3JJH/0M will stay there until the early part of April now.

HS, THAILAND. Look for the RAST HS0AC Club station to be active during the CQWW SSB WPX Contest as a Multi/Single entry. Operators will be HS1CKC, HS1BZY, HS0GBI, HS0VGC, E21ENF and E21EIC. The team of operators are licenced to use 80 and 160 meters during the contest. HS0AC activity will be on 10/15/20/40/80/160 meters. QSL Manager is HS0/G3NOM.
Also, look for HS7UCQ/p to be active in the CQWW WPX Contest. Operators will be HS7UCQ, HS7VMI and E21IZC. QSL Manager is E21IZC.

IOTA NEWS. Hans, DF5UG, will re-attempt a landing on Pulau Satang (OC-165), subject to weather and tidal conditions. He will use the callsign 9M8QQ. He has received permission from the National Museum of Sarawak for a two night stay on the island, and the use of a generator which was not previously allowed. He plans to leave for the island at 0630z on Saturday, March 27th, and to depart after 0400z on Monday, March 29th. Look for him on the IOTA SSB frequencies on 14/21/28 Mhz. QSL via DF5UG.

IOTA NEWS. Veronica, IK3ZAW, reports to OPDX that her friend Kiki, SV1BRL, and she (and possibly other Athens ham) will be operating next weekend (April 3-4th) from Evvoia Island (EU-060). They will be signing with a special callsign, J41YLS (YLs hi!). Operations will be on phone and as usual CW, and she will possibly try some of the RS-13 and AO-27 orbits.

JX, JAN MAYEN. If you need this one you better work it soon. Per, LA7DFA, will go QRT as JX7DFA on April 16th and return to Norway. He reports that there will not be any further amateur radio activity this summer. Look for Per between 1800 and 2230z on 20 meters SSB/RTTY. Also, check 30 meters.

KP2, AMERICAN VIRGIN ISLANDS. The "DX News Letter" reports that Chet, W6XK, will be active as WP2Z during the CQ WPX SSB Contest. QSL via KU9C. Before and after the contest he will be signing as KP2/W6XK. QSL via W6XK.

QSL INFO AND NEWS......
MORE ON ZF2NT QSL ROUTE (Correction). Last week we mentioned that Chris, K4PC (one of 4-land's QSL Bureau Sorters), reported that many QSLs (for ZF2NT) have been sent to the Bureau for N4YBF (who does not keep SASEs on file with the Bureau). OPDX and K4PC have learned since then, thanks to N2AU and ZF2NT, that N4YBF is NOT the QSL Manager for Bruce, ZF2NT. Art, N2AU, reports that in May of 1998, the callsign was reissued to Bruce Sawyer, N6NT, and Art has been the QSL Manager for ZF2NT since day one of Bruce's operation. Art has contacted Chris, K4PC, by E-mail and will be sending Chris some SASEs to answer the bureau cards. So the story has a happy ending.

HC8L QSL ROUTE UPDATE. Art, N2AU, reports that he is now the QSL Manager for Dave, W6NL, who operated as HC8L in the past ARRL SSB DX Contest. He states that it will take 6-8 weeks to get cards and logs. So, all cards for the last ARRL SSB Contest and future operations go via N2AU.

Art, N2AU, also reports to OPDX that he is the QSL Manager for the following stations: NH7A, YC0LOW, YB0ARA/9, YB0JWA, KH6X, KH6T, KH6XT, XE1RGL, ZF2NT, HC8L, V31DX, 4X6TT, V29TT, RZ9WZ, UA9FGR, ZP5XF, YO3APJ (NA only), CT1EGW, KL7Y, CT98EGW, and W6XR.

Reports indicate that the FO0SIL QSLs are being received.......

QSLs for the NP3X CQ WPX Contest operation go via W4DN.........

Z2/ZS6PDX QSL CARDS. David, ZS6RVG, has informed OPDX that due to a computer problem, David hit the wrong key, and the QSO times on his computer logs for most of the Z2/ZS6PDX trip were set to 1500z. David has received a lot of direct cards and was able to rebuild alot of the database with approx. the correct QSO times. However, about 250 cards have been sent to the bureau with the time field blank. David hopes that this will not cause to many problems, and thanks everyone for their patience and tolerance.

E44/OZ5IPA cards for this one-man DXpedition to Palestine (March 10-15th, 4659 QSOs) have been received from the printers. QSL Manager is OZ5AAH, Ben Jakobsen, 9 Knoldager, DK-2670 Greve, Denmark. Cards without sufficient postage (2 IRC or similar) will be sent back via bureau. By the way, Ben is also QSL Manager for: OX3IPA, OY5IPA, HS0/OZ5IPA, and TF/OZ5IPA.

Charlie, W0YG, has requested not to QSL using the ARRL Bureau system for his recent VK9XX/YY operation. If you insist on QSLing through the Bureau, please use the WF5E QSL service which is much easier for Charlie's QSLing team.

Veronica, IK3ZAW, reports that last Saturday she received the 5A1IC printed QSLs, and on Monday (March 22nd) all the direct requests have been answered. As for the 5A22PA QSLs, she is still waiting for both the cards and the logs. She states both operations can be answered via the bureau.

SPECIAL EVENT. "The 59(9) DXReport" reports that Mike, ZL1MH, will use ZL2RN/1, April 1-30th, as part of the Commonwealth Area Stations tribute to Portishead Radio. Activity will be CW on 7020, 10120, 14050, 21050 and 28050 kHz.

SPECIAL EVENT/PREFIX. Industry Canada has released the prefix CY6 for use by the Calgary area amateurs from July 1-14th. This is to celebrate the world famous Calgary Stampede. This will be a good time to work on your Stampede City Award. Full details of the award can be seen at: http://www.cara.ampr.org/stampede.html
VE6NQ is a two point station for the award and will be on July 1st, in the Canada Day contest. All inquiries can be sent to: ve6yc@rac.ca

TM7, FRANCE. Look for F5AMH to use the callsign TM7T in this weekend's CQ WPX SSB Contest.

TZ, MALI. Alexandre, TZ6AK, can sometimes be found on 20 meters around 0630z, but is hard to find on the bands. A report indicates that he responds to a "CQ DX", and he listens for stations instead of calling himself. OPDX has also learned that Alexandre is French and speaks little English. QSL info is to: PO Box 933, Bamako, Mali.

WEBSITE OF INTEREST. Leon, W5NA, says to check out the following MDXA's Web site, "put together by a bunch of DXERS and Contesters.... who also run the ARRL W5 Incoming QSL Bureau": http://www.mdxa.org

ZC4 OPERATION CANCELLED. A report states that George, 5B4AGC, will not operate from ZC4 on March 26th. His mother has passed way, and he has returned to the UK.

ZD8, ASCENSION ISLAND. The "DX News Sheet" reports that Jim/N6TJ and Glen/K6NA are active again until March 31st as ZD8Z and ZD8A. This will include activity in the CQ WPX SSB Contest (Single Band 10 and 15 meters). QSL ZD8Z via VE3HO and ZD8A via home callsign.

Send it direct to the same address that is the Andorra bureau. That
is the address that Archie gives out. I guess with so few hams, a
directly mailed card is forwarded as is. I believe the address is PO
Box 1150 in Andorra. I sent it with a greenstamp and got a direct
reply about 6 weeks later.

My experience is that a greenstamp is more likely NOT to get to the destination. For European, American and Oceania stations green stamps are a bit cheaper that an IRC by a nickel.

For CIS, most African and Asian stations I tend to use IRC's. Note that not all countries accept IRC's and some request 2.

A third alternative is to use mint stamps on the return envelope from the country of the manager. Stamps are available from Bill Plum. 12 Glen Road, Flemington NJ 08822. Bill also has nesting airmail envelopes that are large enough for European cards.

Greeting all who read this.

As one of a deputy charge d'affairs of the Jugoslav Communications Ministry,it is to me a most appalling this reaction to the heart feld post of this conserned citoyen.

Kosovo Liberty Army does too commit atocity, after we majke substantial withdrawl from the Kosova province in October, committing some 6 acts of deadly terrorism against Serb citoyen.

Tito is good for no man, but free elected Milosevic is manhandled by your state influenced media. One need look only at KLA web to see the Java designed sight is clearly CIA's by-product. This is given that U.S.A. policy is know an independce for Kosovo.

As ham I look to work you and QSL during WPX this weekend

3B9R DXPEDITION TO RODRIGUES ISLAND SOON QRV

A team of nine DXpeditioners representing the countries of Finland, Japan, Mauritius, Mexico and the United States is about to depart for their 10-day DXpedition to Rodrigues Island (AF-017) of the Mascarene Islands group in the Indian Ocean. The team will operate as 3B9R with tentative start date of April 1st, running through April 11th.

This will be an all-mode operation, six through 160 meters with special emphasis on 160, 80, WARC and RTTY.

Team-members include Bruce Butler W6OSP, Kimo Chun KH7U, Jari Jussila OH2BU/OH7RF, Victor Keller XE1VIC, Jacky Mandary 3B8CF, Garry Shapiro NI6T, Frank Smith AH0W/OH2LVG, Ned Stearns AA7A and Yuuji Yoshitani JA3IG/K1NT.

QSL via:

Joyce Johnson N7LVD
5627 West Hearn Road
Glendale, Arizona 85306

Pilot stations are:

Andy Chesnokov UA3AB ua3ab@dateline.ru
Gary McClellan K7ZD k7zd@inficad.com
Tom Harrell N4XP n4xp@juno.com

Interested DXers may submit inquiries during the DXpedition via any of these pilot station e-mail addresses.

With thanks to Mr. Anton Vinokurov, an informational web site is now on-line including information about the DXpedition, maps and photos of Rodrigues Island, frequency table, recognition of sponsors, interesting links, operating plan, and more. (On-line logs will NOT be available.)

DXers are invited to sign the guest-book and submit comments.

http://www.dateline.ru/3b9/

The team looks foward to greeting DXers world wide on the air from Rodrigues Island.

Nah, ya got it all wrong, fuckwit. Ronald Reagan was the Cowboy President.
Bill Clinton is the Doughboy President.

BTW, loved your use of the word "Precedent." What third-world online
translator did you use to come up with that and "gets" for "guts" and
"effeminate" for "emasculate?" And, about those "steeling" F-117s...

The American Cowboy Precedent Bill Clinton has not shut off or jammed our Jugoslav media outlets as yet.

NATO has no guys to attack our shortwave transmissions or TV facility, they now they are wrong and they will have the world's enraged against them.

Come on American Cowboy hams with your puny signals, do you have the gets to be like a Dirty Harry and take on our transmission ? Did your communication ministry effeminate you so you don't have the gets anymore ?

7115 0100-0300 UTC

You'll never stop us. Your "steeling" F117 is on our radars. KA BOOM.

This is good news. I have 3B9 on a couple of bands, but need a few more. There are few CW operators better than 3B8CF -- the legendary British DXpeditioners (G3FXB/G3SXW/G4FAM/etc.) are the only ones I can think of who come close to Jacky's ability to pull signals out of the QRN/QRM.

P3A is via W3HNK. CN8WW is via DL6FBL. However, CN8WW will
automatically QSL all contacts via the bureau so it is optional if you
send a card.

There is no language on the coupon to indicate any expiration. I have
recycled irc's dated back into the late 1960's without a problem, but
can't recall when I last actually redeemed one at the post office. They
are like that pink bunny.....

Have had the worst luck finding QSL routes for German ops. Either
can't find them in the callbooks or I get the card back "Bad Address".

There used to be a database here:
http://server.systemtechnik.tu-ilmenau.de/ham/hamqsl.html

but I believe it was moved and is being re-vamped??

Anyone know where that site went or if there is a better site?

I wonder why so many ingrates come out of the wood work with these childish accusations against the U.S. & N.A.T.O forces. We, the United States of America are a member of the NATO team that has seen fit to reduce the criminal activities and inhumane treatment of any country that fails to comply with the demands of the World Majority.

As far as the F-117 downing goes, well we all ready planned for that. It just so happens that Iraq was less of an opposition then we expected, so don't get too comfy there with your single F-117 score. If you check the record, you'll see a greater number of Mig 28's & 29's splashed by NATO forces! Semper Fi from a US Marine!

I have to agree. I have a DSP-599ZX and using it on the TS 850S/AT.
CW and phone is great. The only thing is you have to set the 850 for full
mute on TX. No problem

You can't make a silk purse out of a sow's ear. I have a 599zxx and I do use it (with a 1000D), occasionally. I will not, post-detection (and in fact, no audio DSP unit can) separate the wheat from the chaff. Yeah, it helps.... a bit, but for for the bucks??? You really have to think about it. I agree, try before you buy!!

I have used a Timewave DSP-59+ with a TS-850 (among other rigs) for several years, and I really like the combination. I mostly use it for ragchewing and digital modes, but occasionally for contesting and DXing. I would still recommend the appropriate optional filters in the 850, but the DSP unit really does make a difference.

I have a TS850SAT with the 1.8 KHz and 500 Hz filters in the first IF
and a 250 Hz filter in the second IF.

My TS850 seems like an excellent cw rig. I purchased the Timewave 599zx
and like it the best on cw. However, my timewave will sometimes blank
the signal out on cw rx if there is another very strong signal nearby.
Has anyone else had this experience? I can usually rx while it
is blanking out by selecting my narrower IF filters or by pressing the
BYPASS button.

My TS850SAT has never been very great during SSB phone contests. I
usually have to use the AIP and engage the Attenuators to keep nearby
stations from eating the rx alive.

CELLULAR ACCESSORIES CHEAP!!!!!!!!!

I have the following brand new accessories.

1)Leather cases with belt clips and plastic protective covers $15.00

Audiovox CM3000, MVX-502

Nokia 5120, 6120 , 2160, 2180

Motorola Profile 300, Startac (amps)

Nextel i1000, i370, i390

Qualcom QCP 800, QCP 1900 QCP820, QCP2700

Sony CM-M13004-ATH

2)Car Lighter charger $15.00 (with IC chip)

Audiovox CM3000, MVX-502

Nokia 5120, 6120 , 2160, 2180

Motorola Profile 300, Startac (amps)

Nextel i1000, i370, i390

Qualcom QCP 800, QCP 1900 QCP820, QCP2700

Sony CM-M13004-ATH

3)Portable Hands Free (Earphone amd lapel mic) $15.00

Nokia 5120, 6120 , 2160, 2180

Motorola Profile 300, Startac (amps)

Nextel i1000, i370, i390

4)Portable Hands Free (Earphone and Boom Mic) $15.00

Nokia 5120, 6120 , 2160, 2180

Motorola Profile 300, Startac (amps)

Nextel i1000, i370, i390

5)NIMH Batteries 39.00

Nokia 5120, 6120 , 2160, 2180

Motorola Profile 300, Startac 49.00 (amps)

Nextel i1000, i370, i390

Qualcom QCP 800, QCP 1900, QCP820, QCP2700

Sony CM-M13004-ATH

6)Vibrating NIMH Batteries 49.00

Nokia 5120, 6120 , 2160, 2180

7) Antennas 15.00

Nokia 5120, 6120 , 2160, 2180

Motorola Profile 300, Startac (amps)

Nextel i1000, i370, i390

Qualcom QCP 800, QCP 1900

Sony CM-M13004-ATH

E-Mail me to make for further information

Source record: 25494
Cross-posted to: alt.ham-radio.dxing,alt.ham-radio.hf,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.misc

Is anyone using a Timewave DSP unit with a late model HF rig such as the following:

TS-850, 870
TS-440-450
FT-890, 990, 1000MP, 1000D
Omni V, VI
IC-761, 765, 781

I would be interested in your comments about how well the Timewave unit works with the receiver audio in these rigs. Do you think that it makes your radio a better radio in that it is easier to use, easier to pull out weak signals, whatever. Do you use rig for ragchewing, DX, contesting?

Was the TImewave unit worth what you paid for it?

I have a TimeWave 59+ that I have used on several radios (FT980, IC761, IC775DSP).

The unit does several things, some things better than others. For reduction of noise it is absolutely phenomenal. For reduction of QRM, especially QRM which is stronger than the target signal, it is less effective. This stems from the fact that the filtering activity is post-detection, and the QRM has already impacted your AGC chain.

On the IC775DSP the unit is of less value, simply because the 775 already performs these functions back in the IF stages.

73, Hans, K0HB

Hi Joe -- I have the DSP 599ZX and the TS-850SAT. I use it for DXing
mostly, some contesting. It is absolutely superb for slicing up CW
signals. On SSB where there is noise and atmospherics -- it has enabled
me to pull out signals that were in the ESP category. Highly recommended
from this end. However like all things -- I suggest you borrow one and
try it out for yourself.

For example: a fellow DXer here loves his xtal filters -- I hate em --
ring ring. Not so with DSP unit -- but he hates fiddling with controls
-- so to each his own. Before I got the Time Wave -- my CW operandi was
to use CW Reverse setting on the Kenwood (with no xtal filter) -- when
the pilup was too close to the DX station (usual case).

To my ears it beats any of the built in DSP units I've heard -- but
haven't tried them all yet.

Is it worth it -- depends on if you would use it regularly -- I guess --
I do.

Wow. This is scary. Especially as the (incoming) W bureau doesn't require one to be an ARRL member before cards will be forwarded. I'm curious what kind of W stations you're working? (mostly contesters? Newcomers? Ragchews? Any particular band/mode?)

I get the impression reading this group that many new HF operators over here are unaware of the existance of the bureau, or completely discount it as a route for getting cards. I think that's mostly through ignorance - one can get a HF license without answering more than a handful of questions on HF operating procedure, and nothing at all on DX or QSLing.

There are also some contest stations who simply do not QSL. Too expensive or too time-consuming is what I hear. (but they can afford multiple towers & autotune Alphas?)

73 Doug
(QSL 100% for cards received, bureau or direct)

This is True but you do have to provide the bureau with SASE's to get your
cards.

>I get the impression reading this group that many new HF operators over here
>are unaware of the existance of the bureau, or completely discount it as a
>route for getting cards.

Not a valid excuse. As a card handler for the bureau anyone who receives 6
cards or more through the bureau, receives notification that cards are being
held at the bureau for them and all they have to do to get them is send in
SASE's about half do not respond. I have one ham in my group, who receives 100
or more cards some months
but he will not collect them from the bureau. (Yes this individual has been
notified by sanil mail, email, and in person, he has an unlisted telephone
number)

>There are also some contest stations who simply do not QSL. Too expensive
>or too time-consuming is what I hear. (but they can afford multiple towers
>& autotune Alphas?)

In most cases the big contesters are not operated by the owners but are leased
out per contest. The operators have been there before and are probably not
interested in another 200 I , 150 DL and 100 G cards not to forget EA. Just as
a couple of very powerful European stations are not interested in another 300
W cards.

It would be nice though if any station in a contest was required to announce
once an hour during the contest that they do QSL if in fact that is the case
or be disqualified.

Tnx Bernie W3UR for relaying this.. this is supplemented by
a phone conversation with Frank, AH0W

All ops have arrived on 3B9 with the exception of Bruce, W6OSP who will
arrive tomorrow.

Due to the large volume of equipment and antennas, there
was a considerable delay in clearing customs. Most of the
gear is still on 3B8, but is expected tomorrow. Look for
a big increase in activity as the other 6 stations become
active.

Three stations are presently active with limited capability.
The first activity was on 30M, followed by 17M and today
15M, where the qso rate has been good despite less than
ideal band conditions.

The 6M beacon is active on 50.105 MHz

Look for 160/80M activity to commence within the next 24-48
hours.

On a humourous note, the "Miss Rodriguez Island Beauty
Pageant" is being held on the island. Frank, AH0W reports
scores of lovely YL's are converging on Rodriguez.
Therefore, 3B9R has "volunteered" to be the Special Event
Station for the pageant, which is to beld April 9th.
What a coincidence! ;)

Hard to see any pattern. Weird. I do note a growing number of folks over here are chasing the QSOs for awards but never the awards themselves. I know two hams who've worked over 300 countries but never bothered to apply for DXCC. (I'm not even sure they have 100 countries worth of QSLs)

> By way of comparison, bureau response from DL is 90% and from Italy
> and Spain it's better than 95%. Even Russian QSL response has

I don't send cards unsolicited anymore (except for new band-countries) but do seem to be getting LOTS of cards from Germany, Italy, and Spain. Also Japan, Croatia, Slovenia, France, and the Czech Republic. Cards from the CIS countries are still pretty rare here -- I do get one or two in each shipment, but there are usually a few dozen DL cards in each such shipment. (I work about twice as many DLs as CIS residents)

> outgoing cards.

Though in many cases, the DX station is an expedition operated by Americans.. Those who are that active in DX are usually ARRL members. There is a charge for forwarding outgoing bureau cards, though it really isn't very high.

Anyway, it's hard to explain why this is happening. It must be especially frustrating to the new ham, who hears all these W stations on the air & figures they won't have any trouble getting their WAS...

True, though in many other countries one must be a member of the
national amateur organization to collect QSLs. That has led, for
example, to the German situation cited.

> Not a valid excuse. As a card handler for the bureau anyone who receives 6
> cards or more through the bureau, receives notification that cards are being
> held at the bureau for them and all they have to do to get them is send in
> SASE's about half do not respond.

Again, ouch. I've been pretty good (though not perfect...) about
keeping envelopes on file so was rather out of touch of the process.

I wonder how many of these cases involve inactive hams who receive cards
as the result of mistaken identity? (but really, that seems rather
rare. I have received probably 1000 QSL cards in the last year and can
only count 4 or 5 that I can't resolve with my log. One of them was
definitely for a QSO with WI9WI - I'm surprised there aren't more)

> In most cases the big contesters are not operated by the owners but are leased
> out per contest. The operators have been there before and are probably not
> interested in another 200 I , 150 DL and 100 G cards not to forget EA. Just as
> a couple of very powerful European stations are not interested in another 300
> W cards.

Leased isn't really the right word, but yes, the biggest multiops seem
to be the biggest problem. Though it does also happen frequently with
single-op stations operated by the owners.

I do some contesting myself (in fact, that's about the only way I could
be getting 1000 QSL cards per year!) and figure answering QSLs is really
part of the process. Contests were started to help people qualify for
operating awards, and that's still why many casual entrants get on. If
it becomes the case that contest stations don't QSL, we lose some of
those casual entrants, and things could become rather boring...

> It would be nice though if any station in a contest was required to announce
> once an hour during the contest that they do QSL if in fact that is the case
> or be disqualified.

Only one argument with that -- I would invert the rule, require them to
announce if they *don't* QSL...

I seem to remember that there is a Shriner's Hospital, I believe in the San Francisco area, where there are disabled and sick children who desire to receive foreign postage stamps for collecting. Does anyone have the address for this hospital to send? I have a large box full to donate. Yes, I know this isn't a real DX message, but I hope it won't be necessary for anyone to "flame" over this transgression. It's for a good cause, and maybe there is a DX'er who has contributed to the same hospital.

Thanks,

Red N3TG

Hi all, can anyone help me with a problem I am having with the Icon
in the Flying Horse Call Book CD.
Is it possible to use the Flying Horse Icon as the shortcut Icon on
the Desktop using Windows 95?
I can get the Icon on the desktop but after the computer is closed
down on restart, the RAC Icon that appears as the shortcut, is the
default icon, a DOS programme icon. It would appear that the system
is not saving the Flying Horse Icon.
Any help in simple steps would be very much appreciated,

Yes; Yes; Yes; Typical contest operator - always shouting !

I don't think advertising for contest exchanges is very ethical. Note
my avoidance of the word "cheating".

Repeat calls don't score extra points.

Hi Charlie -- I have the RAC but with Windows 98. Do a right mouse click
on the shortcut --- mine reads "T:CALLBOOK.EXE"

and it works fine (after shutdowns etc)

Hope this helps

VYï¿½ is the prefix for Canada's new Nunavut province. The call would have been VE8XN prior to April 1st. As for the VF3, sound like they were operating portable from Ontario using the special VF prefix celebrating the 50th anniversary of Newfoundland entering the Dominion of Canada. Normally it would have been VY0XN/VE3.

This call belongs to Garry Hammond, VY0XN. Operating from Ontario using
the special prefix VF3 to replace VE3 to commemorate the 50th anniversary
of Newfoundland entering the Dominion of Canada.

QSL route is : Garry Hammond VY0XN / VE3XN
5 McLaren Avenue
Listowel, Ontario
CANADA N4W 3K1

993. FYI: Finding QSL Information

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-03 00:00:00 UTC
From: AC6V <ac6v@ix.netcom.com>
Message-ID: <37069F9E.102D@ix.netcom.com>
Source record: 25393

I have seen numerous QSL info requests here. Most of them can be found
in one of the 33 QSL Manager Lists or in the DX callbooks (38 of them)
at URL:
http://www.ac6v.com/page2.html

So if no one comes forward with your request -- try the above URL as it
contains all of the QSL links I can find on the web --- over 75 of
them!!!

Or maybe check there first.

SB DX @ WW $OPDX.403
Ohio/Penn DX Bulletin No. 403

The Ohio/Penn DX PacketCluster
DX Bulletin No. 403
BID: $OPDX.403
April 5, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1VV, K1XN & The Golist, K2WE, WB2RAJ/WB2YQH & The 59(9) DXReport, W3JJ, AL7KC, N6RT, K7ZD, K8YSE, BA1DU, DJ5AV & DX News Letter, DL2FAG, F6HKS, G4BUE & DX News Sheet, GM4FDM, JI3DST, JM1LJS, OH1KAG, PR7AR, PY1LVF, RA3SL, UT7ND, ZS6P and 4X1VF for the following DX information.

3B9R DXPEDITION TO RODRIGUES ISLAND IS NOW ACTIVE. A team of nine operators representing the countries of Finland, Japan, Mauritius, Mexico and the United States is now active from Rodrigues Island (AF-017) of the Mascarene Islands group in the Indian Ocean unti April 11th. This will be an all mode operation, 160-6 meters with special emphasis on 160, 80, WARC and RTTY. Team members include Bruce/W6OSP, Kimo/KH7U, Jari/OH2BU/OH7RF, Victor/XE1VIC, Jacky/3B8CF, Garry/NI6T, Frank/AH0W/OH2LVG, Ned/AA7A and Yuuji/JA3IG/K1NT. QSL via: Joyce Johnson N7LVD, 5627 West Hearn Road, Glendale, Arizona 85306, USA. Pilot stations are: Andy/UA3AB (ua3ab@dateline.ru), Gary/K7ZD (k7zd@inficad.com) and Tom/N4XP (n4xp@juno.com). Interested DXers may submit inquiries during the DXpedition via any of these pilot station e-mail addresses. Thanks to Mr. Anton Vinokurov, an informational Web site is now on-line including information about the DXpedition, maps and photos of Rodrigues Island, frequency table, recognition of sponsors, interesting links, operating plans, and more. (On-line logs will NOT be available.) DXers are invited to sign the guest-book and submit comments at: http://www.dateline.ru/3b9/

3W, VIETNAM (Also VR, Hong Kong). Steve, K2WE, is returning to Vietnam with a stay in Hong Kong first. He plans to be in Hong Kong from April 16th through the 23rd. Steve has applied for a temporary license in VR-land. He will then continue on to Saigon from April 23rd through 27th. Steve will be operating from the XV300S station at the Kimdo Hotel in downtown Saigon. He has asked for a renewal of his 3W6WE callsign. Steve is again going to try 40 and 80 meters and hopes the noise won't be too bad. He will bring back all the logs for 3W6LI, 3W6KA and XV300S, so he

can answer the hundreds of cards waiting at his QTH. QSL again via his home callsign K2WE.

3W, VIETNAM. Look for Sugi, JA2BWH, to be active again from April 8-12th as 3W6BWH. His operations will include SSTV on 14240, 21346 and 28680 kHz. QSL via home callsign.

4F7, PHILIPPINES. The "DX News Sheet" reports to look for Gus, SM3SGP, to be active until May 6th as 4F7/SM3SGP from Cebu Island. Activity will be CW/SSB. QSL via SM3EVR.

4Z0, AKHZIV ISLAND (New Prefix, Rare Island). Jan, 4X1VF, informs OPDX that he will be leading a group of hams from Israel next Saturday, April 10th, to operate from this rare Israeli island (AS-100) bewteen 0530-1400z. Akhziv Island has not been on for many years. The callsign that they will be using is 4Z0A. (also a new prefix). They plan to operate 3 stations on 20/15/10 meters both CW/SSB using the IOTA frequencies. Jan states that they have to leave the island before dark.

BI5, DONGTOU ISLAND (NEW IOTA). The BI5D IOTA DXpedition to Dongtou Island in the Zhejiang Province Group (AS-???) will take place between April 29th and May 3rd. The team consists of BA1AA, BA1AJ, BA1DU, BA1FB, BA1HAM, BA1KA, BA4AA, BA4RD, BA4RF, BA4RX, BA4TA, BA4TB, BG4AGM, BG4RUC, BD5HAG, BD5RV, BG5BAC, BD6AA, BD6CQ, BA7IA, BA7JG, BA7JK, BD7IX, BD7JA, BD7NI and BD7NQ. They will operate on all bands 70cm - 160m. On HF bands, they plan to have six transceivers, three yagis and three amplifiers. Suggested frequencies for CW/SSB are: 1826, 3530, 3755, 7025, 7055, 10115, 14038, 14260, 18098, 18128, 21038, 21260, 24918, 24945, 28038, 28465 and 29280 kHz (FM only). Look for them on RTTY on or around 7040, 10140, 14080, 21080 and 28080 kHz. They will pay special attention to NA on the following bands, modes and time: 0000-0400z 15m, 17m and 20m on CW; 1100-1500z 40m on SSB/CW; 1100-1300z 75m on CW; 2200-0000z 15m, 20m and 40m on SSB/CW; and will especially work EU during 0700-1800z on several usable bands and modes. On VHF and UHF, they will used 4ELE HB9CV antenna on 6 meters, 13ELE yagi on 2 meters and 70 centimeters bands. The frequency will be 50.115 MHz (SSB/CW), 144.10 MHz (SSB/CW) and 432.20 MHz (SSB/CW). They will especially look for JA, HL and BV stations on 2 meters and 70 centimeters. QSL via P.O.Box 1713, Guangzhou city 510600, CHINA (direct only). Any suggestions, comments and questions should be sent to:
Alan BA1DU (ba1du@arrl.net) or Yang BD7JA (bd7ja@amsat.org).

CE9, SOUTH SHETLANDS. Ric, CE3HDI, will be active until April 23rd as CE9R from the Teniente Rodolfo Marsh base (and possibly President Frei Montalva base) on King George Island. Activity will be CW/SSB/RTTY/SSTV on 80-10 meters. QSL via home call.

CU, AZORES. Look for CU2ARA to be on the air April 10TH and 11TH. Activity will be on 15, 20, 40 and 80 meters on CW, SSB, SSTV and Packet.

IOTA NEWS.....
AS-042. Mike, UA3SDK, is active as UA3SDK/0 from Sredniy Island until

the end of April. QSL via RU3SD, P.O.Box 1, Ryazan 390000,
RUSSIA.

AS-049. Takeshi, JI3DST, reports that he will be active from Tokara
Archipelago (Kuchinoshima, Kogashima-Ken) from April 28th
through May 4th. Look for him to be active as JI3DST/6 (or
7N3UXO/6) on 17/15/12/10 meters SSB. QSL via JI3DST; Takeshi
Funaki, 2-18-26 Hannan-Cho Abeno-Ku, Osaka-City Osaka 545-0021,
JAPAN. His E-mail addresses are:
MXK00027@nifty.ne.jp or ji3dst@jarl.com

EU-094. Look for TM2WLH to be active on Penfret Island from May 6-9th.
Activity will be from a lighthouse (Lighthouse LH 0321 for
the Lighthouse Award) on all bands CW/SSB. QSL Manager is
F6HKS.

SA-029. A group of Brazilian operators will activate the following
islands during April 9-12th (Same IOTA number for all islands):
Itacuruca Island, Martins Island and Jaguanum Island. Activity
will be SSB and CW on all bands (160-6 meters). Suggested
frequencies:
SSB - 1850, 3755, 7055, 14260, 18128, 21260, 24950, 28360
and 28460 kHz
CW - 1835, 3530, 7030, 10115, 14040, 18098, 21040, 24920
and 28040 kHz
Also, please listen to the Brazil DX Net, Saturday and Sunday
from 1800 to 2100z on 14222 kHz. Look for the following
callsigns: PY1NEZ/p or PT1Z (Lima), PY1NEW/p (Pete) and
PY1LVF/p or ZX1Z (Vieira). QSL via home callsign or the PY1
QSL bureau.

J2, DJIBOUTI. "The 59(9) DXReport" reports that Phil, F5PHW, will be
active as J28BS until the end of April from the French Radio Club. He will
use a TS-440S plus available antennas on CW and maybe RTTY. QSL via F6KPQ.

JD, OGASAWARA. Yasu, JA9XBW, will be active as JA9XBW/JD1 from April
9-18th. Operations will be on CW/SSB/FM on 160-6 meters. QSL via home
callsign.

LV2, ARGENTINA. Look for the special callsign, LV2V, to be used by the
Radio Club General Roca for the next 5 years. QSL via LU3VAL.

NEW CANADIAN PREFIX. VY0 is the prefix for Canada's new Nunavut province.
The call would have been VE8XN prior to April 1st.

NEW SCOTTISH PREFIXES. To commemorate the new Scottish parliament, look
for the following special prefixes to be used by Scottish operators during
May 6th through July 31st: GMs can use 2S (ex. GM4FDM can sign 2S4FDM),
MMs can use 2A and 2Ms (Novice) can use 2T.

NEW WELSH PREFIXES. To commemorate the new Welsh Assembly, look for the
following special prefixes to be used by Welsh operators during May 6th
through July 31st: GWs can use 2C (ex. GW4FDM can sign 2C4FDM), MWs can

use 2X and Welsh Novices can use 2Y.

OH0, ALAND ISLANDS. OH0M operation will probably be QTH by the time you read this. Activity was to be done by the Finnish Radio Amateur League (SRAL) and was to active until April 5th. The operators are: Juha/OH1KAG, Mikko/OH3FM, Pertti/OHLQK and Jukka/OH3NLP. QSL via BUREAU to OH3LQK.

QSL INFO AND NEWS......
KL7FBI was operated by Mike, AL7KC, during March 30th through April 2nd, from Shemya Island (IOTA NA-037(, Semichi Group, Aleutians. QSL to KL7FBI via bureau or direct.

Serge, EK4JJ, reports that there is no QSL Bureau in Armenia, and it is too expensive to reply direct unless return postage is enclosed with a QSL card. It has been reported that Serge is a reliable and fast QSLer if you send return postage.

YC9WZJ QSL go to Joni Salim, PO Box 127, Sorong-98401, Irian Jaya, Indonesia.

Roger/G3SXW reports QSL requests already received for contacts with C21SX have now all been answered. Cards arriving daily are being handled within 48 hours. Over 1,000 contacts have already been confirmed direct. The address for direct QSLs is: Roger Western, G3SXW, 7 Field Close, Chessington, Surrey KT9 2QD, England. Nearly 200 contacts have so far been requested by E-mail. These cards will go to the bureau this week. If you wish to receive a card via bureau merely send QSO details and your call-sign to: G3SXW@compuserve.com PLEASE do not send your card by other routes as this defeats the purpose of saving time (your's, Roger's and the bureaux's) and money (your's and the bureaux's).

The following Web site http://dx.qsl.net/logs
has placed the following logs on-line this week:
PW1S (1999 CQ WPX SSB Contest)
PT1A (1999 ARRL DX SSB Contest)
PX1I (1998 ARRL 10m Contest)
FO0CI (1992 Clipperton Island DXpedition)
YC0LOW (thru 20-Mar-99)

ER0N QSLS. GENE, UT7ND, was active in the CQWW WPX SSB Contest as SOSB 28 MHZ from the village of Otaci, Moldova, as ER0N. He is also planning to be active from here in other upcoming contests using the same call. ALL ER0N QSLS are via the Ukrainian QSL Bureau or direct to UT7ND, Gene Chumakov, P.O. Box 5235, Vinnitsa, 286018, Ukraine. PLEASE DON'T SEND YOUR QSLS TO MOLDOVA.

Bob, K3BYV, reports that he is no longer the QSL manager for TG5ITS and KB0QMY/TI5 (both calls are the same person, op Tim). Bob will still be QSL Manager for these stations ONLY: PZ5JR, PZ5DX and P29ND.

ZZ7Z special callsign used in the CQ WPX SSB Contest can be QSLed via PR7AR, Irapuan de Sousa, P.O. Box 60, CEP.58200-970,

Guarabira-Paraiba-Brazil.

QSLs for both CE3/NE4Z and XR3Z now go to AJ4Y, Paul Womble, P.O. Box 1207, Highland City, FL 33846-1207. The old route to CE3SMN will no longer be any good.

R.O.A.R.S. SPECIAL EVENT. On April 10-11th, the "Radio Officers' Amateur Radio Society" will commemorate the "END of MARITIME CW" operations with a special event tribute to "Maritime Coastal Stations". Over 90 special event amateur stations representing historic maritime coastal stations will take part. For details and certificate information, please visit the Web page: http://homepages.enterprise.net/dbarlow/
The Marconi Radio Club W1AA/WCC will represent the WCC Cape Cod, MA coastal maritime station for the event.

S07, WESTERN SAHARA. Ross, CN2UN, was been active as S07UN this week on the 14247 DX net. He was there on a UN mission. He has recently left for Hong Kong and will return to Africa in three weeks. QSL via ZP6CU.
Meanwhile, the "DX News Letter" reports that Arseli, EA2JG, plans to operate as S09A on all bands for two weeks as of March 31. OPDX has spotted Arseli this past weekend on 40/20/15/10 meters SSB. Check around on the usual DX windows. QSL direct only via EA2JG, Arseli Etxeguren, Barrena 6, E-01480 Luyando Alava, Spain.

S7, SEYCHELLES. Babs/DL7AFS, Lot/DJ7ZG and Karl/DL2FAG will be active from April 11th to May 2nd from Mahe, as S79YL, S79ZG and S79FAG. They will be active on all bands, except 80 meters (which is not allowed in S7). If there are any possibilities, they will also try to activate one or two other IOTA islands. Their equipment will be the following: Kenwood TS850S, ICOM IC-706MK and FL2100Z-amplifier. Antennas will be a 3 element Yagi for 20/15/10 and Multiband-dipoles/triple legs for the other bands. They will be active on SSB, CW, RTTY and also possibly in PSK31, Amtor, Pactor. For the YL-award, Babs/DL7AFS will be again active (recently was C50YL) using the special callsign S79YL. QSL for all callsigns are via DL7AFS.

T8, PALAU. Look for Misao/JJ1DWB, Hide/JM1LJS and Hiro/7N1KAE to be active as T88MT, T88LJ and T88?? (Hiro applying now), respectively, from April 27th - May 7th (possibility that schedule may change little). Their activity will be on 80-6 meters SSB/CW/(29M-FM) and T88LJ will try to be on SSTV. QSL to the following addresses:
T88MT - JJ1DWB, Misao Tanzawa, 3-15 Yakata, Kofu, Yamanashi 400-0017, JAPAN
T88LJ - JM1LJS, Hideyuki Kai, 4-22-15, Takata-higashi, Kohoku-Ku Yokohama-City 223-0065, JAPAN
T88?? - 7N1KAE, Hiroyuki Yamada, 2-9-209, Chigusadai, Inage-Ku, Chiba-City 263-0013, JAPAN

TL, CENTRAL AFRICA. Gianni, IZ1CQD, will be active until April 20th as TL8CG from Markounda. His activity will be limited to his free time while working. Look for him on 40, 20, 15 and 10 meters SSB using only a 100 watts to a dipole with solar power. QSL via home callsign, bureau or

direct.

V4, ST. KITTS & NEVIS. The "DX News Sheet" reports that Jim, G0IXC, will be active again as V47XC, April 10-30th, from Nevis Island. Activity will be 40, 20, 15 and 10 meters SSB with a dipole and tri-band Yagi. QSL via home callsign.

VU3, INDIA. After waiting for many months Tom, KR4ZY, has received his VU callsign. He is now signing VU3TOM. QSL via KR4ZY.

ZS8D, MARION ISLAND. Excerpts from a press release: On Thursday, April 1st, the SAS Agulhas left Cape Town to take the 56th weather and biological research crew to Marion Island. This annual supply run includes a radio amateur! Deryck Yelverton, ZS6DE, has been licenced as ZS8D. While Deryck is not an experienced HF operator, he has spent much of the last few weeks in intense training. Deryck will not be active before mid-April at the earliest, as the ship sails in April, and the base handover will occupy his full attention. However, once he has all the hardware ready, he expects to be on regularly and to make lots of contacts. QSL to ZS6EZ, Chris R. Burger, Box 4485, Pretoria, 0001 South Africa. Requests with sufficient postage will be sent by bulk courier service, while the remainder will go via the bureau. SPECIAL NOTE: OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

999. Re: VY0XN/VF3

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-04 00:00:00 UTC
From: Dave Goodwin VE2ZP/VE9CB <VE2ZP@newforce.ca>
Message-ID: <3707f84d@news.newforce.ca>
Source record: 25399

VY0XN/VF3 was Garry VE3XN operating from Ontario.

Garry holds the call sign VY0XN in Nunavut, a new Canadian territory created from the division of the Northwest Territories (VE8) on 1 April 1999.

VF3 is a special prefix authorised to mark the 50th anniversary of Newfoundland and Labrador (VO1 and VO2) joining Canada.

As for DXCC, VY0XN/VF3 does count

....for Canada.

73,

Dave VE2ZP/VE9CB

I need QSL information on the following calls: V26P, VP5B & HU4A.
I have checked everything I can find (including AC6V--tnx Rod) but these
3 have eluded me. Any help will be appreciated.

No luck so far with V26P
VP5B is N2AU (1999 operation)
HU4A is YT1AD

Hi Shirl -- Sure takes some searching. I am testing which URL's have the
best returns and it seems like -- no sure bets. Anyway they surfaced as
follows:

From QSL INFO SYSTEM by IK4LZH
VP5B - Buro: Active - Source: WEB 129.p1.Tnt01.MIA.Icanect.Net - Since:

1011. Software Packet FREEWARE: PKT5MON 5.23 (english version!)

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-05 00:00:00 UTC
From: RadioClub de Teleco <rct@lostrego.uvigo.es>
Message-ID: <3708E3F1.22E755C@lostrego.uvigo.es>
Source record: 25411

Hello everybody!

We'd like to inform you that the freeware program PKT5MON has been translated into English language.

For those of you who don't know, PKT5MON is a program that, with a simple
HAMCOMM modem, decodes PACKET frames which are sent between DX CLUSTER stations.
It's very useful for those of you who can't access a local DX CLUSTER but
want to receive DX-spots and WWV reports, the same way if you could access
one.

You have mucho more information and a screenshot on the web page of the program:

http://lostrego.uvigo.es/pkt5mon/
(there is an English language version as well)

Of course this program is FREEWARE and as it has had so much success in our
local ham radio community, we thought about distributing it via the net so
that everybody could use it.

Greetings from EA1RCT (RadioLab at University of Vigo, Spain)

PS. (Feel free to forward this message to any other forum which may be interested in this software)

RadioClub de Teleco - Vigo
EA1RCT - rct@lostrego.uvigo.es

1018. 75th anniversary QSO party

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-07 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7eeg6n$bd7@news.Hawaii.Edu>
Source record: 25418
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc

Dear OM:
&#65533;
There will be a HAM activity from Argentina, celebrating the 75th anniversary of the contact between Carlos Braggio, r-CB8, at Buenos Aires, Argentina, and Ivan O'Meara, z-2AC, at Gisborne, New Zealand, that established the world record of distance in 1924.
&#65533;
The Radio Club Argentino, LU4AA, will celebrate this anniversary between 16 and 23 of may of 1999.
&#65533;
1) The official station of RAC, will use during this period, the special callsign L75CB;&#65533; every QSO with this station, will be confirmed with an special QSL card.
&#65533;
2) At 21st. of may (the day of the anniversary), L75CB will transmit continously (24 hours), on CW, the mode used by Braggio and O'Meara during that contact.&#65533; Stations contacting L75CB on this mode, that day, will receive, also, an award.
&#65533;
L75CB QSL’s via LU4AA. Bureau or P.O.Box 97 - Zip Code 1000 - Buenos Aires, Argentina
&#65533;
3) During this period, between 0000 hours of 16 of may, and 2400 hours of 23 of may of 1999, every amateur radio station in Argentina is allowed to use an Special International Prefix.
&#65533;
Stations beggining with LU, will use L2.&#65533; LU4AA will use L24AA
Stations beggining with LW, will use L3.&#65533; LW8EZU will use L38EZU
Stations beggining with AZ, will use L4.&#65533; AZ1AAA will use L41AAA
&#65533;
There will be a program of diplomas to work at this period.&#65533; If you want to receive it, just ask me and I will send it.
&#65533;
Every question, or comments, should be sent to lu4aa@lu4aa.org, the e-mail address of the RCA, LU4AA
You can also visit LU4AA's web page, at http://www.lu4aa.org
&#65533;

This bunch of timid Timmys didn't do shit until after the ball was rolling, aided by myself, Jeff Herman and others who pointed out there was a box to leave messages in. That forward looking bunch in Newington had to check with counsel first, as usual, before they took a stand. Must've needed to be sure it wasn't a division of Yaesu or some other contest gear company the ARRL ass kisses...

SB SPACE ARL ARLS002
ARLS002 ARRL Advises Swatch to Cancel "Beatnik" Launch

The ARRL has weighed into the burgeoning controversy over messages gathered by the Swatch watch company and programmed for transmission on 2 meters from the mini-Sputnik satellite. In a fax today, League Executive Vice President David Sumner, K1ZZ, suggested to Swatch Group CEO Nicolas E. Hayek that the Swiss firm cancel the launch of the "Beatnik" satellite and use a commercial satellite for its project instead.

Thanks for nothing, Baldthonia.

I have had the misfortune of watching ARRL as a member for a decade now.

ARRL is pursuing a typical party line. While there must not be profane, political or blatant advertising messages, God forbid some undesirables (read that as hams under 30) be attracted to the HOBBY. And that's what it is- a HOBBY.

ARRL has an unspoken agenda to not advertise the hobby in public. SWATCH violated this. ARRL advertises for new hams in QST ! Who gets QST ? ARRL members ! And don't sell me that newsstand BS, read the USPS release in QST, no one gets it that way. So who will ARRL attract ? Friends and relatives of hams.

This isn't surprising as that's how ARRL hires. Check out December 1998 QST and see who works there. Relatives, friends and contester friends. The Carcias, 3 Wolfgangs, N1DG, KB1HY, K1ZZ, N1RL, KB1BE, the list goes on. Anyone who doesn't fit the above category is given the 5th degree before being hired, to the point of harassment. Superior education, achievement and experience are nothing, who you know in YCCC or PVRC is everything.

Anyone who criticizes this (literal) Old Boys Club gets summarily dismissed, ridiculed and in many cases blacklisted.

But experience is the best advertiser. I have had 2 interested professional, educated parties ask me about ham radio. I told them the above and the direct and veiled ridicule of small stations by obsessed nutcase hams. I spoke of outrageous stations and dangerous RF power like K1ZM, W4ZV and W3LPL. These people spend money on attorneys fees and WASTE THE COURTS' TIME so they can put up not one, but multiple towers in excess of 150 feet because the 50 or 75 feet towns offered them won't do ! COMMERCIAL STATIONS WITH A QUARTER OF THE DIRECTIONALITY OF THEIR ANTENNAS AND ERP ARE REQUIRED TO HAVE RF WARNING SIGNS !

Would K1ZM live next door to himself ? Does the cost of a Mercedes S class sound like an investment you'd make in ham radios ? I told them my personal dealings with the many nosey hams on VHF, many if not most of whom are in reality antisocial freaks whose last hope for friendship is others like themselves. The 2 walked the other way from the hobby.

Yes, Virginia, revenge is sweet.

Yes, it sounds as if your very existence is a bit of a "misfortune". - You sound pretty miserable to me.

Fact is, the ARRL does a lot of good. Sure there's a few bozos in there, but overall the ARRL appears to be made up of pretty decent folk. The ARRL is not perfect... Surprise surprise! Most adults can handle realities like that without throwing a hissy-fit, and getting their panties in a twist.

I think you're full of farina, right to the brim.

snipThere's the rub. I see it now. It used to be a SERVICE. We got to play with our radios, and many genuinely "advanced the radio art" while we payed for the frequencies by providing communications when called upon. This still happens. I took my general exam in April of 1964 in Dallas after a bus ride from Waco. I was 14. You could NOT study the question pool back then. Extras drew schematics.
If it's now just a "hobby" that is a great loss.
H.
WA5IGW
By the way, when I took my 1st phone (remember that?) in 1971, I made 100%.
First try.
I added the Advanced Amateur Radio then for the hell of it.
Gotta get that 20 WPM

1033. stamping from FK

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-09 00:00:00 UTC
From: Didier LAVISSE <fk8vhn@canl.nc>
Message-ID: <7ek9d3$2ptk@enews4.newsguy.com>
Source record: 25433

Dear OM (YL)

Please found stamping rates from New-Caledonia to other continents.

- Pacific area : 105 xpf (20g)

- Both America ans Asia : 135 xpf (20g)

- Europe and Africa : 155 xpf (20g)

- France - FM - FG - FY - FR - FH - FP - FT - 3A - C3 : : 100 xpf (10g)

- FW - FO : 80 xpf (10g)

1 $ = between 100 xpf and 108 xpf sometimes less than 100 xpf and small cuts are not very easy to exchange in this land.

1 IRC is ok till 155 xpf

so please when you send direct qsl-card to FK's OM or XYL don't add 1$ but an IRC.

Thanks for reading me.

Best 73's and good DX.

Didier - FK8VHN

From: wbcapps@mindspring.com
Message-ID: <370e025d.399178@news.mindspring.com>
Source record: 25435

hello all,
i made a qso last night which was my first ever 80 meter cw
european contact with dk5pr/leo. i have a very minimal station here of
100 watts and a low g5rv ant and tuner. the qso was ok except leo was
unable to get my call 100%. he missed it by one letter. no matter how
hard i tried i couldn't get him to see his error. (low power/terrible
band condx)
is it ok to qsl via direct when i know his mailing address,
but he has me down incorrectly in his logbook? is it a legit qso when
one op is unable to get 100% copy?

many thanks to all and 73's

Funny enough, I inquired about a similar callsign this morning.
Well, in the meantime I have found some information on the WWW
pages of URE:
http://www.ure.es/aniversario/aniversario.html

They celebrate 50 years URE and have one special station in each
province; the suffix in the callsign is the abbreviation of this
province, so Larry worked the one in Cantabria.
Those callsigns are used throughout April 1999, and there is even an
award: http://www.ure.es/aniversario/diploma.html

Uhhh, wouldn't that seem to run counter to the spirit of 10-10 International,
which is to encourage the use of the 10-meter band? Putting your 10-10 on
your QSL card is one thing, but swapping them on the Internet seems a little
improper...

There was a German station running a list for Monk Apollo around 1400 on 14m.

Conditions to Canada and the USA were pretty poor then, but several
stations in Canada were trying to get through. The German operator at one
point stated that Monk Apollo was having trouble with his beam antenna and
was unable to rotate it.

Not necessarily. Who says that a QSL card has to necessarily confirm
a 100% QSO? QSL's are intended to confirm a contact - period. If conditions
are difficult and the QSO is not 100%, I would still send the QSL card. The
contact is confirmed. Even if only one-way - the QSL card allows the other
station, who might have had a 75% copy of the QSO to correct his logs and
therefore not have incorrect information in what could very well be an
official document in the DX country. Remember, SOME operators may be REQUIRED
by local law to maintain ACCURATE logs of their DX activity.
I can understand not QSLing on a 1xx contact, but if you can make out
enough of a 2xx contact to get a call sign and QSL information then I think
that QSLing that contact is completely acceptable. Do you believe that only
599 contacts should be QSL'd?
I really can't believe that an Extra class license holder would insist
that only 3xx, 4xx, and 5xx contacts are considered worthy of a QSL card. I
also have trouble believing that an Extra class holder would consider swapping
10-10 numbers over the internet to be acceptable practice. Guess that just
shows why the hobby is slipping in popularity...

: ... Who says that a QSL card has to necessarily confirm
: a 100% QSO? QSL's are intended to confirm a contact - period. ...

Literally, QSL is a confirmation of the receipt of signals. That means,
by sending a QSL card I confirm that I have heard the other side's
signals, although usually "Confirming the QSO" is written on those
cards - funny enough, it should perhaps read "I have received your
signals during or contact" or so.

: Even if only one-way - the QSL card allows the other
: station, who might have had a 75% copy of the QSO to correct his logs and
: therefore not have incorrect information in what could very well be an
: official document in the DX country. Remember, SOME operators may be REQUIRED
: by local law to maintain ACCURATE logs of their DX activity.

Yes, but in such cases one can write something like "RST not received"
or "Callsign incomplete" in one's log - this is perhaps the most
accurate way of logging the activity ...

I wrote it already in an e-mail to the original poster of another thread
(who asked about confirming an incomplete contact): I consider it
a sportive attempt to reach somebody in a distant corner of the world
with my amateur means. Therefore I try to behave like a sportsman -
that means, I want to be honest to myself and to the "other side".
If I don't get the complete callsign or the report, I note it as an
unsuccessful attempt.

: I can understand not QSLing on a 1xx contact, but if you can make out
: enough of a 2xx contact to get a call sign and QSL information then I think
: that QSLing that contact is completely acceptable. Do you believe that only
: 599 contacts should be QSL'd?

No, but only complete contacts. No matter how often the operator has to
repeat callsign and/or report, the contact is only complete if both has
got through. Hard enough if it is only R 2 ...

: ... I
: also have trouble believing that an Extra class holder would consider swapping
: 10-10 numbers over the internet to be acceptable practice. Guess that just
: shows why the hobby is slipping in popularity...

I'm sure this was intended to be a joke ... but anyway, sometimes it is
funny - they call "CQ 10-10" for quite a while, nobody answers; if they
had simply called "CQ", somebody had answered, for instance I ;-)

SB DX @ WW $OPDX.404
Ohio/Penn DX Bulletin No. 404

The Ohio/Penn DX PacketCluster
DX Bulletin No. 404
BID: $OPDX.404
April 12, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KP2BH, N6HR, WA6KBL, N7WDX, K8YSE, AH0W, BA1DU, DJ5AV & DX News Letter, EA5FID, G4BUE & DX News Sheet, HJ3PXA, LW8EZU, OK1JR, PP8EB, PS7AB, RA3DQ and VE7TLL for the following DX information.

3B9R UPDATE. The Rodrigues Island DXpedition is now QRT. They were expected to go QRT as of 2200z, April 10th (this is when their license was to expire). Frank, AH0W, reported last Thursday that he hoped the team would end up with 40K QSOs in the log by the end (they were 35K at the time of the report). I am sure Frank will provide a DXpedition wrap-up upon his return to the states.

5N99, NIGERIA. Stan Matejicek, OK1JR, informs OPDX that he has been in Lagos since March 31st, on a short business trip. He was able to receive his licence from NARS (The Niregia Amateur Radio Society - he is a Life member) and has received the callsign 5N0MSV. Stan will stay here until the end of the May. He is working/operating from the Embassy of the Czech Republic. Look for him to be on the bands during their afternoon time (Stan states, "We are one hour +GMT). He was spotted this week during various times (between 1530 and 0000z) on 10/12/15/17/20/40 meters. Stan mentions 40 and 30 meters look like very interesting bands during the night, however not very many QSNs have been reported. He should be able to produce an excellent signal on 20/17/15/12/10 meters using a TS-950SDX and a 1K amp into a 12 element Log-Periodic. SPECIAL NOTE. Stan states that he is now using the 5N99 prefix until the end of April because the 1999 World Soccer Championship (for young played through the age of 21) is being held in NIGERIA. On May 1st, Stan will go back using his callsign 5N0MSV. QSLs go via his home callsign OK1JR, Stan Matejicek, Moskevska 1464 Praha10, Czech Republic. Stan will be here for the next two months and has promised to send all direct QSL cards back as quickly as possible during June and July of 1999.

8J1, ANTARCTICA. The "DX News Letter" reports that the Japanese club station 8J1RL is situated on Ongul Island (IOTA AN-015). OPDX has found this station active on 21246 kHz between 1600-1630z. QSL via JARL bureau.

9N7, NEPAL. Charlie, K4VUD, who is currently here, has had his callsign changed. Look for him now to sign 9N7UD instead of 9N1UD. It has been reported that foreign visitors are now designated with a "7". Meanwhile, Charlie has been active on 20/15 meters. Look for him on/around 21295 kHz between 1400 and 1500z, and on 20 meters CW/SSB (14022/14200) after 0130z. QSL via K4VUD.

DX CONVENTION. The Lynx DX Group has announced that "Convention'99" will be held May 7-8th, at the Rocas Blancas Hotel in Alicante, Spain. Anyone interested in joining them may contact Juan, EA5FID, from the Organization Committee, via E-mail at: ea5fid@jet.es
Also visit their Web site at: http://web.jet.es/lynx

EG, SPAIN. There has been a lot of questions being asked about the EG prefixes being used by Spanish operators, and OPDX would like again to point you to OPDX.402 (if you do not have it, send an E-mail to: opdx-request@nshore.org -- Put the word archive on the subject line -- and the following command in the body of the text: get volume99/402.0) Basically, the EG prefixes are to celebrate 50 years of the URE. Those callsigns will be used throughout April, 1999, and there is even an award available. For more details also check out the Web page at: http://www.ure.es/aniversario/diploma.html

IOTA NEWS.....
NA-051. On April 10th, VE7QCR and VE7TLL were active as VE7ISL/p from another new Canadian Island, Maude Island. This was a one day operation only. If you were lucky to work them, QSL via VE7TLL and for all VE7ISL operations.

NA-169. Hillar/N6HR and Elsie/N7WDX report that they have been able to reach a Memorandum of Agreement with the Makah Nation Tribal Council, and that they have received permission to land and operate from the rare Tatoosh Island. The island off of Cape Flattery in Northwest Washington is a sacred "Makah Indian" burial ground. They state that the full report will be released at the IOTA Meeting in Fresno. They did mention that they will be on the air during the IOTA Contest July 24/25th with at least two KW stations giving out NA-169 QSOs to the deserving. Look for more details to follow.

SA-027. Look for PY5B (SSB) and PV5L (CW) to be active from Arvoredo Island (DIB 46), May 13-17th. Look for them on the IOTA frequencies and Brazilian nets. QSL via PP5LL, Jayme Lira, PO Box 08, Florianopolis/SC, 88010-970, Brazil. E-mail address: pp5ll@netplan.net

SA-047. Look for PR5B (SSB) and PT5L (CW) to be active from Mel Island (DIB 34), April 21-28th. Look for them on the IOTA frequencies

and Brazilian nets. QSL via PP5LL, Jayme Lira, PO Box 08, Florianopolis/SC, 88010-970, Brazil. E-mail address: pp5ll@netplan.net

QSL INFO AND NEWS......
ZY8A is QRT now! Eduardo, PP8EB, reports that the Anavilhanas Archipelago DXpedition made some 2320 QSOs on SSB and CW. He would like to thank the people that put them on the DX Clusters and for making contacts with them. A special thanks goes out to IBAMA - the Brazilian Institute of Enviroment and Nature, Brazilian Army and Brazilian NAVY that led them to the archipelago by ship. The correct way to QSL via PP8KB at: P.O. Box 691, Manaus Am Brasil, Zip 69011-970

FT5ZH QSLS. Jeffrey, WA6KBL, (for F6KDF, the Lyon DX Gang) reports that the first 2000 cards have been filled out and were sent to the European DX Council to be stuffed into envelopes along with the addresses to go onto the envelopes. They should be sent out very soon, but this is now out of the hands of F6KDF members so they don't know precisely how long before they are mailed. The rest of the cards have been printed in Germany, and there was a misunderstanding about the transport of these boxes of cards to France. This has been cleared up this week, and they are on their way to the F6KDF radio club. The F6KDF group is sorry about the delay but rest assured that everyone will get their cards. Jeffrey states that he will be bringing one card to the Fresno DX Convention if anyone is dying to see one.

BY1PK, the official station of Chinese Radio Sports Association, participated in last weekend's Japan International DX CW Contest. The operators were BA1AA, BA1AB, BA1DU, BA1OK, BA1RB and others. QSL via P.O.Box 6106, Beijing 100061, CHINA.

SAD NOTE. OPDX was informed that well known DXer, William Elasmar, HK3RQ, has recently become a "Silent Key, SK", after a long and stressfull coma. HK3RQ was very well known to many old timers who had their first HK QSO confirmed through his activity on SSB and CW. OPDX sends out our deepest sympathy to the family and friends.

SPECIAL EVENT. The Cadena El Conquistador, Inc. (NP3P) announces that the XXII Vieques Cultural Festival will be held from April 16-18th, at the Fort Count Mirasol. The Vieques Cultural Festival is sponsored by the Yaureibo Cultural Center of Vieques in coordination with the institute of Puerto Rico culture and the Municipal administration of Vieques. The fort was built in 1845 by orders of the Spanish governor of Puerto Rico, Rafael Aristegui y Velez, better known as Count of Mirasol. The sponsoring Radio Club of the S. E. is the CADENA EL CONQUISTADOR, Inc. (NP3P). The four main frequencies of operation will be 28350, 21350, 14300, and 40 and 80 meters. The starting time is 1600z on April 17th and the ending time is 1600z April 18th. The first 500 stations to contact NP3P will get a certificte. To request a certificate send QSL to:
CADENA EL CONQUISTADOR, Inc. (NP3P), P. O. Box 161, Fajardo, PR 00738-0161
For more information and details, send E-mail to: np3p@hotmail.com

SPECIAL EVENT. The Argentina hams have plans to be active in celebration of the 75th anniversary of the contact between Carlos Braggio, r-CB8, in Buenos Aires, Argentina, and Ivan O'Meara, z-2AC, in Gisborne, New Zealand, that established the world record of distance in 1924. The Radio Club Argentino, LU4AA, will celebrate this anniversary between May 16th and 23rd. The following will be applied:
1) The official station of RAC will use during this period the special callsign L75CB; every QSO with this station will be confirmed with an special QSL card.

2) On May 21st (the day of the anniversary), L75CB will transmit continously (24 hours), on CW, the mode used by Braggio and O'Meara during that contact. Stations contacting L75CB on this mode that day will also receive an award.

3) During the period between 0000z, May 16th, and 2400z May 23rd, every amateur radio station in Argentina is allowed to use a Special International Prefix. Stations beginning with LU will use L2 (ex. LU4AA will use L24AA). Stations beginning with LW will use L3 (ex. LW8EZU will use L38EZU). Stations beginning with AZ will use L4 (ex. AZ1AAA will use L41AAA).

L75CB QSLs are via LU4AA by the Bureau or P.O. Box 97 - Zip Code 1000 Buenos Aires, Argentina, For more details or questions/comments send an E-mail to: lu4aa@lu4aa.org (The E-mail address of the RCA, LU4AA)
You can also visit LU4AA's web page at: http://www.lu4aa.org

THE ENDING OF THE DXNS. It was announced this week, in a letter from the RSGB dated March 29th, that effective June 30, 1999, "the RSGB will no longer be producing the RSGB DX News Sheet. The decision was made by the RSGB's Management Committee on the recommendation of Peter Kirby, G0TWW, General Manager in the face of a diminishing number of subscribers and the existence of a number of packet and Internet alternative sources of DX information. All inquiries about the closure of the DXNS should be referred to Barry Cooper, G4RKO, Commercial Manager at RSGB HQ." Your editor would like to say that the DXNS was one of Europe's finest printed DX bulletins, and I will sadly miss the change of DX information with DXNS's current editor Chris Page, G4BUE.

ZS, SOUTH AFRICA. Victor, RA3DQ, informs OPDX that he and another amateur Oleg, UA3HK, are planning a 2 week trip to Cape Town (ZS1) from April 16-29th. They plan to be on the air 80-10 meters (Yaesu FT-900) on CW/SSB. They are currently looking for Cape Town HAMs for possible assistance!
Victor can be contacted at: ra3dq@qsl.net
Also, visit Victor's Web site at: http://www.qsl.net/ra3dq/

1063. DXCC Application questions

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-11 00:00:00 UTC
From: k3fh@aol.com
Message-ID: <19990411151932.00316.00001477@ng108.aol.com>
Source record: 25313

I am finally getting around to applying for my first DXCC award.
Just tallied up all the QSLs I have and this is my question:
Should I send in every card which confirms a new country-band-mode
(many cards) the first application, or should I send in one for each
country-mode (fewer cards) to qualify for both DXCC Cw and DXCC Mixed
(I do not have 100 confirmed on Phone yet)?? Trying to understand the ARRL
application guidelines and fee schedule is difficult for me--maybe I am dense
but it seems rather ambiguous especially where more than 120 cards
supposedly consititutes additonal fees.

I have about 114 countries confirmed on CW and about 119 Mixed (CW+RTTY+SSB).

Any guidance you can lend to this DXCC wannabee/newbe would be
appreciated. Either reply here or email to K3FH@aol.com.

73,
Mike

Peter,

It is certainly 3B9R. If you copied 3B9RUP, it means : 3B9R UP (meaning
3B9R is calling and he is working split and listening up in frequency ;-)))
Not a lot of space in DX (hi!)

I was in trouble recently when I copied a OH0 (don't remember the suffix
but ending with UP too :-) station working a pileup on 40m cw. When I tried
to find the QSL info, it was impossible to find the call...just because I
added the UP at the end fo the callsign...until I understand my mistake :-)

DX is...still learning ;-)
PS : I'm just a HF swl at the moment. The cw test in a few weeks...HPE TO CU
SN
F4BXI...will be F8BXI after the tes...I Hope :-)

3B9 - The 3B9R DXpedition to Rodrigues Island [425DXN 411] has a web
site
(http://www.dateline.ru/3b9/) where to find information about
the
DXpedition, frequency table, operating plan and more (but
please
note that on-line logs will NOT be available). For the time
being
suggested frequencies are 1826.5, 3503, 7003/7023, 10103,
14003,
18073, 21003, 24893, 28003, 50105 on CW; 3795, 7065,
14195/14245,
18145, 21295, 24945, 28495 on SSB; 7043, 14083, 21083 on RTTY.
Please pass along your comments for the team to Andy,
UA3AB
(ua3ab@dateline.ru); Tom, N4XP (n4xp@juno.com); Gary,
K7ZD
(k7zd@inficad.com). QSL via N7LVD (Joyce Johnson, 5627 West
Hearn
Road, Glendale, Arizona 85306, USA). [TNX K7ZD]

Do all FT-50'S RECIEVE THE 800 MHZ?.or do they have to be modified?
Was there 2 versions of the FT-50?
Thanks for any help....
Russ

1072. Re: qsl is it ok?

Newsgroup: rec.radio.amateur.dx

From: AA3RLm9bw990@ix.netcom.com
Message-ID: <37123F6F.76C6@ix.netcom.com>
Source record: 25322

Hello Bill:

Sure go ahead and send the QSL card. Odds are that the other station
will figure it out as long as the time is correct.

As far as whether or not it is a "legitimate" QSO...
Hey, this is supposed to be a fun hobby! You were thrilled by the QSO,
so chalk it up in the win collumn!!! It's not a contest where you are
competing for a score.

I have a similar problem with 80 meters due to a small lot and
compromised antenna. Have only made a couple DX QSO's on that band, so
I know how you feel.

BTW, thanks to Walt for the gracious offer to make a sked. It's a
pleasant change to see an outbreak of niceness on a newsgroup.

1073. Help wanted: getting SbFFT 1.2 to work on my Win95 Pc

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-12 00:00:00 UTC
From: Joop Verdoes <j.a.verdoes@siep.shell.com>
Message-ID: <l7sQ2.3$Mk1.147@wwwserv3.shell.nl>
Source record: 25323

Hello All

I have just downloaded SbFFT 1.2 on my Win95 PC, with the idea to
use it as signal processor behind my Howes DXR20 receiver.
It looks like it could do precisely what I want, i.e. finely
controlling the audio band that comes out-of the whole chain.
There is however a slight problem....no matter what I try I don't get SbFFT
going.
I have all conditions I can think of covered,
- Blaster value is correctly set and my SB16 works with the other
sound tools I have on my PC.
- None of the status fields at the top of the screen show any value,
just xxxxx, no matter how I start SbFFT, with whatever
command line options.
- The rs-12.wav displays fine and then the top of the screen shows values.
- The sound does pass through the PC (line-in to line-out) and I can hear
the
receiver output when SbFFT is on the screen.
- I tried to run SbFFT in a dos-box, shutdown to MS-DOS mode and when
started in only dos mode.

Is there any help you can provide?

Met vriendelijke groeten/Best regards

1079. C56SW QSLs despatched

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-13 00:00:00 UTC
From: Steve Wilson <swi@bramham.demon.co.uk>
Message-ID: <qEG+1NA$X2E3EwBG@bramham.demon.co.uk>
Source record: 25329

I have despatched all direct QSLs received so far for my recent C56SW operation from The Gambia. Those cards with no return postage have been sent via the RSGB bureau together with all bureau and email requests. I have sent out over 1000 cards so far.

I also have logs here for my 1997 & 1998 operations as 5B4/G3VMW, 5V7SW and 9G5SW and would be happy to confirm any outstanding QSOs.

Please note that the *only* ET3AA log I have is for my operation between 18.9.98 and 30.9.98. I am not the QSL Manager for normal ET3AA QSOs, which are usually SSB, e.g. 1998 CQWW SSB. I can only confirm QSOs for the CW only operation last September. For all other QSOs, please send your QSL cards direct to:

E.A.R.S.
P.O. Box 60258
Addis Ababa
Ethiopia

You will get best results from ET3AA by including 1 or 2 US dollar bills rather than IRCs.

Hello my friends

I'm just here to inform you: The CASCAIS DX TEAM goes operate on the
next saturday and sunday 17-18/04/99 the Fortress of "Nossa Senhora da Luz",
with the special callsign of CQ5D, the reference of the fortress is F098.
The Event starts at 12:00 UTC on 17 and
finish at 12:00 UTC of 18. We will operate on vhf, uhf, and hf. The main
call
frequencys is : 145.400MHZ, 435.400MHZ, 14.190MHZ, 18.150MHZ, and others on
sw bands. You can monitoring our work with the packet clusters.
The last year we operated lighthouses with the callsigns of CQ5A,CQ5B, and
CQ5C
. We received a lot of qsls from stations all over the world and i answer to
all of them, I still receive qsls from CQ5A an CQ5B. About the qsls of CQ5C
is a litle bit delayed but i sure you will
receive those qsls. We have programmed 3 more events for this year: one on
the fortress of Crismina, other on Oitavos fortress, and the last one the
fortress of S. Br&#65533;s de Sanxete. We will inform you about the dates later.
About the qsls you can send it by the bureau or to the qsl manager CT1EDG,
and for that please send a SASE and 1 irc for Europe and America and 2 for
Asia.
My best regards to all, and i hope to meet you on the event.

Source record: 25333

I got a reply from NC1L at the ARRL (dxcc@arrl.org). He said the fee schedule for new application is $10 for each award being applied for (in my case 2, DXCC-CW and DXCC-SSB) and that includes up to 120 QSOs (not 120 QSLs if any have more than one QSO confirmed). After that you pay $0.15 per QSO. Plus you pay return postage (suggested via registered mail) for all you QSLs.

Source record: 25335

My post apparently was over your head because you missed the point completely. You recommended QSL ing for a contact that was not completed. The questioner was asking with respect to confirming a contact for an award. You also responded to another poster that it was not OK to exchange 10-10 numbers via the internet. Considering that in both cases, awards are part of the process, it behooves me how you would recommend "almost" meeting the requirements on one hand, and "not" meeting the requirements at all on the other.

Claiming credit towards an award without meeting the requirement(s) fully, is to put it quite simply, cheating!

Your statement that "Guess that just shows why the hobby is slipping in popularity..." is exactly on target. The reason the hobby is slipping is because of the "instant gratification" generation. Many newer participants have little concern for acquiring the benefits of the hobby under the time honored concept of earning them!

1089. Newbie question: "QSL via" instructions for bureau?

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-16 00:00:00 UTC
From: ken.hoover@DIE.SPAM.DIE.yale.edu
Message-ID: <7f7coe$5j1$1@news.ycc.yale.edu>
Source record: 25339

Greetings-

A simple question from a HF newcomer:

If a DX station has a QSL route via a callsign, how do I send cards to that station via the bureau? Should I wrote "QSL via xxxxxx" on the card? Can I attach a post-it note to the card with "QSL via" instructions?

Does the ARRL outgoing QSL bureau know about QSL routes on its own?

Please email responses and thanks in advance for your assistance!

>
> A simple question from a HF newcomer:
>
> If a DX station has a QSL route via a callsign, how do I send cards to that
> station via the bureau? Should I wrote "QSL via xxxxxx" on the card?

On the upper left hand corner of the back of the card, in NEAT LEGIBLE
handwriting, put the call sign of the station you worked OR the QSL
manager

Can I
> attach a post-it note to the card with "QSL via" instructions?

NEVER!!! they fall off and the cards never get to where they are suppose
to

>
> Does the ARRL outgoing QSL bureau know about QSL routes on its own?

No, you need to know that and there are many many sources of QSL routing
if the station does not provide it.

Also make sure you are subscribed to the 3 area Incoming QSL buro so
those cards have a route to get back to you.

Let me know if you have any other questions

>attach a post-it note to the card with "QSL via" instructions?

I wouldn't recommend you send the card via the bureau. If a DX station has
a QSL manager, and you need a card, you should send the card direct to the
manager, with an SAE and a stamp or IRC for return postage. I'll use Guam
and Saipan for an example, since that's where I am.....

Some 'DX' stations answer bureau cards - some don't. I'm afraid, after ten
years or so of handling bureau cards, that I can't agree with Steve about
writing the call of the manager neatly on the card - I've seen hundreds of
cards with managers call sign neatly written on them that get sent to the
DX station (me) and not the manager.

One thing you have to remember about QSL cards. You might want to
collect 100 cards for your DXCC. If a rare station gets on the air and
works 1,000 stations, 995 of them might want cards. Help out the DX
stations by sending them return postage and an SAE. Don't expect them
to answer cards via the bureau (some do) or don't expect them to foot
the bill sending you a card back direct.

If everybody pays for their own awards, everybody is happy, and it will
keep more DX stations on the air - I've seen a few 'quit' because they
just couldn't deal with the volume and expense of cards.

Think about it this way - you may 'need' a card from Guam or Saipan.
I doubt seriously any of the active guys in Guam or Saipan 'need' a
card from PA or MD. Most of them are still willing to send you a card if
you need it, as long as you buy the stamp......

> Does the ARRL outgoing QSL bureau know about QSL routes on its own?

No. The ARRL outgoing bureau still hasn't figured out that KP2 and KH2 are
two different countries. Every time the KH2 bureau gets a box of cards from
the ARRL, about 30% of them aren't even for this country..... If you send a
KH2 card (outgoing) to the ARRL bureau, it might get to Guam or it might
go to KP2 land but rest assured nobody will look the call up to see if there is
a manager and forward it to him.

Bureau cards take a long time to go back and forth - two years maybe. The
bureau system is an excellent idea, on paper, but in reality it doesn't work.

For a lot of reasons:

1. Some countries don't have bureaus, some have only incoming bureaus. Send a KH2 card to the bureau, and we don't have a bureau to send you one back.

2. Small countries with few hams have low volume - cards sit a bureaus for years waiting for 'other' cards to go with them and never get sent.

3. Cards get stuck together, missorted, sent to the wrong place.

And so on.... in 10 years more than half the cards that have arrived at the KH2 bureau have gone in the trash.

If you really want to collect cards, go buy some stamps and forget the bureau.

>That's funny, Jim. In the past 40 years I've received over 80,000
>QSLs via the bureau.

>It doesn't work?

I think we've had this pissing contest before, Walter. I implied that it doesn't work 'as planned'. Rest assured that for every 80,000 delivered, 160,000 went in the trash somewhere. Don't take my word for it. Ask some other people who run QSL bureaus. Start with the guys who run the W6 bureau.

I've received a lot of QSL cards via the bureau myself. I don't know how many, as I don't count them or keep them. But I've also thrown thousands in the trash, because they couldn't be delivered, and nobody came to get them after they layed around for a few years......

So if 1/3 of all the bureau cards sent get delivered, should we consider the bureau system as something that 'works' ?

If it 'works', why did the ARRL send 14,000 KG6 cards to Guam that they should have sent to California ? Doesn't the ARRL keep up with what calls are being issued where ?

If it works, why doesn't everybody who has a KH2, AH2, WH2 or NH2 call have envelopes on file with the Guam bureau ? Why do only six or seven out of 600+ issued calls have envelopes on file ?

Why does the bureau system send cards for N2NL/KH2 to the W2 bureau when he's really in Guam, and cards for KH2T/W4 to Guam when he's really in Virginia ?

Why does the ARRL send KH7, KH3, KH0, KH-anything cards to Guam ? Do they think we can jump in the car and drive over to the other islands on the weekend and deliver them ? Don't they know the bridge from KH2 to KH7 isn't finished yet ?

What are we doing wrong over here, Walter ? Your bureau works so well that you got 80,000 cards. Why ? Clue me in so I can fix the problem over here. Obviously, we are the only ones with a problem......

I don't think the KH2 buro is the only one with problems. I send cards via the buro. Not a lot in the grand scheme of things--but in the course of a year I will send 200 to 300. If I need a confirmation for a station in Sweden on 80 meters, I will send a card for every station that I work that fills the bill until I get one back from 'someone'. I receive cards back from the sorter about 4 times a year. Last envelope had 7 in it--time before had 12. Let me be generous. If I send out only 200 cards in a year and receive back as many as 50, then it has been a good year for buro cards, but I am only hitting .250. I don't blame the buro system for this--I blame the amateurs at the other end for not keeping envelopes on file and then when they do get them, not responding. I rarely get a card directly or via buro asking for my qsl but it happens. Most of these guys could heat their homes for a winter with the US cards they receive, but it would be nice for them to respond a bit more consistently. It IS part of the hobby, whether folks like it or not.

I am looking for the old "Doctor DX" CW Contest Simulator put out by AEA (I think) years ago. This ran on a Commodore 64 or 128 computer and had an interface for a key. The computer was used to simulate a "DX contest" and you could actually "work" stations artificially and practice your technique.

Anybody out there have one of these they'd like to sell? I also need the computer and accessories to go with it. Please e-mail if you can help.

Gary,
My experience has been much the same as yours. My return rate is a little bit better than 25% over the course of the past 10 years. I was curious about how efficiently the bureau system was working so I emailed several hams around the world to whom I had sent my card. None of the hams I emailed had received my card after almost 3 years. Where did those cards all go.....who knows? All I know is that I'm giving up on the bureau system and changing the manner in which I QSL. I have over 5000 cards in limbo and I doubt if I'll live long enough to see even a quarter of them arrive.
I am not sure who to blame but it seems, based on Walt's and Jim's experiences, that the ARRL outgoing bureau isn't doing the job as it should...but then again when high school seniors in this country can't even identify the state of Florida on a map, why should we expect anyone to be able to tell the difference between KH2 and KG6!!!

73,
John, KF7PG

You may have just hit on something here, Walter. 90% of the
issued Guam calls are issued to people who have a) never been
in Guam, b) never will be in Guam, and c) don't know where
Guam is.

Maybe it's not a QSL bureau problem, maybe it's the FCC's
fault for allowing U.S. licensing exams to be given in Japan,
Europe, and the Philippines and for selling all those vanity calls.

So here's another question. How do we go about informing all
the bureaus world wide that KH2QJ's cards should go to the
Italian bureau because he's a) not in Guam, b) has never been
in Guam and c) he scammed a Guam callsign by using the KH2
bureaus P.O. box address on his 610 form when he took the
U.S. ham test in Europe ?

The few guys who are here don't need to supply the bureau
with envelopes, they pick thier cards up every Saturday at the
DX club breakfast.

Two comments, Gary. One, if you could see the bureau system in operation, I think you'd realize why you are batting .250, and you'd realize that the other 75% of the missing cards were not necessarily caused by people not answering them. Many countries have a policy that bureau cards are only delivered to 'members' of the bureau, so if you send a card to VK99XX and he's not a member, he never gets the card. Some bureaus actually waste even more time and money sending undeliverable cards back - marked 'NOT A MEMBER' or 'SILENT KEY', but I imagine a great deal of other ones do what we do - keep the cards on file for a year or two and then trash them.

And two, I don't agree that QSLing 'IS' part of the hobby. Tracking digital satellites is part of the hobby, but nobody is forced to participate in it. Some people don't collect cards, and don't collect awards, so if they are not interested in QSLing, they shouldn't be forced to participate in that either. Granted, if you talk to someone on the radio and they don't want to QSL, they should tell you that, but most bureau cards sent aren't usually the result of a discussion on QSLing, they are just a routine part of someones operating habits.

The burden on the QSL bureau and on active 'DX' stations is also increased by people who have been preprogrammed as to what a QSL card is. Take Japan for example. Many Japanese hams sit down at the end of the month a fill out a QSL card for every contact they have made - never mind if they 'need' a card or not - never mind if they have sent the station a card before

for that band/mode. In the 80's we had a lot of active contesters here in Guam, and it wasn't uncommon to sort incoming JA bureau cards and find 50 from the same ham in Japan - 8 for one guy, 10 for another guy, 12 for another guy, and all 50 for contacts on 15 meter SSB. Only a very serious card collector would need 50 cards for KH2 15 meter SSB contacts, or at least it seems that way to me. If there was a way to stop all the unnecessary cards from being sent 'via the bureau' then it would be much easier for people who really 'need' a card to get one.....

Although some people may say that the 'QSL is the final courtesy of a QSO', there are a lot of us who say '59 27' isn't a QSO.....

Most have never even been here, more less operated. But the bureau system is designed so that when cards are sent to KH2XX/6Y5, they are sent to Guam - and KH2XX doesn't have envelopes on file, can't be reached by mail as he has a phony P.O. box number in Hawaii, and nobody here knows how to get in touch with him. So what do we do with his cards ? Only two choices, waste our time and money sending them all back, or throw them into the trash.....

John Hunley <john@jrh.com> wrote:

>It seems that a lot of people have opinions (mostly negative) about the
>bureau system, but nobody has any ideas as to how to fix it.

Sure we have ideas how to fix it, John. First of all, it's 1999. We have the internet, online databases for DXpeditions, everybody has a computer. A few hams collect cards for memorabilia, but most want them for one reason - awards. And of course the most wanted award is the DXCC certificate. I think anybody on the honor roll will agree that it's much harder to CONFIRM 329 than it is to work 329. Keep reading, the solution is to follow......

> .....the bureau system needs to work like the postal system.....

That's a novel idea. The postal system has a couple hundred thousand paid employees, and a source of a little income, called stamps. So if we hire a couple hundred thousand people to run the bureau system, how do we pay them ?

The current QSL bureau is run by volunteers, with the exception of a few places, like the JARL in Japan. Many of those volunteers are probably as frustrated as I am after spending hours sorting and filing cards only to have them go unclaimed.

> .... Throwing them away is not acceptable .....

In Guam we have a ham club with a dozen active members. Everybody pays $20 a year dues. We are trying to use the money for infastructure, like packet nodes, a DX cluster, etc. AH2R is a club call, issued to a ham in Japan. He and his friends come to Guam and operate from a hotel in serveral major contests every year. He doesn't want bureau cards - he has instructed us that he doesn't want them. He regularly publishes QSL info before a contest, and says DO NOT QSL to the bureau. In a normal contest the club makes 7 or 8 thousand contacts. We continue to get hundreds of card for AH2R. Don't you think it's a bit rediculous to suggest that we use our $240 a year in dues to send back thousands of cards for someone who doesn't want them ?

> If a bureau can't forward a card, stamp it "return to sender" and
> ship it to the sender's bureau.

Again, who pays for the stamps ?

> Right now, there are several ways to find out QSL managers, and you
> never know which publication or Internet database has the current
> information on the station you're looking for. A lot of cards get sent

> to the wrong manager..............

Totally different problem than bureau cards. If you want an accurate
QSL manager database, go PURCHASE the GO list. If you download
Freddy's Freebie QSL manager list, yes, it's full of bad info.

Let me tell you a well kept secret, John. I know not many people
read this newsgroup, so I'm not worried about it getting out. The
ABSOLUTE BEST and TOTALLY ACCURATE source of QSL info for
ANY DX station you work is the DX station himself !! If you work
me on 20 meters and you need a card, PLEASE just ASK me how
to get one and I'll be happy to tell you. I have never refused to
answer that question in thousands of hours of operating. If it's
CQWW contest, ASK me, I'll be glad to stop and tell you. I'd rather
tell 2,000 people in a weekend who my manager is than have 20
people unhappy because they didn't get a card because they sent
it to the wrong place.

If you don't ask, here's what could happen. You send a card to
the bureau. Two years later, maybe I get it. But I don't answer
bureau cards much anymore, unless they are going to a bureau
where I can send 1,000 at a time. You send a card direct to me.
I throw it in a box. I don't like to answer cards, don't like to pay
bills, don't like to do anything that has to do with a pen and paper.
But six months, or a year from now, one day I'll get out the box,
dump it on the floor, and answer your card. Or you send a card
to my manager. He LIKES to answer cards. Why, I don't know.
So he'll send you one back the next day. Your choice, all you have
to do is ask.....

>get sent to the station itself because the sender didn't look in the
>right place to find the manager. The bureaus themselves should maintain
>and implement this service.

If I didn't know better, John, I'd say you are looking for a free lunch.
Somebody else does all the work, you get all your cards.

>This has the additional benefit that hams could inform their bureau if
>they didn't want to accept cards, either via the bureau or at all. Then
>the bureau could just return the card stamped "direct only" or "does not
>QSL" or whatever, and the sender would know that his bureau request did
>not work and why.

Again, more stamps for returned cards. Ask me on the air, and I'll tell
you not to QSL to the bureau, and save somebody some postage.

> Don't know exactly ow the logistics of that would work, but
> hey, I'm just brainstorming here. ;-)

You need to brainstorm on a much larger volume, card wise. QSL cards
don't seem to be much of a problem for someone who sends 200 a year.
They are a much bigger problem for someone who sends 20,000 a year.

>Of course, the bureau would have to know the address of every ham in
>their country. In the U.S., that's no problem because that's all in the
>FCC database.

Yep, it sure is. Look up KH2XX. Where do you send his cards, to the
KH2 bureau or the KH6 bureau ? Look up KH2E - he left Guam 8 years
ago and never bothered to send in a 610 form to change his address.
The FCC database is about as accurate as the free QSL manager
databases because people don't update thier addresses when they move.

> But for my part, I'd certainly pay more than the current $6/pound for
> this kind of reliability. How about the rest of you?

Personally I'd rather send an SASE or an IRC for a card I really need.
Gets back in one tenth the time, less chance of it not getting back.

So here we are in 1999. Everybody wants a DXCC certificate. All the
major DXpeditions use computer logging, any DX station who is active
probably uses computer logging. So we have all this 'data' on a disc
someplace - what say we use it.

I'd be more than happy to send my logs electronically to the ARRL. I'm
sure that a lot of other 'DX' stations would be too. I doubt major
DXpeditions would have a problem with submitting logs either.

When you need a 3B9 credit for your DXCC, you just email the ARRL
and they look you up in the log.... we save some stamps, we kill one
less tree for printing paper, and things happen MUCH faster. You
don't have send your cards to Newington with return postage any more.

We use the internet to announce all the major DXpeditions. We use
the internet and email to stay on top of all the latest DX happenings.
We use the internet to ask for 'skeds' for a new one, we use the
internet to tell the DXpeditions what band has propagation to our
part of the world. After a contest we email our computer logs to
the contest organizer.

We have computer controlled radios, contest software that turns
the beam and switchs the antennas. We have amplifiers that auto
tune, radios with 1000 memories, all kinds of hi-tek stuff in the
shack.

But we still kill trees, waste time and money, and beat ourselves to
death trying to get that cardboard cartoon card for a new one.....

Let's automate this mess and get it over with. The ARRL says they
are 'working on it'. I started remodeling a bathroom 9 years ago, it's
still not done, but when my wife asks, I'm 'working on it'....

Hi,

I am looking for a FM board for my Kenwood TS930s. If you have one, or know where there is one available for sale at a reasonable price can you please let me know via Email to: timj@omen.net.au as I do not browse the news groups very often.

Thanks.

Tim. VK6EI Perth, Western Australia

PS I am will to pay shipping costs etc. from where you are.

1110. QSL info for J68MM

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-17 00:00:00 UTC

I have received some QSLs for J68MM, but I am NOT the manager for this station.

If anyone has seen my call listed as manager for J68MM, please tell me where you saw it.

73,

John, K9MM

Walt, I think you are right on track. I've QSLed many DX stations with European mgrs. via the buro. True, some guys (for example, F6FNU, DJ6SI, VK9NS, ZL1AMO) won't reply that way, but most do.

It seems that a lot of people have opinions (mostly negative) about the bureau system, but nobody has any ideas as to how to fix it. Well, I have a suggestion:

The bureau system needs to work like the postal system. If you send a first-class letter anywhere in the world, for the most part you can rest assured it will either get to its destination or be returned to you with an explanation as to why. Oh, sure, letters occasionally fall through the cracks and some countries' postal systems don't work any better than the current QSL bureaus, but the concept is sound. A ham should be confident that his cards will either be delivered or returned. Throwing them away is not acceptable.

For this to occur, a bureau needs some equivalent of the Post Office's "return to sender" service. Every QSL card has the sender's callsign on it, so the "return address" is already there. If a bureau can't forward a card, stamp it "return to sender" and ship it to the sender's bureau.

Secondly, each country's bureau should be THE central database for QSL managers for stations in that country. Right now, there are several ways to find out QSL managers, and you never know which publication or Internet database has the current information on the station you're looking for. A lot of cards get sent to the wrong manager, and a lot get sent to the station itself because the sender didn't look in the right place to find the manager. The bureaus themselves should maintain and implement this service. If I want to send a card to XY4Z, I should be able to just send it to my outgoing bureau, who forwards it to the XY4 bureau, who knows that XY4Z's manager is XY4AB and delivers it

accordingly. If XY4Z's manager is in another country (say, W3HNK), then the XY4 bureau knows that and forwards it to the W3 bureau. Of course, if I knew W3HNK was the manager, I might want to just send it direct, but the bureau system should still get it there if I choose to send it that way. There could still be secondary manager information services which I could check to find out that W3HNK is the manager, but they would all get their information from the XY4 bureau, so it wouldn't matter which one I use. The bureau is still the primary source.

This has the additional benefit that hams could inform their bureau if they didn't want to accept cards, either via the bureau or at all. Then the bureau could just return the card stamped "direct only" or "does not QSL" or whatever, and the sender would know that his bureau request did not work and why.

An additional problem is stations not keeping envelopes on file for the bureaus to send their cards in. Again, going by the postal example, the sender pays for delivery. So charge enough at the outgoing bureau to cover the cost of sending the card all the way to the destination, or returning the card to the sender if necessary. There could even be multiple rates, like the Post Office's classes. A low rate for cards that you really don't care about, where the system would work pretty much as it does now; e.g. if the card is undeliverable, throw it away. Then a slight higher rate for cards that you want returned if undeliverable. And a third highest rate that would not only ensure delivery, but would cover the cost of sending the recipient's card back to you. Don't know exactly ow the logistics of that would work, but hey, I'm just brainstorming here. ;-)

Of course, the bureau would have to know the address of every ham in their country. In the U.S., that's no problem because that's all in the FCC database. I would hope that in other countries, the bureau could have access to the database of whatever authority issues licenses, so that wouldn't be a problem.

All this would require two major things to happen: 1) some amount of agreement and consistency among the world's QSL bureaus, perhaps even some international overseer to keep things running smoothly. And 2) sufficient fees to fund the additional services to be provided by the bureaus and to hold them accountable. Since the U.S. seems to be the world's policemen, maybe the ARRL could provide the oversight. And of course the world's hams would have to provide the fees. But for my part, I'd certainly pay more than the current $6/pound for this kind of reliability. How about the rest of you?

In <7fbq14jlv1@brokaw.wa.com>, Jim (kh2d@my-dejanews.com) wrote:

: ... Many countries have a policy that bureau cards are only
: delivered to 'members' of the bureau, so if you send a card to VK99XX and
: he's not a member, he never gets the card. Some bureaus actually waste
: even more time and money sending undeliverable cards back - marked
: 'NOT A MEMBER' or 'SILENT KEY', ...

This is what the Germans and the French do. Their QSL bureaus are only
open to members of the national amateur radio organisations (DARC or REF).
But most of the amateurs in those countries are members of these
org.s - the costs of the bureau are covered by the membership fee.
Incoming QSL cards are sorted in the bureau by local DARC chapter (Germany)
or departement (France) and sent to the respective radioclubs where
people pick them up. Outgoing cards are also collected in the radioclubs.
Usually, the cards are mailed from the clubs to the bureau (or vice versa)
once per month.

: ... but I imagine a great deal of other ones
: do what we do - keep the cards on file for a year or two and then trash
: them.

That's not good at all - imagine some poor chap who is waiting for
whatever answer and never gets one ... IMHO, uncollected cards should be
returned.

I've been using it for four months and am quite pleased.

You may already know this... but...

Info is available at http://www.erols.com/pvander/

There's a DX4WIN reflector which you could check out at
http://www.qth.net. I read the reflector for a few months before
selecting the software.

SB DX @ WW $OPDX.405
Ohio/Penn DX Bulletin No. 405

The Ohio/Penn DX PacketCluster
DX Bulletin No. 405
BID: $OPDX.405
April 19, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1VV, KE1AC, AI2Q, ND1V, W2SF, W3UR & The Daily DX, N5FG, N6RT, AH0W/OH2LVG, 9M2TO, DJ5AV & DX News Letter, G4BUE & DX News Sheet, G0KRL, OH2RF, RA0FN, SP5ELA, Socios del Radio Club Rosario, VE2NW, VE3XAP and YS1RR for the following DX information.

3B9, RODRIGUES ISLAND. Thanks to the 3B9R DXpedition operation, Robert Felicite, 3B9FR, is now back on the air. Robert has been off the air for over 5 years for a number of reasons. One reason given is that he lost nearly everything he owned to a cyclone. Robert was heard this past weekend on 30 meters between 1330 and 1400z and between 2130 and 2200z. QSL direct only (this may change later).

4U1ITU, ITU HEADQUARTERS (GENEVA). The "DX News Letter" reports that Eric, W3DQ, will be active as 4U1ITU during his spare time after 1900z now until April 25th. He will emphasize his activity on RTTY and the WARC bands. QSL via bureau.

FM, MARTINIQUE. Pertti, OH2RF, intends to operate as FM/OH2RF between May 1-7th, with a CEPT licence probable. He is visiting FM5BH during his week vacation in the Caribbean. There will be special attention to European stations on both CW and SSB. QSL via OH2RF, Pertti Turunen, Sulkapolku 1 A 2, SF-00370 Helsinki, 37, Finland.

FR5/T, TROMELIN. QSL Manager Zareh, VE2NW, informs OPDX that Jacques, FR5ZU, will be active from Tromelin Island (IOTA AF-031) from now to May 4th. Activity will be SSB only 40-10 meters. Zareh will run a net around 0200z on 14256 kHz and will try to run as many as NA stations as possible. As this bulletin was being prepared, QSNs indicate Jacques has been active on 20 meters and as late as 0400z. There was also one report where he was active on 28470 kHz around 1430z. Jacques will be working in Tromelin and will try to be active as much as possible during his rest periods. QSL all contacts, except JA ones, is via VE2NW. JA

contacts go to the JA QSL Manager JA8FCG.

GD, ISLE OF MAN. Ian, G0KRL will be operating from the island May 1-8th, as GD0KRL/P. This will mainly be a vacation for Ian, but he hopes to be active every day. Activity will be on all bands mainly SSB with some RTTY using an Alinco DX-70 and multiband vertical antenna. QSL via the bureau or direct to his home callsign. E-mail QSL requests for the bureau can be sent to: G0KRL@ARRL.NET

HQ6RCH OPERATION (QRT). The Radio Club of Honduras was active this past weekend from Little Key Island. Little Key measures just 25 x 25 meters in size (!) and lies at N 16 degrees, 3 min., 36 sec. and W 86 degrees, 58 min., 58 secs. They used the callsign HQ6RCH and were active on CW/SSB. QSLs will be handled by the club president, HR2JAW. The club reports that there is NO IOTA number yet for this island, but Joe, HR2JEP, says that will be forthcoming.

INTERNATIONAL MARCONI DAY (IMD). Just a quick reminder that this event takes place April 24th, between 0000-2359z. The event is sponsored by the Cornish Radio Amateur Club of Cornwall England. Check out the Web page: http://www.users.globalnet.co.uk/~straff/
There will be 58 Marconi Special Event stations participating, many with certificates offered.
Look for stateside station W1AA/IMD to be active, and it will represent the 1903 Marconi Transatlantic Transmitting Station on Cape Cod. DX stations QSL via the bureau and Stateside stations via the CBA with a S.A.S.E.

IOTA NEWS......
AS-073. Tex, 9M2TO, will be active from Redang Island as 9M2TO/P May 1-4th. Activity will be on 40-6 meters on the normal DX frequencies. QSL via JA0DMV (via JARL Bureau is OK).

NA-046. Henry, KE1AC will be operating from Nantucket Island, Nantucket County, Massachusetts (MA-007S), April 20-22nd. He will use his ICOM 706, 100 Watts, vertical antenna on 10, 15, 17 and 20 meters, depending on propagation. Look for him on the IOTA frequencies.

NA-062. Bob, W2SF, will be active from Lower Matecumbe Key in the Flordia Keys April 23rd through May 7th. Activity will be on all bands plus the WARC bands CW/SSB/RTTY. Bob informs us that this is a practice run for his upcoming trip to Iceland (see TF below).

QSL INFO AND NEWS......
RA0FN QSLs go to: Viacheslav Davidenko, ul. Yuzhno-Zelenaya 80-22, Uglegorsk, Sakhalin Island, 694900, Russia

Raymundo, YS1RR, reports that as of April 10th, Franz, DJ9ZB will be QSL Manager for his two sons John, YS1JR, and Ray Jr., YS1RAY. Franz will have the logs for all QSOs starting January 1, 1999. By the way, Franz is also YS1RR's QSL Manager. Raymundo mentions that the YS1JR callsign

was initially his father's, Jose Rodriguez (who died in 1996), but was reissued to his son (who was YS1JRG) by the PTT authorities.

NEW ADDRESS. Rob Wright, ND1V, informs OPDX that many cards for his VQ9CV operation are being sent to his old address in Key West. QSL cards SHOULD be sent to his new Virgina address. His new address is: Rob Wright, ND1V, 1409 Eaglestone Arch, Chesapeake, Va 23322

YI9CW QSLS. Tom, SP5AUC (ex-YI9CW), has left Poland for Vietnam on his new Foreign Office assignment. Tom apologizes for delays in answering his QSLs. The backlog of direct QSLs for his YI9CW operation is now being handled by Mirek, SP5APT. Tom hopes that this will finally clear the problems associated with his huge 100k QSOs record. Zygi, SP5ELA, is a back-up manager and has access to YI9CW logs. If help is needed, please send E-mail to: zygi@sp5pbe.waw.pl

S79AG, S79FAG, S79YL, S79ZG LOGS ONLINE. Doug, N6RT, reports that he has received and put online the S79 logs from the Germans currently operating from Seychelles and they are updated daily. Also, the S79AG logs for Erik's (SM0AGD) March, 1999, operation are also now online. The logs can be found on the Web at: http://dx.qsl.net/logs
Doug also mentions that the recent OH0M logs, as well as many other logs, are also there. New logs are added weekly in addition to a list of links to other logs on the net.

DO YOU NEED A QSL CARD FOR YS1ZV, CU3AV, HR2RDJ, HL9JF, HH2/KB0QNS, N4GFO/KH2, N3SIY/HH2, XE2UVB, KL7IYD, J37LK, HR2A, YN4/WK6O, YN4ZUJ, VY1JA, HR2KOS or YO2CDE (before 1999 only)? Reportedly all these stations have the QSL Manager KB5IPQ. Sources from the ARRL W5 QSL Bureau reports that KB5IPQ is not an ARRL member, and he refuses to answer these stations via the bureau. It is highly recommended to QSL direct to KB5IPQ.

RRC "NORTH POLE 1999". The "International North Pole Expedition" with the "Russian Robinson Club" is now active until April 25th. It is under the sponsorships of the Federation of Parachute Sports of Russia in accordance with the direction of the official preparation and realization program of the celebrations of the 70th Anniversary of Polar Aviation, the 70th Anniversary of foundation of the First Polar Station at the Franz Joseph Land and the 50th Anniversary of the First Skydive onto the North Pole. This expedition is truly unique. It is the first time that an International Expedition will be routed via: Moscow - Murmansk - the Franz Joseph Land - North Land (Srednij Island AS-042) - North Pole. This expedition is in preparation for an expedition to the South Pole, whereby new technologies pertaining to performance in the polar conditions are to be worked through. The callsign of this Expedition is RV3MA/0. Operator is Roman. QSL via RV3ACA, Elen, P.O. Box 13 Moscow 127521 Russia. The special callsign of RRC`pedition is R3RRC/0. Operator is RV3MA. QSL via RW3GW, Valery, P.O.Box 3 Lipetsk 398000 Russia. There will be a special "RRC-North Pole-1999" plaque (the wooden plank 20x15 cm. on the metallic base) available for QSOs with R3RRC/0. Cost is 23 (USD for EU), 25 (USD for DX) and can be obtained via the plaque manager RW3GW (via DL6ZFG,

Rolf Rahne, P.O.Box 15, D 39241,Gommern, Germany). Also, check out the Russian Robinson Club Web site at: http://www.stinol.lipetsk.ru/~rrc

S7, SEYCHELLES. The "DX News Sheet" reports that Gavin, GM0GAV, will be active April 22nd through May 5th as S79GT "while on honeymoon". Activity will be CW on 20/17/15/12/10 meters and possibly 6 meters. QSL via home callsign.

SPECIAL EVENT. The "Socios del Radio Club Rosario (LU7FW)" will be active as L27FW from May 16-23rd, in celebration of the 75th aniversary of the contact between Carlos Braggio (r-cb8) and Ivan O'meara (z-2AC) establishing the world record distance between Buenos Aires and New Zeland in 1924. For more details see OPDX.404. QSL via LU7FW: PO Box 263 ZIP CODE 2000 Rosario, Argentina.

SPECIAL EVENT. The prefixes CI3 for VE3 and CJ3 for VA3 Canadian amateurs have been approved for use in the "Region of Peel" to commemorate the 25th anniversary of the "Incorporation of the City of Brampton" for the time period April 10-25th.

SV/A, MOUNT ATHOS. Monk Apollo has been active again as SV2ASP/A on 20 meters SSB. Check the 14252 kHz (net) between 2000 and 2200z. Also, look for him on 20 and 17 meters on Fridays and Saturdays on SSB and possibly RTTY and Pactor. QSL direct.

TF, ICELAND. Bob, W2SF, is currently planning an operation here which will take place August 27th through September 7th. His callsign has not been announced yet, but activity will be on 80-10 meters plus the WARC bands CW/SSB/RTTY.

XX9, MACAO. The "DX News Letter" reports that Motoi, JK2PNY/VR2SS, will be active from Taipa Island (AS-075) until May 9th. They state his callsign may be XX9TSS. However, "The Daily DX" reports that Motoi will concentrate on 6 meters. So, HF activity may not happen. QSL via JK2PNY, Motoi Kawattsu, 205 Mezon 3-17-15, Nishisugamo, Toshima-ku, 170-0001 Japan.

Hello Everyone:

Iï¿½m selling my President Jackson.

* This unit covers from 26.065 for 28.305mhz built in
* Has an open dual-clarifier with 14kc spread
* Am/ Fm/ SSB modes
* Mike gain control
* 10kc switch
* Roger Beep on/ off
* Nb on/ off
* Tx/ Rx lights
* Dual mode meter (signal/ mod)
* 30 watts output (ssb)
* 3-pin power socket
* Pa/ ext. speaker outputs
* All for $225.00 w/stock mike

Also this unit is a newer Jackson, it is black all around, except for
the small fabricated faceplate that goes around the signal meter and
channel display. (original received a large scratch ï¿½ looked really bad)

Extra equipment for sale:

NTR-1 Noise/Tone Reducer by JPS.

* Unit has notch/noise red/ bandwidth selections
* DC up to 15v
* $50.00

Thanks,

leel@uniserve.com

Hi !
I had today a QSO with RV3MA/0
The OP gave as QTH the North-Pole.
As the QTH is very interesting, I wonder, if there is any WEB-site
regarding the operation from there ....

Any URL ???

I am looking for an AEA MM-3 "Morse Machine" Keyer. I understand it has CW operating simulators like "Dr. DX" and "Dr. QSO" built-in.

Does anyone have one of these that they would like to sell or trade?

I would need the manual/documentation also.

Please e-mail if you have info.

73,

Ron N4RT

Ron,

There's a bunch of CW software for the PC at:

http://www.ac6v.com/pagez.html

There is also a program written by a Japanese ham called
PED that does what you are looking for.

I have tried two downloadable freebees so I am no expert on logging prgms.

I write to alert you to be sure to find out on each program you consider if it
will do the following:

Does not require you to reset your computer's clock.

Can operate on windows instead of requiring you run DOS.

Compatability with logging data format used by ARRL.

I have an old MM-3 and I love it. It would be too hard to part with it now after using it for so long. Good luck with the search, though. If you find one, you can get a eprom upgrade to the lateset AEA had before they closed down. Call the guys at Timewave and talk to them about the eprom. They offered to burn me one a couple of months ago for my unit.

I've tried a whole lot more than two <g> and would like to add a few
points...

- I've found DOS programs are somewhat more reliable. Do make sure
they'll run under Win95 though, some won't. (that said, I'm using a
Windows logger!)

- Make sure your program will copy information from the previous QSO.
If you're spending a few hours in front of the radio working, say, 20CW,
you don't want to have to retype "20 CW" for every QSO! (especially if
you participate in contests)

- Make sure it'll support all bands and modes you use or expect to use.
I've found some won't accept VHF bands, or RTTY.

- Make sure it handles all fields you're likely to want to track. (grid
squares, for example, are often missing - you'll regret that if you get
into VHF CW/SSB! -- and there are even grid-square awards for HF now)
Counties, for USA-CA, are also often missing.

- Make sure you can skip fields you don't want to fill for this QSO. If
you decide to work a contest, you don't want to have to enter through 5
or 10 unwanted fields for each QSO!

- Make sure the fields are wide enough. I found some programs that
don't provide enough space for calls like HS0/JH3XGN/P.

- Make sure the DX countries list can be edited. The map is changing
rapidly!

- Make sure any QSL-label printing routine will work with your printer.
Some will only print to tractor-feed labels, a problem if you don't have
a dot-matrix printer; others will only print to laser-feed labels, a
problem if your printer *is* dot-matrix!

- Make sure the program will call up information from previous QSOs with
the same station.

1137. On EBAY: Sunlit Globe. Shows Terminator like Geochron

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-20 00:00:00 UTC
From: robcap@aol.com
Message-ID: <19990420175348.00692.00003041@ng67.aol.com>
Source record: 25287

On EBAY: Sunlit World Globe, which acts like a timepiece. The globe has a built in 24-hour clock, which keeps time by the action of the globe revolving around its axis. Also, it has an internal lamp which shows the day/night terminator of the Sun like a Geochron clock. The Globe is in mint condition, and has a handsome black base. The globe is 12-inches in diameter, and with the base it stands 15-inches in height. It runs on house current. This handsome timepiece is a great tool for the DX'er, or as an educational tool in the classroom.

Hi, a few questions:

-Is there a band plan list on the web that gives
the "standard" calling frequencies for initiating
a DX contact for each band or do you just call
anywhere and wait for someone to find you?
If there are specific calling frequencies what
are the procedures for moving to a new frequency
for conversing?

-How do you call if you are trying to reach a
specific country, but not a specific person?

73's

Hi again Eric --some more thoughts, before calling a specific country -
of course you want to check for propagation to that part of the world --
for the most likely times -- see URL:
http://www.concentric.net/~jerrhall/

and be aware of the propagation conditions at URL:
http://www.ac6v.com/pageprop.html

Calling CQ DX (country) usually gets poor results, your much better off
catching the DX calling CQ. Some tips in this regard:
Listen Listen listen -- catch em calling CQ or finishing a QSO.

Hams tend to be habitual -- look up the country of interest on a packet
cluster or telenet to determine a time when a particular station usually
appears. Call a few minutes earlier!!!

For DX telenet -- See URL:

In a pileup -- listen listen listen -- they may call for your area only
-- or any one in San Diego or any mobile or QRP or YL (raise your voice)

Of course you can always try a DX net (Purists and I frown on this) see
URL:
http://www.ac6v.com/pagep.html

Also be aware of the time differences around the world -- looking for
Europe when its 3:00AM there -- is a poor bet. Likewise -- if you get
up at 3:00 AM -- you can snag lots of countries while North America

sleeps!!

SB DX @ WW $OPDX.405.1
OPDX Special Bulletin No. 405.1

The Ohio/Penn DX PacketCluster
Special DX Bulletin No. 405.1
BID: $OPDX.405.1
April 21, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX
Association, Ohio/Penn PacketCluster Network and Wayne Mills (N7NG)
for the following special DX information.

From iglou.com!n4gn@nshore.org Wed Apr 21 11:03:26 1999
Date: Wed, 21 Apr 1999 10:52:51 -0400 (EDT)
From: n7ng@arrl.net
Subject: P51BH
To: editors@n4gn.com

Gentlemen:

Martti Laine, OH2BH was heard signing P51BH early Wednesday morning from
the DPRK. The following release should help to put this appearance into
perspective. There are few details available at this time. Further
operation will depend on the situation, but is not planned. Additional
information will be released as appropriate.

73, Wayne Mills, N7NG

****

NORTH KOREA - MOST WANTED DXCC COUNTRY

Countless DXers are eagerly waiting for a North Korea activation.
The country is the rarest of them all - for a good reason.

Often the value of amateur radio does not signify anything
tangible for these developing countries. Hence, a specific dimension
should be discovered.

North Korea is totally isolated from the rest of the world, and visits
are allowed only for a special purpose.

Transmitting by radio from North Korea has been, and still is, a highly
sensitive issue.

Many parties have worked tirelessly in looking for ways of offering valuable partnership to North Korean society. Only a handful of P5 radio contacts were made in 1995, and the efforts to produce more will continue.

DX history tells us that sooner or later, the rare ones will be available to those who Deserve. That last word is spelled with a capital "D" to illustrate the need for a greater understanding of the overall issue, and the need for patience. That is always a worthwhile resource in DX.

The efforts will continue. Martti, OH2BH, is currently in North Korea pursuing those opportunities and searching for that magic dimension to please both ends of the circuit.

This is not a DXpedition, and Martti will make only sporadic QSOs while showing the equipment and the concept of amateur radio to those who have the power to decide.

If you did not make a QSO this time, please feel relaxed since this kind of intermediate steps are always needed, and at best, they may lead to more activations.

DX is an everlasting joy, and with some missing countries, the joy will stay fresh. Always.

1147. ARRL DXCC Desk Funding KLA !

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-21 00:00:00 UTC
From: hellschrieber@my-dejanews.com
Message-ID: <7fjf80$17m$1@nnrp1.dejanews.com>
Source record: 25289
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.policy

In a stunning development, the Washington Post is set to report in a front page, above the fold story, that the ARRL DXCC desk is funding the Kosovo Liberation Army.

According to the Post, ARRL is one of several organizationsd in the US that has become so desperate for the lucritive ham funds of a developing newly independent country, it is seeking to install a pro Amateur puppet regime in any future PTT bureau.

According to an anonymous ARRL Executive Vice President

"this is something good for all hams and DXers and contesters especially. Martti Laine, OH2BH is readying a heavily armed, paramilitary DX jump team to set up a operation on the heels of NATO ground forces this summer."

State Department spokesman James Rubin noted

"we've seen this kind of behaviour before from the ARRL, particularly the recent Palestine operations. Key League insiders are attempting to establish a private initiative through which to funnel money from the DXCC program to their own coffers. The Justice Department is investigating, I understand."

Anyone know the QSL route for H40OO (that's zero oh oh)?
I can't find anything anywhere about him on the web.
I'm 98% sure I got the call right, though there was QSB.
I couldn't quite copy his QSL info; it was something like OK7Q??
I worked him on 20 m CW at 520 UTC on 4/22/99.
Any info greatly appreciated!

1149. Re: Newbie question: "QSL via" instructions for bureau?

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-21 00:00:00 UTC
From: ameredith@ozemail.com.au
Message-ID: <7fjvfdfam1@nnrp1.dejanews.com>
Source record: 25291

Hi All

QSL......frustration shortened to three letters! :-) Being new to QSLing, and DXing for that matter (about 12 months or so) I am still going through the QSL blues. ie: how what when where who etc. Being a VK I would have to say that our Bureau system works OK. (please dont inundate me with tales of woe...ignorance is bliss :-) BUT I also know that VK is one of the worst countries for getting a QSL from ....strikes me as an operator, not bureau problem! I made some quick calculations about the bureau system realising that I only send (currently anyway) around 400 or so cards a year. While these calculations are VK based I hope you get the idea.

Cost of Direct QSL's (50 to date) = A$156.25
Cost of 350 via Bureau = A$0.00 (part of WIA membership)

Now being pessimistic and saying I only get 25% of bureau and optimistic at 100% of direct cards back that equates to the following costs:

Direct $A156.25 for 50 cards = $3.25/card
Burea $0.00 for 87 cards = $0.00/card

Even getting really rude and saying that half my WIA subscription is soaked up by the QSL bureau activities (which its not!) you still come out at $0.43/card. Not a bad deal really in anyones books....comparatively speaking!!

I would still like to have back my unsent cards though and as the cards are sent via the bureau system then I cant see why they cant be sent back by the bureau sytsem. If the bureau in question cant find who they go to then surely they send "current" cards to other bureas so why cant the unsent be sent in the same batch. At least then I would know who I have to chase direct if I desparately want one. Unfortunately you cant do much about the ham who receives cards and files them unanswered in the bin!

My observation so far about successful QSLing is to ASK the station in question how to QSL etc. or email them if you forget or check the DX bullitens for help. Paitence & perseverance are the key (money helps to for all those directs!) but some people dont QSL and thats their right so QSL someone else if your desparate, don't give up in disgust.

Well that's it for my ramble. Only one final thing to say ....QSL or I'll brick you roof 'fella!!! :-)))))

Cheers....Allan VK2NNN

Expense, most likely.

Can't say for sure (not being involved in the operation of a bureau) but
I'll bet the proportion of undeliverable cards received by most bureaus
is quite high - I wouldn't be surprised at a number approaching or
exceeding 50%! I guess the question is whether one would be willing to
pay higher WIA (or over here, ARRL) dues to cover the cost of returning
those cards. And, for that matter, whether other bureau users would
want ot have their envelopes used to return their own cards.

I suspect the undeliverable card ratio in bureaus serving countries with
lots of transient operators (KH2, T32, VP9, etc.) is much *higher* than
50%. In such countries, the cost of returning QSLs would be by far the
largest expense of operating the bureau!

Probably the best thing to do.. if one don't accept bureau QSLs, *say
so*.

Right-that's why I left the part in where he said "It's not a contest where
you are competing for a score" (unless I missed a post-sorry). Personally,
while I have fun listening to contests and sometimes checking in, I have
never entered a score in one. Nothing against those who really get into
them, just not the way I enjoy ham radio. That's why I responded to Mike's
post-HAM RADIO IS A FUN HOBBY. I think too many people are way
too serious about competing when they should be having fun and encouraging
new hams. Friendly competition is fine, it just seems like some people
care more about winning than whether or not they are actually having fun.

You have already gotten some sound advice.

Just to clearly answer your question ---- There is no set calling frequencies for getting specific DX and little comes from trying to get a specific country (except for the obvious over ham-populated onces like Italy, Croatia, Slovenia, Spain, etc.). Just use the part of the band that you are licensed to use and for the mode you want to use. The rest is chance, educated chance and learning to hunt.

Thanks Erik, you have gotten my point exactly.

Of course, as David pointed out, the exception applies to awards as well as contests. But, I don't think the original poster was aiming at contests or awards. If he was, he would likely know about the detailed rules. I believe that he asked if it was ok to send a QSL card, and I hate to see newcomers or non-award chasers get caught up in the minutiae of those qualifications.

Bottom line.... I hope everybody has FUN!

Dr OM/YL

This mail to inform You that I resently have uploaded an updated
beacon list covering a 70 MHz world wide, a 50 MHz world wide in
six continantal splitted listings covering, Africa, Asia, Europe,
North America, Ocean/Pacific and South America.

These lists can either be viewed in html or downloaded as a ZIP
file in band pacages, the ZIPed version contains a bandplan aswell.

These can be found at http://www.qsl.net/oz6om/

I hope You find the listings of use ...

vy 73 de OZ6OM "Matt"

1164. BI5D (AS-???) Next Week!!!

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-23 00:00:00 UTC
From: by5qn@qsl.net
Message-ID: <7fp7ka$7tl$1@nnrp1.dejanews.com>
Source record: 25214

The BI5D IOTA-pedition team has been founded and will be active from Dongtou Island in the Zhejiang Province Group (AS-???) between 29 April and 3 May. The team consists of BA1AA, BA1AJ, BA1DU, BA1FB, BA1HAM, BA1KA, BA4AA, BA4RD, BA4RF, BA4RX, BA4TA, BA4TB, BG4AGM, BG4RUC, BD5HAG, BD5RV, BG5BAC, BD6AA, BD6QC, BA7IA, BA7JG, BA7JK, BD7IX, BD7JA, BD7NI, BD7NQ.

We will operate on all bands 70cm - 160m. On HF bands we plan to have six transceivers, three yagis and three amplifiers. Please look for us on or around 1.826, 3.530, 3.755, 7.025, 7.055, 10.115, 14.038, 14.260, 18.098, 18.128, 21.038, 21.260, 24.918, 24.945, 28.038, 28.465, 29.280 (FM only) and on or around 7.040, 10.140, 14.080, 21.080 and 28.080 for RTTY. We will pay special attention to NA on following bands, modes and time: 0000Z-0400Z 15m, 17m and 20m on CW; 1100Z-1500Z 40m on SSB/CW; 1100Z-1300Z 75m on CW; 2200Z-0000Z 15m, 20m and 40m on SSB/CW. and will specially work EU during 0700Z-1800Z on several usable bands and modes.

On VHF and UHF, we will use 4ELE HB9CV antenna on 6 meters, 13ELE yagi on 2 meters and 70 centimeters bands. The frequency will be 50.115 (SSB/CW), 144.10 (SSB/CW) and 432.20 (SSB/CW). We will specially look for JA, HL and BV stations on 2 meters and 70 centimeters.

1166. New Fuzzy Digital Modes

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-24 00:00:00 UTC
From: Fred <as149@detroit1.freenet2.org3>
Message-ID: <7frvpp$3cr$1@newsource.ihug.co.nz>
Source record: 25216
Cross-posted to: aus.radio.amateur.digital,nl.radio.amateur,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.homebrew,uk.radio.amateur

Hi - did you know that there are digital modes that are intended to be human readable? Well of course, CW is, but there are also visual human readable modes.

One of these, Hellschreiber, and in particular Feld-Hell, is fast gaining popularity among the digitally enlightened hams, because it offers -
- performance hard to beat in any mode except CW
- slick operation, like RTTY or CW
- it's easy to use, the software is free, and is great fun
- it's uncannily like CW, but not such hard work!

All you need is a PC with a sound card and Win 95. If you run PSK31, then you can operate Hellschreiber!

To find out all about this exciting new mode (invented as recently as 1927), and to download all the software you need, visit the all new FUZZY MODES WEB SITE, at:

http://www.qsl.net/zl1bpu/

SEE you in Hell!

73,

Murray ZL1BPU

An email discussion list has been started for all Panama Vets. This list is for anyone military or civilian, who has ever been a part of the US Forces stationed in the Republic of Panama. Discussions regarding military experiences, family issues, local culture and everything related to the Panama experience are welcome.

Additionally, anyone involved in the Dec 1989 invasion of the Republic of Panama, otherwise known as Operation Just Cause are particularly invited to participate here too.

This list will try to serve as a connecting link for all who desire to remember their Panama experience and share it with others.

To subscribe, simply go to the following URL:

http://www.onelist.com/subscribe/PanamaVets

Take care,

Robert L. Williams
Former member 6933 Electronic Security Squadron
Howard AFB, Republic of Panama - Nov 87 thru Aug 90

True, but it is neat, and it is also faster than most CW ops can copy.
I also like the fact that it is "fuzzy". There's enough redundancy in each
character that a noise hit usually doesn't corrupt it so bad you can't
figure out what it was. It isn't the equal of PSK31 most of the time,
but when auroral flutter phase scatters PSK31, you can still make
out many of the dot matrix characters of S/MT-Hell (IMHO S/MT-Hell
works better than Feld-Hell). You can also copy *several* Hell QSOs
at the same time (provided they're fairly close in frequency to each
other). None of the other digital methods let you do that. That's one
of the advantages CW ops have had to themselves up until now.

I like Gram42 so much that I leave a copy of it running nearly all
the time. Being able to *see* what's going on in the passband is
really useful. I keep it up on a second computer so I can also
be running a different sound card program on the main machine,
usually PSK31. I think I could run two sound cards in the same
machine, but I haven't quite figured out how to do that under
Windoze yet. (Windoze isn't my operating system of choice,
but Linux versions of some of these neat programs aren't yet
available as far as I know.)

1173. To my ham friends

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-25 00:00:00 UTC
From: YU7XX <watchman@tig.com.au>
Message-ID: <37226656.33188BF8@tig.com.au>
Source record: 25223

Dear friends,

my name is Nick Hacko, YU7XX and VK2ICV / VK9LX.

Five weeks ago, US and NATO started aggression on my
home country, Yugoslavia. Since today, I was trying to force
myself that this is not my business at all.
But this morning I've received an e-mail form my brother,
Branislav Hacko (Mr.sci.med., YZ7DX) telling me that
his 6 years old boy is wearing his snorkeling mask
"... because he believe if they bomb petrochemical plant
nearby he would be protected!"

Five weeks ago, this would be just sarcastic joke.
Today, it's their reality. Hanibal ante portas.
Barbarians are at our gates. They are using their largest
and smartest bombs to destroy our schools and hospitals, our
museums and ancient monasteries, our heating plants
and food factories, our bridges and dams.
"In the name of democracy and humanity ", of course.

As a Yugoslav and Australian, I deeply sympathize with ALL innocent
people who suffer and this is my modest contribution to peace and
spreading of the truth about Yugoslavia's innocence,
in the moment when the world's biggest powers have born
down on it. I owe this to my family, friends,
my 2 yr. old son and myself.

You can laugh on this letter or you can go and have a good look in the
mirror and ask your self 'what am I doing to stop this war?'

It's up to YOU.

Nick Hacko

Nick,

The Albanians that are being murdered by the Yugoslav government are also innocent. "Ethnic cleansing" is a politically-correct term for genocide!

NATO is trying to protect the right (to live) of the Albanians, nothing more. I think that if the situation was reversed, NATO would help the Yugoslav people also.

Of course it is unfortunate that civilians are also killed in wars like this.

73,
Hamish VK3TYD

Nick,

I have seen the ugliness of war in Vietnam. But we all know
about World War 1 and World War 2. So we must ask ourselves if we had
been capable of this before, could those two wars have been prevented?
Especially we are aware of the destruction of millions of innocent
persons during WW2...do we dare let this happen again? This war
certainly could not be about the wonderful Yugoslav people, but it is
about the killings and the 'ethnic killings' being brought on by the
Yugoslav government leadership. The world can not sit by and let this
happen again.

SB DX @ WW $OPDX.406
Ohio/Penn DX Bulletin No. 406

The Ohio/Penn DX PacketCluster
DX Bulletin No. 406
BID: $OPDX.406
April 26, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1XN & The Golist, N2OO, N4GN, W4AU, N9JR, CT1AXS, DJ5AV & DX News Letter, DL2RUM, DL6MHW, EA5GMI, F5NOD, F6AJA & LNDX, G4BUE & DX News Sheet, I2WIJ, I4UFH, IK1QBT, JA8VE, JM1LJS, OH2BH, ON4ASW, UA0SJ, 9K2HN and ARRL DXCC for the following DX information.

THE HOT DX TOPIC OF THE WEEK! P5, NORTH KOREA. Well known DXer Martti Laine, OH2BH, has once again surprised the DX Community. Martti was able to be active as P51BH for a very short time on April 21th, for about 2 hours. During Martti's short operation, he was able to make 263 QSOs. The operating was done from a telecom center. Were some North Koreans climbed a 150 ft. tower to hoist the antennas. Martti states that "the antennas were left right there together with the Yaesu FT-847 equipment. It is just a matter of switching the power on - when the time is ripe - to allow North Korea to join the ranks of amateur radio." In short (from Martti's press release), "the operating was done between 1436-1640 Korean Time. First JA QSO was JA2DO, Europe OH5MBF, Oceania KH6WU and the United States W6WKE. The operation covered 14 MHz CW and SSB plus 21 MHz SSB. The documentation will be sent to the ARRL shortly, and QSL cards will be released from the OH2BH Finland address as soon as possible." Martti has currently left North Korea on Thurday and is back in Beijing, China. The complete press release by Martti, along with a special DXCC Press Release, will be sent out to all OPDX InterNet Subscribers as an additional bulletin. ADDED NOTE: Audio from this operation may be heard on 9K2HN's home page. The URL is: http://www.qsl.net/9k2hn

SPECIAL NOTE FROM EDITOR. Last week we had an unfortunate thing happen to OPDX.405 which was completely out of our hands and responsibility. Some (not all) OPDX InterNet Subscribers received multiple bulletins, but the hardest hit seem to be the NJDXA's DX Reflector with each subscriber receiving about 19 bulletins. Let me asure you that OPDX only sent out

one bulletin (check the headers -- dates/times/Message ID were all the same). Even BARF-80 BBS's (system where the bulletin is sent) mail log shows one copy left the system. After I learned what happened on Monday (and receiving many complaints), I sent an announcement that I would look into what happened and explain the problem did not come from this end. During some investigating, it was explained to me by local ISPs that the following "may" have happened: "It has become known a major backbone for SMTP mail, a hub for hundreds ISP's processing over 30,000 E-mail messages per minute, had its hub in Chicago go flakey starting Sunday in the early afternoon..... Knowing how SMTP mail is delivered, it may be that the Chicago hub had failed to acknowledge received E-mail and ISPs were retransmitting over and over again waiting for an acknowledgment."
I want to thank the many who were very sympathetic to the situation.

3C, EQUATORIAL GUINEA (New IOTA!). The "DX News Sheet" reports that Jean, TR8XX, is planning to be active May 22nd from Corisco Island (in the Rio Muni Province Group). His length of stay is not known, but more details are to follow.

3D2, FIJI. Look for Mat/JA1JQY, Sasi/JA1KJW, Kaoru/JA3MCA/1 and Kuni/JA8VE/1, of the Yamato ARC (JA1ZEK), to be active as 3D2SH, 3D2HI, 3D2TK and 3D2KZ, April 30th through May 1st. Suggested frequencies are:
CW - 1827, 3507, 7007, 1007, 14007, 18077, 21007, 24897, 28007 and 50107 kHz
SSB - 3798, 7080, 14197, 21270, 24937, 28470 and 50107 kHz.
Please QSL via their home callsigns. The group plans to move on to Tuvalu after this operation (See T2).

9K, KUWAIT. Mohammed Al-Holi, 9K2DR, KARS Manager, announced that the DX group of Kuwait Amateur Radio Society have currently organized a trip to the Kuwait Island of Faylaka (IOTA AS-118) for the third time. This operation should have started by the time you read this and will last until April 30th. Activity will be on all bands using the callsign 9K2F. QSL via 9K2RA. The direct address is: Kuwait Amateur Radio Society, P.O. Box 5240, 13053, Safat, Kuwait.

BI5, DONGTOU ISLAND (New IOTA). Just a quick reminder. The BI5D IOTA DXpedition team will be active next week from Dongtou Island in the Zhejiang Province Group, April 29th through May 3rd. Please refer to OPDX.403.

FO, MARQUESAE AND AUSTRALES ISLANDS. The "LNDX" reports that Alain, F2HE, will be FO/F2HE from Marquesas starting June 4th. In July, he will return to Tahiti with stop overs in Tuamotu Archipelago (OC-066) and Raiatea (OC-067). In August, he will be in the Australes on the Island of Tubuai (OC-152). He will go back to France in early September.

FT5W, CROZET ISLANDS (Bad news!). Gil, F5NOD, reports that as of April 17th, Gilles's (FT5WH) Transceiver went QRT! While he was transmitting, he saw a "flash" inside and can't transmit at all. He is looking for a solution and is absolutly disappointed. Gil will keep the DX community updated.

HK, COLOMBIA. Gerard, F2JD (now ex-HK3/G0SHN), has received his new callsign HK3JBR. He has been active this past week on 80 meters around 3794 kHz after 0400z. Gerard will be here for 2 years. See OPDX.400 for more details.

IOTA NEWS.....
NEW IOTA. The "LNDX" reports that Christian/6W1QV, Jean/TR8XX, Alain/ TR8CA will be active as 3C8XX from Corisco Island from May 22-30th. They will have two complete stations, one on CW and one on SSB. QSL via TR8XX.

AS-049. Takeshi, JI3DST/6(7N3UXO/6), will be active from Tokara Archipelago, April 28th through May 4th. Activity will be on 17/15/12/10 meters SSB. QSL via JI3DST, Takeshi Funaki, 2-18-26 Hannan-Cho Abeno-Ku, Osaka-City Osaka 545-0021 Japan

AS-067. Syouzi, JA4PXE/6, will be active from Kusagaki Island from April 29-30th. Activity will be on 40-10 meters SSB. QSL via JA4PXE, Syouzi Kuwabara, 1-75 Midori-Cho Tokuyama-City Yamaguchi, 745-0075 Japan.

EU-038. Marcel, ON4ASW, reports that the club station ON4NOK (UBA section NOK) will be active from the Island of Texel, in the Netherlands, during the IOTA contest July (23), 24 and 25th. Their callsign will be PA6TEX. Activity will be on CW/SSB. Also, look for them to be on the WARC bands. QSL via ON4ALW.

EU-074. F5JOT, F5TBF, F5LGQ will be /P from Brehat Island from May 8-16th. They will be active on 80-10 meters CW/SSB.

EU-074/EU-105/EU-157.
F5SNY and F5PFT will be /p from Batz Island (EU-105) from May 3-5th, Brehat Island (EU-074) from May 7-9th and Cezembre (EU-157) from May 10-13th.

NA-136. Tony/WF1N and Lou/W1DIG (ex-KA1DIG) will be on Pot Island in the Thimble Island Group, May 21-23rd. Their operation will start around 1500z Friday and end about 1800z Sunday. Operations will be with a tribander and amp, on/near the usual IOTA frequencies, SSB. QSL to home calls direct (SASE Please) or Bureau. Tony can be contacted at: megahertz@webconn.net

L2, ARGENTINA. LU1FI is another station that will be active as L21FI during the celebration of the 75th aniversary of the contact between Carlos Braggio (r-CB8) and Ivan O'Meara (z-2AC) in 1924. QSL L21FI via LU1FI by the bureau or direct to: Montevideo 441 P.5, Zip 2000, Rosario (Santa Fe), Republica Argentina. For more details or questions, send an E-mail to: lu1fi@hotmail.com
Also, look for "Luc", LU7EC, wto be active as L27EC. QSL via LU7EC, Lucas Mariano Elichagaray, C.P. 2703, Carabelas Bs As, ARGENTINA (with a S.A.S.E.) or bureau.

NEW WEB SITE AND NEW SERVICE. John, K1XN, reports that "The Golist" has a new Web Site and some new features on the Web. The Web site is at: http://www.itis.net/golist/
The site now has NEW features for Guests and Registered Users, such as "Online Look ups from the Golist database". This database will be updated periodically during the month. OPDX InterNet Subscribers will receive the complete details and press release by John as an additional bulletin.

QSL INFO AND NEWS......
Fabio, I4UFH, reports that all QSLs for the 5H1FS (1997) and SV9/I4UFH (1998) have been processed (direct and bureau). So, there are no more backlogs of QSLs, and if anyone doesn't receive their direct QSL in 2 weeks, please send it again.

T9 BUREAU. Joe, N9JR, reports that the Bosnia-Herzegovina QSL bureau is now fully functional. With the T9 QSL bureau working, Joe will no longer be serving as T94B's QSL Manager effective April 1, 1999, and all QSL requests should be made to him via the T9 bureau.

Tony, IK1QBT, reports that the following logs for his activities are now available on-line at: http//www.freeweb.org/freeweb/ik1qbt
3A/IK1QBT 1993/1996/1997/1998
TK/IK1QBT 1994
4U0ITU May 13/14th and 20/21st (1995, only CW)
IP1/IK1QBT IA1/IK1QBT from IOTA EU-083 -- 1996/1997/1998
ID9/IK1QBT from IOTA EU-017 -- 1997

CQ2S was a special event station that was active this past weekend to commemorate the 25th anniversary of the "Revolution in Portugal". SSB activity was by CT1AXS and CW/RTTY by CT1FMX. QSLs go to CT1AXS for SSB QSOs and CT1FMX for CW/RTTY QSOs.

Yuri, UA0SJ, reports that, because of problems with the mail to please send mail only direct using "acknowledgement guarantee". Send request with SASE and coupon IRC or dollars to: Yuri A. Maltsev, P.O. Box 2304, Bratsk-City, 665700, Russia. Yuri's E-mail: ua0sj@windoms.sitek.net

SPECIAL EVENT. Commemorating the 500 anniversary of the University of Valencia, a special callsign has been issued which will be on the air April 30th through May 2nd. The callsign will be EG5UV, and a special QSL card will be available for all contacts. There will be two operators: EA5DFV and EA5GMI. Please look for them on all bands including the WARC bands. QSL via EA5GMI, preferably via the bureau.

SPECIAL EVENTS (French)......
Look for TM0AR to be active during "The Festival of Art and Technologies" from May 9-16th. QSL via F5TJC.

Look for TM0AC to be active during the 50 years anniversary of the National School of Civil Aviation (ENAC). The special callsign TM0AC will be on the air from May 15-19th. QSL F6ITD via bureau.

SV9, CRETE. Bob, I2WIJ, will operate as SV9/I2WIJ during his summer vacations, July 12-26th. He will also participate in the IOTA Contest as a Single Op (24H CW) DXpedition Mode entry. During his first week there, he will be mainly on vacation. During the second week he will be more active on the radio. He will be using a Cushcraft R7 and ICOM IC706 MkII. Look for him on the usual IOTA frequencies and the WARC Bands. For more news and updates, also on-line logs after his operation, check out Bob's Web page at: http://www.qsl.net/i2wij/

T2, TUVALU. After their 3D2 operation (See 3D2 above), look for Mat/JA1JQY, Sasi/JA1KJW, Kaoru/JA3MCA/1 and Kuni/JA8VE/1, of the Yamato ARC (JA1ZEK), to be active from Funafuti Atol May 2-9th. They will sign T22JY, T22KJ, T22TK and T22VE. Suggested frequencies are:
CW - 1827, 3507, 7007, 1007, 14007, 18077, 21007, 24897,
28007 and 50107 kHz
SSB - 3798, 7080, 14197, 21270, 24937, 28470 and 50107 kHz.
Please QSL via their home callsigns.

T30 & T33, WEST KIRIBATI AND BANABA ISLANDS. A German team from the Berlin DX Group will go in October-November (1999) to T30 and T33 for three weeks. The team consists of 11 members, 8 which are ham operators. The operators are: Tom/DJ6TF, Wolf/DL2NWK, Tom/DL2RUM, Tom/DL7BO, Sigi/DL7DF, Frank/DL7UFR, Rudi/DL7VFR and Marianne/DD6UYL (YL operator). The rest of the team consists of two XYL's and one YL (Norma, Christiane, Sabine). All of the operators have DXpeditions experience since 1990. They expect to arrive on the Island of West Kiribati on the morning of October 19th. Their licence is in order, but their callsigns are still not assigned. They will try to use two callsigns, one for SSB and one for CW/RTTY. They will have four complete stations with PAs with them (actually they will have six TRCVRs with them). They may run three stations around the clock and all stations simultanusly. The team has three beams antennas (a 5 element Tribander, a 3 element Tribander and a 3 element for WARC. They hope to get a second WARC beam). They will also have two fullsize 1/4 verticals for 80m. It is planned to erect both antennas, and phase it for better gain. These antennas are also used for 160m. For 40m and 30m, they will also use verticals. They hope to find enough space on the islands to erect all antennas. They plan to be active on CW/SSB and also on RTTY. After about a week of operation, four of them will go to Banaba, with half of the equipment. The ship for their 2.5 days of sailing is already booked. They have everything they need (Water, food, fuel, generators, beer, ...). It is planned to be on the island from October 28th through November 2nd. In Banaba, there is a guest house all ordered, but they will need special permission to visit the island. They will run with two complete stations with PAs and a third Low-Power staion for "local" QSOs with JA and NA. They will depart from Kiribati the morning of November 11th. For more details and update-to-date info, check out the Web site at: http://www.qsl.net/DL2RUM

T8, BELAU. The "DX News Sheet" reports that Hiro/JH3FJG and Kenji/JI3DLI will be active July 20-25th, as T88JR and T88DX. Activity will be CW/SSB/FM on 80-6 meters. QSL via their home callsign.
Just a quick reminder and update to look for Misao/JJ1DWB, Hide/JM1LJS

and Hiro/7N1KAE to be active as T88MT, T88LJ and T88YH April 27th - May 6th (Refer to OPDX.403). Hide, JM1LJS, informs OPDX that he will be on 3795 kHz (April 27-May 1st) everyday between 2000-2100z.

XU, CAMBIDIA. Jani, YB0US, will be active from here as XU7AAP, April 22-26th. Activity will be on 80-6 meters (look for him on the high end of the band). QSL via N2OO, Bob Schenck, P.O. Box 345, Tuckerton, N.J. 08087 USA.

YK, SYRIA. Michael, DL6MHW, informs OPDX that he plans to operate as YK/DL6MHW some time this week. He will be attending a conference on April 28th, but wants to operate at least 6 days on the air. He wants to demonstrate PSK31 and Pactor to Syrian amateurs. He will become active with the help of YK1AO, Dr. Omar Shabsigh, who is the president of the Technical Institute of Radio, the Syrian amateur radio society. According to information by Omar, Michael will use the call YK/DL6MHW for his visit. He will be operating SSB and CW all bands, depending on available antennas. Michael states, "The main goal is to support as many as possible stations with an new one (YK is somewhere on the Top 30 in the World and North America). For that I will focus to one main band, if pile-ups are booming." Check out his Web page for details/updates at:
http://wwwiti.cs.uni-magdeburg.de/~hoeding/hamradio/yk_main.html

ZK1, NORTH AND SOUTH COOK ISLANDS. Look for the Wolf/DL2SCQ and his wife Ann/DL1SCQ to activate a few IOTAs from these two islands during the month of August. Their callsigns will be ZK1SCQ and ZK1SCR and their planned schedules are as follows:
August 4-8th - Rarotonga Island (OC-013), S.C.I.
August 10-12th - An island in the Aitutaki group (OC-083), S.C.I.
August 14-17th - Mangaia Island (OC-159), S.C.I.
August 20-25th - Manihiki Atoll (OC-014), N.C.I.
August 28-31st - Palmerston Atoll (OC-124), S.C.I.
Bands/Modes activity were not mentioned. QSL via DL6DK, Peter Voilts, Uhlandstr 28, D-59192 Bergkamen, Germany.

Medication might do you some good if you can find the right pill to
grow balls.

I know, don't tell me. You never read the contest schedule in the
Newington News, and you and your one friend in the world were on
your private schedule frequency on 20 meters and CQWW snuck up
on you and although you protested and screamed, nobody even
noticed you were there.... And now here you are screaming on
UseNet and still as Anony-Mouse here as you are on HF. Must be
tuff going thru life being just a little scratchy noise in the
background.

Never mind the antenna, spend the 25K on therapy. First question you
should ask is "Why do I have the urge to preach to the masses and
these strong opinons yet I don't have the balls to sign my name to
them ?". Did the other kids in school slap you every time you said
something and you have this ingrained fear of being slapped or what ?

I was just wondering why they still keep the Morse code testing requirements if the military doesn't use it anymore and telegraphs are not that common. I think because they stopped it for the marines, there's no point in using it in ham radio either. And if you want to say it is for security, you are not allowed to use codes when intended to obscure meaning.

1999 YHOTY AWARD - NOMINATIONS CLOSE MAY 30

The nominating period is open only until May 30 for the 1999 Newsline Young Ham of the Year Award. With corporate sponsorship from Yaesu USA and CQ Magazine, the Young Ham of the Year Award seeks to honor the Amateur Radio related achievements of those hams age 18 or younger.

In addition to a trip to the 1999 Huntsville Hamfest courtesy of Yaesu, this years winner will also get to spend a week in Spacecamp Huntsville thanks to CQ.

The full details, rules and a nominating form are available right now on our website at www.arnewsline.org. Or send a self addressed stamped envelope to the 1999 Newsline Young Ham of the Year Award, 28197 Robin Avenue, Santa Clarita California 91350.

Yessir, good old Bill and his Prozac top heavy view of ham radio. Whenever someone posts a negative statement or gripe on his self promoting contesting.com, he attaches a little "you did a no-no" shame message and publicly rebukes the poor guy.

You know those big mouth contesting hams who tout what great ops they are, right ?

If they're such great ops, why do they need absurd towers and the rest of us do it with wires ?

If they're such "Gentlemen", why not refrain from pig piling everytime they hear a G or DL on 160 CW ?

Answer: they are actually the truest form of LIDS.

Hi Jim,

I bet you and your buddies big time ops all drive Jeep Cherokee. This is clear case of maleï¿½s ï¿½small penisï¿½ complex. To prove for yourself that you are OK, you need ten element beams. Oh, those snobbish Americans. They are ready to give lessons to everybody around on somebody else expense.

Do not send me in McDonaldï¿½s though, I already have job and beam.

73, Andrey VE4QQ.

No, they would shoot themselves if they tried wires. Their poor brute force
operating is compensated for by their arrays. Funny, they still can't buy a
LIFE though, which they sorely need.

Besides Jim, you drive a Good Humor truck for quick access for you and your
(taste) buds.

I could spend 25 grand on an antenna array, but then I'd need to add on
expensive therapy and medication like you and Bill. Besides, I let you
jackasses spend the dough, I get half the benefits for free. Morons.

That's not to say a beam or two is bad.

Talk about needing a life, though- why win a radio contest every time, at will ? There's fun and variety. Contesters are the people who damn near flunked out of gym, so they found a niche where they can get trophies as adults.

And I'd love to be the boss or coworker of one on Monday morning. Can you say zero productivity ?

Contesters have manners to match; they are actually poor operators who need to rely on brute force and the toy duck shoot known as a contest.

NIMA's GEOnet Names Server at http://164.214.2.59/gns/html/index.html
may know Latitude/Longitude, and with
http://www.amsat.org/amsat/toys/gridconv.html
or http://www.aber.ac.uk/cgi-bin/user/auj/locate.pl
the locator can be found.

It might be better to check with a topographic map of the area.

I'm going to regret wading into this mess but...

Did a quick count last night. I have in my possession over 200 PSE QSL cards from German stations worked during contests since 1995. That's over 200 people who got a wanted QSL only because of a contest. And that's only in one country - if you count Japan, the rest of Europe, and North America, I'm sure the figure comes pretty close to 1,000.

An obvious troll! However, I agree. The big reason is, it is the law.
Another reason is, it is not against the law [like spark!!]
How many spark stations would be polluting the airwaves if the regs
allowed THAT mode. I have read at least one ham article bemoaning the
absence of that "raspy" sound of ham radio's early days. Brrr, I can
just
hear it, "spark forever!!!". ;->
CW isn't "just another mode".

Morse Code has its uses and should be encouraged, but not worry too much about those who don't know the code. I think the opportunity to pump signals out on a narrow band to distant parts of the world has its own charms.

The US Marines still use Morse code, and a few of us keep our keys handy just in case.

Howdy Dan....In all the hoopola about whether anyone should or can't use morse anymore.....a few points never seem to be brought out...or are only mentioned briefly.

Morse - Is a mode that allows communications to be copied verbatim easily (you can come close on voice or often do it if words are standardized but its not easy)......
- Is a mode that is indeed digital but which requires the most rudimentary interfacing and for which our own "processor" causes error correcting and speed compensating depending on the ability of the other "terminal" or "line" conditions.
- Is a mode which transcends language and dialect barriers when suitable signals are used...such as the international "Q" signals...and others. Hard to get most computer systems to do that yet and our ability to merely speak one language (english for example) with a wide variation of accents is hard enough sometimes.
- Is a mode whose "standardization" is unheard of in communications, where for at least a hundred years was not obsolete for the purpose of basic communications (stuff that's GOOD for critical use...such as lifesaving...and cheap commerce).
- Is a mode which, when the equipment is tired....just needs a good dinner and a cup o coffee to revive it.....stuff we have around anyway !
- When send using CW transmission (the 2 are NOT the same!) is extremely effective, using suitable narrow filters at both ends, for solid communications under the worst circuit noise and conditions. It might not be the very best...but when you consider the rudimentary equipment needed it becomes mighty attractive.
- Is a mode which, because it only requires very basic equipment, lends itself well to "field repairability".....a handy thing if you've ever sat in a remote spot and listened to digital signals that couldn't connect to you...telling yourself...."if they'd only just turn 'em on and off...I could get the message! After all...what is slower....a slow sent message or one that never arrives????

There's likely lots of other good and bad reasons why anyone should keep morse alive. Yep its old.....but well made and the fact that it hasn't undergone a million transformations tells us all that it works well. It is slow, but when mere text will suffice, is an adequate method of communication in conjuction with simple equipment. It does require skill to use...but everything we do also does (Tell me that a windows NT system hung up on a satellite link doesn't require skill to figure out what happened!). There is also a thing about operating morse that only

morse operators may truely feel...but its a kindred spirit that transcends whether you were a mere ham or a skilled commercial operator, a struggling boy scout trying it or a pilot who was able to make himself understood when his mic stopped working. To that last end I can only offer that to those who WON'T use it...it will always be a thing despised....to those who do or have, a thing revered.

1219. FS: Tranquil Ham QTH in Central NJ

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-27 00:00:00 UTC
From: "Joe Giacobello, K2XX" <k2xx@concentric.net>
Message-ID: <3726B1E5.98120011@concentric.net>
Source record: 25069

K2XX and K2XXX are selling their QTH in central (Green Brook) NJ and moving to the wilds of western Virginia. The QTH is located in the first ridge of the Watchung Hills, overlooking the Raritan Valley, with a line-of-sight view into Manhattan (25 miles away as the crow flies), Long Island and thence Europe and Africa. The view to the west isn't bad either, but the Rockies get in the way. Green Brook borders Plainfield, Watchung, Warren, Middlesex, Dunellen and North Plainfield, NJ.

The QTH includes a 72 ft. motorized Triex crank-up, tilt-over tower with a six band quad on top: four elements on 10, 12, 15, 17 and 20 and seven elements on six meters, all on a 24 ft. boom. There is also a Wilson TT-45 forty-five foot crank-up (manual), tilt-over tower with a 13 element two meter Yagi, a 24 element 432 MHZ Yagi and a Diamond vertical collinear for two meters. Attached to the chimney are circularly polarized Yagis for Oscar (144/435 MHZ) with azimuthal and elevation rotors. Finally, there is a 102 ft. long center fed Zepp that I use for 30, 40 and 80 meters. This whole package comes along with trained neighbors. I know it's hard to believe, but they actually help me put up and maintain my antennas. I have consistently run 1.5 KW at this QTH for more than 19 years with practically no RFI. What little there has been over all those years, has been easily and amicably resolved. My relationship with my neighbors is excellent.

As if all of the foregoing were not enough, there is also a comfortable, cozy home, a wonderful neighborhood, convenience to shopping and transportation, excellent schools and immediately adjoining neighborhoods where the home values range between $500,000 and $1,000,000.

The house was originally built in the late 30's but has been renovated several times. We made a major renovation in 1987 and followed up with a new kitchen about five years ago. There are three bedrooms, one of which we use as a shack. The accompanying walk-in closet is used as a workshop. All of the bedrooms have walk-in closets. There is a modern kitchen, an office, a living room with stone fireplace, a sun/dining room, a screened front porch, a large front patio, and a large rear deck. There is an oversized, detached, two car garage with a large workbench and additional storage. While the official lot size seems small (75X100'), its effective size is much larger because the adjacent streets do not use up all of their allowed right-of-way. The lot and its surroundings are shielded by an abundance of mature deciduous trees. The property tax is about
$3400 annually.

Rail transportation to Manhattan is five minutes (three miles) away at Dunellen. The trip to Penn Station is about 55 minutes. Route 22 is only two minutes away and I-78 (Exits 36 or 40) is about eight minutes away. I-287 is only 10 minutes away.

High school students from Green Brook Township attend Watchung Hills Regional High School, a highly considered public institution noted for its academic and athletic excellence.

If you have any interest in owning this QTH, please contact Joe at 908-756-3825 or via e-mail. If there is no interest from hamdom by June 1, we intend to offer it, though somewhat sadly, to the general public at that time. The price is firm at $255,000.

73, Joe
K2XX

Funny, Chapter 8 of "The FCC Rule Book" lists all the modes
available to the Amateur Radio Service and none of those modes
is Morse. I see CW, MCW, Phone, Image, RTTY, Data, Pulse, SS,
and Test, but no Morse.

I believe the International telecommunications Union, the international treaty that authorizes the Amateur Radio SERVICE, requires Morse Code for amateur licenses.

We have been playing with the definitions of how much morse has to be known, copied, skill level, etc. but I believe international law still requires it.

ALL the below are VERY CORRECT and TRUE, BUT,
is that ANY reason to use it on a TEST for getting your ticket
keep the subbands..if you want, EXPAND them if you like
IF we use this MODE to test people should we not have a test to see if you
can talk correctly for phone, type correctly for packet,
and expand that by building your own computer for digital modes.
THAT'S ALL I AM AGAINST IS FOR A TEST
keep the mode if it makes you happy but don't use it for TESTING.

I too have QSL cards from both stations for several bands each. No problems with either, although OD5NJ's manager sometimes is a little slow - probably waiting for logs. If you don't want e-mail, don't send out inaccurate information solely based on your own experience.

Morse is not a mode,but a language that is the common one used on the
mode continuous wave.Tracy

Here, here!

I've been trying to explain to wife/family/friends for over 30 years,
and haven't ever come up with a "reason" for using CW that satisfies
those that don't have the experience. To those who have conquered
their demons, learned to communicate via CW, and discovered the reward
of it, no explanation is necessary.

If the code requirement is dropped (as it may well be), the incentives
that lead one past the hurdles of learning the code, to the most
rewarding experiences offered by CW, will be removed, and perhaps the
ranks of CW ops will diminish. Some will be happy if this should be
the case.

I think it's interesting to observe, that since the proliferation of
digital modes in the last ten years or so, CW activity on the ham
bands seems to have grown, not diminished, both here in the States and
internationally. Considering that many countries don't have a code
requirement anymore, I wonder why that would be, if it truly is a dead
mode?

Saying CW is dead is kind of like saying pianos are useless because
PCs with sound cards can make more sounds, and never need tuning.
Those who play or listen to fine pianos can instantly perceive the
difference, and those whose minds are made up won't be listening for
pianos in the first place.

When I got started 33 years ago, I struggled for a year to get my code
speed to 13 WPM so I could get my "general" ticket and move on to fone
and rtty operation. But 99% of my operation since then has been CW.
Go figure, huh?

73,
monty N5FC

1230. YU QSL returned

Newsgroup: rec.radio.amateur.dx
Date: 1999-04-28 00:00:00 UTC
From: Doug Smith <w9wi@bellsouth.net>
Message-ID: <3726E1B4.AC5F22DA@bellsouth.net>
Source record: 25074

For what it's worth..

My HU4A QSL via YT1AD was returned today by the US Postal Service,
marked "Service Temporarily Suspended. Return to sender.". The
notation appears to have been applied by the US postal authorities (not
the Yugoslavs) so this may not apply to other countries.

I note with some interest that YT1AD's last name is Milosevic! - might
he be in some way related to the country's president?

Here we go again, please take this off of
rec.radio.amateur.equipment and rec.radio.swap & take it
back to policy where it belongs. I could care less if you
want to learn the code or not. Don't learn it & miss some of
the best dx, learn it & work it but don't clutter up groups
where it doesn't belong.

Yeah, but. . .what other communications methods are achieved via CW? You are correct, strictly speaking, CW * Morse code. The misnomer is as old as the vacuum tube, though the FCC can be forgiven a bit of idiom and tradition, can't it?

Howdy Cecil.....Interesting point - often confused.....CW, MCW etc are modes of operation for a signal source.....morse is a mode (method) of communicating information, like voice etc. I know you know the difference of course....what I see is when green hams (we were all one eh!) start to confuse all this not understanding that you can send morse over an FM circuit by keying a tone or by calling that CW. Then they're scratching their heads the first time we show 'em a signal generator heheh.
I think we all ought to make our "tech" talk a little more accurate by times...maybe.

I also received a 7X2LS card direct.

7X4AN is VERY active and is a good and reasonably fast QSLer. He uses a maildrop address in Barcelona, Spain though the card comes from Algeria. Lebanon is also fairly active and most stations there also seem to be pretty good about QSLing.

> Morse - Is a mode that allows communications to be copied verbatim
> easily (you can come close on voice or often do it if words are
> standardized but its not easy)......

It is much easier to copy something from English to English, It is much harder to copy something from a code back to English and thus more chance for error.

> - Is a mode that is indeed digital but which requires the
> most rudimentary interfacing and for which our own "processor" causes
> error correcting and speed compensating depending on the ability of the
> other "terminal" or "line" conditions.

Speech is compatible to 99% of the population's "processor", morse code only to a much smaller percent.

> - Is a mode which transcends language and dialect barriers
> when suitable signals are used...

What?! Neither my English or other foreign language speaking friends can understand morse code. This is a ridiculous statement.

> and our ability to merely speak one language (english for example) with
> a wide variation of accents is hard enough sometimes.

Yes, accents are hard enough, why make it MORE difficult?! If people can't understand a store check-out clerk in some weird accent, how many customers are going to understand him if he emits beeping noises from his mouth?

> - Is a mode whose "standardization" is unheard of in
> communications, where for at least a hundred years was not obsolete for
> the purpose of basic communications (stuff that's GOOD for critical
> use...such as lifesaving...and cheap commerce).

Yeah, that's why Police, Fire and Ambulance don't use it.

> is extremely effective, using suitable narrow filters at both ends, for
> solid communications under the worst circuit noise and conditions.
Completely worthless if the person on the other end doesn't understand code! (which is about 99% of the population)

> - Is a mode which, because it only requires very basic
> equipment, lends itself well to "field repairability"

A washboard is easier to repair than a washing machine too, but not a good reason to mandate people learning to use it before they are allowed to buy a washing machine.

.....a handy thing
> if you've ever sat in a remote spot and listened to digital signals that
> couldn't connect to you...telling yourself...."if they'd only just turn
> 'em on and off...I could get the message! After all...what is
> slower....a slow sent message or one that never arrives????

If no one on the other end understands code, it will never arrive.

Why don't advertisers make all their commercials on radio and TV in morse code so the message could reach more of an audience in bad conditions? Because MORE people would get the message EVEN IN BAD CONDITIONS if it is in voice, than in a secret code that they don't understand.

> There's likely lots of other good and bad reasons why anyone should keep
> morse alive.

There is only ONE. Because it is nostalgic and fun for many people. Don't take the fun away by forcing it on people that don't want to use it.

I bet if morse code was not a requirement (for certain classes of license) more people might take it up. No one wants to learn something that is forced opon them. People choose hobbies because they have an interest in them, not because someone hands them a fishing pole and orders them to fish!

> understood when his mic stopped working.

You people with your mic stopped working BS. Or stranded at the north pole with nothing for miles but a payphone with a broken microphone. Always have to try and make up some unrealistic situation to show how morse code could actually be usefull, and then THAT doesn't even fly!

I don't know of anyone ever going to be in the above situation, but even IF... would the operator on the phone or the police understand the code you are punching in on the touch tone pad, or would they think it is a prank call and hang up? Doesn't really matter, as this situation will never occur to either of us. They don't have payphones in the middle of the north pole. Especially with non-working microphones and working touch tone pads.

To that last end I can only
> offer that to those who WON'T use it...it will always be a thing
> despised....to those who do or have, a thing revered.

Think about what you just said! Think about WHY it would EVER be DESPISED! NO ONE would ever depise it if it wasn't shoved down anyones's throat!

People don't DESPISE model airplane kits. They might if people were FORCED to build them in order to take up some other hobby!

To YOU and many others it is fun, to others it is boring and slow.

To some people restoring old cars is fun, to others it is boring and slow.

At least car restorer's don't want that hobby to be a requirement in order to enjoy some other hobby.

I know a lot of obsolete skills too. Tape editing with razor blades and
tape come to mind. Perhaps that will save my life in some emergency
when my digital audio workstation breaks, or will allow me to edit in
bad weather conditions.

Hi ,Dan!

Well, in just a few short days, you've managed to create quite a stir
with your question (wink) ... 19 replies so far, and I bet it ain't
over yet. I've noticed in the past, that nothing gets things stirred
up quite so much as code and licensing issues. Anyway, well done!

I'd like to make an observation about human nature. [Now, please
understand, I'm not talking about you. Heck, you asked a question,
and you seem to be the best example of an open mind I've seen in this
thread so far.] Anyway, I've noticed that when my mind is made up
ahead of time, it tends to adopt as its purpose to support that
decision in any and every way it can. And once that purpose is
established, it will endeavor to interpret everything I hear and see
as evidence I am "right". It doesn't make me right, mind you, but
it's a mighty temptation to judge everything and everybody as either
threatening or supportive, with no gray area between.

So whenever I encounter myself feeling defensive (or offensive) about
a subject, I suspect I've pre-determined how I want things to be, or
how I want things to come out. And that's a warning signal to me that
my mind is pretty much closed. For me, the warning flags went up when
I though somebody might threaten my beloved CW.

But on re-examination, I think both "sides" can find common ground.
We don't necessarily need code proficiency tests for everyone to prove
they can do it ahead of time. Nobody's going to get on the air
sending morse when they only know 12 letters of the alphabet. So,
maybe just a sampling of questions on the written tests, concerning
the use of the mode, would be in order - to show an understanding of
the mode and its operating procedures, for those who have the
potential for using CW. Same would apply to voice, digital modes,
repeaters, satellites, anything that has significant usage on the ham
bands.

After that, it's up to us avid CW fans to promote and expose the positive and rewarding aspects of the mode (and there are many). We haven't done a good job of that thus far, maybe as a result of being so defensive.

As for actually learning CW, when I think about it (at least for me), the fastest part of the learning curve was when I was practicing it "on-the-air", without the pressure of "having to pass a test". It also happened to be the time that I really learned to love it.

Come on, folks - both pro and con - let's look for new viewpoints, consider them with an open mind, and see if we can't make the amateur service even more fun and more friendly than it already is.

Very well said, Monty! Your post marks you as a gentleman and a scholar. It is very difficult to convey to the no-code types what an aesthetic experience proficiency in morse provides, but even this long-time CW op has come to realize that using the code test as a barrier to amateur radio is unproductive. To the others: Welcome to ham radio -- be tolerant, and 73.

Well all the "lazy and stupid" go use the Internet today for satisfying
their need for playing with technical stuff and communicating with
people. Those who are not "lazy and stupid" go through learning all
the electronics and regulations that you have to learn to get a ham licence.

You missed the point. the comment was the military doesn't use it , not true in the case of the coast gaurd. The guy was taught code as part off the m.o.s. to be a radio operator.
I think as far as the coast gaurd the military still thinks it is important to have coded operators.

> these hams.

I Sadek 7X2LS personally and talk to him almost every week and can
assure you that he is QSL (via address below)

SADEK LASKRI
51 RUE EDMOND BONTE
RIS ORANGIS FRANCE F-91130

As you may have noticed 7X2 is in Algeria and the address is in France.
The reason for not having QSL send to him directly in Algeria is theft of
mail
so he goes (an average of) twice a year to France to collect and sends back
QSL from Algeria. This explains why it may take a few month to have a QSL
returned.

Remember that the rest of the world is not running in FAST forward like here

in North America. A letter from here (Canada) to Algiers in 7X can take from

1 to 3 MONTHS (yep THREE MONTHS!) to reach destination. Small packages
I send there took up to 9 (NINE) months!! I could have rowed accross the
Atlantic in a canoe and reached destination before that, but that's the way
it is.

Hams who send QSL around the world, especially Africa/Middle East should
be EXTREMELY PATIENT. Most mail to Africa, goes through other countries
like France, UK or Portugal and these countries do not consider that as a
priority, so mail may be stuck in France for two three weeks before being
shipped to final destination. Add to that the fact that most African
countries
are using 18th century technology to sort and distribute mail and you have
your two month delay.

Gary,

You've probably got some good advice. Perhaps the best thing you can do is to download the demo versions from all the major suppliers (DX4WIN, DXBase98, etc.) and compare them side-by-side. If you're going to invest in anything, you might as well spend a few minutes and find out what really works for you. If the vendor doesn't have a demo version, then I'd probably not bother with it.

Just to confirm some of the previous comments - I wouldn't bother with a DOS program. (It might work under '95/98, but do you really want to use something that was written for a 16bit environment? All of the modern 32bit-windows programs generally have more features, are just as reliable and fast as the older DOS versions - and look a hell of lot nicer.) You might also want to look at something that also runs under NT - the next offering of Windows from Microsoft may be a lot closer to NT than Win98.

Obviously I have my preferences, but I don't want to influence your decision.

Best 73,
Darrell.
NR3Y/W6.

What if you wanted to play the flute, but a law required that you learn how to play the harp before you were allowed to play the flute?

What if you didn't like the harp and only wanted to play the flute, and other flute players called you lazy for not wanting to waste time learning an instrument you had no intention of ever playing?

Some people want to get into the hobby of radio to talk on the radio. They have no desire to use morse code. How silly it would be to waste the time to learn morse code, only to forget it once one has the license to go ahead and use voice.

Only people who intend to USE morse code should learn it.

I thought the code requirement was for INCENTIVE purposes for a HOBBY that obviously needs to be regulated by the government so it won't turn into a fiasco like the mistake that happened with CB. You don't need to learn CW to be a ham and if all you want to do is rag chew on local 2 meters or other VHF/UHF freqs that's fine. They did away with CW in most military services because there are more effective ways to communicate reliably in war time. War is not a hobby (to most) and the military has a hard enough time teaching people with a 6th grade level education how to fire a million dollor rocket by "pushing the RED button" that they don't have time to spend teaching a HOBBY to 6th graders, most of who did not want the job to begin with! Ham radio is not a "way of life" it is a fun way to enjoy life. A code requirement provides incentive to upgrade. Our society (meaning the United States) over the last 10 years or so have become a bunch of whiners and get really irritated when told "no--you can't have it all right now!" If prospective hams spent as much time focussing on learning the code as they have whining about the requirement--there would be a lot more general class and higher I am sure. I don't like stop signs. Sometimes I like to drive fast. I think gas should be as free as water and I should not have to buy insurance and pay taxes. Learning the code shows you are somewhat dedicated to your hobby and perhaps worthy of increased frequency priviledges thereby allowing you to communicate with others who enjoy the hobby in other parts of the world. You are in effect an ambassador of the US! We could use more good ambassadors, that't for sure. Look at all the lids (former or current CB'ers) who took the time to learn the code then abuse it on 20 and 75. Perhaps the FFC is finally getting around to some long needed enforcement and are taking away the privilege. Just like driving--it is a privledge--not a right. So you don't need to learn much to ride a bike (scanners) but need more to drive a car (vhf/uhf no-code) but you need more road tests for cycle endorsements, big rigs, hazardous materials, flying an airplane, jets etc., pass 5 wpm you get some limited HF. Pass 13, you get to play with big rigs and big amps. Pass 20, you can do it all. I'd like to do it all and fly a jet but don't have the time to learn it all and get my 20 just yet! And I still shy away from the CB-like chatter on the ham bands, but still love to chat on 2 meters and give out my 1010# to all the KC***** call signs I hear on 10 meters. I always try to tune into a CW rag chew just to see how many characters I can copy at 20+wpm from the oldtimers who don't need to write anything down! A friend of mine has over the last year spent close to $50,000.00 on antennas including a 3 element rotatable full size yagi at 180 feet. 12 monoband antennas in all, and ALL are cut for the CW portions of the ham bands. CW is alive. Just because the military did away with it does not mean hams should also. After all, I want a college educated officer to get a VERY clear error free packet transmission before he tells the 6th grader to "push the RED button!" Kwitchyerbitchen and learn the code--or don't drive the big rigs!
Rudy, K8SWD, Advanced Class
Don or Darla Arnold wrote in message <3727AA1D.9F4B2D76@datasync.com>...
ALL the below are VERY CORRECT and TRUE, BUT,
is that ANY reason to use it on a TEST for getting your ticket
keep the subbands..if you want, EXPAND them if you like

IF we use this MODE to test people should we not have a test to see if you can talk correctly for phone, type correctly for packet,
and expand that by building your own computer for digital modes.
THAT'S ALL I AM AGAINST IS FOR A TEST
keepe the mode if it makes you happy but don't use it for TESTING.

Gord Skiffington wrote:

Howdy Dan....In all the hoopola about whether anyone should or can't use morse anymore.....a few points never seem to be brought out...or are only mentioned briefly.
Morse - Is a mode that allows communications to be copied verbatim easily (you can come close on voice or often do it if words are standardized but its not easy)......
- Is a mode that is indeed digital but which requires the most rudimentary interfacing and for which our own "processor" causes error correcting and speed compensating depending on the ability of the other "terminal" or "line" conditions.
- Is a mode which transcends language and dialect barriers when suitable signals are used...such as the international "Q" signals...and others. Hard to get most computer systems to do that yet and our ability to merely speak one language (english for example) with a wide variation of accents is hard enough sometimes.
- Is a mode whose "standardization" is unheard of in communications, where for at least a hundred years was not obsolete for the purpose of basic communications (stuff that's GOOD for critical use...such as lifesaving...and cheap commerce).
- Is a mode which, when the equipment is tired....just needs a good dinner and a cup o coffee to revive it.....stuff we have around anyway !
- When send using CW transmission (the 2 are NOT the same!) is extremely effective, using suitable narrow filters at both ends, for solid communications under the worst circuit noise and conditions. It might not be the very best...but when you consider the rudimentary equipment needed it becomes mighty attractive.
- Is a mode which, because it only requires very basic equipment, lends itself well to "field repairability".....a handy thing if you've ever sat in a remote spot and listened to digital signals that couldn't connect to you...telling yourself...."if they'd only just turn 'em on and off...I could get the message! After all...what is slower....a slow sent message or one that never arrives????

There's likely lots of other good and bad reasons why anyone should keep morse alive. Yep its old.....but well made and the fact that it hasn't undergone a million transformations tells us all that it works well. It is slow, but when mere text will suffice, is an adequate method of communication in conjuction with simple equipment. It does require skill to use...but everything we do also does (Tell me that a windows NT system hung up on a satellite link doesn't require skill to figure out what happened!). There is also a thing about operating morse that only morse operators may truely feel...but its a kindred spirit that transcends whether you were a mere ham or a skilled commercial operator, a struggling boy scout trying it or a pilot who was able to make himself understood when his mic stopped working. To that last end I can only offer that to those who WON'T use it...it will always be a thing despised....to those who do or have, a thing revered.

73 - Gord VE1AJF...(and merchant R/O in recent times :)

That's why there's a no-code tech license. What's the beef?

It appears we've gone completely full circle again.

Michael.

I would like to know how CW maintains this "level of operator
competentancy"? While "we" are debating CW, the Internet, cable modems,
sat. phones, cell phones are passing us in technology.

Mike (KD4LLA)

For the people who like peace and quiet: a phoneless cord <grin>!

The longer Bill Clinton stays in office, the more we pay.

Our justice system pays because he has opened the door for millions of us to play games with the notion of telling "the whole truth" under oath. Our military personnel pay because they have to carry out their duties while grappling with questions regarding the motives of their commander in chief. Our national intellect pays because, with his myriad verbal contortions and willful deceptions, the president has become little more than a walking, talking insult to our intelligence. Finally, the taxpayers pay because, in his efforts to keep "looking presidential" and "doing the work of the people," he is creating more new programs and growing the government.

Haven't we paid enough already?

See my web page at http://www.alaska.net/~mdickman/Index.htm

1282. 9Q5AA in April 99 was BOGUS

Newsgroup: rec.radio.amateur.dx
Date: 1999-05-01 00:00:00 UTC
From: Sandy Lynch <slay@netcom.com>
Message-ID: <slayFB2Jpq.Asy@netcom.com>
Source record: 25032

On April 17, I reported a 20m SSB QSO with a station identifying itself as 9Q5AA, operator "John" and to QSL via N4QVS. Several other stations in the Portland, Oregon area attempted QSOs with this station as well.

I have received confirmation from John/N4QVS that his operations as 9Q5AA occurred only between July 1988 and July 1991. Therefore, the station I heard was obviously a "slim" or pirate.

Further, it is not absolutely clear to me that there are ANY licensed operations currently occurring from 9Q5.

You are likely both lucky and unlucky, if you read the posts which are surfacing about your observation.

Your call isn't in my recent on-line Call Book database in my logging program, so I don't have your city as a reference. If it happens to be in Ohio, to my recall there have been a number of high power HF and MF sites in Ohio over the years, including the old VOA site, which I think was near Lima, Ohio, the old Crosly site near Cincinatti, and I think there are a couple of very hefty religious HF station sites up there as well. Ohio has figured as an optimal site for European service for HF for many, many, years per my recall.

At one point in time, the Germans hated the Ohio sites badly because they were so efficient into Europe, that there was no way to even suppress the cheerup news for the American GI's over there even on the MF broadcast bands! My recall is that there were even some 500KW, and perhaps even one 1 Megawatt, BC stations on in that service up there at that time. They had HUGE signals even into Europe!

These are the kind of sites certainly capable of generating the level of signals you are seeing.

If you are reading the posts you are receiving here, you are finding that many of these five letter number/leter cypher group services in the intelligence game are apparently using substantial power and antenna systems for their work. To my knowledge, the VOA stopped using the Ohip site, officially, a number of years ago. I recall an article in QST published by a ham group which managed to get permission to hold a special event there for a couple days at the termination of service.

They were allowed to use the massive rhombics and curtain arrays on Europe for the special event. It wasn't said that VOA actually was going to tear down the whole site, abandone it, or what. It may be that the site was either sold to an HF service group, or even retained by the U. S. Government and mothballed!

We do things like that in the USA. I haven't looked for a number of years now, but there used to be a very huge metallic building machine shop out on 16th street in Northeast Houston. It had a large parking lot, was 'open' for business, and did machine shop work at large, but there were never, to me, enough cars to justify this HUGE building! I found out that the main reason it was there was that in this building was one of the largest crankshaft grinders ever built in the world! It was the only grinder in the USA that could service the cranks in our battleship and carrier fleet. The government paid this place year after year, just to keep the thing available if it was ever needed!

So to, I would think, might be the VOA site, or others up there. We may have even contracted for the service on a temporary basis with the religious crews, or perhaps, grin, the data is of a relevationary nature . smile! There's more than one way to throw a parabolic curve!

In that the signal strengths are really that hign, so to are you lucky! You should be able to DF this deal, at least down to a bi-directional null with a ferri-loop stick, which you can make for a buck or so. You could, if the signal is pervasive, get on 20 next time it is on, and ask for someone with a beam on 20 o see if they can hear it on the beam and determine if it is really in your direction, listening to it from a distance.

If it is, and you are really fortunate, you should be able to hop in the car and drive a few miles and see the null move. If you are super fortunate, you will be really close to it and you can then zero in in the place and get a real insight! If the signal is really pervasive and you post the on-going process here, even if we aren't lucky and you aren't really the 'guy-next-door', there probably will be enough interest, stirred up one way or another in the Ohio area, to DF it even if it is close to you, but not truely local..

As the information surfaces you met then get luckier! It may move out of the ham band... There is a big maybe about that. Recall that the Ohio and W8 area is in a terrible good spot for high efficiency HF service to Europe. Note also what is going on over there now. During a recent Carribean event in which there was strong US military presence, the 75 phone crew was rather aware of military HF use of 75 phone.

It may also be that the 30 meter band is shared with the military. officially! Someone else here can. perhaps, speak to that.

You have to know that everything isn't what it seems in band organization and use allotment. In Region 2, Europe, for example, the use of the 40 meter ham band is on a shared basis, with the Russian

military folks. To this day, Russia is still positioning RCQ45, the "V" single letter beacon, in Tashkent, on 7.002 Mhz, still positioning the "P", "S", and "C" SLB's on 7.0388 Mhz, 7.0389 Mhz, and 7.0390 Mhz, respectively. If you listen VERY carefully for a VERY long period of time to these beacon markers, you will, rarely, hear them breaks randks and call other Russiam military units, "UWG63, UWG63 de RCQ45 RCQ45 QSV?", or "RAM22 RAM22 de RCQ45 RQC45 QSV?", followed by a string of five-letter cypher groups! RAM22 happens to be, so said, in Moscow. UWG63, so said, is in Bulin, up near the Artic circle!

I bet you won't bet me much that, if "V" is in or near Tashkent, as listed, or the "P" is in Moscow, as listed, that a TashKent or Moscow ham, respectively, does much operating on or near 7.002 Mhz or 7.0388 Mhz, when the markers are there! Nor have they for the roughly 45 years that I have been listening to these things here in Texas in W5 land!

For you, however .. just maybe better times await!

On the other hand, things might get different. Often when it gets too costly to pursue something on one frequency, when one can move it a bit away and accomplish the same results, sometimes things move!

Per my recall, even the Children's Crusade had economic underpinnings!

Recall that the Russian OTHR Woodpecker did leave 40 meters in the mornings for a good period of time before it left, in general, at least in it's old-fashioned emmisive state! Chuckle.

:)

If an Ohio site is being used, during this period of NATO involvement, for European cypher traffic, and it isn't a shared band, it just might so happen that the frequency gets moved as the water heats up as the site locations, and so on, get determined in the hunt, or begin to get noticed that they will be picked up in the hunt and published..

:)

If so, you (and others) just might win. Chuckle...

:)

Of course, nothing is done so as to compromise the integrity of the circuit. Perhaps in this case, it really is operationally necessary to ise this band for the service, all things considered. I think most hams would understand that and accept that; I would.

But if you are very fortunate, your discovery and a little further work, which should be a lot of fun, could get you a lot of satisfaction. :)

I bet it won't be as hard to find this one as it was for the crew that failed to find a 75 phone rig hand-carried in to the middle of a remote rairoad line. We loaded 20 miles of telegraph lines up on 75 phone for a transmitter hunt one weekend .. Nobody had any intention of walking

the line between College Station and Navasota Texas down that remote
Missouri Pacific set of rails to find it some forty years ago!

:)

The old VOA site and the old Crosley site near Cincinnati are one and the same. Actually, the 500kW AM BC station you mention in the next paragraph is there too. WLW-700 belonged to Crosley. WLW is still transmitting from there, and my understanding is that the 500kW transmitter still exists, though they're limited to 50kW (and using a much newer transmitter!) these days.

There are plenty of big religious HF stations in the U.S. these days, but I don't know of any in Ohio.

> systems for their work. To my knowledge, the VOA stopped using the Ohip
> site, officially, a number of years ago. I recall an article in QST

Last I saw the antennas were still there, but the site is no longer transmitting. (at least not for VOA<g>) I guess I'll find out for sure in two weeks, as I have to drive past to get to Dayton. Suburbia is VERY rapidly encroaching on that site, and I doubt the neighbors will tolerate the VOA antennas for long even if they aren't transmitting anything. High-powered shortwave transmission could result in the secession of that part of Ohio<g>.

> It may also be that the 30 meter band is shared with the military.
> officially! Someone else here can. perhaps, speak to that.

30m is definitely a shared band. I don't know offhand who the sharing partners are, but the band is not exclusively amateur.

1293. Pre-War QSLs sought from Germany...

Newsgroup: rec.radio.amateur.dx
Date: 1999-05-02 00:00:00 UTC
From: kwp@rai.ping.at
Message-ID: <7G7nCMu--jB@rai.ping.at>

Amateur Radio in Germany started 75 years ago.
We are currently putting the final touches to a database collecting information on German hams (and, of course, SWLs) from the beginning to 1950.
We welcome any information (callbooks, circular letters...) but particularly want QSLs (either donated or offered as scans), to add to our files and archives.

A similar project is being prepared for Austria, celebrating 75 years of ham activity, next year.

Please let me know if you thing you might be able to help.

SB DX @ WW $OPDX.407
Ohio/Penn DX Bulletin No. 407

The Ohio/Penn DX PacketCluster
DX Bulletin No. 407
BID: $OPDX.407
May 3, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AC4G, AA5DX, N6HR, N6RT, N8BJQ, KE9KD & DX-Central, DJ5AV & DX News Letter, DL4BQE, DL3APO, DL7VRO, G4BUE & DX News Sheet, G0REP, GU0SUP, JA1WSX, JI3DST, LU3FCK, VK8PW, Lukasz Komsta and Herb Blair for the following DX information.

3W, VIETNAM. 3W7TK was heard this past weekend on 17 meters (18069 kHz) between 1600 and 1900z. QSL via OK1HWB.

9N, NEPAL. The "DX News Letter" reports that Sergio, IZ6BRN/AP2WAP, is going to sign 9N7RN from Mirni near Pakhara. His activity should have started by the time you read this. He intends to stay until the end of June 1999. QSL via IK4ZGY. Meanwhile, the "DX News Sheet" states to look for Fred, WF6Z, to be active until May 7th as 9N7ZA. The QTH he will be operating from is at 24,000 feet. Activity will be SSB on 7234, 14158 and 14175 kHz. QSL via home call.

CY9, ST PAUL ISLAND. From a press release: Look for Doug/K4LT, Dan/K8RF, and Bob/W6RGG, Stan/AC8W and Hank/K8DD to be active May 23-31th as CY9RF. The CY9RF team will also be a Multi-Op/Multi Transmitter entry in the CQ WPX CW Contest May 30-31st. Look for them to have four 24 hour station and two part-time stations. Before the contest they will run 2 or 3 stations concentrating mostly on the WARC bands and on difficult propagation areas of the world such as Asia, VK, ZL etc. Also, all SSB operations will be before the contest period. This operation is now a YASME DXpedition and QSOs count for the YASME awards (for details check the Web site: http://www.cestro.com/myweb/yasme.html
QSL via K8RF. All OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

DAYTON HAMVENTION DX ACTIVITIES. Steve, N8BJQ, informs us that the following events will take place:
The DX Dinner Banquet program on May 14th will be "ZL9CI, 96,000 QSOS, and Environmentally Correct" by ZL2HU & ZL1CN. (There are still some

tickets left.)

The DX Forum programs are on Saturday, May 15th, at Meadowdale High School again (1:00 - 5:00 PM). Guest speakers are as follows:
"DXCC 2000" by Wayne Mills, N7NG
"AR Cluster Development" by Jim Moore, WU3V
"ZL9CI" by Ken Holdom, ZL2HU, Murray Woodfield, ZL1CN and Don Greenbaum, N1DG
"The DXpedition to St. Brandon, 3B7RF", story and slides will be presented by George Wagner, K5KG, Karl Gratezer, HB9JAI, Walter Marshall, W7SE and Erik, HB9ADP
"Return to Vietnam after 30 years" by 3W6WE/K2WE & 3W6LK/W2LK
"3B9R" by Frank Smith, AH0W and Garry Shapiro, NI6T
"Another day in Paradise, V7-Kwajalien Atoll" by Tom Harrell, N4XP

FT5W, CROZET ISLAND (Update). Good news. Reports indicate that Gil, FT5WH (F5NOD), has reportedly fixed his radio and should be active again soon. Look for him on 20 meters.

FS, ST. MARTIN (and V4, St. Kitts & Nevis). Hiroo, JA1WSX, informs OPDX that he will be going to FS and V4 after the Dayton HamVention. He will sign FS/KH0Y from St. Martin, May 16-19th. After this operation he will go to St. Kitts and will try to get a V4 license from the Telecommunication Office there. He will be there May 19-21th. QSL to JA1WSX direct or JARL.

IOTA NEWS.....
AS-032. Takeshi, JI3DST, will operate from Osumi Archipelago as JI3DST/6 from November 21-22nd. Activity will be on 17/15/12/10 meters SSB. QSL via JI3DST.

AS-041. Operators JE4CIL and JI3DST will be active from Oki Archipelago (Oki-Gun Shimane) as homecall/4 from 0800z June 4th through 2200z June 6th. Activity will be on 80-10 meters (including the WARC bands) CW/SSB. QSL JE4CIL/4 to P.O. Box 3, Hamamura, Ketaka-Cho, Ketaka-Gun, Tottori 689-0331 Japan. QSL JI3DST/4 to Takeshi Funaki, 2-18-26 Hannan-Cho Abeno-Ku, Osaka-City Osaka 545-0021 Japan.

AS-117. Takeshi, JI3DST, will be active from Honshu's Coastal Island (Awajishima Hyogo) as JI3DST/3 between July and December. His schedule is as follows: July 24-26th (IOTA Contest); September 4-6th; September 23-26th; October 30th-November 1st and December 11-13th (10M Contest). Activity will be 17/15/12/10 meters SSB. QSL via JI3DST.

NA-169. A group of hams from the ICARC, WWDXC and NCCC will activate Waadah Island (NA-169) of the Makah Nation Tribal Lands during the IOTA contest July 24-25th. NA-169 is one of the rarest of the IOTA groups since these islands are the Makah Nation ancestral burial grounds. Two kw stations will be on the air before, during and after the IOTA contest to hand out QSOs.

This effort has already been coordinated with the IOTA HQ
Martin, G3ZAY. More to follow.

J28BS NOW QRT. Phil, J28BS/F5PHW, is now QRT and is in Muscat at A45XR's home. He reports that his J28BS DXpedition netted 5700 QSO IN 57 hours of activity. If you hear J28BS on the air now, it is a pirate. QSL via F6KPQ, Bureau or CBA.

LO1, ARGENTINA. LU4FM reports that he will be active as LO1F in the ARI International DX Contest as Multi-Op Single Transmitter entry.

MM, SHETLAND ISLANDS. Wolf/DL4BQE, Helmut/DL5BUT, Thomas/DM4VDE and Arno/DL1CW will go on an Amateur Radio Expedition to the Shetland Islands (DXCC: Scotland). They will be active with two 400 watts stations from June 11-16th. They will operate from Muckle Roe Island (IOTA EU-012, WAB HU 36). The team will use CEPT callsigns (MM/DL4BQE/p and MM/DM4VDE/p). The first station will run on CW, while the second station will run either on SSB or CW. They will be active on 160-10 meters bands including the WARC bands with verticals and wire antennas. The goal is to make as many QSOs as possible, especially with stations outside of Europe. At the moment, Wolf is trying to find a comfortable RTTY software, and they hope to be able to satisfy some RTTY requests, too. QSL cards are prefered via DARC-bureau. If you cannot wait, you may send your cards direct to DL4BQE. For some further information, check out the Web site at:
http://privat.schlund.de/y/y36/shetl.htm.

QSL INFO AND NEWS.....
Tony, G0REP, reports that he processed and despatched all QSLs sent to him directly following his recent operation from Mustique Island (NA-025). Anyone having requested a QSL by this means and fails to receive a card after a reasonable period of time, should contact him via his E-mail address were he will try to sort things out. His E-mail address is: Tony_Blackburn@otterburn2.freeserve.co.uk

LOGS ON THE WEB. Doug, N6RT, informs OPDX that the following logs are now available at the Web Site: http://dx.qsl.net/logs
FO0XUU (Marquesas - February 1999) 5R8FU (through April 6, 1999)
FO0XUU (Australs - January 1999) VK9YY (February 1999)
JW/SM7NAS (April 1999) VK9XX (February 1999)
YC0LOW (through April 25,1999)
5B4/EW1AR & 5B4/NP3D (October 1998)
Peter, DL3APO, states to look for the logs from the FO0AWI operation to be added a little later because Wulf wrote all his Qs on a paperlog.

GU2ENK is an INVALID callsign! Phil Cooper, GU0SUP, GU and MU series QSL Sub-Manager informs OPDX that the callsign GU2ENK appears to have been active in the ARI contest (CW section) in 1997 and 1998. He has made inquiries, and this callsign has NEVER been issued! Please take note, as you will NOT get a QSL card.

QSL Manager, Fritz, DL7VRO, reports that he has had some computer problems but was able to save the data on his hard drive. Anyone who

still needs a QSL from the operations that Fritz is manager of and wants to know the status of their cards, please send an E-mail to: dl7vro@ibm.net

SPECIAL EVENT SPECIAL. From May 1st through July 31st, special event station SN0APT will be active from Lublin and Klementowice. The event is the 750th anniversary of the first opening of a pharmacy in Poland. The "APT" suffix is the abbreviation of the Polish word "Apteka" which means "pharmacy". The first Polish pharmacy was opened in Swidnica in 1248. The special event is organized by radio club "Ariadna" (SP8YCB). For any questions about this station, please send E-mail to: radioam@ariadna.pl QSL via the bureau or direct to: SP8YCB Club, Po Box 403, 20950 Lublin, Poland.

SPECIAL PREFIXES. Just a quick reminder to look for special prefixes being used by Scottish and Welsh amateurs to celebrate the opening of their new parliments. Activity will begin May 6th and last until July 31st. GM stations (Scotland) will use 2A, 2S and 2T. GW stations (Wales) will use 2C, 2W and 2X.

USI NEWS. The Michigan DX Association (MDXA) will be putting "Beaver Island" on the air September 10-17th. Beaver Island is USI MI032L and they will be using a 8 man team with the special callsign KC8MHX (Michigan Ham Xpedition). The team will use the standard IOTA frequencies as well as other frequencies. QSL via W8VOM at: MDXA-BEAVER, O-947 Lake Michigan DR, Grand Rapids, MI 49544.

V4, ST. KITTS AND NEVIS. The "DX News Sheet" reports that Steve, G4JVG, will be active June 4-18th while on holiday. His callsign will be allocated upon his arrival. Activity will be SSB on 40-10 meters including the WARC bands and possibly 80 meters with 400 watts and verticals. QSL via home callsign.

V7, MARSHALL ISLANDS (possibly KH1, KH9 and maybe others). Bruce, AC4G (ex-N4GAK), informs OPDX that he will be active for at least 2 years from Kwajalein Island beginning in mid-June, hopefully. Bruce expects to be active on all bands unless it interferes with his work assignment. He will be taking his Kenwood TS-850, a vertical Cushcraft R-7000, his satellite rigs and antennas for AO10 Satellite QSOs, etc. Bruce states that he hopes to be active from his residence as well as from the club station on Kwaj. Many of you may remember Bruce as QSL Manager for Ken Wells, V73C. Bruce hopes to pick up where Ken left off and be active in many contests. He is applying for the callsign of V73G. Bruce will continue to answer Ken's QSLs as well as his own unless it becomes a problem. Ifso, he may ask for a volunteer to help with the QSLing. Bruce adds that he also hopes to be active from Baker-Howland, Wake, and a few other islands nearby. Lastly, Bruce hopes to give out many QSOs on SSB and CW. If you need a certain band QSO, let him know and he will try to accomodate. He will not be taking RTTY gear in the hopes that the club station has this setup already.

VK8, AUSTRALIA (Rare Area). Peter, will be operating as VK8PW/p starting around May 14th from Arnhem Land, an Aboriginal Land Trust, in the VK8 district some 350km east of Darwin. This area is accessible by special permit only from the Aboriginal land owners. This might be the first ever ham operation from this part of VK8. Peter will be there until mid October, 1999. Operations will be on 20-10 meters on SSB only. QSLs for bureau requests go only to VE8RZ and for direct requests to: Peter Wollenberg, Box 2142, Darwin, NT, 0801, Australia.

VQ9, CHAGOS ISLAND. Ron, VQ9DX (AA5DX), reports from Diego Garcia that he is now dockside and can ride his bike into the radio club at least 3 or 4 times a week depending on his work load. Ron states to look for him on 1828 kHz starting around 2315z through 0130z (that is when he must QRT to get back to the ship on time). He states that their offical sunrise is now 0112z.

XZ, MYANMAR (New IOTA DXpedition). A few different sources report that Mike/N7MB, Steve/G3VMW, Ray/G3NOM, Darryl/AF7O, Warren/K7WX, Jouko/OH1RX, Robin/WA6CDR, Dan/NA7DB, Sally/KM5EP (YL op), Paul/W8AEF, Martti/OH2BH, Rich/K7ZV and EA5XX; N5IA and K6KRE of the Central Arizona DX Association (CADXA) will be active in mid January of the year 2000 for two or three full weekends as XZ0A. Operations will take place from Thahtay Kyun Island (also known as Mergui Archipelago, 9 57' N, 98 32' E) located in the Andaman Sea. This will be the first IOTA operation from XZ-land, which means it will be a new IOTA. Planned operations will be CW/SSB/RTTY and SSTV on 160-6 meters. More details are to follow.

ZC4, UK SOV. BASE AREA ON CYPRUS. The "DX News Sheet" reports that Jeff, G0WSA, is active until the year 2001 or 2002 as ZC4JP while stationed at the Western Sovereign Base Area (WSBA) in Episkopi. No QSNs have been reported as of yet, but activity will be on CW/SSB/RTTY and Pactor three to four afternoons weekly. Jeff will use a TS-850S 100 watts and dipole. QSL via RSGB bureau to G0WSA.
Meanwhile, George, 5B4AGC (G3LNS), was active as ZC4ATC over the past weekend on 40/30/20 meters between 2100 and 0400z. Check 14170, 10109 and 7052 kHz. QSL via 5B4YX.

Hi Juha,

Try W3HNK for TI1C. I got one from him for one of the WW contests in late 98.
W3HNK is very reliable and handles QSLs for many stations.

73 and DX,

Kermit, AB1J

I was not aware that Callbook was making a MAC version (any more). The only "MAC" version was the printed one. hi hi.

If you want a "live" callbook look at
http://www.ualr.edu/~hamradio/callsign.html
and is updated daily.

I have heard Med (7X4AN) calling CQ at the bottom of 40 CW for seveal weeks at around 2300Z and around 0400-0500Z, often with no answers. I have had several nice chats with him lately; he has a decent signal and should be easy to work in the USA. I have several of his cards; in my book he's a great QSLer.

30 Meters is a shared band. There are commercial and military stations
there. Looks like you heard a "numbers station".

Some of the signals on 30 ARE illegal.

Does anyone know the source of the transmitter that sends "GOD 666" in CW
around 10106 kHz? (I never wrote the freq down but I believe that is
close to it.)

A station, so said, being used to send encrypted informtion in a series of numbers read over the air. The series of numbers has a hidden meaning to those receiving the traffic.

Cypher traffic has been sent for years. It is also common to see this type of traffic sent in 5 letter groups as well. For example, on the rare times when the Russian SLB's will break ranks from the monotonous letter they are sending, I've heard them then use a series of five letter cypher text groups to pass information over the network.

The 5 letter groups contain coded information for the recipient(s).

So said, numbers stations traffic is simply encoded information traffic, I've never heard anyone offer that they were involved in a numbers circuit and what traffic it actually addressed! Grin...

Well, this was not a numbers station, but it was one of those 5-character groups transmissions. An endless stream of 5-character groupings (the groupings containing combinations of letters and numbers) running at about 20 WPM. What struck me was the overwhelming strength of the signal -- +60 db into southeastern Michigan. Thinking that it might be local, I QSY'ed up to 20 MHz to see if I could hear the 2nd harmonic.

This may sound corney, but I can usually differentiate between strong local and distant stations by listening at 2xFrequency. If I hear them on the 2nd harmonic, they're generally a local. If 2xFrequency is clear, they're somewhere else.

Hello everybody !!

Als ich neulich meinen neuen ICOM IC2800H an meine Packet Station
anschliessen wollte funktionierte auf Anhieb nur der RX.
Obwohl die PTT-LED am TNC leuchtete ging der TRX nicht auf Sendung, auch bei
einem TX-Delay von 60mSek. nicht !!
Durch manuelles Kurzschliessen des Datenkabels (PTT -> Masse)schaltete der
Transceiver ohne Probleme auf Sendung.

Meine Vermutung, dass der Schalttransistor des TNCs hin�ber w�re best�tigte
sich leider auch nicht (2.tes TNC2H getestet).
Nun weiss ich momentan nicht mehr weiter. Hat jemand vielleicht schon das
gleiche Problem gehabt, oder kann mir jemand noch einen Tip geben?

Schon mal herzliche Dank.

vy 73 de DJ5CL, Ingo aus Erding - JN58WH

1327. THANKS ALL!!

That's ok we can argue all we want about keeping the code test, but something needs to be done to bring people into amateur radio not keep them out. Soon enough all the brass pounders will be gone and then the FCC can sell of the rest of the ham spectrum. How soon we have forgotten about 220 MHz.

With regard to Gaby OD5NJ, I received a card off him about 8 weeks after posting. I sent two IRC's direct to his QTH in Lebanon. The card I received came from an EA station in Spain, who I guess must be a manager for Gaby.
I later found out that IRC's are not valid in Lebanon so I can only assume Gaby had gone to the trouble of forwarding these to his manager.
On the subject of IRC's does anybody know of other countries in which they are not valid? I was told to check out the web page of the International Postal Union for this info but have never managed to access it successfully.

Jack,

Brass pounders will always be around, and in large numbers too. As for new blood in Amateur Radio, there is plenty of that too. Where did the notion that Amateur Radio is dying come from? At my extra class exam (recent) there were about 5 youngsters aged about 10 taking the 5 WPM code test. Come to think of it, there were kids testing at every one of the test sessions I attended.

I think we need to worry more about the F layer falling.

73,

Marv

Chicken Little is an old tale. No one learns. Seems folks are always the same.
Thank you for an independent observation.
I suspect the same small fraction of 13 year olds are still learning code. Like many things that require a little work up front, CW is worth it.

Marv OM,

I agree with you. I don't see ham radio 'dying' at all. I operate in excess of 12 hours a week on the air, basically all CW. Over half of that is mobile CW. The CW bands have plenty of ragchewing going on all the time. I know, I am one of them. And I spend almost all my time on only one band: 40M. A while ago I worked a 16 year old in Phoenix who was running homebrew TUBE-TYPE gear he had made himself, from old handbook articles. Said he just wanted to play around with tubes is all. Have worked several newer hams, some in their teens, who started with codeless techs, then discovered (some to their total amazement) that CW is an excellent ragchewing mode, and works very well. Some are excellent CW ops, know procedure, know how to listen, with less than 2 years experience in ham radio. They try to spread their enthusiasm to some of their non-CW friends, often with no luck. So they go their own ways.
The message here? You are either interested or you are not. Nothing new going on here. CW will continue to be used by the many who find it enjoyable, that is, can attain reasonable skill at it. Apparently many non-cw ops think we are all WORKING to use it, writing stuff down, using straight keys, egad! Hey, it is just another language guys, if you are proficient, and is effortless to use. If you're not wired for it, there are many other modes to use. That is one of the beauties of ham radio.

73,
Don, W6JL

That is the point. There are many modes that don't use CW. Many that are interesting and satisfying that don't need knowledge of CW to use. The hobby is diverse and growing more so all the time. Yet there is truly only one test for suitability to belong to the club: knowledge of code.

I have the skill to pass the practical test (and have with the training software) through Advanced, yet I hold only a Tech ticket because of the code. I am still trying but I haven't found my method for learning code yet. I memorized the tapes, and have tried a couple of different computer tutor programs, but so far I have not been able to master CW. I will get it eventually, but it is not coming easy. I resent comments from other hams about being an "appliance user" or the comments on this list about code being a "moron filter." We all have assets in different areas. Learning the code is just plain a bitch for me, and is for others.

I see Techs filling key spots in many clubs, taking on important jobs in weather nets, coordinating public service activities and the like. Some of these folks will upgrade, and some will not. The code will be an obstacle for some, the practical test will be an obstacle for some, and some are content with what they can do with their current ticket. None deserve to be looked down upon because of lack of code speed.

Here's my worthless drivel on this worn-out subject.

I just got my Tech+ ticket 3 months ago. Having a good time. All I do is CW. But I'm 41 and don't have those countless hours to put into increasing my speed like a young kid might. So I may never get to 13 WPM. I'm hoping for a restructuring that will give me more of the bands to work on. I have a great respect for the guys who got to the top and I don't want something for nothing - just a little more.

And what's with this 50% QSL return rate I'm seeing ? I'll have to work all states TWO TIMES to get my W.A.S. !!!

And finally I say, keep the code test. If I could learn 5 WPM then anybody can. There's something to be said for paying some form of dues. It builds character and gives an appreciation for things.

OX3LG, Michael will be on Asiaat Island, NA-134 from May 10-20th.
He will be active on 6, 10, 15 and 20m, work schedule and propagation
permitting.

June 15-39th will see Angmasalik Island, NA-151 activated, same bands
and limitations. This visit should also see the new 6m beacon
activated.

1353. Newbie question about DX packet spots

Newsgroup: rec.radio.amateur.dx
Date: 1999-05-07 00:00:00 UTC
From: Larry Gauthier <larryg@ismi.net>
Message-ID: <3732ce8e@news.ismi.net>
Source record: 25153

Revered DX chasers:

I have just returned to amateur radio after a lengthy absence, and a lot of things are different: packet, computers, the WARC bands, callsigns that don't tell you where a "W" station is... other stuff.

I operate strictly HF, and am using the DX4WIN tracking software. The software has a nice interface to a 2M packet radio for DX spotting... but I do not have 2m packet. HOWEVER, I do have a dial-up Internet connection, so during those times that I am connected I fire up the "Interneet connection" in DX4WIN and see what's happening.
Every time the DX spots begin appearing on my screen, I always wonder "what did I _just_ miss? What spots were reported 10 minutes ago... 1 minute ago"?

Is there a web or telnet site that caches these spots, so that I could connect and get a recent dump of DX activity? I cannot stay constantly connected to the Internet, but I would like to check at regular intervals.

Hope my question makes sense...

If it's not on qrz.com, which is current to FCC database within a day or two, then you probably copied it wrong.

I just finished giving my seven year old his code lesson. He's learning the code to earn a award in his Tiger Cub Scout group. He is a seven year old that came to me to learn the code, and has no interest in radio, I would think that anyone who is interested in radio should stop crying about it and donate the 15 minutes a night for 2 weeks, and learn it.

No one complains about having to learn how to use windows before they can surf the net....

What was the source for this? (a physical CD? Web site?)

Just curious, as it doesn't appear on the University of Arkansas server,
which is updated directly from government records - weekly, I believe,
if not more frequently.

(then again, our government is known to "lose" broadcast stations out of
their database, it's hardly impossible they'd lose an amateur too!)

>TNX Don KB3DMA

First of all, Don, congratulations on being a 2 month old ham. That may be a world record - plus you have already learned to use the internet !! Pretty amazing. There are a few DSP audio filters around, but pretty expensive. The older/cheaper audio filters all seemed to be ringy. You have to hear that to understand it, but it doesn't sound good. The problem with DSP filtering in the audio is AGC pumping - if you have a radio with DSP in the IF, then strong adjacent signals aren't a problem, but with DSP in the audio stage, a strong adjacent CW signal can 'pump' the AGC on the radio and cause you to not hear what you want to be hearing. The idea of a CW filter is to hear only the station you are working, and not much else. The DSP filter in my radio is in the audio stage - works great if the band is clear, but a strong adjacent signal makes it useless. The 400hz CW filter works much better.

You can get a FREE DSP filter to play with if you have a soundcard in your comptuer at:

http://www.siliconpixels.com/

Download CHROMASOUND, it's a DSP filter. You hook the radio speaker output to the computer sound card input and hear the filtered audio from the computer speakers. It ties up the computer, but the demo runs for 30 minutes, so you can play around and see what it's like.

Anyway, after 25 years of CW, lots of radios, a few audio filters, and a radio with DSP, I'd recommend you get a regular plug in CW filter for the radio. It may be hard to find, as it's an older model, but a 400 or 500hz CW filter will make you a much happier camper than a audio filter will probably. INRAD has filters for a TS-120S so that may be the one you need, check their web page at:

http://www.qth.com/INRAD/

and send the guy who runs the joint an email or call him on the phone, I forget his call but he's very helpful. The TS-120S filter is 95 bucks, and you won't get much of a DSP unit for that price. Everybody who uses the INRAD filters seems to like them, mine works great in a new Yaesu.

Hi Keith OM,

Thanks for the thoughtful response.
In WWII, the military taught Morse code to literally thousands of people from all kinds
of backgrounds and abilities. Many of them were not doing it voluntarily, either!
I myself cannot see where using "tapes" and "computers" is an effective learning method
for learning to use the code conversationally, as we do in ham radio. First of all, it
is boring, listening to basically boring content being sent. As you said, you eventually
memorized the tapes. That should be a clue that that is not the way to learn the
code. Why not listen to something interesting instead?
To become comfortable with CW, you have to 'USE IT' for some purpose. Listening to real-live
conversations on the air is what made CW take off quickly for me. Fortunately, in those days
there was no distracting temptation to somehow 'use a computer' (a distinct advantage, from
what I can see). Second of all, it does nothing to teach you how to listen to REAL
WORLD signals off the air, while at the same time, you are internalizing what is being said.
This is what worked for me. It has been music to my ears ever since, and is definitely my
preferred mode for ragchewing on the air, compared to using voice. When you are otherwise
just wasting time (ex: while driving), sound out everything you see

written: street signs,
license plates, etc etc. Make the sounds of CW very familiar to
yourself, so that
you associate those sounds immediately with the letters and numbers and
punctuation.
This all requires zero investment in $$, and can be done anywhere,
anytime. Lastly,
listen ON THE AIR to real CW QSO's, as much as you can, to all kinds of
fists, in various
conditions of in the clear to buried in the QRN/QRM. Watch out! You
might suddenly
become hooked; that is a risk you take. If that happens, you will
suddenly see yourself
on the other side of the perennial code argument, and can't for the life
of you figure
out what all the fuss is about; it has happened to many others, HI.
Lastly, like anything else, CW is not fun for EVERYONE. Some people
just do not take to it.
But that is a very small group indeed, I think. Especially at the
moderate speeds required.
After all, 5 WPM you can practically look up real time. 13 WPM actually
requires that you
know and can respond almost immediately to the characters. This does
not seem to much
to ask, for a large number of us. I believe it is an essential part of
one's education
to become a ham and to use HF (the 'real' ham radio to me).
You can do it.

73 and GL,
Don, W6JL

Keith,

I forgot one other important point in my post. DON'T WRITE STUFF DOWN. Copy it in your head; that is how you will be using it for ham radio ragchewing. Writing it down is an (unnecessary and limiting) habit that you don't want to get into if you can avoid it. I sometimes run into ops on the air who ask me (as I am working mobile CW) "how do you write it down?". Egad.

Yep, always worth a shot! Kinda figured that was what it was. My bet is he got a vanity call & isn't N4OAO anymore. They were keeping notes in the FCC DB (it would have come up as N4OAO, changed to <W4-whatever it is now>) but I don' t know how long they keep them...

Some software (e.g., Morse Tutor Gold) is pretty effective, in that it sends typical, but random, QSOs. Of course that may be boring (many qsos are!), but it is better than the old 5 element groups.

Thanks! I've been wondering about this ever since I saw a post in rec.radio.cb
about running your mic through your sound card to enhance your output audio. I
figured it could be done, it's nice to know there is a program for it. I'll
be checking this one out.

Hi Don!

Hmmm... I've heard this admonishment before, and I really don't understand it. I've been operating almost exclusively CW for over 30 years, and I've always written it down. It feels natural to me. It goes in my ears, it comes out my hand. It's not particularly legible above 30 wpm, mind you, but I can refer back to my notes in a ragchew and remind myself of what was said. (I can't recall a 10 minute monologue, but I can if it's written in front of me). Later on (2 or 3 qsos late), I can jot down a note or two in the log if I want. My wife can look over my shoulder if she wants. When visitors come over, they can see that the process actually works... morse in, words out. Above 35 wpm or so, I'll put the pencil down and copy entirely in my head, but if somebody throws a long unfamiliar and non-phonetic word out there at 45 wpm, I'll probably miss it, and I've found that's usually the case for people that "only copy in their head", even at slower speeds. And speaking of slower speeds, people that copy only in their heads have difficulty with copying 10 wpm qsos... I think you forget what was sent at the beginning of the word at that speed... hi.

Besides the practicalities, I think it's easier and faster to learn code while writing it down. As you decipher a letter aurally, you write it down, see it with your eyes, and it connects you with the part of your brain that already knows how to read and write.

Hey, different strokes for different folks, but I think it's a lot easier and more practical to learn code while writing it down, and make the transition to head-only copy later on if you need or want to. Am I the only one in hamdom that thinks so?

Will that help with DX calls? In my experience there are many, many DX
callsigns which aren't in any of the online databases, and now that the
printed dx callbook is no longer available, I have no access to them
either.

Message-ID: <e4TY2.8478$116.13633@news2.ozemail.com.au>
Source record: 25168

About a year ago a friend of mine Mario DL1FDV has sent cards to 3B7RF manager and in the letter were cards for DL1FDV, T94DO and me - VK4NM. He also included SASE and DM 5- which is around US $ 3,50. although a letter from HB to DL cost less than a dollar. A few weeks later Mario has received a letter back with 3B7RF card for DL1FDV, but nothing about the other two . Last night I talked to Mario and he told me he has received 3B7RF card for T94DO via the bureau (Mario is his QSL manager). I remember sending an e-mail to a 3B9RF manager about 6 months ago with the question what about my card but I have never got an answer. I think that if you send two or three cards in one letter all of them should be answered, especially if you send a few dollars donation, or support. I know majority has got their QSLs and are pretty happy with 3B7RF QSLing, but I am not. I think that in some cases (when QSL manager "decides" who gets country confirmed and who doesn't) the DXpedition should loose it's DXCC credit.
I wonder if somebody has the same expirience with this station and what is the actual price for 3B7RF card. Maybe I should simply send my credit card number so they take whatever they want, hi.

Mike VK4NM (DL4FMA / T94CQ / KF6CBS)

True enough; however, it has everything to do with the es-prit de corps of ham radio. Knowing that one has gone through, and survived, the identical trials and tribulations of his or her counterparts, builds a unique bond of dedication and purpose. The instant gratification crowd of today has no appreciation for that bond.

Now that sounds like a plan, a Morse code test to get on the internet
would keep some of you no-code peckerwoods out of the DX newsgroup
and about a half dozen other ones this 'discussion' doesn't belong in.

Is it REALLY necessary to post this crap to every ham newsgroup there
is ? Some of us have already learned Morse code, we aren't looking for
any good reasons not to....

Controversial ? BWA HA HA, he tried to whack hs wife ! Is this Martti Lame guy in touch with REALITY ?

Greetings From Don Miller, W9WNV

By Martti Laine, OH2BH

(Re-printed from the Editorial of Chod Harris' The DX Magazine, August 1990)

Has the world forgotten its idols - the people who provided a full scale of entertainment to radio rooms across the world? In spite of certain controversial issues involved, Don Miller W9WNV devoted more to the art of serious DXpeditioning than anyone else in those early years. DXers have always inspired controversy and so did Dr. Miller.

Don is now in his fifties but, as a result of many unfortunate events following his DXpeditions, he has spent the last eight years in a California prison. Furthermore, he has been isolated from amateur radio for the past twenty years in the aftermath of his dispute with the ARRL, a dispute that was settled in a manner satisfactory to both parties. At the good age of 52, Don is missing his freedom but maybe even more his 15 year old son who was everything to him after he quit amateur radio. These twenty years have not wiped out Don's extraordinary code proficiency. He mastered code better than anyone else in the history of CW operating. "It's still banging in my mind - even better, purring like a cat, itching at night," he said.

<naw, that's Ben Dover next door !>

It took some effort and searching to find Don and to make the prison gates open for a first amateur eyeball with him for the past twenty years. There he was standing - an idol of the entire DX community for almost a decade. Don was physically in great shape since he was exercising every day.

<yeah, from running away from the REAL inmates !>

He was mentally sharp, working on several specialized subjects related to his medical profession. He was involved in efforts to combat the drug problem - a major problem in many prisons. Don Miller was found thirsting for new life and freedom. He was found searching for that Samoa girl whom he had once planned to marry. He was ready to re-establish his contest records and set up a contest site on Fiji, the island he had fallen in love with. But many years will still need to pass - and that massive 5-inch gate is very demanding until it finally opens up for him. God bless Don Miller.

<Lame is a coo coo>

In 1980 Don was convicted of conspiring to murder his estranged wife, and is currently serving a term of 25 years to life in
a California prison. - ed. VP2ML

BWA HA HA HA That's as beautiful as the FCC Dirty Digest !

I guess we've got to be patient...

Seriously, I rather doubt this war will last much longer. I'll bet mail will be flowing to Belgrade before mid-July. Hams are also pretty good at ignoring politics, so I'll also bet YT1AD won't have any problems forwarding HU4A QSLs once the mail is flowing again.

It is rather ironic that the last major DXpedition to a Central American country (and one with good relations with the U.S.) was run by Europeans!

If you mean ham radio DX, I would not recommend concentrating on any specific frequencies. DX can be found throughout the amateur bands, and sometimes the rarest countries are found where you least expect them!

Major expeditions do seem to prefer 14.190-14.200, 21.290-21.300, and about 22-24kHz above the bottom of the band for CW. But even those you sometimes find somewhere else.

SB DX @ WW $OPDX.408
Ohio/Penn DX Bulletin No. 408

The Ohio/Penn DX PacketCluster
DX Bulletin No. 408
BID: $OPDX.407
May 10, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1XN & The Golist, KH2/N2NL, KF2TI, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, N6RT, K8YSE, DJ5AV & DX News Letter, DF6VI, DL3APO, F6AJA & Les Nouvelles DX, G4BUE & DX News Sheet, G0REP, HJ3PXA, LA9VDA, LU4AAV, ON5FP, OZ1PIF, RW1QM/1, UN5PR, UT1HT, VK4NM, VK1TX, YO3FWC and ZS5BBO for the following DX information.

FEW NOTES FROM EDITOR, TEDD, KB8NW: Because I will be attending the Dayton HamVention, I cannot guarantee that there will be a bulletin next week. If it does happen, it will probably be late Monday. Please, continue to send your information (you never know!).
Just a reminder! The Northern Ohio DX Association (along with WVNO Radio) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel (old Stouffers) on Friday and Saturday evenings. All DXers/Contesters are welcome. Munchies and refreshments will be avaialble. Come and meet the members and friends of NODXA.

2S, SCOTLAND. Chris, GM3WOJ, reports that to celebrate the opening of the new Scottish parliament, the first in 300 years, the North of Scotland Contest Group GM2MP/GM7V will be using the special prefix "2S" and will be signing 2S2MP during the period of May 6th through July 31st. The group will be active from several different QTHs on different bands to give everyone the maximum opportunity to work this rare prefix. Their activity started this past weekend on 15 meters. QSL cards for ALL QSOs will be sent out VIA THE BUREAU only later in 1999. 2S2MP does not collect QSL cards, so PLEASE DO NOT SEND a QSL card. You will receive a 2S2MP QSL card if you make a QSO.

5N, NIGERIA (Update). OPDX received a message this week from Stan, OK1JR, currently active from here, stating, "Greetings from Nigeria and I want to say hello to OPDX readers. We just finished with 5N99 prefix. I hope I made happy all HAMs looking for 5N as a new one." Stan goes on saying he

made 10,000 QSOs which includes activity on 40/80 meters. He states that he also made 1000 RTTY QSOs using the BTL software along with his multi-media sound blaster and notebook computer. Stan will be active until the end of the May, but using the callsign 5N0MSV. Look for him between 1500-0100z on 80-10 meters CW/SSB/RTTY. QSL via home callsign OK1JR: Stan Matejicek, Moskevska 1464, 101 00 Praha 10, Czech Republic

9M2, WEST MALAYSIA. The "DX News Sheet" reports that Johnny, G3LIV, will not be active May 4-24th as 9M2/G3LIV from Pulau Penang as announced. The reason given was a change in the licensing authority by the Commission as of April 1st, which means he has been unable to obtain a license.

AX3, AUSTRALIA. "The 59(9) DXReport" states to look for AX3ITU May 17th from Melbourne during World Telecommunications Day. QSL via VK3DYL. Actually, look for each call area to be active during Australia's ITU Day. Look for AX1ITU, AX2ITU.... etc.

DAYTON DXERS/CONTESTERS EVENT.....
The 59(9) DX Report, Western New York DX Association and Rochester DX Association will host Hospitality Suite 325 at the Crowne Plaza Hotel during the Dayton Hamvention next weekend. Stop by for an eyeball and a cool one Friday and Saturday evenings from 8 PM onwards. Meet your fellow DXers and have an eyeball with some of the DX gang you worked lately. You never know who will show up. It is always a good time and enjoyable for both the Big Guns and Little Pistols. All are welcome.

FO, MARQUESAE ISLANDS (Change of plans!) The "Les Nouvelles DX" reports that some planning changes have taken place by Alain, F2HE. Alain will leave from France on May 19th and he will be in Marquesas on May 26th. He is also supposed to go to the Australes Islands. Please refer to OPDX.406.

FR/G, GLORIOSO ISLAND. Several are reporting that Henri, FR5ZQ, will be active again from here sometime in May/June as FR5ZQ/G. However, Bernie, W3UR, editior of "The Daily DX" reports that he received information from Flavio, IK2IQD, stating Henri, will arrive on the island of Glorioso May 8th. He will be active on 80-10 meters CW and SSB for 4 weeks. He will be working on the island and will be on the air in his spare time. The following suggested frequencies were given: CW - 28023, 21023, 14023 and 7003 kHz --- SSB - 28480, 21230, 14180, 7050 and 3770 kHz. No WARC frequenices were given, but he will be on the WARC bands. Also, in the report it was mentioned that Henri will show up on 14180 at 1500z. It is not known if this is a list operation or not. QSL direct to FR5ZQ CBA.

HB0, LIECHTENSTEIN. A group of Germans will be active from here June 19-25th. They report that their QTH there will be 2000 mt ASL. Their callsigs will be HB0/DF6VI, HB0/DL1FDH and HB0/DL4OCM. They will be active with 3 stations on simultaneously, each with about 800 watts output into several antennas on 160-6 meters on CW/SSB/RTTY. QSL via their home callsigns.

JW, SVALBARD. Look for DF6VI and DL4OCM to be active from Spitzbergen, August 9-15th. Their callsigns will be JW/DF6VI and JW/DL4OCM. They will be active on 160-10 meters on CW/SSB/RTTY. QSL via their home callsigns.

HC8, GALAPAGOS ISLANDS. Look for Trey/N5KO, Ken/K1EA, Steve/K6AW, Jon/ N0JK, Ralph/K9ZO, David/KM3T and Robert/N6TV to be active May 26th through June 2nd from San Cristobal Island. Their activity will include the CQ WPX CW Contest. Callsigns were not given. Look for N0JK to be active on 6 meters with 100 watts and a Yagi. A beacon will be on 50.110 Also, look for him on the satellitea outside of the contest.

IOTA NEWS.....
EU-032. From July 21st through August 4th, look for Marc/ON5FP and Kristof/ON6NN to be island hopping (inclusive IOTA contest) in the French EU-032 group using the callsign TM1OTA. Their aim is to activate the islands of: Re, Aix, Madame, Fort Enet, Fort Louvois and Oleron (which will be their home base). QSL to ON4ADN either direct (Geert Decru, St Laurentiusstraat 18 8710 Wielsbeke, Belgium) or via the UBA bureau.

EU-128. Mario, DJ2MX, will be active from Fehmarn Island, May 16-19th. He promised to pay special attention to VK/ZL and Pacific areas. The Fehmarn Island is also valid for DID as O-01. QSL via bureau.

EU-156. Hubert/F6HKA, Didier/F6ELE and Mauricette/F8BPN will be active as homecall/P from Tombelaine on May 30th from 0500-1500z.

NA-046. Henry, KE1AC, will be operating from Nantucket Island, (Nantucket County, Massachusetts, MA-007S) on May 12-13th. Look for him on the SSB IOTA frequencies. Henry will use a Kachina 505DSP w/100 Watts and a Force 12 C3SS antenna. QSL via home call.

NA-134. Michel, OX3LG, will be active on Asiaat Island, Greenland, from May 10-20th. He will be active on 6/10/15/20 meters, work schedule and propagation permitting. QSL via OZ1PIF: Peter Frenning, Ternevej 23, DK-4130 Viby Sj., Denmark

NA-151. Michel, OX3LG, will be active June 15-30th from Angmasalik Island, Greenland. Activity will be the same bands and limitations as his NA-134 operation. This visit should also see the new 6m beacon activated. QSL via OZ1PIF.

L2, ARGENTINA. Horacio, LU4AAV, is another station that will active as L24AAV between May 16th (0000z) and May 23rd (0000z), CW/SSB on all bands. This will be during the celebration of 75th Aniversary of the World Record of Distance in 1924 (please refer to OPDX.404). QSL via the bureau or direct to LU4AAV: Horacio Cilmi "Hoc", Navarro 5078, 1419 Buenos Aires, Argentina (w/ SASE). For questions send E-mail to: luaav@mixmail.com Also, look for LU1DK, LU2JCW, LU5FCI and LU8EEM during the celebration as L21DK, L22JCW, L25FCI and L28EEM, from May 16-23rd, on all band (SSB). QSL via F6FNU.

P3, CYPRUS (Update). Harry, UN7FZ/UP6F, informs OPDX that the P3A Team (RA9JX, RZ3TX, UA9MA, UA3DPX, UA3AB, I2VXJ, RW3QC, UT7QF, RX4HW, RU3DX, UA9CDV, UN7FZ) will be active during the 1999 CQ WPX CW Contest as a Multi/Multi category. QSL route is via W3HNK. QSLs for operations before and after the contest for contacts with teams signing 5B4/homecall, must go to home callsigns.

QSL INFO AND NEWS.....
E44DX QSL Cards at Dayton! "The Daily DX" reports that the QSL cards for E44DX, the first DXpedition to the new Palestine, will be available thanks to the assistence of the Northern California DX Foundation (NCDXF). At the Crown Plaza Hotel, a table will be set up on Friday night just outside of the DX Dinner Banquet. Bernie, W3UR, Editor of "The Daily DX", reports that the labels have all been printed and the group will have only the U.S. labels and QSL cards. To see a sample of the QSL card, check the Web page:
http://www.dailydx.com/graphics/e44dx.htm
For those who are unable to attend, and VEs and DXers from other countries, the QSLs will start to go out around June 1, 1999.

E44/HA1AG QSLs are going out! Zoli, HA1AG, reports that the first 2500 direct QSLs have been mailed. Early next week another 7100 will follow. The logs for this expedition are available at the Web site:
http://www.okdxc.cz/e44
Also on this page, you can also catch a glimps of the QSL to appear in your mailbox soon.

The latest edition of "The 59(9) Report" states that effective April 5, 1999, the U.S. Postal Service has suspended delivery to the following countries: YA, 9U, 9Q, J5, EL, P2 (Bougainville only), 9L, T5, and YU.

OOOPPPSS!! The dates for the FO0XUU operations in last week's bulletin were listed wrong. Please change the date for the Marquesas operation to January, 1999 and the Australs to Februbary, 1999.

Tez, VK1TX, reports that the QSL Manager for Tom's (VK0TS) Antarctica operation is VK1PJ (Phil) NOT VK1AUS. Also, please send QSL cards for Tom's operation from Macquarie Island to the Inwards QSL Manager for VK1 Bureau, to VK1TX c/o VK1 QSL Bureau as of now. Address is:
WIA VK1 Bureau, Box 600 GPO, Canberra City A.C.T. 2601, Australia

The special event station EN125H that is active between May 6-9th, CW/SSB/RTTY on all bands, was on in celebration of 125 years of the "Kriukov Railway Car Building Works". QSL via UT1HT, P.O. Box 87, Kremenchug-21, Ukraine, 315321 or via bureau.

HK3DDD ADDRESS CHANGE. Rob, HJ3PXA, reports to "Please take note that well known all time Malpelo QSL Manager, HK3DDD, BETO , has changed his address". The new address is: Edilberto Rojas Mosquera, POB 170151, Bogota, COLOMBIA.

SAVE YOUR MONEY. The station active as YA1R several months back who gave the QSL route as RW3LO is a pirate. According to RA3LZ: "Callsign RW3LO has never existed".

Doug, N6RT, reports, "The final S79FAG, S79YL, and S79ZG logs are now online at: http://dx.qsl.net/logs
Several hundred QSOs were missing from the logs before the final update.
If you think you should be in the log and you were not, check again."

UP54P was a special event station to celebrate the 54th anniversary of victory in WWII. QSL via UN5PR direct: Romeo Y. Loparev, P.O.Box 73, Temirtau, 472300, Rep. of Kazakhstan.

NOT A QSL MANAGER! W3CU is the club station callsign for the Maryland Mobileers Amateur Radio Club. Russ, N3GT, Trustee for W3CU, states, "We are not QSL managers for anyone. It is possible that the previous callsign owner was."

YO99JP was a special event station (isssued by the Romanian Amateur Radio Federation) and was active in celebration of the Pope's first visit in Romania. Pope John Paul II was present in Bucharest May 7-9th. QSL to YO3KPA via bureau. More information on the Romanian Amateur Radio Federation can be found on the Web site:
http://www.qsl.net/yo3kaa

SV9, CRETE. The "DX News Sheet" reports that Drew, GM3YOR, will be active May 15-28th as SV9/GM3YOR while on holiday. He will operate CW mainly on the WARC bands, but also 160 and 80 meters (13kHz up) if conditions allow. QSL via home callsign.

TM, FRANCE. F5JBR will be active as TM0AI from May 23rd to June 6th. This will include CQ WPX CW Contest.

V3, BELIZE. Bill, W2WC, will be here May 11-14th, and plans to be active from V31GM's QTH in Punta Gorda. No callsign was given, but there was some mention of him possibly working the digital modes. QSL via home callsign.

WH2, GUAM. Dave, KH2/N2NL, informs OPDX that he will be active as WH2/N2NL in the CQ WPX CW Contest as a Single Op/All Band entry. QSL via W2YC, direct or via the bureau is OK. Cards sent directly to his Guam address will be answered, but the turn around will be much longer than via his QSL Manager W2YC.

YM0, TURKEY (Attend Prefix Hunters). The "DX News Letter" reports that DL6DB, DA2KT, DJ2JH, DL4DN, DL6BK and DG1NPM should be active as YM0S from Bozcaada Island (AS-099) now until May 14th.

YO, ROMANIA. Jean Michel, F6AJA, will be active as YO/F6AJA from May 17-22nd from YO8FZ's QTH during his free time. Jean states, "It's NOT a DXpedition of course."

> I just finished giving my seven year old his code lesson. He's learning the
> code to earn a award in his Tiger Cub Scout group. He is a seven year old
> that came to me to learn the code, and has no interest in radio,

Well why not FORCE him to learn about radio before he can use morse
code? It is ok for him to want to learn Morse Code and not anything
about radio, but not the other way around?!

I would
> think that anyone who is interested in radio should stop crying about it and
> donate the 15 minutes a night for 2 weeks, and learn it.

If your son doesn't have to learn or like radio to enjoy Morse Code,
then people who want to use or like radio do not have to learn Morse
Code.

> No one complains about having to learn how to use windows before they can
> surf the net....

Of course not, no one complains about having to learn how to use a ham
radio before surfing the repeaters either, but what if you made them
learn Russian before they were allowed to use the internet? Then you
would get the same complaints.

The best analogy would be having to learn Morse Code in order to use the internet, as Morse Code has as much to do with knowing how to operate and work the internet as it does with knowing how to operate and work a Ham radio.

I have great news for you! You CAN become a ham without learning Morse code. Looking at FCC Part 97, you can qualify for a Technician's license with only a written procedure and absolutely minimal theory test. No Morse code test!

It seems your wish has been granted, and quite some time ago at that. Run on over to your nearest VEC testing facility. There's no need to stop to thank me.

Michael.

After mail gets to island it can take 4-5 weeks for station to get the QSL card. Their post office is not like Europe or USA that means 10 weeks to get and send off the island. THEY are in no hurry there. When I was P40AV that was what I was told by the locals.

But Don did say he was operating mobile CW; best *not* write it down, methinks!

I'm a bit in between; write down name, qth, rst, etc. -- but usually head-copy the rest.

Agree!

> And speaking of slower speeds, people that copy only
> in their heads have difficulty with copying 10 wpm qsos.

And with that: Too slow and you cannot copy words, only letters; then I must write it all down.

Phil

Learning morse code is like having to learn to program in binary before you
can turn your computer on or learning to ride a horse before you can get
your driving license just so you can relate to horse power.

Bring back the dark ages too!

You have to learn window before using the Net. Gee did not know that.
Indeed I know plenty of Net users that don't do windows. but then if
it were true that you did it is not likely that we would hear much
from them.

But My My the Federal governement requires knowledge of windows in
order to surf the net. I never knew that Thanks for telling me

Hi,

today I added the stroy of my C56EL trip to the homepage.
You can also check if you made it into the log.

here's the adress : http://user.online.be/~frankyb/c5-dxped.htm

I still receive a lot of mail concerning the correct mailadres....
the adres is
Franky Beuselinck
Oostmolenstraat 95
B-9880 AALTER

those who send it to "Ekenakker 12", do not re-QSL, it's my mothers
place and she gives
me the cards without opening the envelop....hi.
Also those who send QSL to Oostmolenstraat 97, do not re-QSL, they
renumbered the street
a few months ago, and the postman is informed about the DX-mail....

My understanding of why we still have morse code as a requirement is simply because of international agreements. In order to work DX, the ITU still requires a code proficiency. What speed varies with the country issuing the license, so the FCC could easily reduce the speed, but there would still be the minimum requirement.

I consider myself an "appliance operator" and haven't used code for a long time. I am one of those that would like to see it dropped as well. We are not preserving a tradition, trying to keep anyone out, or making ourselves an exclusive group. Amateur radio should advance the radio art, have a trained pool of operators for emergencies, and improve international relations. These can be done without CW, but until the ITU changes its policy, the FCC has no choice.

From: dgware@voicenet.com
Message-ID: <3737b9a5.4915018@netnews.voicenet.com>
Source record: 24977

Here's one for you.

I've been a tech+ for about 3 months now working CW on the novice bands (where else?) mostly on 40 meters. The majority of the people I end up QSO'ing are Xtra's and some advanced and generals. Of 40 contacts so far only 1 has been a novice and 2 have been tech + .

Where are all the slow guys ?
Are all the tech's hanging out on 2 meters ?

Could my CQ's be too fast and scaring people off ?

Just curious.

Many South American countries have very unreliable mail systems (theft, etc.) It is very common to give bulk mail to persons traveling to other countries that have better systems. Much as we may complain about our U.S. Post Office, it is one of the most reliable (and inexpensive) systems in the world.

1432. FT-50R vs VX-5R

Newsgroup: rec.radio.amateur.dx
Date: 1999-05-11 00:00:00 UTC
From: Joe Humberger <KB9TFH@MichianaToday.com>
Message-ID: <01be9b60$a02fb780$4a9cead0@Cyberlink.MichianaToday.com>
Source record: 24982

Hello,
My name is Joe Humberger and i a Ham in Northern Indiana, I am looking to buy a new HT. The two hts i am looking @ are the Yeasu FT-50R and VX-5R. I was woundering if somone could compare these for me. I am NOT looking for the reasons like "one is triband and the other is dual band" But i AM looking for "one has a better audio"... Thanks

73sss Joe Humberger KB9TFH

In regards to this, I have two CW related questions:

1. As a Technician (not Tech+) operator, can I operate CW on 6 meters or even 2m?

2. How should a CW CQ be formated? (ie: CQ CQ CQ KC8KZY CLG CQ)

I'm studying code now, but have found that using my key is the best way. It would be great if I were allowed to transmit for sure, and maybe make actual QSO's. I don't see any concrete answers to these questions in the Handbook, so any help would be greatly appreciated. Thank you in advance.

Neither of these sets will work DX, Joe. I suggest that you try
another radio or another newsgroup.

Hello All! Especially Canadian Island Award Chasers!

I will be activating 2 islands on June 5, 1999. Starting at about 1700Z I will operate from ON-149 (Bobcaygeon), and then at about 1800Z I will relocate to ON-NEW (Buckeye Centre) and operate from there for a few hours.

I will operate using my call, and will only be on these islands on June 5 this trip.

Hope to work many of you then.

VA3JFF ON-149 Bobcaygeon June 5/99 1700Z-1800Z 14.260 +/-
ON-NEW Buckeye Centre June 5/99 1800Z-????Z 14.260 +/-

Thanx.

I've recently been bitten by the contesting and DX bug. I know that a headset/boom mike combo can help by leaving my hands free for other functions.

Last year at Field Day, I had a chance to use a Heil Proset-4 with a footswitch for PTT. I really liked it.

The problem is the price of new Heil products. And to add to the complexity, I have not seen any similar products offered by other manufacturers.

I know that hams out there must also be using other brands of headphones.

QUESTIONS
==========
1. So , what headphone/boom mike combo are you using?

2. Where can I buy these other brands?

--Thanks!
Scott, KD5CAS

If you did ANY amount of contesting you would have realized that the Heil's are worth the money. I have done some contesting with other brands and will stick with my Heil's. Buy the foot switch at Radio Shack, but spend the extra money on the headphones. Probably nothing will drain your energy faster than headphones that are too tight, have lousy adjustments etc. What part of the radio are you connected to? Think of it that way.

The technician license does NOT allow you to use ANY of the Ham bands
below 6 meters. Thus you DO have to pass a Morse Code test if you want
to be a HAM without restrictions. A technician license is like a
fishing license that only allows you to fish in a small fraction of
small lakes. Only you don't have to know Morse Code for the fishing
license with no restricions on lakes.

> any good reasons not to....

Well if they would replace the Morse Code with Russian and make you learn Russian with a test to keep your HF priviledges, I'm sure you would be posting some comments on how you don't understand why you need to learn Russian if you only plan to use English. And then the Hams that allready KNOW Russian would tell YOU to shut up and stop complaining and posting as they aren't looking for any good reasons not to have to learn Russian.

There are going to be a lot of posts to newsgroups that don't happen to have subject matter that is of personal interest to you. Lots of YOUR posts will not have any interest to lots of other people too.

Read the threads of the subjects you find interesting and skip over the ones you do not. Seems like a lot of wasted time to reply to threads that don't interest you.

Ham radio has changed. Packet, Satellite, R/C, television, and so much
more had nothing to do with what you said above. Perhaps all wood
workers should be required to be able to use old hand made tools of the
1800s before they are allowed to use modern power tools for the same
reason you gave.

Knowing that one has gone through, and survived, the identical
> trials and tribulations of his or her counterparts, builds a unique bond of
> dedication and purpose.

If I want to wash my clothes, I would find no bond of dedication or
purpose by using a washboard. I would prefer to use a washing machine
and dryer, and would not appreciate being forced to perform a test using
the washboard before I am given the PRIVILEDGE of being allowed to use a
washing machine. Would you? Or are you one of those lazy people that
think they should be allowed to use Washing Machines without ANY sort of
a test? How would we be able to keep CB'rs from using washing machines?

The instant gratification crowd of today has no
> appreciation for that bond.

Better sell your car and walk to work, don't use that Microwave oven either as that is for instant gratification and convienience too. Get out those two sticks, rub them together, and cook your food the hard way.

Using Morse Code was at one time an instant gratification and convienient thing too over writing and sending a letter pony express. Did people despise Morse Code back then because IT was more convienient and gave instant gratification?

All inventions give us convienience and instant gratification. That is a GOOD thing. Civilization finds better more efficient ways of doing things. Wanting to find an easier and better way of doing things is intelligent. Finding ways to make things more difficult is idiotic and stupid.

You appear to be so engrossed in your efforts to convince the rest
of the world that you are incapable of attaining anything in life that
requires effort that you seem to have totally missed the point.

The reason we have thousands of newsgroups is because the world is
filled with millions of people with different interests.

Although your inability to learn Morse code seems to be the current
focus in YOUR life, the rest of us don't necessarily view your lack
of motivation as an earthshaking event.

REC.RADIO.AMATUER.POLICY was created with the sole intent
of giving you a forum in which to air your views. Please feel free to
use it to your hearts content.

Posting your Morse code dribble in multiple newsgroups is not going
to gain you any support. Many unmotivated whiners before you have
proven this point.

Some people have things they want in life because they are willing to
expend the effort required to obtain those things, whatever that effort
may be. It is obvious to us that you are not one of those people.

What apparently is not obvious to you is that the rest of us don't care.

You all contribute to the thread, so you DO all care, else I would be
the only one and there would be no thread. I did not start the thread,
and it appears to be the most popular topic here right now. Even YOU
can not resist reading and replying to this.

Scott - KOSS makes some good headsets, many times under different distributors' labels. For example, I just wrapped up working alongside the firm, RACING ELECTRONICS, for the California 500 NASCAR auto race. KOSS makes a very comfortable noise-reducing headset (25dB) for about fifty bucks. And professional models with boom mike are about $239.00.

Dear HAM's:

www.lu4aa.org

75th ANNIVERSARY r-CB8 & z-2AC QSO

Next May 21st. will be the 75th Anniversary of the historic QSO between
Carlos Braggio, r-CB8,
Buenos Aires, Argentina and Ivan O’Meara, z2AC, Gisborne, New
Zealand; establishing on 1924 the
World Record of Distance.

The Radio Club Argentino wishes to celebrate this, and invites the Ham
community all over the
world to join us participating in the commemorating activities of the
event.

The following program, sponsored by R.C.A. will take place the week from
May 16th to May 23th,
1999.

1.) R.C.A. official station will be on the air with the Special Call Sign
L75CB. All contacts
made with the official station will be confirmed with a special
commemorative QSL card.
2.) On May 21st. the anniversary date of the World record, L75CB will be
on the air 24 hours
continuosly on CW, transmission mode used by Braggio and O’Meara to
make the contact. An
special commemorative award will be issued to all stations that work
L75CB on that day.

L75CB QSL s via LU4AA. Bureau or P.O.Box 97-1000 Buenos Aires, Argentina.

3.) During the week of the event, all argentinian stations will be
authorized to operate with
special prefixes:

LU stations: L2

LW stations: L3

&#65533;
AZ stations: L4
&#65533;
4.) We encourage the amateur radio community all over the world to join
us celebrating this
event, and we hope to see you on the air.
&#65533;
Comments to LU4BR - Project Coordinator.
lu4aa@lu4aa.org
73 & DX
Radio Club Argentino
&#65533;

SPECIAL AWARDS PROGRAM SPONSORED BY THE&#65533; RADIO CLUB ARGENTINO

"75&#65533; ANNIVERSARY OF THE WORLD RECORD OF DISTANCE BETWEEN CARLOS BRAGGIO, r-CB8, BUENOS AIRES, ARGENTINA, AND IVAN 0’MEARA, z-2AC, GISBORNE, NEW ZEALAND"

GENERAL RULES

1) This awards will be issued to amateurs and SWL&#65533;s all over the world.

2) All bands and modes may be used.

3) May be contacted stations with the Special International Prefixes L2, L3 and L4, from 0000 UTC May 16th to 2400 UTC May 23rd 1999.

4) Fee is u$s 8.= or 10 IRC’s each Award. (Free for Radio Club Argentino members).

5) GCR List (no QSL needed) to:

AWARD MANAGER
Radio Club Argentino
P. O. Box 97
1000-BUENOS AIRES
Argentina

"CARLOS BRAGGIO, r-CB8, AWARD"

Contact station using different Special International Prefixes L2-1 to L2-9, L3-1 to L3-9 and L4-1 to L4-9. There are 4 classes.

Platinum = 20 Special International Prefixes.
Gold&#65533;&#65533;&#65533;&#65533;&#65533;&#65533;&#65533; = 15 " " "
Silver&#65533;&#65533;&#65533;&#65533;&#65533;&#65533;&#65533; = 10 " " "
Bronze = 5 " " "

The official station of the Radio Club Argentino L7-5CB may replace any Special International Prefixe you need.

&#65533;

"IVAN O’MEARA, z-2AC, AWARD"

Awarded for making contact with stations using Special International
Prefixes in 4 classes.

Class I = 300 different stations.
Class II = 200 " "
Class III = 100 " "
Class IV = 50 " "

The official station of the Radio Club Argentino L7-5CB count as 5
stations.

"75 ANNIVERSARY OF BRAGGIO-O’MEARA QSO AWARD"

Contact stations using the Special International Prefixes L2, L3 and L4.
The points credit is as follow:

L2-4AA = Allow 24 Points.
L3-5DZ = Allow 35 Points.
L4-1ZZ = Allow 41 Points.

There are 4 classes:

Superior = 2500 Points.
Special = 1500 Points.
Notable = 1000 Points.
Extra = 500 Points.

The official station of the Radio Club Argentino L7-5CB allow 75 Points.

So, dear friends, I hope to listen you on the ham bands. About me, I
will be active with the special call L38EZU on 10 and 80 meters, and
maybe from the local club station LU7DCE (L27DCE), Radio Club Junin also
on 10 and 80 meters. Greetings and I hope to hear you on the bands!!!

Sir writes:

> What about it? Code test required.

Yup! I'm a + and will soon be a General<g>. CW is really addictive and it's amazing what you notice once you learrn it. Just the other day I was watching a AAMCO Transmission commercial on TV the other day. Their motto is "Double A, beep beep, M, C, O", it subconciously dawned on me that the "beep beep" is Morse for the M <g>. It's also nice to finally be able to know what the repeaters say when they ID.... it's not always just the callsign :) Anyways, CW may not be for eveybody, I guess that's why we have different license classes. There is a place for all of us in ths hobby!

Steve,

TK prefixes are used only by hams from Corsica. Corsica is a french island but they use other prefixes than the F ones used for metropolitan stations (we have also HW and TM prefixes on the ITU allocation blocks).

For the DXCC award, Corsica(TK) count for one entity and France, obviously, for another one !

Metropolitan France is divided into 95 departments. Corsica counts for 2 departments (2A and 2B) in case you would like to submit QSL for the DDFM award (contact one station in each french department).

For further information on French Award (award = diplome in french) you can check the REF web site (in frenc only at this time) at :

www.ref.tm.fr

Jeff,
You are a contemporary example of a ham who put in an honest effort at CW instead of shying away from the work, and then found out how much satisfaction the mode affords! Good luck on your upgrade; CW operation is the best way to upgrade your code proficiency. Enjoy your hobby!

I didn't like the isolation type headphones, so I use a headset / boom mike like the ones you see on HT's. salvaged it from a telephone set. Steal some power from the microphone controls, or on many rigs there is already bias on the line. Use mine on my mobile and my base. Have under $15 in the entire set up. At a hamfest I bought a "computer" set of headphones with an electret mic for $5 still in the original package, but have not hooked up to the radio yet. I tested it with the computer and found the audio was fine in both directions.

5WPM isn't impossible. And there are currently efforts to make the
maximum 12WPM. Kind of frosts me when I think about it but I'm glad I got
my 20WPM over and done with.

sez...
[extra stuff deleted]
> Every time the DX spots begin appearing on my screen, I always wonder "what
> did I _just_ miss? What spots were reported 10 minutes ago... 1 minute ago"?

Using a DX cluster need not be a passive excercise on your part. Learn
to use the commands such as:

SH/DX - shows the last five DX spots
SH/DX/10 - shows the last ten DX spots
SH/DX/10 20 - shows the last ten DX spots on 20 meters

The "?" command should display a list of the available commands (clusters
have a core of common commands, but some clusters have additional
commands that are available locally such as displaying the GO list, local
news and info files, callbook queries, etc.)

The "H" command (i.e. H SH/DX) displays help for a particular
command.

Enjoy!

Lets talk about some REAL DX!!

SETI@home is a scientific experiment that will harness the power of
hundreds of thousands of Internet-connected computers in the Search
for Extraterrestrial Intelligence (SETI). You can participate by
running a program that downloads and analyzes radio telescope data.
There's a small but captivating possibility that your computer will
detect the faint murmur of a civilization beyond Earth.
Download at this site. http://setiathome.ssl.berkeley.edu/

It's your chance to help find ET "FOR REAL"!.
The program works as a "Really Neet "Screen saver when you are not
using the Computer.
Check it out, it the Biggest Fox Hunt in the Galaxy.

1490. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-05-16 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7hlsr1$1m1@news.Hawaii.Edu>
Source record: 24741
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.digital.misc

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH6O, (jeffreyh@hawaii.edu), or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL

bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas.

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send email with the word "subscribe" on a line by itself to cq-contest-request@tgv.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to

dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's headers (before the first blank line). This will cause followups to your

article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

I also use a MAC and will continue to use a MAC. Online, You can access two callbooks - Buckmaster and QRZ. " www.qrz.com " and "www.buck.com".
Also many dx callbooks are available at "www.qslnet/kt4or/links/qslinfo.html".

There is also an index with many links that might help you at "www.ac6v.com".

Depending on the MAC you own, you might also purchase a program such as Virtual PC '95 which can run flying horse callbook and all the others on your MAC. But ask for assistance. For instance. I had to buy Virtual PC '95 and not Virtual PC '98 to run my callbooks.

Hope this has been helpful. Joe W1DEE

What a bunch of geek LOSER perverts KA9FOX and his fellow hen-pecked ham husbands were at this joint. What macho men you guys were. You can now return home and show your wives what studs you are (and they will say to themselves if you ever touch another woman I'll break your flabby ass).

These girls were laughing (all the way to the bank, they thought until they got their CHEAP ham TIPS) at these dorks.

I figure most of these jerks go to church on Sunday with their wives and then probably cut drivers off and bird them !

http://www.qth.com/sos/dayton99/sos-group1.jpg

NOTE the CALLSIGN BADGE in the restaurant on WV9T, if the picture doesn't speak for itself... Would they like their daughter to be ogled by drunk hams some day ?

Cutting here -n- there from all the threads:

> What if you wanted to play the flute, but a law required that you learn
> how to play the harp before you were allowed to play the flute?
>
> What if you didn't like the harp and only wanted to play the flute, and
> other flute players called you lazy for not wanting to waste time
> learning an instrument you had no intention of ever playing?
>
> They have no desire to use morse code. How silly it would be to waste
> the time to learn morse code, only to forget it once one has the license
> to go ahead and use voice.
>
> Only people who intend to USE morse code should learn it.

90% of the automobile drivers out there don't intend to use anything
they *learned* to get their drivers license, why not drop that
requirement too? Just let 'em all drive, drop the roadtest
requirement!

>That's ok we can argue all we want about keeping the code test, but something
>needs to be done to bring people into amateur radio not keep them out.

Ever stop to think that maybe the government intended to keep some
people out? Why not drop the code requirment for commercial broadcast
while we're at it?

>I suspect the same small fraction of 13 year olds are still learning code. Like many
>things that require a little work up front, CW is worth it.
>73

And worth some pride too... ever heard of the rite of passage. Why
not do *something* you can take pride in instead of changing the rules
so you don't have to apply hardly any effort?

> If you're not wired for it, there are many other modes to use. That is one of the
> beauties of ham radio.

Absolutly!!! The whole spectrum above 50 mhz is wide open for those
who have no interest in CW. You knew it before you got into radio...
So what's the problem? (but be forwarned... you'll hear alot of CW
there too. Moonbounce, contesting, etc.)

>The key to keeping code from dying is those of you who are proficient MUST take
>those of us willing to learn under your wing and pass it on to us....

Seems all the *old Timers* around here left me to my own devices...
Wonder *how* I did it..... hmmmmm

>If you efforts to find someone in Ft. Worth fail, Why dont you and your
>buddies get on the 2 meter radio and teach each other?

5 wpm is NO CODE. It's like an open book test. If you *try* to learn
the code with *any* effort at all, you *will* pass the 5 WPM test.
From there you'll meet hundreds of others in the same boat on 40 & 80
mtrs.
Plenty of practice to hone your skills. I had a problem getting over

10 wpm myself once licensed as a P, but got on the air with a friend
of mine for an hour a nite over the period of a week, pushing
ourselves to the limit, and passed General that weekend. *USE IT* once
you get it.

> I have the skill to pass the practical test (and have with the training software) through
> Advanced, yet I hold only a Tech ticket because of the code. I am still trying but I
> haven't found my method for learning code yet. I memorized the tapes, and have tried a
> couple of different computer tutor programs, but so far I have not been able to master
CW.
> I will get it eventually, but it is not coming easy.

Sounds about normal to me...
if you study... it will come......

>If your son doesn't have to learn or like radio to enjoy Morse Code,
>then people who want to use or like radio do not have to learn Morse
>Code.

Did you're mama ever say "who ever said life was fair?" Just 'cause
you want to learn gun handling doesn't mean you have to kill someone.
I don't have a son, but I have to pay school tax.... WHAAAAA!

Hope I hit a few sore neves here. Amateur radio isn't the only thing
in life that will require you to learn something proficiently to do
(unlike my spelling to post to the group).

Take a look back at all the things that got lax on the rules in the
past and see what happened to them. Do you really want amateur radio
to go that route?

The hardest part about learning the code is to just put away all
the excuses you have as to why you < can't / don't have time for /
shouldn't have to / are just to darn lazy to > learn the code *and do
it.*

Next thing you know, after they start packaging up an extra class
radio amateur operators license in all the HF radios (sound familiar?)
They'll be whining that the FCC should abolish CW off the airwaves
'cause they can't handle not being able to understand what is going on
on the bottom half of the band.

I might could stomach letting a small portion of the prime DX bands go for the slow coders (P's),and leave the rest of the licese structure alone. But I hope at least that they leave the extra class alone so that *some* of us can keep a little pride in something that we *worked for* instead of crying about it 'till we got it for next to nothing.

If anyone out there is interested in *learning* CW and going to EXTRA in 6 months, e-mail me. All it requires is about 4 hours a week of *dedication*... You have to *want to do it* to do it.

The others.... FLAME AWAY, got my asbestos boxers on.

Breaker Breaker x.19x.xxx.xxx, catch me on the bottom 150 khz of the band good buddy, c'mon back!

SB DX @ WW $OPDX.409
Ohio/Penn DX Bulletin No. 409

The Ohio/Penn DX PacketCluster
DX Bulletin No. 409
BID: $OPDX.409
May 17, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, AJ3M, W3UR & The Daily DX, N4VA, N5VT, N6RT, K8YSE, W9DC, A35RK, DJ5AV & DX News Letter, DL5KAT, DL9GDB, G4BUE & DX News Sheet, GM3WOJ, GM4YXI, IK1QBT, JA1ELY, JA1IST, LA0CX, LU9AY, ON6TT, OZ8AE, PA3GIO, SM7PKK, VA3JFF, VK8AV, 4L5O and 9A4KK for the following DX information.

4L, GEORGIA. Omari, 4L5O, informs OPDX that Georgia has two autonomy republics, Apkhazia and Adjara. According to Omari, only the following prefixes and suffix are good (anything else is a pirate):
1) Apkhazia (ex-UF6V) can use the prefixes/suffix: 4L1-4L0 and the first letter in the suffix "V" it means APKHAZIA.
2) Adjara (ex-UF6Q) can use the prefixes/suffix: 4L1-4L0 and the first letter in the suffix "Q" it means ADJARA.
For more details/questions contact Omari via E-mail at: 4L5O@caucasus.net

4U1UN, UNITED NATIONS. It has been reported that Mats, SM7PKK/5X1Z, and Peter, ON6TT/5X1T, will be active from 4U1UN on May 16-18th, right after Dayton. However, reports indicate that there are no antennas in place at 4U1UN for DXing. The only antenna available is a beacon antenna which is owned by the beacon group and not available for normal amateur use. LATE BREAKING NEWS.... Your editor talked to Peter at the Dayton HamVention this past weekend, and he told me that Mats and he will "definitely" operate from 4U1UN. He also said that there are antennas in place to use. Also, Peter and Mats will be traveling to Kosovo in about a week.

5P, DENMARK. The CEPT Amateur Radio Club will sign 5P1ER from the European Radiocommunication Office in Copenhagen during the CQ WPX Contest. The operator will be OZ8AE. All QSOs will be QSLed via the bureau.

6O, REPUBLIC OF SOMALILAND (Possible new one? WFWL!). You still have a few days to work Baldur/DJ6SI and Franz/DJ9ZB as 6O0X and 6O1Z, respectively. Operation is to terminate May 18th. DJ6SI will operate CW while DJ9ZB will operate SSB. They are operating from Hargeiza, the capital city. QSL

via their home callsigns. Somaliland declared independence from Somalia on May 18, 1991, although the independence of Somaliland has not been recognized by other countries. Somaliland has its own elected government and parliament. This is not enough to be added as a new "ENTITY" for DXCC. Somaliland must meet one of the three criteria (under DXCC Rules Section II Part 1): 1 - UN Member State; 2 - Assigned a callsign prefix bloc by the ITU; and 3 - A separate IARU Member Society. If anything, this operation "MAY" count for T5 or nothing for DXCC. As always, WFWL! More information about Somaliland can be found on the Web site at: http://www.anaserve.com/~mbali/home.htm

9H3, MALTA. Dieter, DL9GDB, will be active as 9H3UT from May 22nd through June 3rd, from Comino Island. QSL via DL9GDB via bureau or direct to: Dieter Brachmann, Kolumbusring 56, 18106 Rostock, Germany. QSL requests are possible via E-mail to: dl9gdb@t-online.de

A35RK SPECIAL REQUEST. Paul, A35RK, has recently been plagued with equipment and antenna failures and is in need some help getting new rigs, antennas, and parts to Tonga. If anyone is planning a trip to Tonga, and would be willing to hand-carry some "stuff" for him, PLEASE contact his QSL Manager, Bob Preston (W7TSQ) at: w7tsq@aol.com Or meet Paul and Bob on 14155 kHz at 0330z. Paul states that he will gladly pay all "over-weight baggage" charges and any other additional travel expenses incurred. Also, he will gladly "put you up" for free at his family guesthouse on Lifuka Island, Ha'apai, while you're there.

ATTENTION CANADIAN ISLAND AWARD CHASERS! Jeff, VA3JFF, will be activating 2 islands on June 5th. Starting at about 1700z, Jeff will operate from ON-149 (Bobcaygeon), and then at about 1800z he will relocate to ON-NEW (Buckeye Centre) and operate from there for a few hours. He will use his callsign VA3JFF on both islands.

CQ WW SSB CONTEST "October 2000". Chris, GM3WOJ, reports that the North of Scotland Contest Group (GM7V) is mounting a major expedition to the Shetland Islands for the CQ Worldwide SSB Contest in October 2000. They hope to sign a special callsign ??7V - a possible new prefix to identify Shetland from mainland Scotland - more details later.

CY9, ST PAUL ISLAND. The "DX News Sheet" reports that Robbie, VY2SS, and possibly 7 or 8 other VE and W operators will be active from here June 5-14th as CY9SS. Activity will be on CW/SSB, RTTY, SAT and possibly EME. Operations will be on 160-70cm (including WARC). QSL via VY2SS.

DX CONVENTIONS.....
The 8th Annual New Orleans International DX Convention will be held on Friday and Saturday, August 27 & 28, 1999, at the Royal Sonesta Hotel on Bourbon Street in the scenic and historic French Quarter of New Orleans, Louisiana, USA. The agenda is currently being assembled and details will appear in the future. The convention will include DXpedition presentations, technical presentations, reports on ARRL DX Desk and DX Advisory Committee news, and QSL checking by an ARRL DX Desk representative from headquarters. The activities culminate with

a gala banquet on Saturday evening at which the Convention Board of Directors' selection of International DXer of the Year is honored and the featured DXpedition presentation is given. A hospitality suite with a strolling balcony view of Bourbon Street is provided on Friday night and on Saturday night following the banquet.

The International DX Convention (in the year 2000) will be held at the Holiday Inn in Visalia, April 14-16th. To make early reservations call 209-651-5000. They have about 250 rooms and about 100 have been already taken.

DX1, PHILIPPINES. "The Daily DX" reports that Martti, OH2BH, will be active during the CQ WPX CW Contest with the "ultimate callsign" DX1S. Yes, "DX IS" Martti.

EAST TIMOR (Closer to becoming a new one?). The residents of East Timor, Indonesia (YB) will vote on August 8th in a referendum for autonomy under control of Indonesia. If they reject it, Indonesia has pledged to give East Timor full independence.

EA8, CANARY ISLANDS. Kreso, 9A4KK, will be active during CQ WPX CW Conetst as EA8/9A4KK on 10 meters only. Also, he states that he will possibly be active before and after the contest on SSB. He will be on EA8 from May 23rd through June 6th. QSL via home call (bureau or callbook). Also, look for Fernando, EA3KU, to be active from Tenerife Island in the next CQ WPX CW Contest as ED8PP and also as EA8/EA3KU before and after the contest. QSL via his home callsign: Fernando Martinez Lizama, P.0. BOX 69, L'Ametlla de Mar 43860, Tarragona, SPAIN

GM ISLAND DXPEDITIONS. Don, W9DC, informs OPDX that he hopes to make a number of contacts with NA stations and try to introduce them to the World Lighthouse Award and the Scottish Islands Award. He will be active from the following Scottish Islands:
MM/W9DC plans to operate with GM3VLB from Fidra Island on Monday, May 31st on 7, 14, and 21 MHz, using the IOTA frequencies +/- 5 kHz on SSB with possible CW operation if necessary. Fidra is an island in the Firth of Forth and counts for IOTA-EU-123, World Lighthouse LH-0313 and Islands of Scotland Award FF-04.

MM/W9DC/m plans to operate from the Island of Mull, IOTA-EU-008 and IOSA NH-15 on June 5th and 6th.

On June 6th and possibly June 7th, MM/W9DC will try to activate several Scottish Islands with special attention to Seil, FL-03, Luing FL-04, and Kerrara FL-02. On June 7th, he will try to activate Davaar Island which does not count for an IOTA but does count for World Lighthouse Award LH-0724 and IOSA CL-09. Most activity will be on or near 14260 with special attention to stations outside Europe.

Since access to the islands is dependent on weather conditions, alternate Scottish island operations may be chosen at the last moment.. Any requests or additional information may be obtained from Don via E-mail at: W9DC@innova.net

II1, ITALY. Tony, IK1QBT, informs that the Italian Western Riviera DX team callsign "II1R" will be active during the 1999 CQ WPX CW Contest as Multi/Operator category. QSL route is via I1NVU new's QSL Manager starting April 1st, 1999, address: Claudio Di Pietro, Via G.Galilei 424/10 zip 18038 Sanremo - Italy, via direct or bureau.

IOTA NEWS.....
AS-024. Three members of the Yamato Amateur Radio Club (JA1ZEK) are going to IOTA DXpedition from Ishigakijima, Yaeyama Island, from June 4th (0600z) to June 6th (2300z). Operators will be Jun/JJ1EQW, Kaoru/JA3MCA and Aru/JA0KNM, and they will sign homecall/JR6. Activity will be on 40-10 meters, SSB/CW. QSL via home call, direct or JARL bureau.
JJ1EQW - Junichi Sato, 6-1-9-2 Turumaki, Tama, 206-0034 JAPAN
JA3MCA - Kaoru Tachibana, 1-7-5-403 Tukimino, Yamato, 242-0002 JAPAN
JA0KNM - Seiich Aruga, 546-7 Shimoturuma, Yamato, 242-0001 JAPAN

AS-097. This was received a little late, but if you were lucky to works Keith, GM4YXI, as 9M2/GM4YXI, he was on Besar Island, West Malaysia. QSL to his home callsign: Bureau or PREFER DIRECT.

EU-105. The Radio-Club "F5KAC" will be active May 22-24th from Stagadon Island (DIFM-MA-094). QSLs will be sent automatically via bureau. QSL direct is OK at: F5KAC / Stagadon Island, BP 5, 45270 LADON, France. QSLs for SWL can be requested via E-mail at: F11556@aol.com

JT, MONGOLIA. "The 59(9) DXReport" states that Laurence, GM4DMA, is expected to be active from here in July. There were no other details given. QSL via homecall.

KH0, NORTHERN MARIANA ISLANDS. Ban/KF4VSV, Michy/JH2CYU, Akio/JH2QFY, Kou/JR2BUM, Goto/JR2XKV, Yasu/JJ2CYO and Yasu/JS2ITP will be active on 160-6 meters SSB/CW and possibly RTTY from Saipan. Activity will be from June 12-15th. They will focus on the WARC bands and 6 meters (50.090 CW and 50.115 SSB). QSL via home callsigns, except KF4VSV (QSL via JF2WXS).

KP2, VIRGIN ISLANDS. Jeff, N5TJ, will be active signing KP2/N5TJ from St. Croix on May 25-31st. This will include an entry in the CQ WPX CW Contest. During the contest, Jeff will sign WP2Z. QSL WP2Z via KU9C. Outside of the contest Jeff will sign N5TJ/KP2. QSL N5TJ/KP2 to his home callsign.

OJ0, MARKET REEF. Uli, LA0CX, informs OPDX that the announced OJ0 DXpedition has been moved from the last weekend in June to the first weekend of July. Look for operators OH0RJ, LA3IKA and LA0CX to be active July 2-5th on all bands from 160-6 with a stress on 12 meters. QSL via their homecalls.

PACIFIC DXPEDITION. Mats, 5X1Z/SM7PKK, announced this past week that a DXpedition is being planned for T31 Kanton Island and ZK3 Tokelau. The

initial itinerary is as follows:
T31 - September 23rd through October 3rd (1999)
ZK3 - October 7th through October 12th (1999)
They intend to have three stations with 1KW which will be manned by 6 operators. There will be beams for all the higher bands including the WARC bands and verticals for the low bands. The operation will feature one SSB site, one CW site and one WARC/Lowband/RTTY site. More info will come out after the Dayton Hamvention. OPDX InterNet Subscribers will receive an additional bulletin containing Mats complete press release.

QSL INFO AND NEWS.....
FO0PAP AND FO0MAC QSLS. John, K8YSE, informs OPDX that the cards have been received from the printer and processing will begin this week.

OOOPPPSS on my OOOPPPSS!! (Must be old age setting in!) The dates for the FO0XUU operations in last week's bulletin (and the week before) were listed wrong. Please change the date for the Marquesas operation to January, 1998, and the Australs to Februbary, 1998.

Mats, LU9AY, reports tha NU4N is now QSL Manager for LU9AY, L29AY, WL7KY and CP6/LU9AY.

Alan, VK8AV, informs OPDX and the DX community that due to the near defunct state of the VK8 QSL bureau, to please QSL VK8AV direct, as per the CBA, which has been current for the past several years. Alan has just returned home after travelling for nearly 14 months. He states that the beam is not up yet, and the amplifier is 'sick'. So it will probably be the beginning of June before he is fully operational. QSL to: Alan Viegas, P. O. Box 3718, Alice Springs NT., Australia 0871.

The BI5D log is now online at: http://dx.qsl.net/logs
The BI5D Web page is at: http://www.qsl.net/bi5d

S21R QSL Manager. Larry, N4VA, reports that he has the logs for June 28, 1996, until October 9, 1998, and can answer requests for S21R QSLs. QSL via: Larry Vogt, N4VA, PO Box 12, Springfield, VA 22150 USA

SV9, CRETE. Look for OH2M, OH3LQK and OH9MM to be active May 24-31st. Their activity will be on 160-10 meters CW/SSB. It will probably be an entry in the CQ WPX CW Contest.

TK, CORSICA. Bert, PA3GIO, will be on Lavezzi Island (EU-164, TK011), transport permitting, between June 3-7th. He will also be on Grande Sanguinaire (EU-104, TK002) June 9-12th. He will be signing as TK/PA3GIO/p on both islands. Also, there will be some activity as TK/PA3GIO/m or /p on Corsica (EU-014). Check out his 1998 QSL and operation pictures on: http://www.xs4all.nl/~pa3gio/1998-05-2/index.html

W1AW/8 (Late breaking news!). It was announced at the Dayton HamVention that in the year 2000, HamVention attendees will be able to operate as W1AW/8 from the convention. EXPECT long lines if you want a chance to operate.

ZK1, SOUTH COOK ISLAND. Jim, ZK1JD, from Rarotonga, has been quite active recently on 10 meters SSB. Check 28445 kHz after 0100z. Also, check 17 meters on 18130 kHz around 0830z and 20 meters on 14174 kHz around 0330z. QSL direct to Box 491.

Wasn't someone else (not the League) trying to bring it back?

In the absence of an official NR, I would consider the 10-Meter Contest
a good substitute. Don't forget to try 10m CW; those Novice/Tech QSOs
are worth 8 points on CW & I'd sure love to make more than two or three!

Any spelling mistakes Chip ?

Several of the ... at Dayton were looking at the FT100....I thought this might be of interest:

I got my 1000MP back today from Yaesu, they replaced the Control Unit. Chip told me he knew of no known problems with this part...yet, I found several others at the various hospitality suites who had to return their 1000MPs for various problems relating to the control units.

Why can't Yaesu be honest with us? I keep hearing from my JA buddies that Yaesu Japan is losing money and in financial difficulties....this could be why, their home market knows what's up.

Doug,

FISTS sponsored the last Novice Roundup. Take a look at
http://www.fists.org

I put out a packet spot last year that I was looking for
Novices/Techs--managed to work about a dozen!

Give me an example, I can't think of one thing you learn to get a
driver's license that you wouldn't need to know when you drive.

why not drop that
> requirement too? Just let 'em all drive, drop the roadtest
> requirement!

That would be like dropping the rules and technical requirements on the
ham test. Both are needed and used by everyone in Ham radio. We are
talking about Morse Code which does NOT have to be used in order to
operate Ham radio. If it was required to learn how to ride a horse to
get that driver's license, then you could argue about that, but they
don't test for stuff EVERY driver won't need to know in order to drive.

> Ever stop to think that maybe the government intended to keep some
> people out?

No, they droped the code on the tech to get people in, not out. They
would drop the code for other classes too if they could, but it is an
international requirement, so it will take a bit longer to do.

Why not drop the code requirment for commercial broadcast
> while we're at it?
```

There never was or is a code requirement for commercial broadcast.

The thing about Morse Code is that it seems that the OLD TIMERS are
saying that we did it and you should too. That is baloney. What some
cheese with that wine?

In a previous article, AT (just.do.itemail.ro) says:

>
>> If you're not wired for it, there are many other modes to use. That is one of the
>> beauties of ham radio.
>
>Absolutly!!! The whole spectrum above 50 mhz is wide open for those
>who have no interest in CW. You knew it before you got into radio...
>So what's the problem? (but be forwarned... you'll hear alot of CW
>there too. Moonbounce, contesting, etc.)
>

I got my license back in 1967, when the Novice class license was one year non-renewable and was the entrance point for most into this hobby. Ever since then, CW has been my favorite mode.

However, I've taken a liking to the digital modes and am now on RTTY, AMTOR, PACTOR, Packet (both HF and VHF), PSK31 and am looking for that first QSO on feld-hell (just got the software).

Some propagation modes lend themselves to CW - EME, aurora. Some of the digital modes will also make it there. But these propagation modes generally distort SSB too much to make any sense out of it. So CW plays a dominant role in VHF/UHF/microwave weak-signal work.

>
> If anyone out there is interested in *learning* CW and going to EXTRA
>in 6 months, e-mail me. All it requires is about 4 hours a week of
>*dedication*... You have to *want to do it* to do it.
>
>The others.... FLAME AWAY, got my asbestos boxers on.
>

I once taught Morse code to someone in 3 evenings (!) That was up to 5 wpm. I know this was an unusual case, but I figure the average person should be able to learn Morse at 5 wpm in a cople weeks or so. Then it's just a matter of practice to get the speed up.

Hhas anyone got any ideas of what all the secrecy is about with the RSGB and the Special RA Bulletin which will not be released to anyone until the 26th May 1999?

Do U Think they have scrapped Morse?
Or will they will introducing a 3rd tier

see it at rsgb.org.uk Webpage.

Ben Clegg G7 RER

No, I'm saying that if you want the same license I have, pass comparable tests.
Is CW relevant? The Navy thinks not. It's still valid and satisfying.
I'm no 35 WPM Extra, just an Advanced. I took my last code test at the Dallas
FCC office in April of 1964, 13 WPM. The damn government already stole my First
Phone, I don't want it to redefine my ham license, too. Just create a new
ticket? Been done.
The service does need to evolve with technology, no one uses spark much.
I have no simple solution.

I'm looking for: Motorola STX model 821 or MTS 2000 Flashport series radios. They must be 800mhz and Smartnet ii capable. These are for a small dept. here in the Indy area that is looking for a way to get around paying the enormous price of new ones from the local radio authority. If they have extra batteries or chargers or public safety mics that would be great also but not needed. Anybody that has these in good to fair condition can e-mail me at paramike@indy.net with prices and terms, I will forward the info to the chief of the dept. inquiring about the radios. Thanks for your help, Mike

1517. RTTY from GD land (Isle of Man) 21-27 May

Look for me as MD0BPI on RTTY from the IOM from 21 to 27 May.
Qsl via N6TQS or the G or W buros.
I'll be using a wire antenna for the first two days, then I'll have a
beam.

But the law has always been there, Ham radio is a club and if you require
membership you must adhere to the rules.
Can you drive a car on a public road without a license ?

1527. Apologies to the guys with the Morse Code

Newsgroup: rec.radio.amateur.dx
Date: 1999-05-19 00:00:00 UTC
From: Keith Bennett <trojanhorse@virgin.net>
Message-ID: <8Nim+HA2mnQ3EwSh@virgin.net>
Source record: 24877
Cross-posted to: soc.penpals,rec.radio.amateur.dx

Some apologies are coming from me, only I have just noticed that many of the crosspostings are being generated by myself hitting 'reply' without actually viewing the listings of newsgroups that I am actually replying too! My system is set up to read one newsgroup only, so my sincerest apologies for any crossposting errors that I may be guilty of.

I agree many of these cross posts could be eliminated by many of the authors, but they'd disappear even faster if you'd quit respoding to them, obviating your attention to the authour in th first place.

1529. The big Morse debate

Newsgroup: rec.radio.amateur.dx
Date: 1999-05-19 00:00:00 UTC
From: Con Daly <radioman27@hotmail.com>
Message-ID: <S7z03.5965$xa.54371@c01read02-admin.service.talkway.com>
Source record: 24879

Hello everyone,

I don't read the posts from this group much and am'nt as active as much
I would like to be on the air. However I see a lot of debate going on
about morse. It seems to be the most passionate issue among amateur
and professional radio operators these days. I sailed as a merchant
marine radio officer from 1991-1997. I found morse to be absolutely
invaluable at that time (not terribly long ago). There were times
when I really could not have managed without it. This was not just
a matter of equipment on board as I often sailed with Inmarsat
terminals, both A and C systems which were supposed to be well
established at that time.
I have countless stories about satellite null zones along the equator
and many other areas, extremely weak signals on SSB etc, where the
only option available was to use morse. Indeed on one particular voyage
on board an Inmarsat-C equipped vessel I was using CW 90% of the time.
When the first changes started to appear with the introduction of the
new maritime radio system (GMDSS), there was any
number of mishaps occuring with ships normally having no communication
problems suddenly "dissapearing" from the air for days on end.
The ones which still had radio officers had no problems, as with the
ones with electronics officers who were former radio officers.
Having come close to shipwreck on 2 occasions I expressed great concern
about the changes taking place, as they seemed to be rather
premature and rushed and there was a desperate drive to get it all into
place before the millenium.
Now don't get me wrong, I'm no old salt and am always
keeping up to date with electronics and the latest innovations, but
morse should not be seen as simply old technology, it is just another
method of communication, proved itself very reliable again and again up
to the present day, I can vouch for that. Certainly
new communications technology should be introduced to all fields,
amateur or commercial. Especially when the high traffic needs of todays
industry are demanding it, but it seems that certain people
are just determined to get rid of something that they never embraced
because they never saw it in the right way. Morse is not a code, it
is a language. That is the first mistake a lot of people make in the
way they approach it. Certainly those people more musically inclined
will tend to like it more than others (I play 5 string Banjo), but
like learning an instrument, it takes a lot of time and effort and
can be frustrating.
Ok, so I'm obviously an advocate of CW but you may
be surprised to hear that I'm not in favour of keeping the requirement
for a proficiency test, if thats what people want. I just wish that

those against the code requirement would take a long hard look at what they are really campaigning against. It seems like it is really based on an irrational belief that it's too old fashioned, but really fashion shouldn't come into it. It certainly didn't matter for me in the Mid atlantic when we were taking on water faster than the pumps could get rid of it down in the engine room. That was in 1992 and there were other less urgent incidents right up to the time I left in 1997.

Certainly the amateur service is'nt as important as a shipboard radio installation or a coastal station but all you anti code people out there, please, take a good look at what you are starting. Because there will be no going back and it will be dead within 20-30 years of a no code requirement. The commercial people made a mistake, based on purely financial motives. 12 WPM is not difficult to obtain if it is learned the right way. At least ask yourselves is it really the requirement you are trying to get rid of or is it the whole art form itself. I hope I have at least provided some food for thought and that it will add some new and interesting insights.

73's

Conor Daly EI5IK

Ireland.

PS, if there are any other musicians on this group I would like to hear how much you relate music to CW.

Morse Code is a "turd in a punch bowl". It is the reason that ham radio
will die. It is really unfortunate.

Anyone have address/route for this call? The best I was able to come up
with on the web was a list of new Dutch calls, without addresses. :(

Most Dutch amateurs QSL via the bureau. Most Dutch amateur addresses can be found at the VERON website (http://www.veron.nl/veron/clbk.htm), but PA5MM isn't listed yet. Vanity callsigns are something very recent, and as such many people are changing there calls these days. Callbooks always lag behind, so it might be a while before you find them there.

I don't see any groups listed where the Morse Code issue would not be appropriate.

All but two are amateur radio related, and shortwave and scanner listeners have to listen to (or try to avoid) Morse Code too.

So are you saying that you wouldn't mind if the 200,000+ newsgroups were
lumped together as just one NG? After all, one would only need to inspect
the subject line as one waded through the 10 million posts each day,
right?

Well, Keith, we used to talk about DX. But then all these Morse code
geeks and hot women from SOC.PENPALS started posting here and
looks like everybody who was interested in DX left. Haven't seen
anything DX related for quite a while.....

>I don't see any groups listed where the Morse Code issue would not be
>appropriate.

That's because you're not familiar with the rec.radio hierarchy; here's
a reminder:

Subject: List of the rec.radio newsgroups
Followup-To: poster
Approved: news-answers-request@mit.edu,rec.radio.info-moderator@primenet.com
Distribution: world
Expires: 01 June 1999
Summary: This article provides a list of the rec.radio newsgroups; it is
posted alternately with the longer "Guide to the Rec.radio NGs"
Keywords: radio amateur ham cb scanner shortwave netiquette
X-Last-Updated: 1998/03/29
Version: 1.1 created 98/03/05 03:50:23
Posting-Frequency: posted on the 1st of each month

Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-running thread results from a single cross-posted article, and the contents of such a thread drift further and further away from being "on-topic" in the various NGs that receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups" posted on the 15th of each month.

Jeffrey Herman, KH6O, and your friendly rec.radio.amateur working-group

1548. Need opinions on MFJ418 Morse Code Tutor

Newsgroup: rec.radio.amateur.dx
Date: 1999-05-21 00:00:00 UTC
From: dgware@voicenet.com
Message-ID: <3744dce1.5347552@netnews.voicenet.com>
Source record: 24799

Hi,

I've been hamming for 3 months and enjoying CW DX however, I fell into the habit of the mental lookup table and I've hit that wall of about 7 WPM.

Another HAM once recommended the MFJ418 Morse Tutor ($80).

I don't mind practicing by listening on the air but I don't have tons of time and I'm finding about 3/4 of the guys in the 13 wpm range seem to have pretty bad fists and that makes it pretty hard to learn.

Does anybody know much about this gadget ?

Tnt, 73, Don KB3DMA

Don't foget Spark Gap. For those of you who do not know what DX is; it
means receiveing a radio/television signal from far away. From far away
as in you usually do not get a signal from this place. DX can also mean
how far your siganl is getting out. From everything that I read; if you
can run just 10 watts, and your siganl is getting out 300 to 400 miles
then that is better DX then somebody running 1000 watts and doing th
same thing.

Since when do TV station broadcast in one colo(u)r as the name
Monochrome would imply. Heck, even Black and White is two colo(u)rs.
By the way, the best Black and White is what is know as a Twistee cone.
That is when they combine Vanilla Ice Cream with Chocolate Ice Crea.

Dr OM/YL

This mail to inform You that I resently have uploaded an updated beacon list at my website covering a 70 MHz world wide, a 50 MHz world wide in six continantal splitted listings covering, Africa, Asia, Europe, North America, Ocean/Pacific and South America.

These lists can either be viewed in html or downloaded as a ZIP file in band pacages, the ZIPed version contains a bandplan aswell.

These can be found at http://www.qsl.net/oz6om/

I hope You find the listings of use ...

Listen to the theme song at the end of the program; you'll hear
the violins sending M O R S E over and over (in Morse code, of course).

1566. How to get DXSUMMIT web DX spots via packet radio

Newsgroup: rec.radio.amateur.dx
Date: 1999-05-22 00:00:00 UTC
From: ik4vyx@my-dejanews.com
Message-ID: <7i5m73$601$1@nnrp1.deja.com>
Source record: 24816

This bulletin describes how to get DXSUMMIT web DX spots via packet radio.
This is particularly useful for hams in Europe, where Internet is still rather expensive (at least when compared to US).

DXSUMMIT (http://oh2aq.kolumbus.com/dxs/) is the GREAT web service created by OH2BUA (Jukka) and currently maintained by OH5TB (Antti).
When you submit a DX spot to your local cluster, with 99% probability it
appears on the DXSUMMIT web page.

As you probably know, N6RT (Doug) has created an IRC (Internet Relay Chat)
channel which is being fed with DXSummit dx spots, coming there "real time"
with no delays at all; as you can easily guess, there's currently no ordinary
DX-Cluster able to carry the same volume of info; this because DXSummit gets
its info from many clusters, all over the world, simultaneously.

A program named DXTelnet (I'm the one who developed it :-) is kept connected
non stop to N6RT's channel, bridging the DX spots from there into the
channel 107 of the ham converse network.
This service is kindly provided by F1NGP, Yann, who's using a 24H Internet
connection and the DXTelnet software running on his home PC.

Now the point is that the ham converse network can be easily reached via
packet radio, from many parts of the world.
You just need to reach a radio/internet gateway supporting the telnet command.

From such a gateway then you can type, for instance:
"telnet 44.139.4.65 3600"
and you'll get connected to a converse node located in Turku (Finland);
once on this node, login typing:
"/N YOURCALL 107"
where "YOURCALL" stands for your real callsign and 107 is the channel where
DXSummit spots are reflected by the DXTelnet server; this channel has been
named as "DX-Cafe".

Note:
Some gateways support the converse network directly.
In this case you don't need to use the telnet command: simply connect
to the
converse network and switch to channel 107; the commands to do this
depend
on the gateway software, but it shouldn't be hard for you to discover
them, with queries such as "Help" or "/Help".

Once on channel 107, you can use converse level commands (do a "/H" to
get a list of the supported commands).
For instance, "/US" lists the connected users while "/WR CALL ..."
allows
you to send a direct talk to a certain ham.
If you don't use "/WR", anything you type is seen by all the users on
the
channel and this can turn to be useful for generic chat purposes;
"/EX" allows you to quit the session.

There are also some DX related specific commands that are implemented
by the
DXTelnet server:
!DX <freq> <call> [remark] (to submit a dx spot)
!ANN <text> (to submit a full announcement)
sh/dx (to retrieve the latest 10 dx spots)
sh/wwv (to retrieve the latest solar flux report)
(note the "!" in front of DX and ANN)

The spots and announcements submitted with the above commands are fed
into
DXSummit web page and the result is the same as if they were manually
submitted with a browser (they appear as sent by YOURCALL-@).

To summarize what described so far, I include some lines captured from
a real connection (reality is much easier than theory).
I highlighted the commands typed by me with a ">>>" header.
Believe me: sometimes the spots I submit to my local cluster are showed
first on the DX-Cafe channel than on the cluster itself!!!.

If you're going to be pedantic at least check your facts first.
Monochrome - (of, using or being) reproduction or execution in 1 colour,
black and white, or shades of grey.
And technically speaking, black and white, being the absorbtion or reflection
of the whole spectrum, are not colours.

SB DX @ WW $OPDX.410
Ohio/Penn DX Bulletin No. 410

The Ohio/Penn DX PacketCluster
DX Bulletin No. 410
BID: $OPDX.410
May 24, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K1XN and The Golist, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, KE4LWT, N4AA & QRZ DX, K6UR, N6RT, N6TQS, K7BV, K8YSE, DC8TS/KC2DMA, DL6FBL, F5NOD, G3LWM, G4BUE & DX News Sheet, GM0DEQ, GW0ANA, GW0VSW, HA5COK, HL2KAT, PY1KS, RA1WZ, SM5MX, SP5ELA, VE9DX, VK8HA and YO3FWC for the following DX information.

3W6, VIETNAM. "The 59(9) DXReport" reports that Karl, W9XK, will be active June 1st-July 20th as 3W6XK. Activity will be on 20 and 15 meters CW/SSB. QSL via homecall. ADDED NOTE: See XV7 below.

3W7CW UPDATE. Zygi, SP5ELA, from the Warsaw University of Technology RC (SP5PBE) and President, reports that Tom, 3W7CW/SP5AUC (ex-YI9CW), has been active from Hanoi, Vietnam since April 11, 1999. Tom has a one year license to operate on all HF bands plus 50 MHz, all modes. However, Tom's main interest is in CW. He is planning to operate some RTTY once his station gets fully set up. Tom's new QTH is on a second floor of a four story building (A DXer's paradise: no nearby high-rises, open horizon, tennis courts and parks all around. And, most of all, an unlimited access to the building's roof where Tom mounted his R7.) Tom is currently struggling with getting items ranging from a coax cable to a laptop computer, most of which have to be ordered from abroad. Fortunately, Tom took the majority of basics with him. He operates his faithful TS-180 and reports hearing not a single local 3W activity, only the neighboring BY, VS6, VK and JA. He has spotted many West Coast U.S. stations during the ARRL Contest, some of them really loud. Europe comes in with generally poor signals that he has to combat because of the overwhelming QRM from the local broadcasts, especially on 40 meters. Tom is planning to stretch some long-wire antennas north-west and possibly to other directions. He is a member of the Polish diplomatic corps in Vietnam and signed a four year contract. There should be lots of opportunities to work him, so dust those keyers off... For those interested in operating from Vietnam a

word of caution: a one-year license fee is 500 (USD)! QSL cards for 3W7CW should be directed to P.O.BOX 11, 02-800 Warsaw 93, Poland. Tom has been heard recently on 17 meters between 1230 and 1600z.

6 METERS CONTEST. Ciprian, YO3FWC, wants to remind everyone that the 1999 Oltenia Six Meter Contest will be held on the last full weekend of May (First period: May 29th, 0400-2000z, Second period: May 30th, 0400-2000z). All hams in the world are invited to participate in "Oltenia Six Meter Contest 1999". Rules can be found at "Romanian Amateur Radio Federation" Web site at: http://www.qsl.net/yo3kaa

BY, CHINA. The "DX News Sheet" reports that the Nanjing Agricultural University Radio Club will be active June 1-30th as BT99WED to celebrate "World Environmental Day".

BY, CHINA. Look for Pertti, OH2PM, to be active this weekend (May 29-30th), from the BY1DX station in Beijing for an all-band operation. Activity will be mostly on CW. QSL BY1DX via OH2BH.

CF3/VA3, CANADA. Look for amateurs in Ontario to begin using the CF3 prefix instead of VE3, and VX3 prefix instead of VA3 June 1-30th, for the 75th anniversary of the Royal Canadian Air Force (RCVAF).

CN, MOROCCO. Ben, DL6FBL/CN8WW, will operate during the CQ WPX Contest as a Single OP/All Bands entry. There will be some activity before the contest, but after the contest there will be no or only little activity because he will take down all antennas on Monday and go back to Germany early Tuesday morning. Ben states, "Please: during the contest all QSOs are welcome, of course. Outside the contest, please call me only on bands/modes, we have not yet worked!!! After this activity ALL logs will be merged and ALL QSOs (Oct.-Dec. 1998, Mar./Apr. 1999, and now) will be confirmed in one step!"

CY6, CANADA. Look for amateurs in Alberta to begin using the CY6 prefix instead of VE6, July 1-14th, to promote the Calgary Stampede.

DX CONVENTIONS (Update). The Holiday Inn in Visalia, where the International DX Convention is being held (in the year 2000), has a new area code. To make early reservations call 559-651-5000.

DX1S UPDATE. "QRZ DX" and "The Daily DX" sent out a press release from Martti, OH2BH, on his upcoming operation as DX1S. OPDX InterNet Subscribers will receive a copy of the release as an additional bulletin. Here are some excerpts from the release:
"Operators are Robin, DU9RG, Kan, JA1BK and Martti, OH2BH..... the station DX1S - DX Is - will hit the airwaves and be available for those who Deserve. DX1S is a new callsign of the Filipinas DX Society, of which WA6AUD and OH2BH are the first invited foreign members..... the station will be available May 28-31 for the multitudes on all known DX bands." Suggested frequencies: CW - 7005, 14025, 21025, 28025 kHz and SSB - 14195, 21295, 28495 kHz. QSL Manager for this special activity is KU9C.

GD6/MD0, ISLE OF MAN. GD6IA will be active during the upcoming ANRTS Contest, June 12-13th. Activity will be on 160-10 meters, but their

objective is to get some of the local hams active on RTTY.
Also, Doug, N6TQS, will be active as MD0BPI on RTTY from here May
21-27th. He will be using a wire antenna for the first two days, then he
will have a beam up and running. QSL via N6TQS or the G or W bureaus.

IOTA NEWS......
AS-122. This one came in late! Chung, HL2KAT, reports to look for
activity by HL0IHQ from Packryungdo Island now through May 25th.
Activity will be on 75/40/20/15/10/2 meters. This island is the
closest to North Korea, and it is a military area with a
sensitive zone. QSL via HL0IHQ; HL0IHQ, P.O.Box 375, Naminchon,
405-600 Korea. QSL searchs available at:
http://www.qsl.net/hl2kat
http://dx.qsl.net/logs

EU-008. Jeff, G3LWN, will be active June 1-4th, as 2S0PNS from the
Island of Pabay (57 17.7N/ 05.51.5W, IOSA NH11, WAB NG62). The
special call 2S0PNS is only available from May 6th to July 31st
and has been specially granted by the Radio Communications
authority to mark the Scottish Elections and the first sitting
of the Scottish Parliament. (The 2S replaces GM and of course
other GM stations can use the 2S prefix) The station will be
active on 160-10 depending on conditions and aerials available.
Jeff states that Pabay issues its own stamps (carriage labels)
and a special 2S0PNS stamp will be available.

EU-052. Jenci, HA5FA, will be active from Korfu Island with his CEPT
license as SV8/HA5FA/P between May 27th and June 2nd. QSL via
HA-Bureau.

EU-108. Operators GM0DEQ, GM0SEI and GM3WIL have planned another visit
to Lunga Island, Treshnish Isles (IOSA: NH17) on MAY 28-30th,
as GB5TI. Activity will be on 10/15/20/40/80 meters SSB/CW.
Last year's visit was cut short due to one operator suffering
a heart attack. QSL via GM0KVI.

EU-124. Glyn, GW0ANA, will be on Flatholm Island from August 27th
through September 1st. The callsign will be GB5FI. He states
that this will be a big event mounted by members of his club
"Barry Amateur Radio Society". They will be active on all bands
(Top band to 70cms) and modes (A1A, SSB, SSTV, RTTY, AMTOR,
PACTOR, and they will try PSK31). They will also have 6 meters.
QSL via GW0ANA bureau or CBA.

J6, ST. LUCIA. Jim/KF8VX and Cathie/KG8QL are announcing their summer
vacation/DXpedition to St. Lucia from June 19-26th. Callsigns are expected
to be J6/KF8VX and J6/KG8QL. They will be active on SSB and RTTY on all
bands based on propagation. QSL to home callsign or the W8 bureau.

KH0, MARIANA ISLANDS. Another group will be active from here during the
All Asian DX Contest. Look for Asa/JA6AGA and Tony/JA6CNL to be active
June 18-21st as KH0/AF4IN and KH0N. Listen for them on CW, 25 kHz up

from band edge.

NEW #CQDX HOME PAGE. Doug, N6RT, reports that the new home page of the IRC #CQDX Chat channel (with realtime spots from DX Summit) is now: http://dx.qsl.net/cqdx
The new page includes a java based IRC applet which you can try out if you have been curious about #CQDX but did not want to download and install any software.

OJ0 & OH0, MARKET REEF AND ALAND ISLANDS. A few press releases by Dennis, K7BV, announced that plans are now firm for the OJ0 and OH0 DXpedition. On May 25th, Dennis will fly via helicopter from the Aland Islands to Market Reef with Lars/OH0RJ, Seppo/OH1VR and Pasi/OH1MM. Operations will begin that evening (local time) after the antenna work has been completed. Listen for OJ0/K7BV, OJ0U, OJ0/OH0RJ and/or OJ0/OH1VR. Dennis will depart the reef for the Aland Islands OH0 Friday morning May 28th. One or two or all of the others may stay behind to operate in the CQ WPX CW Contest. K7BV will operate as OH0/K7BV from the OH0Z super station beginning the evening of May 28th and continuing until June 4th. He will use the OH0Z callsign during the WPX CW contest. Expect appearances on all bands 160-10 meters, the WARC bands and the RS12 satellite. A strong emphasis will be placed on CW. The 6 meters operation is questionable at this time. QSL OJ0/ OH0/ K7BV via KU9C. QSL OJ0U and OJ0/OH1VR via OH1VR. QSL OH0Z via OH1EH. The DXpedition Web site is now up and available for viewing at: http://www.qth.com/k7bv/

P3A AWARD. The 1999 P3A Team, which will be active in the upcoming CQ WPX CW Contest, announced that they will issue a special colorful award (with photos of all members of P3A) for contacts with P3A during 48 hours contest period. Details/press release will be provided to all OPDX InterNet Subscribers as an additional bulletin.

PW, BRAZIL. Alex, PY1KS, will be active in the CQ WPX CW Contest as PW1S. He will be on all bands as a low power entry. QSL via Bureau or direct to: P.O.Box 18123, Rio de Janeiro-RJ, 20722-970, Brazil.

QSL INFO AND NEWS......
4U1UN QSLS. The recent operation by Peter/ON6TT and Mats/SM7PKK should only be QSLed to: POB 3873, New York, NY 10017. (Remember ONLY this operation).

FT5ZH QSLS. Gil, F5NOD, reports that around 4000 FT5ZH QSLs have been mailed out, and the next 4000 QSLs will be mailed out in about one to two weeks maximum. They have received 8000 QSL currently. Some QSLs were received direct without postage contribution. These will be returned via the bureau. You can see the FT5ZH QSL on the following Web site: http://perso.easynet.fr/~f5nod/ft5z.html

The QSL route for 8P6AW is NOT via WB4RRK or K1XN. John has never been the manager for this club station. He suggests sending all QSL requests direct to 8P6AW: Amateur Radio Society of Barbados, Box 814-E, Saint Michael, Barbados.

The logs for the FO0AWI (Marquesas, January 1999) and FO0AWI (Australs, February 1999) are now online (as well as the FO0XUU operations) at: http://dx.qsl.net/logs

NOT THE QSL MANAGER! Steve Hurst, KA7NOC, reports that he is not the QSL Manager for YU1OJ. He has received many QSLs for this station over the last five years and has recently returned all cards to the hams who sent them. Steve WAS the manager for YU1PJ several years ago, but he has not heard from Zoran since the outbreak of war in YU-land in the early '90's. He feels this is why hams are sending him the QSLs. Should you require any further information, please refer to his Web site and follow the "YU1OJ" link at: http://www.magiclink.com/web/shurst

QSL YC0MZI via Muhamad Zaini "Zen" PO Box 7257/JKSPM, Jakarta 12072, Indonesia.

QSL YB0ZDD via Club Station "ORARI LOKAL PASAR MINGGU", PO Box 7257/ JKSPM, Jakarta, 12072, Indonesia.

SAVE YOUR GREEN STAMPS! EP/RA6LGM is a PIRATE.

WIA/IARU/VK8HA QSL BUREAU. Henry, VK8HA, states in reference to OPDX.409, Alan VK8AV does not refer to the WIA/IARU/VK8HA QSL Bureau. This bureau receives QSL cards for members as well as NON-members of the WIA. The WIA/IARU/VK8HA QSL Bureau address is: Box 619, Humpty Doo, N>T> 0836, Australia.

ZL9CI QSLs. These cards are expected to start coming out, and they expect to have all of the cards sent out by the end of June.

R200, RUSSIA. Look for special event station, R200AP, to be active on all bands and on all modes from June 5-7th to commemorate the 200th anniversary of the great Russian poet Alexander Pushkin. QSL via RA1WZ either direct (Al Trubchaninov, Rizhskij pr.51-104, 180016 Pskov, Russia) or through the bureau.

S9, SAO TOME (New on the Satellites?). Hardy, DC8TS/KC2DMA, states he will activate this one on the satellites. If you remember, he was active in 1996 as 5R8EO from Madagascar. He feels that it is now time for another "new one" on the satellites. However, he mentions that this is NOT a Dxpedition, but a holiday with his wife combined with a bit of satellite activity, if the licensing authorities allow this to happen. He has not heard anything yet about his license, but he will visit the Sao Tome Telecom to hopefully pick up a license on Monday the 31st of May. Activity in the hotel will be limited. Look for him between 1600-2000z. QSL is via the German QSL Bureau to DC8TS or direct. Direct QSLs for destinations outside of Europe require 2 USD return postage.

SV8, ZAKYNTHOS (Zante). Carl, GW0VSW, will be operating from this Greek island (IOTA EU-052) from June 1-14th, as SV8/GW0VSW. This will be mainly a vacation for Carl, but he hopes to be active every day. Activity will be on all bands mainly CW. He will also be looking for low power stations on the usual QRP frequencies. QSL via the bureau or direct to his home callsign.

XJ9, CANADA. A special prefix has been issued to be used by stations in Saint John, New Brunswick during the period of 0000z May 22nd through 2359z June 6th. There will be several stations active during this period. This prefix was issued to recognize 150 years of operation by the Saint John Police Dept., the oldest force in Canada. Andy, VE9DX, reports that he will be active during the CQWW WPX CW Contest as XJ9DX. Look for him before and after the contest on SSB, RTTY and PSK31.

XV7, VIETNAM. Rolf, SM5MX, is about to travel from Tokyo, his present QTH, to Hanoi to revive his call XV7SW for two weeks, May 23 to June 5. Rolf will take part in the WPX CW Contest. He is now the only remaining XV7 on CW. From now on, only 3W calls will be issued. QSL via SM3CXS.

YS, EL SALVADOR. Jack, KE4LWT, will be active as YS1/KE4LWT through at least August 15th. Activity will be on 10/12/15/17/20 meters. QSL through July 1st to: Jack R. Smith, Unit 3105, JTF New Hope, APO AA 34023. After July 1st, QSL direct to his home callsign. Bureau cards to the home callsign are always welcome.

1586. Re: 9U stations DXCC-status?

Newsgroup: rec.radio.amateur.dx
Date: 1999-05-23 00:00:00 UTC
From: Sandy Lynch <slay@netcom.com>
Message-ID: <slayFC7IC9.Ep5@netcom.com>
Source record: 24751

Why not ask the DXCC desk directly? I'm sure their answer would be more accurate than the assumptions by others who are not necessarily "in the know". FWIW, I have always had good luck getting the DXCC desk to respond to similar requests for info. I believe they can be contacted at dxcc@arrl.org

Jim, nothing wrong with hot women interested in dx. Sounds like just
what we need in amateur radio. Those topless Polish QSL cards are
getting kind of worn, you know. ;^)

73,
Brian/N0iMD

1592. Holiday operation in Thailand

Newsgroup: rec.radio.amateur.dx
Date: 1999-05-23 00:00:00 UTC
From: Norman Heggerty <norman@heggerty.freeserve.co.uk>
Message-ID: <7i8dfj$8qu$1@news8.svr.pol.co.uk>
Source record: 24838

My wife and I are going to Thailand in July.
Does anyone out there know the procedure
for getting permission to operate from Thailand?
I have tried the RSGB, but they have no information
for reciprocal licences for Thailand.
I would be grateful for any information.

Regards,

Norm, G0PTN

no, you are wrong!
Black is absense of any colour, but white is at least 3 colours

1596. 9U stations DXCC-status?

Newsgroup: rec.radio.amateur.dx
Date: 1999-05-23 00:00:00 UTC
From: Georg Einfalt <georg@csi.com>
Message-ID: <#brfBAQp#GA.351@nih2naab.prod2.compuserve.com>
Source record: 24842

I remember an announcement, that DXCC-credits for QSOs with 9U/F5FHI, 9U5DX and 9U5CW made after January 1996 will be purged. As my DXCC records contain credits for QSOs with these stations (from 1996 and 1997), I supposed, that these credits will be deleted when the next endorsement is processed. I am surprised, that these QSOs are still on my DXCC award credits listing, which I recevied last week from the DXCC-desk as result of an endorsements application.
Has ARRL reviewed the decision on these 9U-stations?

Thanks for the interesting and informative comment on Morse. I am not a pro with Morse, nor do I even use it to speak of; but, I keep the tapes in my car and motorhome and listen to them on a regular basis. I like the "music" and one day I may "need" to play it for real.

Tom

The term 'DX' was originated by amateur radio ops.Others use it to
mean different things.The original meaning of DX is to make contact
with a station in another country.This is required to qualify for any
of the ARRL DX awards that many Hams persue.You can call a dog a cat
if you wish...it dosnt change the fact that its still a dog....:>)

I already asked the question and the DXCC desk said all 9U QSOs
(excpet those authorized by the UN, i.e. 4U9U) from 1994 to present
will be deleted from the records.

>Does anybody know much about this gadget ?

Yes, I bought my girlfriend one and she learned code from it and
passed 13 WPM in only a few months. When I first got it and tried it
out I was suprised how good the tone quality is. It sounds like a
pretty good sine wave, not the raspy square or other harmonic rich
waveforms I am used to hearing from code practice oscillators and most
keyers. The thing is very versatile you can set it to send only
certain character groups. It has several character group options in
addition to allowing you to make up your own character group. So you
can practice the letters that are giving you trouble, practice without
numerals or punctuation, etc, etc. You can listen to simulated QSOs
or random characters, and I think you can listen to random words. You
can have the speed increase as you are copying. It will send
farnsworth or regular slow code. It can show you the character and
then send it, or send first and then display the character.
You can probably tell I am glad I bought it. I really wish they
were available when I started out. I say GO FOR IT! No, I have no
financial interest in MFJ.

>>Hey Jeff, what are the chances of you sending me a Hawaii'an beach
>>shirt?

>Probably about the same as the chances of him sending you a QSL card!

Hey, Walt -- I QSL 100% *after* I receive the other station's card.
I have two styles of cards: The R-rated card shows a topless Hawaiian
beach girl, and the G-rated cards are a Hawaiian sunset, or a picture
of Diamond Head or Waikiki Beach. (They're really just post cards, with
my call sign scrawled across the top with a felt-tip pen.)

My wire beam points due West; maybe one of these days we'll work each
other *long* path.

Well, just to make at least ONE DX posting, has anyone heard anything about the supposed DXpedition to Malpelo that was being talked about a year ago? Is it still going to happen? I received my cards from Pedro (HK3JJH/0M) the other day (THANKS Pedro!) but I sure could use Malpelo on other modes.

Has anyone heard any talk about an operation to Clipperton? I still need that one too and I think it's been over 7 years since the last one.

BT99WED special event station for World Environment Day will
get on air since June 1 to June 30. Thanks to the help of BA4RC and
other local hams.
This station is setup by Nanjing Agriculture University to
call on the attention of radio amateurs to worldwide environment
protection. We'll operate on several bands and modes. And we are
eagerly to get in touch with some environment protector or universities
and schools devote to environment protection on the air. So please tune
for our signal. Any comments please direct to Michael Chen/BD5RV at
by5qn@qsl.net Thank you.

Well -- the correct answer is always: "It depends."

One of the regional state highway patrol freqs is at 154.905 mcs.
So, I get to hear a lot of "tweep-tweep-tweep" QRM between
144.200 and 144.205 mcs.
Granted, this is not a "modification" to xmit on amateur freqs.
Oh No, it works that-a-way right out of the box.

Yes it is.All you need is an Amateur Transceiver and some duct
tape.Attatch the scanner to the AT with the tape.Leave the scanner
switched off and use the AT.

If you knew a little about electronics and radio circuits, you could
probably figure out how to do it. As for a short, simple method that
anyone who lacks knowledge of RF circuitry could do, I'd have to say no.

Not very easily. You could modify a VW Bug into a Ferrari, but would you really want to? The very fact that you ask leads me to believe you don't have the technical background to build your own FM transmitter, which is what you'd have to do. (Please don't take offense, I don't have that kind of skill either! My skill level with homebrew electronics falls somewhere between dumb and dangerous. <g>)

The thing to do is go out and get yourself a *real* Amateur HT. Most if not all of them have receive-only coverage that is the same, or in some cases better, than a scanner. Plus, you won't have to deal with the expense and hassle of building your own.

Is it possible to modify my lunchbox to transmit on Commercial
frequencies? :)
ANYTHING is possible. Sure a scanner can be modified to transmit on any
freq. you want, you just have to add a transmitter.
Same goes for my lunchbox! (and a reciever)

All in good fun. People learn more when they are laughing.

I don't know who makes me want to vomit on them more, the Kaiser, ARRL Puppetmaster K1ZZ or the FCC WTB (or the losers who keep working what few Yugoslobs are QRV)

Klinton Ready To Consider Kosovo Land War -Paper

LONDON (Reuters) - Fuhrer Wilhelm Klinton is ready to consider a full-scale Kosovo ground war against Serb forces,
sending up to 90,000 U.S. combat troops if no peace deal emerges within three weeks, Britain's Times newspaper
reported Thursday.

The newspaper, which led its front page with the story, quoted unidentified NATO sources for its information.

Although NATO was officially planning for a peace implementation force of only 50,000-60,000 troops, there
was a growing feeling in Washington and London that it must prepare for a much bigger operation involving
150,000-160,000 troops, the Times said.

``Mr. Clinton's dramatic conversion, after weeks of apparent reluctance to send in ground troops, has emerged in
the light of detailed briefings from General Wesley Clark, the Supreme Allied Commander, last week,'' it said.

The newspaper said a new sense of urgency had been injected into NATO's contingency planning because of a
warning from the military that a decision would have to be made by mid-June if the alliance was to contemplate a
ground offensive.

``The tight timetable is being dictated by the alliance's determination to start returning ethnic Albanian refugees to
their homes in Kosovo before the winter,'' the Times said.

It quoted the sources as saying that with Clinton committed to defeating Yugoslav President Slobodan Milosevic
one way or another, the United States would be expected to contribute more than half of the force.

The sources estimated the U.S. contribution could be about 90,000 troops who would be deployed from the
United States, not Germany.

``Britain and France would also be expected to play a major part,'' the Times said.

Years ago (1.10.1973) I worked VQ9BP/F from Faquhar.
I sent several QSL cards to him but with no luck.
I have now DXCC 358 worked and 357 confirmed. VQ9BP/F is the only
missing confirmation.
I know its a deleted country but would like to complete my DXCC
confirmed.
Does anybody know if there is someone who still have logs and qsl-cards?

73 and thanks for reading this message

From: "Nathan R. Ciufo" <nrciufo@earthlink.net>
Message-ID: <7ijm2h$h95$1@birch.prod.itd.earthlink.net>
Source record: 24791

I just recently got a new HF rig and have found myself doing some DX'ing. I've never really worked it much before, and I'm curious about something. When they tell you to QSL their home QTH, do you assume they will get their own postage, or should you send something along with yours? Sounds like a silly question, but I've worked some good ones so far, and would hate to get burnt early on. Thanks in advance, Nathan, KA3MTT

Nathan,

Welcome to DX :-)

Imagine the following call : SV9/IK2YYO. It means IK2YYO is operating
from SV9 land (Crete Island, Iota EU015). If he tells you to send a QSL to
his home call or home qth, it means to send the card to IK2YYO. Via buro or
direct will depend on what the om told you on air. If you are not sure, send
it via buro.

On the QSL you will write in the box TO RADIO : SV9/IK2YYO and in the
VIA box : IK2YYO

Sometimes you will find om with a special callsign for a special
activity. Generally, they have a manager and they will announce the manager
callsign on the air. The manager callsign should be put in the VIA box.

Hope this helps,
Philippe

It depends on how hot you are for cards. I once confirmed 162 countries in one
year without ever sending out a single card --- on CW.

The more money you spend, the more cards you will receive. Up to a point.

Peter,

I also worked him on 22 October, 1973. Being new to DX'ing, I sent off a card with NO return postage or envelope. Surprisingly, I received a direct QSL from him postmarked 10 April, 1974. I guess I was very fortunate!

The return address was: R.F. Miles
P.O. Box 191
Mahe, Seychelles Islands
Indian Ocean

Maybe you can do a search on his name. My log has his name given as Bill.

When he stated via home QTH, always try to include something to cover
postage. A dollar (greenstamp), an IRC coupon or even a postage stamp
(for his country, not US postage) will do. Remember to include a self
addressed envelope.

Let me know if you have more questions.

Check out some of the DX club websites for lots more information

73 es have fun

Also, when sending a self-addressed envelope, please try to purchase the European-size lightweight airmail envelopes for this purpose. They fold in half nicely to send to the DX station, and they are larger than our #6 3/4 U.S. envelopes which many hams seem to use. Unfortunately, many of the DX stations have QSL cards larger than the standard U.S. letter size. Some DX stations are even suggesting that the U.S. hams send sticky labels and IRCs or greenstamps, so the DX can get an envelope of the appropriate size at their end.

Uh...not to quibble but, "scanners" are...uh...scanning RECIEVERS. I suppose it would be sorta feasable to boost the local oscilator power up somewhat, and sorta use it as a transmitter that way, but I don't know why you'd wanna do that.

Don't wanna sound snippy, but I think I misunderstood your question.

Thanks, people.

CIAO!

When a DX station requests a direct QSL one of three things are implied:
1) He is not a member of his national association and can not use the incoming bureau.
2) There is no bureau in his country (Thats the case in several good DX countries)
3) He needs a little something to help pay for the cards (read that as $1 or $2 dollars). As an example HK3JJR Pedro just put on Malpelo and worked 13,000 Q's. The cost of cards alone are over a $1000 plus his time and expense for travel.

In case 3 there are several ways to cover the costs. Enclose 1 or 2 "greenstamps" well hidden in the return envelope. To the point they will not be seen if a corner of the envelope is clipped or the envelope is held in front of a bright light.. I use IRC reply coupons that you can purchase at he postoffice. A few countries need 2 all others need only 1.

Don't use any radio callsigns on the addresses and don't use "colorful" stamps. An european size envelope with a plain stamp works best. You can also buy mint stamps from Bill Plum at 12 Glenn Road, Flemington Road, Flemington, NJ 08822 along with many other DX supplies.

I have 316 countries in the box, most gotten as described above.

Any others questions? I'll be glad to pass on anything else I have picked up while DX'ing....

Yes, and Pedro has those cards coming out! Most everybody I know who
worked him has received their cards recently.

To individuals on DXpeditions such as Pedro's, I usually send several
greenstamps to help him with his costs and as appreciation for his time
and effort.

> stamps. An european size envelope with a plain stamp works best. You can also
> buy mint stamps from Bill Plum at 12 Glenn Road, Flemington Road, Flemington,
> NJ 08822 along with many other DX supplies.

I concur. Bill has airmail envelopes that fit into each other. The
European return is slightly smaller so that they fit one into another,
plus they use security paper, so that if you put your qsl card and some
"offering" inside the inner envelope it's pretty secure

I have no financial interest in Bill's stuff other than I am an extremely
satisfied customer

>>>>>>>>>>>>>>>>>>>>>>>> <<<<<<<<<<<<<<<<<<<<<<<<

Jeff:

It's really not to difficult to accomplish what you desired in your post. The answer is, certainly, yes. You need to pull out of the scanner all the proper LOs (local oscillators), mix them in the proper order (using doubly balanced mixers), and modulate the final result with the type of modulation and information you desire. You're there! You may prefer to apply a little amplification to the result to render the "signal" a bit stronger, but that isn't too difficult, either, in these days of MMICs and hybrids. Trivial!

Dave - W6LEV

Opinions are my own and do not reflect in any way on my email provider (employer).

maybe these people made a mistake.....K1WY is a famous QSL manager and
founder of the K1WY DX association.
Currently he's the manager for following stations :CURRENT STATIONS MANAGED:

4N1DX, 4N1YL, 5A21PA, 5R8ET, AX1TX, ET3BT, GD3LSF, GI3MUS, GI6YM,
GIï¿½PCU, HBï¿½CZS, K1WY, KW1JY, KW1WY, ON4CAT, ON9CAT, P29CC, S21J,
TF7GX, TF8GX,
UAï¿½ACG, UAï¿½AOZ, UAï¿½DC, UAï¿½ZBK, VK1TX, ZD7VC, AND ZL3KIM
so if one the received QSL-cards your son received is for this stations, some
people made a mistake.....

The former GDR was DM. The GDR-officials then requested the Y2-Y9
Prefixes for better separation from the FRG-Callsigns (DL etc).
And now the DM - callsign block is again assigned to Germany, and a lot
of ex-DM-Hams requested their old callsign with DM-prefix or a similar.
Also for better separation from the (old) FRG. :-)
Germany is not (yet) really _one_ country. ;-)

Can't you just answer the guy's question instead of advertising your lack
of knowledge by nitpicking it to pieces?
He obviously meant monochrome as in BLACK & WHITE. Instead you give out with
all this BS about stations broadcasting in only one color ('scuse me, colour)
and ice cream and chromatic density and blah blah blah. Sheesh.
All you're doing is evading the question and making yourself look like a
jackass in the process.

Ohio/Penn DX Bulletin No. 411

The Ohio/Penn DX PacketCluster
DX Bulletin No. 411
BID: $OPDX.411
May 31, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, WB2REM, K4QD, KE4LWT, N6RT, AA7X, K8YSE, NE8Z, KE9KD & DX Central, BD5RV/4, CE6TBN, CX5BW, DL6FBL, EA5BY, EA4DX, G4BUE & DX News Sheet, GM4FDM, GM4DMA, IK1QBT, JH6RTO/AH0R, JM1LJS, PS7AB, PT2NP, PT7WA, YZ7ED and ZS6AQS for the following DX information.

3C0, ANNOBON ISLAND. An international team of operators composed of Ramon/ 3C1GS, Roberto/3C1RV, Elmo/EA5BYP and Vicente/EA5YN, are now in advanced planning stages for an early September 1999 DXpedition to Annobon Island. ALL the necessary permissions have been obtained, transport arranged and the logistics needed to put together an operation from this rare new one. The team will be joined by a PTT representative and will leave a complete station on the island. The callsign will be 3C0R, and the operation will last for 10 days. Activity is planned for 160-2 meters on CW/SSB/RTTY. More information will follow and is available from any of the operators or via the following Web sites:
LYNX DX GROUP http://web.jet.es/lynx
CLIPPERTON DX CLUB http://www.multimania.com/cdxc/

7S5, SWEDEN. "The 59(9) DXReport" reports that special event station 7S5F will be active until December 31st by the Falu Radioklub, founded in 1924, to celebrate its 75th Anniversary. QSL via SK4AO.

9V, SINGAPORE. Steve, K9WO (ex VS6WO/VR2WO), who has been in 9V-land for 20 months, has now received the license and callsign 9V1DX. We have not seen any QSNs on this station. QSL via KA9UQT.

AH2, GUAM. Seiji, JH6RTO/AH0R, will be active from Guam as AH2/AH0R on June 3-6th. Activity will be on 10 to 30 meters, especially on the WARC bands. QSL via JH6RTO or direct: Seiji Fukushima, Hase 1182-2506, Atsugi 243-0036 Japan.

CV5A, ISLA DE FLORES. Pedro, CX5BW, informs OPDX that during June 4-7th a couple of CXs and some LU friends will activate IOTA SA-030, "Isla de Flores", signing CV5A. They hope operate on all bands and modes including the WARC bands and digital modes, PSK31. QSL via CX2ABC: P.O.Box 950, ZC 11000, Montevideo, Uruguay. Visit their Web page to find out more about the island at: http://isladeflores.8m.com/

E4, PALESTINE. The "DX News Sheet" reports that a group from the UK may be active from here June 14-28th. Activity will include 6 meters. Meanwhile, two station have been active over the past week and weekend. David, E41/OK1DTP, continues to be very active on 20/17/15/12 meters SSB at various times of the day (try 1330-1500z and 0000-0200z). QSL via OK1TD. Also active is E4/OK5DX. Activity seems to be mainly CW on 40/20/15/10 meters on various times during the day. It has been reported, but not confirmed, QSL via OK1YN.

E41/E44/4X DXPEDITION. Hide, JM1LJS, plans to be active from these three areas during the period of July 23rd and August 1st (depending on his work schedule). According to his release, activity from Palestine will be from the Gaza Strip and West Bank. He will operate in Israel until he receives the Palestine license. Until he receives his Palestine license, his detailed schedule is not known. Activity is planned for 80-10 meters CW/SSB. His power limits are: 500w in Palestine / 100w in Israeli (The Japanese license limitation is 150w in Israel). His callsigns and QSL Mangers are as follows: 4X/JM1LJS - QSL via JL2UXN, E41/JM1LJS (or E41JA) - QSL via JL2UXN (*** West Bank Only) and E44/JM1LJS (or E44JA) - QSL via VK4FW (*** Gaza Only).

HR, HONDURAS. Look for Al, K3VN, operating from Honduras during this next week. He will be there for about one week on business. He plans to be on the WARC bands and low bands depending upon equipment and antennas available. QSL via K3VN call book address.

IOTA NEWS.....
EU-008. (Correction!) In last week's bulletin OPDX.410, we mentioned that Jeff, G3LWN, will be active June 1-4th, as 2S0PNS from the Island of Pabay (57 17.7N/ 05.51.5W, IOSA NH11, WAB NG62). Jeff's callsign should have been G3LWM, not G3LWN.

EU-083. Tony/IK1QBT, Nino/IK1ZOZ and Alex/IK1OXF will be active from Gallinara Island (rare island of Ligurian group), between June 5-6th. Operators will sign homecall /P and activity will be on all HF bands SSB/CW (WARC included) around the standard IOTA frequencies. There will also be activity on 6 meters, VHF/UHF on SSB Reference number for the Italian Island Award (IIA) is SV-01. Gallinara is a private island, and the daylight visit is very restricted only to Island Archeologic and Biologic presence. EU-083 is the most wanted IOTA in North America because of the difficultly to stay and operate during the night. QSL via their respectives home calls, bureau or direct.

SA-018. The "TEMUCO RADIO CLUB" (CE6TC) has organized a DXpedition to Quinchao Island in the Chiloe Arch. The operators will sign

CE6TC/p, July 20-25th, and they will participate in RSGB IOTA Contest. QSL via CE6TC, Box 1234, Temuco Chile or via bureau. For more information check the Web page: http://www.qsl.net/ce6tbn

SA-046. A group will be active from Itamaraca Island, June 3-6th. Callsigns and operators will be: PT7BZ/PY7/Ely, PT7WA/PY7/Luke, PY7XC/7/Jim, PY7ZY/7/Ciro and PY7/7/Fred. Activity will be on 40-10 meters CW/SSB (no nets or list operations). QSL via their home callsigns.

J6, ST. LUCIA. Bill, AA7X, will be operating from Jalousie Bay, from June 24-30th, using the callsign J6/AA7X. He will operate on 40-10 meters. QSL to home call.

JT, MONOGOLIA. Operating from the remote Central Steppe region of Monogolia, Laurence, GM4DMA, will be active signing JT from June 19th for approx. 10 days on 1.8-50Mhz using 100 watts into a simple antenna and solar power. He states that he will be living in a traditional "Ger" - a felt lined circular tent. He will be training a volunteer staff in HF communication techniques before their 10 week expedition covering from the Gobi desert in the South to the forested uplands and mountains to the North of the country. This trip follows earlier training visits to Patagonia (CE), Uganda and Namibia this year for the "Youth Development Charity Raleigh International". They are conducting environmental, community and adventure expeditions in these and other countries.

JY, JORDAN. Look for Pete, N3FNE, to be active now through the summer of 2000 as JY9NE. Activity will include 6 meters. QSL via home call.

OJ0, MARKET REEF. With the current activity from here, Gerben, PA5NT, reports to OPDX that he has been to Market Reef in 1983 and has constructed a Web story/page about his trip together with some additional interesting information about the reef. If you would like to see some pictures and read details about OJ0 land, visit the Web page: http://dx.to

PACIFIC DXPEDITION. Roberto, EA4DX, will once again be active from the Pacific. This time he will be active from Tuvalu (T2) and Fiji (3D2) during August/September 1999. His planned schedule so far is:
T2 - Funafuti, Tuvalu (callsign will be issued on arrival) August 26th through September 11th.
3D2 - Viti Levu, Fiji, signing 3D2DX/P from September 13-16th
Activity will be on all bands 80-10 meters including the WARC bands on the usual SSB DX frequencies. His equipment includes Yagis for 10-12-15-17-20 and a vertical for 40-80 meters, plus 1 kw linear. QSL via EA4CP CBA. More info to come later.

QSL INFO AND NEWS....
FO0PAP and FO0MAC cards are now being received. John, K8YSE, reports that cards are being mailed as processed. Be looking for them in your mailbox.

QSLs for ZV0SB and ZV0SW. The ABRA-DX Brazilian Association has informed OPDX that the QSLs for the ZV0SB and ZV0SW DXpedition are now being sent

out by the QSL Manager, PT2GTI. The QSL card can be seen at the ABRA's Web site at: http://www.pt2dx.org.br

QSL 2S5VG/P via GM3UTQ (CBA or the bureau). This station was active this past weekend from Island of Eigg (EU-008). Operators were GM3NIG, GM3UTQ, GM4FDM, GM4YMA, GM0UKZ and 2M1EDN.

NEW QSL Manager. Rick, NE8Z, reports that he is the new QSL Manager for all QSOs with HC1OT, HD1OT, HC1OT/HC8 and HD9OT. Ed, K8ZZ/KG8CY, is no longer able to help Pedro due to his work schedule. Any QSLs sent to K8ZZ in error will be given to Rick by K8ZZ (they see each other often). All old contest logs will also be loaded on Rick's computer.

QSL ZV7ZZ (Calcanhar Lighthouse, DFB -04) via PS7ZZ: Francisco E. de Freitas, Av Sao Miguel dos Caribes 31, Neopolis II, 59086-500, Natal RN, Brazil (or via the Bureau).

"YUGOSLAVIA OFF-LINE" states Ed, YZ7ED. He informs OPDX to let all OPDX readers that YU HAM are not able to get any QSLs. There are two reasons: 1) QSL Bureau NOT working 2) Post Office NOT working. So, as of March 23th (1999) they haven't received any letters/cards via the post office service. Ed states that he will inform us when their post office service starts working again, but he beleives that this will not happen soon because of the war.

QSL CN8WW via DL6FBL. Ben's E-mail address is: dl6fbl@boc.de
Also, details and infos may be found at: http://www.boc.de/dl6fbl

VA1A active this past weekend was a special event station celebrating 90th Anniversary of the first powered flight in Canada (and British Empire) by the Silver Dart - on February 23, 1909. A special QSL card showing the Silver Dart being pulled by the horses on the ice is available via K3BU, Box 282, Pine Brook, NJ 07058, USA.

VQ9CV logs are now online. The VQ9CV logs through May 13, 1999, are now available at: http://dx.qsl.net/logs

JW9PJA logs are now online. The JW9PJA logs for all operations through March 1, 1999, are now online at: http://dx.qsl.net/logs

QSL Manager for ZS6SCI is via ZS6NB: Ken Pickersgill, 60 Selborne Ave., Lyttelton, 0157, Pretoria, South Africa.

SPECIAL EVENT. BT99WED is a special event station for "World Environment Day" and will be on air from June 1-30th (Thanks to the help of BA4RC and other local hams.) The station is set up by Nanjing Agriculture University to call the attention of radio amateurs to worldwide environment protection. They will operate on several bands and modes. They eagerly want to get in touch (on the air) with some environment protector or universities and schools devoted to environment protection. So, please tune for their signal. QSL BT99WED via F6FNU. For any comments, please direct them to Michael Chen/BD5RV at: by5qn@qsl.net

VP2EREM, ANGUILLA. Jim, WB2REM informs OPDX that from June 28th until July 8th, he will air this special callsign from the Island of Anguilla. Operations will be on both CW and SSB, mainly on 10-15-20 meter bands. QSL via WB2REM.

YS, EL SALVADOR (Update/Change). Jack, KE4LWT, informs OPDX that he will be active as YS9/KE4LWT, not YS1/KE4LWT as first reported. He was informed last week by SIGET in El Salvador that he was misformed and that he should be using the YS1 prefix. Please refer to OPDX.410 for more details.

ZS8, MARION ISLAND. Deryck, ZS8D, was active this past weekend on 14195 kHz around 1450z. He has indicated that he still hasn't erected his beam antenna, but is currently using a wire antenna. QSL via ZS6EZ.

Hello,
Anyone have the new log-eqf v 9 yet? I was looking for a copy to try out but it was not at log-eqf site yet. Also I have version does anyone have the modules
for DXCC WAS and WAZ for version 8. I would like to check this out also.
Thanks!!

Steve,

For $49.95, you can check out version 9 all you want and you will not have to copy anyone registered disks.

I got version 9 at Dayton and like Tom's earlier versions, Version 9 is works great!

Version 9 is not out as shareware (as I understand it). DXCC, WAS and WAZ are modules of the registered version only. Buy it, you'll like it!

I have Version 8 and have been asking for some of the things in 9 ever since
I got it. I looked at the ad and am singularly unimpressed. It is still a
dos program and still has no variable length or user configurable fields.

My opinion is

For contest use NOTHING beats Troll
For General Logging NOTHING beats Logic 5.

For me, that is what I will stick with.

Log-EQF is the best logging program I have ever used and I have used a lot!

I have the new version 9. of Log-EQF. Best logging program I have ever used.
To get a complete working version only costs 35.00 and the complete Rig-EQF is
only 20.00. Well worth the really low price. Not fair to steal a man's
creation from him.

I fail to see how knowing Morse Code will help you learn how to operate
a radio. I do not know Morse Code and can operate a C.B. Radio, FRS
Radio, Shortwave Radio, Scanner Radio...

1704. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-01 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7ivsue$qfh@news.Hawaii.Edu>
Source record: 24656
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

```
Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed
with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-
running thread results from a single cross-posted article, and the
contents of such a thread drift further and further away from being
"on-topic" in the various NGs that receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups"
posted on the 15th of each month.

Jeffrey Herman, KH6O
(rec.radio.amateur working-group)

Mountain Altai for amateur radio operators

Hallo, respect frieds!

We invite you to take a part in work of the summer camp for amateur radio operators in Altai.

This camp lies in mountains of South Altai (1500 m above sea-level) in the region of the Markakolsea (it's a high-mountain sea) on the crossing of borders of Kazakhstan, China, Russia and Mongolia. Work - in July-Oktober.

If you have suggestions, our adress is:

KZ 482000 Kasachstan Ust-Kamenogorsk M-Gorkistr. 21-314

e-mail: altai-es@ukg.kz

Where did you think you were tapping? I'm not that kind of girl. I don't
let guys tap me anywhere on the first date. <g>

Morse code is one of the few methods I use in the quiet of night. There are few sounds, outside of soft arrhythmic tapping and occasional gasps of joy or surprise, to disturb the sleeping household.

You are right, of course. Outside of narrow circles, its an unusual first date that responds in kind to my gentle manipulations.

Michael.

Well, kind of...

I received a parcel from James N1YC (9V1YC) today with a
beautiful poster from the Campbell Island 1999 Dxpedition with
handwritten greetings from James on the backside. We had a long
CW-QSO last week and he promised to send me a surprise - and
what a nice surprise this was. Thank you, James!

The poster looks great in my shack ;-)

Dan,

I also received the Russian DX Association email. I suspect it is a scam. Most pleas for money are.

You have a signature like the one below and then you say I should take my "dum witted" (your
spelling) insults somewhere else? Kinda like the pot calling the kettel black ain't it?

And any how since the Blitzkreg of 1939 it's German cause the NAZI's stole it like everything
else Hitler could get his hands on!! And possession is 9/10 of the law!!

Hi all,
OD5NJ advises direct mail to Lebanon should now be much more reliable, since a private company has been appointed to handle mail in and out of the country. QSL's to him should include return postage (not IRC's as these are invalid in Lebanon).

There are a number of stores

In Breda: Jabobs Breda Electronics (No WWW pages yet)
In Katwijk: Schaart www.schaart.nl

More are listed on http://www.vrza.org/linkapp.htm
Look for the heading "Leveranciers in Nederland"
(Suppliers in the Netherlands).

1729. EP2MKO via UA6HCW?

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-03 00:00:00 UTC
From: gerca297@ida.liu.se
Message-ID: <7j6tdg$2qq$1@curofix.ida.liu.se>
Source record: 24681

Has anyone received a QSL card from EP2MKO via UA6HCW?
I have sent three cards to him, the first one almost a year ago.
I have received nothing so far. Is he a "stamp collector"?

I saw a route via UA6HAC the other day. Is it correct? If it is,
could someone send me his address?

Hello,

I possess the interfacing for programmed the Motorola GM 300 and the program that go with.

The problem is himself that the software of want not to descend below 438 Mhzs!!!

How to make to can programs the TX on the HAM band.

That is necessary to you him to modify and how on the file gm300.mdf?

Would someone already have programmed this kind of station on strips hams?, and was one able to give me the file gm300 solely.mdf her would be cool.... :)) I am not very good in the HEX .

1732. Radio formulas - web calculators

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-04 00:00:00 UTC
From: Harry Lythall SM0VPO <harryvpo@hotmail.com>
Message-ID: <01beae50$762add90$8734d693@e0060b0eb282a>
Source record: 24683
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.shortwave,uk.radio.amateur,uk.rec.radio.cb

Hi again all,

I have waddled over to the HTML newsgroups and found the users there very helpfull. As a result I have managed to add the promissed radio formulas calculator (under BASIC INFORMATION) at:

http://sm0vpo.8m.com/ Main page
http://www.geocities.com/SiliconValley/3569/ Mirror in the USA
http://hem2.passagen.se/sm0vpo Mirror in Europe
http://members.xoom.com/sm0vpo Mirror in Far-East

So-far I have added calculators for:

Resistors in series /Caps in parallel (bit of a joke here?)
Resistors in parallel / Caps in series
Reactance of Capacitors
Reactance of Inductors
Calculating basic frequency - LC known
Calculating the number of turns on a coil - single layer
Calculating the number of turns on a coil - multi-layer
Evaluating a heatsink (what does this HS in my hand do?)
Calculating heatsinks (how big do I want to have it?)

Soon, I will be adding T/Pi resistive attenuators and VSWR calculators.
I will also be adding calculations involving sugar/SG and potential alcohol content plus boiling point as a measure of alcoholic content.

Best regards from Harry - SM0VPO
==========
PS
Windows is not the answer - it is the question.
The answer is NO!

Gert,

Guess I'm lucky on this one. I worked EP2MKO in 9/97 and received card from UA6HCW in 12/97. I sent 2 IRCs(no greenstamps) via regular airmail.

Dave(W2GI)

Whenever you hear a claim like that, it possibly might be warranted to check out the IPU (International Postal Union) website to see wether or not a DX station lives in an IPU member country or not. If the country is listed as an IPU member, then IRCs can be exchanged for foreign airmail rate postage there.

Source record: 24690

I worked him in May 97.. sent two cards, 6/97 & 12/97, both direct to UA6HCW.
QSL received 12/98, airmail from Pyatigorsk all OK. I suspect mail delivery in
that part of Russia is very variable, not to mention theft possibilities.
There's still hope !

Well, maybe not, considering where that expression comes from!

So said, in the world of theatre, when you tell some one "Break a leg",
you are wishing that their performance should go so well, they should
have to take a bow!

1759. Supporting pirates or not ???

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-05 00:00:00 UTC
From: "Mike, VK4NM" <stelex@ozemail.com.au>
Message-ID: <Ao963.1586$H21.5563@ozemail.com.au>
Source record: 24611

Hi and thanks for reading this.

I don't wanna be specific about callsigns but let me ask you all one question:

There's a station "...ELS" operating from one country but using prefix of another one what is purest example of piracy.

The station "...AA" is a QSL manager for the station "...ELS"

By the way, the station "...AA" is very high ranked on the WPX and DXCC Honour roll lists (I think so)

So if the station "...AA" is supporting piracy, by managing QSLs of the station "...ELS" don't you OMs and YLs think that "..AA" station should loose its DXCC and WPX credit ??

(or otherwise DXCC looses it's credibility ?!?!)

Please let me know your opinion

Thanks for your time, 73 de Mike - VK4NM

1762. Special call : T M 6 J

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-05 00:00:00 UTC
From: awn <samuel.morse@nomail.cpod.fr>
Message-ID: <01beaf12$5ecb3380$198127d4@f6awn.cpod.fr>
Source record: 24614

Good evening,

Want to mention T M 6 J "special event" french station.
Located in Normandy, for the D-DAY commemoration, in the Hillman
Memorial.

It's a bunker located in Colleville-Montgomery (Calvados), near CAEN.
The position was taken by the 1st Bn The Suffolk Regiment on 6th June
1944, during the liberation of North West Europe.

The TM6J Ham Radio Team is proud to commemorate this event by operating
from the Hillman site.

HF / VHF. CW & Phone.

QSL Via F5EJC. Special Card in response.

Thanks everybody to transmit this information.

73,
Have a good Week-end,
Francis,
F6AWN

You should use a helmet when you skateboard, that way you won't get the kind of
brain damage your displaying here when you wreck!

Signed one of those ol' fart hams

choice of two (both printed on his QSL:

Rey "Dandy" Lachica
P O Box 394
Puerto Princesa City 5300
Palawan
Philippines

or
2052-D Donada street
Pasay City 1300
Philippines

I think i used the latter.

Hope this helps

1774. How I Spent My Weekend

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-06 00:00:00 UTC
From: k7on@arrl.net
Message-ID: <MPG.11c4ea6f21d6ded198975b@news.speedchoice.com>
Source record: 24626

```
How I Spent My Weekend

I hadn't written Prolog code for nearly a decade, so the following was
thrown together this weekend as a refresher. It is standard Clocksin &
Mellish Prolog.

My plan is to expand on this for many functions relating to amateur
(ham) radio.

If anyone has similar interest, please contact me: k7on@arrl.net

----------------------------------------

/*

The following relation (prefix/2) may be used to query the database
comprising the prefix/7 relation by callsign or callsign prefix.

For example:

| ?- prefix( 'ZK1N', X ).
X = prefix('ZK1N',['ZK1/N','North','Cook','Is.'],32,62,10.4,161,'OC')
;

X = prefix('ZK1',['ZK1/S','South','Cook','Is.'],32,62,21.2,159.8,'OC')
;

no

| ?- prefix( 'ON4UN', X ).
X = prefix('ON',['ON','Belgium'],14,27,50.9,-4.4,'EU')

| ?-

This is merely a demonstration of the purpose to which the database
created (prefix/7) by the goal init/0 may be used.

(c) Brian Short, K7ON / 06-June-99 / All Rights Reserved Worldwide

*/

prefix( X, Y ):-
name( X, L1 ),
prefix(Pfx, Name, CQ, ITU, Lat, Long, Cont ),
Y = prefix(Pfx, Name, CQ, ITU, Lat, Long, Cont ),
name( Pfx, L2 ),
prestring( L2, L1 ).
```

```
prestring( [], _ ).
prestring( [X|Y], [X|Z]):- prestring( Y, Z ).

/*

The following goal (init/0) is used to read the
CTY.DAT file provided by the TR Log Program.

A set of clauses comprising the prefix/7 relation
is created in the database:

prefix( Pfx, Name, CQ, ITU, Lat, Long, Cont )

Where

Pfx is a Prefix as an atom
Name is a description as a list of atoms
CQ is the CQ zone as a number
ITU is the ITU zone as a number
Lat is the latitude as a number
Long is the longitude as a number
Cont is the continent as an atom { EU, NA, SA, AS, OC, AF }

Once executed, you may query the database. For example:

| ?- prefix( 'ZK1', Name, CQ, ITU, Lat, Long, Cont ).
Name = ['ZK1/S','South','Cook','Is.'] ,
CQ = 32 ,
ITU = 62 ,
Lat = -21.2 ,
Long = 159.8 ,
Cont = 'OC'

| ?- prefix( 'ZK1N', Name, CQ, ITU, Lat, Long, Cont ).
Name = ['ZK1/N','North','Cook','Is.'] ,
CQ = 32 ,
ITU = 62 ,
Lat = -10.4 ,
Long = 161 ,
Cont = 'OC'

| ?-

SB DX @ WW $OPDX.412
Ohio/Penn DX Bulletin No. 412

The Ohio/Penn DX PacketCluster
DX Bulletin No. 412
BID: $OPDX.412
June 7, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, K3BEQ, K5KG, N5PA, N6RT, K8YSE, CT1END, CX5BW, DJ5AV & DX News Letter, DL3GA, F6AJA & LNDX, G3SWH, G4BUE & DX News Sheet, GM0CLN, GU0SUP, HL1TMU, IK4MHB, IZ5AXA, JA3ART, JM1LJS, LA2PA, PS7AB, VK2ICV, VK4FW, YB4JIM, YT1MM and 5B4WN for the following DX information.

3XY, GUINEA (Look at this callsign!) The "LNDX" reports that Robert, F5MKA (ex-TL8GR) has received the licence and callsign 3XY1B0 (Three X-ray Yankee One Bravo Zero). He is reportedly active on 10, 15 and 20 meters mainly on CW. QSL via F5XX.

7Q, MALAWI. Alan, N5PA, will be arriving in Malawi on July 3rd and leaving on July 13th. He will operate as 7Q7PA and will be there during the IARU DX Contest on July 10-11th. QSL via his home callsign of N5PA.

CASTLE TO BE ACTIVATED. On June 10th, Mor/CT1AHU and David/CT1DRB will be active from Castle Terena - Alandroal, valid to Award DCFP Diploma Castle Forts Portuguese with reference C-002. Activity will be on CW/SSB and operators will sign homecall /P. QSL via their respective homecalls, bureau or direct.

CV5A DXPEDTION TO ISLA DE FLORES (SA-030) DELAYED! Pedro, CX5BW, informs OPDX that at the last moment they received a message from the Uruguay Army (their transport to the island) informing them that it is not possible to carry them to the island until June 18th. So, the DXpedition will be from June 18 to 21st. This means the CV5A activity must wait for 15 days. Pedro states, "Thanks a lot to all hams for the patient". Please refer to OPDX.411 for more details.

CW40, URUGUAY. The "DX News Sheet" reports that special event station CW40CCC will be active June 13-20th. Activity will be CW/SSB on 160-6 meters (including the WARC bands). This activity is to celebrate the 40th anniversary of the Centro Radio Aficionados Montevideo. QSL direct.

CY9, ST. PAUL ISLAND. Dan/K8RF and Doug/K4LT have just returned from their CY9RF operation after an exhausting trip fraught with both problems and good accomplishments! They originally planned a major operation with a group of six top notch operators to enter the CQ WPX CW Contest as a Multi-Multi entry. However, Dan and Doug entered the WPX CW Contest as a Multi-Single and made 4840 QSOs during the Contest, and another 1500-2000 QSOs before and after the WPX Contest. Their M/S score was some 14.4 Meg and it looks like a possible new M/S World record!. The complete story and press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

CY9, ST. PAUL ISLAND. If you missed the CY9RF operation here is a second chance to work CY9. Look for CY9SS to begin before or after the time you read this. Operators will be VY2SS, VY2CD, VE1PZ, K2NJ, VE9MY and VE9JW. From their latest press release, they will be on the island for 8 days. They are taking 150 feet of tower (and leaving some of it behind), two HF yagis (20-15-10 and 17-12), an R7000 and two 6M yagis. They will be running 1200 watts on 6 meters! Robby, VY2SS, states he will be taking his 91B again on this trip for HF. Also, they will take long boomers and stacks for 2m and 70cm. They plan to stretch a wire across the tickle to the main island for 160M and maybe some balloons as well. On 80m they will hang a loop over the strait between the two islands. They will be active on all bands 160m to UHF including all WARC bands, SSB, CW, RTTY, Satellite and EME. There will be a strong effort to work Europe on 6m. QSL CY9SS to VY2SS direct to call book address: R. Robertson VY2SS, RR#2, Bloomfield Stn., Prince Edward Island, Canada C0B 1E0
Bureau cards will be answered eventually, but Robby states he still has a couple of thousand to send out for the 1996 and 1997 operations. :-)

E4, PALESTINE (Update). It seems E4/OK5DX may have gone QRT. There has been no QSNs reported since May 30th. Also, the correct QSL information for E4/OK5DX is via OKDXF (OK1TN), not OK1YN as first reported in OPDX.411. Send cards to OKDXF (OK1TN), Bradlec 73, 293 06 Mlada Boleslav, Czech Republic or via QSL bureau.

E41/E44/4X DXPEDITION (Changes/Corrections). Hide, JM1LJS, reports that he has mistakenly given the wrong QSL Manger for one of his Palestine operations. The following correction is JL2XUN, not JL2UXN. So, the QSL information is as follows: 4X/JM1LJS via JL2XUN, E41/? via JL2XUN (*** West Bank Only) and E44/? via VK4FW (*** Gaza Only). Hide also mentions that his scheduled airplane flight was changed too. He will leave for his operation on July 25th (00:45 Local Time) and depart on August 2nd (17:30 Local Time).

F, FRANCE. The "LNDX" reports that operators F5LMJ, G0LMX/F5MBO and F6GIN will be active from Glenan Islands (EU-094) for the IOTA contest. They will arrive on July 23rd and they leave on Monday the 26th.

GM, SCOTLAND (IOTA operation). A team from Cockenzie and Port Seton ARC, near Edinburgh, Scotland, will be travelling to the Isle of Tiree (IOTA - EU008, IOSA - NH4, WAB - NM04), the most westerly of the Inner Hebrides, for the "1999 Islands On The Air Contest". The Team, comprising of John/ MM0CCC, Cambell/MM1AVA, John/GM7OLQ, Iain/MM1CPP, Malcolm/F5VBU, Ron/

GM0NTL, Mo/GM0HLK, Colin/GM0CLN and possibly one or two others are due to arrive on the island at approximately 0900z, July 23rd and plan to be active later that afternoon. Some activity may take place using the operators' own calls /P prior to the contest but most, if not all, activity will be restricted to 2A0CCC/P during the contest itself (1200-1200z July 24th/25th). Activity will be on 3.5, 7, 14, 21 and 28 MHz using both SSB and CW. A coastal site at Gott Bay on the eastside of the Island will be used once more and Fred Roe, GM0ALS, has again agreed to act as QSL Manager for the expedition. Info and updates will be available from the following Web site: http://www.btinternet.com/~john.innes/Tiree.html
ADDITIONAL INFORMATION: Tiree is some 10 miles long and 3 miles wide, and is skirted by the Hebridean Sea to the south and east with the Atlantic Ocean to the north and west. The island has no trees, as they cannot root against the severe winter gales, but it is famed for its spring and summer sunshine records and birds, flora and fauna not seen on the mainland. A flat crofting land, Tiree has only three hills above 300 ft with a coastline edged with long, windswept, shell sand beaches.

HL, SOUTH KOREA (IOTA operation). Wan/HL1TMU reports that he and members of Inha University ARC (HL0ZX) will be active as HL0ZX/4 from Pigum Island (AS-060, Chollabuk/Chollanamdo Province), June 22-26th. Activity will be CW/SSB on 10, 15, 20 and 40 meters. QSL via HL0ZX, Inha Univ. A.R.C., Yonghyun-dong, Nam-ku, Inchon, South Korea. Check out their Web Page at: http://www2.inha.ac.kr/~hl0zx
Comments and questions can be sent via E-mail to: hl0zx@www2.inha.ac.kr or hl1tmu@qsl.net

HS, THAILAND. There have been reports that Thailand's PTD has authorized HS stations to operate on 160 and 80 meters during any contests through December, 1999.

I, ITALY (IOTA operations). The "ARI Club of Lucca" informs OPDX that IK5AMB, IK5PWS, IK5VLS, IZ5AXA, IW5CFN and IW5AKR will be active from Montecristo Island (IOTA EU-028, IIA LI-015) on June 26-27th, as IA5/homecall. They will be on HF and VHF (50 and 144 mhz) bands CW/SSB. Their activation could be delayed until July 3-4th. QSL to home callsigns (direct or bureau).
Also, Carlo, I4ALU, will be active from Ustica Island (IOTA EU-051) as IE9/I4ALU from August 8-20th. Activity will be on all bands CW only. QSL via bureau or home callsign.

JW, SVALBARD. Leif, LA2PA, will be signing JW2PA for a week from June 18th to 25th. He will be located in Longyearbyen on Spitzbergen (EU-026). QSL to homecall.

KH0, MARIANA ISLANDS. The members of JARL Kyoto Club will be active from Saipan Island (OC-086) July 19th through August 2nd. The following operators will be active: N3JJ (JA3ART), AE4SU (JA3KWZ), K7IL (JF3PLF), N7EIU (JA3AJ), NH7V (JI3NST), KF8TW (JH3TXR), W8YAQ (JA3YAQ), JA3RR, JH3QNH, JH5IXG(YL) and JA3YAQ. They did not mention their KH0 callsigns, but operators will probably sign KH0/homecall. They plan to be active on all HF bands and 6 meters (mainly on the 12/10/6m bands). It was stated

that the possbility of activity on 160 meters is not "ZERO". QSL via to each CBA in JA, but it's all OK via JARL QSL Bureau.

OJ0 & OH0, MARKET REEF AND ALAND ISLAND (K7BV Update). Dennis/K7BV and the Finnish crew finished their OJ0 operation Friday, May 28th. Their totals from Market Reef were 0J0/K7BV - 6,000 QSOs and OJ0VR - 2,000 QSOs. In the CQ WPX CW Contest, Dennis operated as OH0Z and had 2,988 QSOs, 808 multipliers for a score of 5.8 meg. QSL via KU9C.

OY, FAROE ISLANDS. The "DX News Letter" reports that Stephan/DF6VU and Hubert/DL9YBY will be active until June 11 as OY/homecall/P. Activity will be on SSB and RTTY, on 40, 20, 17, 15, and 10 meters. QSL via homecalls.

PETER ON THE MOVE AGAIN (West Africa). Peter, ON6TT, reports that he will be going on a short mission to TU/9L/EL/XT/TZ. He will be in each country only for a very short while but would still like to operate a bit from each country.

QSL INFO AND NEWS.....
FO0AWI/FO0XUU QSL CARDS. Gerhard, DL5AWI, reports that the QSL cards for the Marquesas/Austral Islands should be mailed out in about 2 weeks. The first layout of the cards were unacceptable.

Michael, DL1GKG/HI3, reports that Karl-Heinz, DK2GP, is now his QSL Manager. QSL via the Bureau as well as CBA.

Doug, N6RT, reports that the following new logs are available on-line at: http://dx.qsl.net/logs
HL0IHQ/2 - IOTA AS-122 Paengnyong Island, May 1999
D99ARDF - South Korean Special Event Station, thru June 2, 1999
PW1S - 1999 WPX CW Contest, by PY1KS
DU1ODX - through May 27, 1999

Igor, YT1MM, reputes the information that "YU HAM are not able to get any QSLs and that YUGOSLAVIA is OFF-LINE" as stated by Ed, YZ7ED. Igor states, "The YU QSL bureau is alive and working (it is operated by Petar, YT1WW), and Yugoslav post office works properly, as letters for all countries in the world are regularly accepted, despite the present circumstances (and the letters DO arrive to their destinations, like Canada, UK, Japan etc.). My radio club (YU1EXY) receives LOT of mail, so I have first-hand proof for my statements. On the other hand, it is a well known fact that a number of countries (like USA, Great Britain and Germany, for example) simply suspended accepting any kind of mail destined for Yugoslavia since early April. Some other countries, like Japan or Hungary accept letters for Yugoslavia and such mail regularly arrives, with a slight delay."

QSL IQ5Z (CQWW '98, ARRL DX '99, CQ WPX '99) to QSL Manager IZ5AXA (direct or bureau).

QSL GU0WWW (which was active in the CQ WPX CW 1999 on 80 meters, from Isle of Sark IOTA EU-114) via 5B4WN: Marios Nicolaou, Box 4834, Nicosia

Cyprus. Marios states cards should be available in July.

MU2K was activated by the Guernsey Amateur Radio Society (GARS) during the CQ WPX CW contest last weekend. The callsign was used by GARS members together with a group of Belgians (also members of GARS) for this contest, and QSL is either to GU3HFN, or - preferably to ON4ON, who is handling the cards for this call.

RADIO SILENCE FOR YB'S. Akhmad, YB4JIM, reports that because of the election event in Indonesia, "all YBs stations will be signing off frequencies (radio silence) from June 1- June 11, 1999".

SPECIAL PREFIX/SPECIAL EVENT. Look for PS400NAT to be active and on the air until December 31st, to commemorate the 400th anniversary of Natal City, in Brazil. Activity will only be on 20 meters SSB. Rony, PS7AB, states, "Please, be patient because I have only a dipole antenna, and my English is bad." QSL via PY Bureau, or PS7AB, Rony Reis, PO Box 2021, Natal/RN, 59094-970, Brazil. For more details, check the Web page: http://www.qsl.net/ps7ab/pydx.htm

SV8, GREECE (IOTA operation). Phil, G3SWH, reports to OPDX that he will be on Mykonos Island (EU-067) again between June 16th and 23rd. He expects to be active as SV8/G3SWH on CW only on all bands 40-10 metres. He mentions that this will be a holiday operation, and he expects to be on the air for an hour or two during the mid mornings and early evenings. QSLs will be via the call book address or the RSGB bureau. ADDED NOTE: Phil states that his 5Z4LI QSL cards have arrived from the printers and he is starting to work through the pile of direct requests.

TM, FRANCE (French activities).......
Look for special event station TM5EUR to be active June 12-13th on all bands and mainly CW. Operations will be from the geographical center of "Euroland" located at Blancafort. QSL via F5IAE.

Look for club station F6KFI to be active June 7-13th as TM6ACO during the 34th LeMans Car Race. QSL via F6KFI.

A group of French operators will be active as TM5B from Fort Brescou (EU-148) from June 25-27th. They will be active on the IOTA frequencies. QSL via F5XX.

VK, AUSTRALIA (IOTA operation). Bill, VK4FW, will be active from the Queensland State (South Coast) Centre Island Group (Fraser Island, OC-142) late June 11th through June 14th. He will only have a R5 vertical and will spend most of the time on CW. Bill states the callsign will be the official Oceania DX Group callsign VK4YN. QSL direct to Bill Horner, VK4FW, P.O. Box 929, Gympie, 4570, Australia.

VK9L, LORD HOWE ISLAND. Nick, VK2ICV, will be active here as VK9LX from October 24th-November 2nd. He will be active in the 1999 CQWW SSB Contest as a Single Op/All Band entry. QSL via P.O. Box 730, Parramatta 2124, NSW Australia. There will be all bands pre-contest activity. Send comments and questions to Nick's E-mail address: vk9lx@qsl.net

Anybody who writes or even understands Prolog is really a sick individual. I had to suffer through it in college. I was writing code that worked but I had no idea what I was doing.

Is that the beauty of it ?

Don

>Are you sure it isn't OK1TN. That would make more sense, as OK1TN is
>the QSL manager for the OKDXF.
>
>73 de G3NYY

G3NYY is correct...here is an excerpt from the Ohio-Penn DX Newsletter which tells details:

"....E4, PALESTINE (Update). It seems E4/OK5DX may have gone QRT. There has been no QSNs reported since May 30th. Also, the correct QSL information for E4/OK5DX is via OKDXF (OK1TN), not OK1YN as first reported in OPDX.411. Send cards to OKDXF (OK1TN), Bradlec 73, 293 06 Mlada Boleslav, Czech Republic or via QSL bureau...."

Looks like via registered mail is best...if it comes at all. I gave up after 3 tries. I arranged for skeds with Abdollah, EP2FM...finally completed in late March of this year. No problem with the QSL! One of my last 6 needed (now 5!)

You might try: as@neda.net

I am a professional software engineer and a long time short wave
listener.

I have developed a Windows program that allows you to filter audio in
real time.

Connect the "Line Out" on your short wave radio to the "Line In" on your
PC's sound card.

Use the Windows "Volume Control" program to assign inputs and outputs
and set levels.

The program takes the digitized audio, filters it and plays it out
through your PC's speakers!

No special hardware or modifications needed.

It does require a fast PC - 200 Mhz or better.

For more information and a free Shareware copy of the program visit my
web site:

http://www.winternet.com/~swezeyt/dsp.htm

Thanks a lot,
Tom Swezey

Who cares about what the military uses we are not the military
and by the way a few special forces still are taught it guess who?

Some people still collect and use old HF gear older than most of
us. Still sounds good on the bands so are they obsolete beyond
use? Get real and quit beating a dead horse issue. Remember and
respect your roots! After all without amateur radio opertors/developers
where would communications be today,so let us all enjoy the NOS... ok!

1793. Re: QSL's for OD5NJ

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-08 00:00:00 UTC
From: Richard Eckman <r.s.eckman@larc.nasa.gov>
Message-ID: <7jiv12$3kg$1@reznor.larc.nasa.gov>
Source record: 24499

I think that he must have meant the "Universal Postal Union". Its address is:
http://www.unpi.com/upu.html.
However, I could not find a list of the members there. I did manage to find
that list at:
http://www.polisci.com/world/unsa/20170.htm
and, yes, Lebanon is a member of the UPU. Interestingly, Libya is also a
member. So,
if the post offices in these countries are really not accepting IRCs, then
they are breaking UPU
rules, which I suppose is not a wholly unlikely occurence.

God No!! It is my job and my hobby. I love radio construction. Funny thing, I design and build a project, make a couple of prototypes to get it 100%, then it goes in a drawer with the rest and I start on the next project. I never seem to have the time to actualy get around to using my radio equipment, I am too hapy building it!

You're trolling, right? You're really one of the know-code crowd in
disguise, trying to discredit the movement to dummify.

Michael.

Same reason I didn't work you on PSK the other nite, I
couldn't copy you. I could hear the other guy, but not you...

He did copy HC8N. He just made a typo and wrote it down
as SC8N. So it still counts. Gooooooooooooooood Contact.

1810. car battery as power source?

Newsgroup: rec.radio.amateur.dx
Date: 1999-06-09 00:00:00 UTC

Although a car starting battery is is not originally designed for any depth of discharge it can be economical initial purchase and possibly last as long as a deepcycle battery if treated well.

Apparantly it's the time it spends in discharged state that kills it, not the depth of discharge. Sulphation crystals and shedding whatever that is.

Anyone have practical experience of using a car battery to run 12V powered transceivers while in a temporary location?

Is it really true a car battery never recovers from a deep (say 50%) discharge?

If he did not copy the call correctly, he did not make a good
contact!!!!!
Jim (KH2D), you should know that!

Actually Mr. Young, I'm opposed to internationally mandated code testing. Just go look up that
statement that the FCC made that says the treaty does not specify what speed you need to learn
the code at. You need to know the code, but not the speed at which it is sent. I gathered this information from http://www.arrl.org/news/restructuring/98-143/nprm.html.

Actually, Mr. Wookie, I'm opposed to reading your oppositions to Morse code testing in the DX newsgroup and a half dozen other unrealated newsgroups. If you can't respect Usenet's structure, don't expect everybody else to respect your opinions......

REC.RADIO.AMATEUR.POLICY was created specifically for your oppositions. Go use it.

By who's definition did he not make a 'good contact' ? Please
don't tell me the ARRL DXCC desk. Please don't tell me that
the contacts made don't qualify for DXCC.

Because then I'll tell you that this is the very same DXCC
desk that accepts credits for contacts made on the W7PHO
Family Horror Show and a number of other 'DX Nets'. If one
'bad contact' is accepted for DXCC credit, then in my opinion
that invalidates the whole program. What's bad for one guy
has to be bad for EVERYBODY and what's good for one guy
must also be good for EVERYBODY or else the whole deal is
bogus.

But, David, if CQ magazine will confirm the fact, in writing, that
HC8N did not claim any points for the contest contacts that we
are referring to, and you can convince me that the contacts made
in previously referred to contests where at least 75% of the call
was copied correctly are any different than contacts made on the
W7PHO 'net', where none of the calls of stations 'working'
each other have to be 'copied' (not to mention signal reports)
because net control stations announce calls and pass
hints on signal reports (and these 'contacts' are accepted at the
DXCC desk), and you can convince me that it will change the
world or cause someone to expire if contacts in question are
confirmed by a QSL card, then I will change my opinion on above
mentioned contacts.

Until then I still say that if HC8N took the poinits, it must have
been good for him, and if the original poster is looking for QSL
info, it must have been good for him, so what else could it be
besides a Gooooooooooooooooooood Contact ???

Never forget, ham radio is NOT a job. It's an adventure......

Besides, there is a world class contest station in Poland with the
call SC8N, so maybe he really DID work SC8N, who knows. How
do we turn back the radio spectrum to verify who he worked ?
And to whom does it really matter ? Not me and not the DXCC
desk anyway.....

Not in a temporary location, but in my house. I have four of them
connected to a Kenwood power supply, which charges them (when
the commercial power is on) and they supply 12 (sometimes 13)
volts to all the stuff in the shack.

>Is it really true a car battery never recovers from a deep (say 50%)
>discharge?

I don't know. I have never measured how deeply they get discharged.
If one won't charge anymore, I just go buy another one.... If you are
concerned about battery life, I think I'd go with a deep cycle battery.
I used to have a boat and the trolling motor battery didn't seem to mind
being run down until the prop wouldn't turn any more, but I don't think
car batteries are designed to do that. Problem with deep cycle batteries
is I can buy three car batteries for the price of one deep cycle battery,
at least over here.... Last car battery I bought was $36 and it's still
playing 3 years later.

JY9NX is Koji Tahara (JM1CAX), and formerly ZS6CAX/3DA0NX/YJ0NX etc etc
He's now working in Jordan, presumably for the next couple of years or
so. In the past, it has been possible to exchange QSLs with him by
sending your card via the JARL buro to JM1CAX. He has lots of chums
in the Japan Crazy Contesters Club who may be able to be more
specific.
